SCHOOLS.

VENICE, LOS ANGELES CO., CAL.—School group, 4, 1 and 2 story, brick and concrete, \$150,000. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, City of Venice. The group will consist of the Administration building, Science building, Household Arts building and Manual Training building. The style of architecture will be the Lombardie Italian. The Administration building will be two-story and basement structure 152x144 feet, and will contain the administrative offices, auditorium, study and choral halls, library and twelve class rooms. In the basement there will be a cafeteria, kitchen, bicycle rooms, etc. The central heating plant will be constructed in connection with and at the rear of the administration building. The science building will be a two-story L-shaped structure with no basement; extreme dimensions 140x120 feet. It will contain twelve class rooms, work rooms, offices, recitation rooms, etc. The household art building will be two stories 140x120 feet, and will contain a modern bungalow, cooking department, laundry, lecture rooms, seven class rooms and sewing and millinery departments. The mechanical arts building will be one-story 112x144 feet, with an interior court. The building will be connected by arcades. They will be of brick construction, with concrete foundations, exterior facing of different shades of light-colored brick, tile roofs, pine and hardwood trim, pine and maple floors, lavatories, plumbing, electric wiring, heating system. Plans are complete and figures are now being taken. Bids will be opened on February 24th. Plans and specifications can be secured from the architects.

SAN FRANCISCO.—School, 3 story and base, semi-fireproof construction. Cost not stated. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. The following firms submitted the lowest figure for the construction of the Washington Irving School at the last meeting

of the Board of Public Works: General construction, Frank M. Garden Co., \$64,544; general construction, Prop. (2) Heckenroth & Schell, \$54,910; heating and ventilating, H. Lawson & Co., \$2,985; electric work, Butte Electric and Engineering Co., \$2,660; plumbing, Alex. Colman, \$1,746. No contracts have yet been awarded. A complete list of these figures will be found under the heading of San Francisco.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete, \$200,000. Architects, Shea & Loquist, Bankers' Investment Bldg., S. F. Owners, Sacramento School District. The opening date for figures on the building which is to be erected from plans by Shea & Loquist has been postponed until March 6th.

BISHOP, INYO CO., CAL.—School, 2 story and base, reinforced concrete, \$39,000. Architect, G. B. Clement, Bishop. Owners, Bishop School District. Plans for the building to be erected in the Bishop District have been completed and approved and are now out for figures. The structure will be practically fireproof, and will contain eight class rooms, assembly hall and principal's office. Interior finish will be of pine. Maple floors will be used in the class rooms. There will be a central system of heating. Exterior will be faced with cement plaster. Bids are now being taken and will be opened on March 10th.

Contracts Awarded.

LOS ANGELES, CAL.—Orphans home, 2 story and base, reinforced concrete, \$50,000. Architect, I. H. Seeborn, 328 South Clay street, L. A. Owners, Missionary Sisters of the Sacred Heart. Contractor, S. Solano, 1770 North Main street, L. A. Contract price, \$50,000.

BAKERSFIELD, KERN CO., CAL.—School, 1 story and base, brick and concrete, \$23,000. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield School District. Contractor, M. T. Keen, Bakersfield. Contract price, \$17,950. Note: This is the building which was abandoned by Contractor F. J. Amweg.

STORES.

LOS ANGELES, CAL.—Stores and lofts, 8 story and base. Class A construction. Cost not stated. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, S. K. Lindley, H. W. Hellman Bldg. This structure will be erected on West Fourth street, adjoining the Grant building, and will have a frontage of 90 feet by a depth of 124 feet. Construction will be of the class A type throughout with a complete steel frame, concrete and brick walls and reinforced concrete floors. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, freight and passenger elevators, vacuum cleaning system and mail chutes. Plans provide for metal window sash and frames and fireproof doors. Exterior of the building will be faced with cement plaster and pressed brick. Interior finish will be of pine throughout. There will be sidewalk doors, lifts and lights. Plans are now being prepared. Figures will be called for as soon as working drawings can be completed.

Contracts Awarded.

LENTS, ORE.—Stores and offices, 2 story and base, reinforced concrete, \$15,000. Architect, none. Owner, Mrs. H. Yott. Contractor, V. L. Irish, Lents. Contract price, \$15,000.

THEATRES.

MODESTO, STANISLAUS CO., CAL.—Theatre, 2 story and base, reinforced concrete. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Messenger. The building will be erected on the site of the structure recently destroyed by fire and will be designed to contain a large main auditorium, gallery and stage. Construction will be practically fireproof with reinforced concrete walls and floors. Interior will be finished in pine and ornamental plaster. There will be a central heating system, metal trim and modern system of ventilating. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

TACOMA, WASH.—Theatre, 2 story and base, reinforced concrete, \$100,000. Architect, R. E. Borhek, Savage-Scotfield Bldg., Tacoma. Owner, Eugene Levy. The building will adjoin the present Tacoma Theatre and is to be fireproof throughout. There will be a main auditorium and two galleries. Interior will be finished in pine, metal trim and ornamental plaster. There will be steam heat, a modern system of ventilating and vacuum cleaning. Complete stage equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are to be completed so that work may be started by early spring.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

PURSUANT to resolution No. 7247 N. S., passed by the Council of the City of Oakland will receive bids for furnishing of all the labor and materials entering into the construction of the Preparation of Site, Concrete Work and Granite Work and Setting for the Auditorium, Washington street, between Fallon street and Lake Shore avenue, in the City of Oakland, California.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between 11 o'clock A. M. and 12 o'clock, Noon, Pacific Time, on the 26th day of February, 1914, in the room of the Council in the City Hall, Fourteenth and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefore and on file in the office of John J. Donovan, the Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

No bid will be received or considered which is not accompanied by a check, certified by a responsible bank, payable to the order of Frank M. Smith, City Clerk, in an amount not less than 10% of the aggregate amount of the proposal. Said check shall be forfeited to and be retained by the City if the successful bidder fails or refuses to execute the contract in the required form and furnish bonds of the forms to be provided by the City and as required by the Charter of the City of

Oakland, within twenty days after receiving notice of award.

The contractor will be required to begin work within five (5) days from the execution of the contract—unless otherwise notified in writing by the owner or architect—and to fully complete the entire work in accordance with the requirements of the agreement, plans drawings and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council on or before one hundred (100) days from the date from and after the beginning of the work.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to or for the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

FRANK M. SMITH, City Clerk.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 826—Proposals for Sand Blast Equipment, Galvanized Sheet Steel, Steel Cable, Chain, Wire Bolts, Plate Washers, Sheet Brass, Sheet Copper, Bronze Bars, Brass Tubing, Copper Tinning, Brass Sheet Zinc, Galvanized Bars, Hammers, Hinges, Wheelbarrows, Corn Brooms, Fire Preservers, Hose, Manila Rope, Magnesia Pipe, Covering, Paving Brick, Fire Clay and Lamplack. Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. February 21, 1914, at which time they will be opened in public, for furnishing the above mentioned articles. NOTICE TO CONTRACTORS.

THE BOARD OF TRUSTEES of the Coalinga Union High School Library District will receive sealed proposals up to, but not later than, 1:30 o'clock p. m. on the 28th day of February, 1914, for the construction of a Library Building to be erected on a tract of land owned by the said Library District, situated in the Town of Coalinga. Specifications have been adopted by the County of San Diego of California. The said building is to be constructed according to the plans and speci-

cations prepared by Swartz, Hotchkin & Swartz, architects, which plans and specifications are on file with the Clerk of the Board.

All bids for the general construction of the building must be accompanied with a certified check in the amount of One Thousand Dollars (\$1,000) on some solvent bank, made payable to Coalinga Union High School Library District as a guarantee that the person whose bid is accepted, will within ten days after the acceptance of the bid and the awarding of the contract, execute a contract for the construction of the building and give approved bonds for the faithful and complete performance of the contract as required by law.

Separate bids will be received for the complete installation of the heating system which bids must be accompanied by a certified check in the amount of Two Hundred Dollars (\$200) on conditions above stated.

Plans, specifications, form of proposal and other information may be had from Mrs. H. L. Fennell, Secretary, Trustee of the Coalinga Union High School Library District, No. 169 East C Street, Coalinga, California, or from the architect, Room 619 Rowell Building, Fresno.

The Board reserves the right to reject any and all bids without recourse.

MRS. H. L. FENNEL, City Clerk of the Board of Trustees of the Coalinga Union High School Library District.

PROPOSALS FOR TIMBER.

TIMBER—U. S. Engineer Office, Duluth, Minn.—Sealed proposals for first timber will be received until 10 o'clock, noon, February 26, 1914, and then publicly opened. Information on application to this office or the local office, Seattle, Wash. E. D. PEEK captain, engineers.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock, Monday, March 2, 1914, for constructing a box culvert on the Canyada road near Woodside, Third Road District, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 9, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the awarding of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,
County Clerk.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Monday, March 2, 1914, for constructing a reinforced concrete bridge on the Highway near Woodside City road at Woodside, in the Third Road District, per plans and specifications prepared by the

County Surveyor and adopted by the Board of Supervisors on Monday, February 9, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,
County Clerk.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Monday, March 2, 1914, for constructing a reinforced concrete bridge on the Highway near Santa Gregoria road across creek separating the Third and Fifth road districts, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 2, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the awarding of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,
County Clerk.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition at Room 213, in the Service Building, Fillmore and Chestnut Streets, San Francisco, California, at 3:00 P. M., Tuesday, February 17, 1914, for the construction of the Court of Abundance in accordance with the specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Electric Wiring, and on Water, Steam, Gas and Drain Piping.

Each proposal must be accompanied by a certified check made payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount

bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal or bid, which check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty (\$50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

For the purpose of the award made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by depositing \$50.00, which amount will be refunded to contractors submitting bona fide bids. Persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

PROPOSALS.

For the reconstruction of the side wall of No. 2 boiler at Pumping Station No. 1, and for the replacement of the Water System of the San Francisco Fire Department.

OFFICE OF THE BOARD OF FIRE COMMISSIONERS, San Francisco.

In accordance with a resolution of the Board of Fire Commissioners, duly passed February 4, 1914, sealed proposals will be received in open session of the Board on Wednesday, February 25th, 1914, between the hours of 8 and 10 p. m. for the reconstruction of the side wall of No. 2 boiler at Pumping Station No. 1 of the San Francisco Fire Department, in strict accordance with the specifications and plans contained in the proposal blank prepared by the Board of Fire Commissioners, on file, and copies of which may be obtained at the said Board, 1251 Market street, San Francisco, Cal.

BOARD OF FIRE COMMISSIONERS,
FRANK T. KENNEDY,
Secretary.

NOTICE TO ARCHITECTS.

For the benefit of architects inquiring concerning plans for a new 3600 school building to be erected in Chico School District, the Board of Education of the City of Chico in and for Chico School District, hereby invite architects to submit designs for a school building that shall furnish the last mentioned rooms and accommodations as a preliminary requirement. The Board of Education shall judge and select or reject the plans. It is especially understood that no premium or award shall be given to any architect whose plan the accepted plan shall become the design and plan from which the building shall be erected.

Plans for the proposed new Oakdale grammar school building shall be made to the scale of 1/4 inch to one foot, and shall consist of the following drawings:

- Foundation plan.
- Basement story plan.
- Main floor plan.
- Second story plan.
- Roof plan, and a longitudinal and a transverse section, four elevations, front and rear elevations of the building to be combined, exterior and grammar school for approximately 400 pupils, half boys and half girls. The building to be erected on a basement in height—not fewer than eight class rooms size 24x32x about 14 feet with cloak rooms, each class room with built-in bookcase, not smaller than 12 cu. ft. inside. One office. One library well provided with shelving. One auditorium of seating capacity not less than 100 seats. Basement rooms for manual training. Two basement rooms for domestic arts. Kitchen to be provided with water and gas. Entrance hall, office, and auditorium to be wired for electricity. Basement to contain

heating plant for auditorium, and a room for bicycles. No toilet system other than for teachers use need be installed. Sanitary and drinking fountains must be on each floor.

Plans shall be completely and accurately figured with all necessary dimensions and spacings, and thickness of walls in each story shall be clearly indicated. Specifications shall be complete, and shall accurately describe all materials and labor required in the construction and finishing of the building. Each architect who submits plans shall furnish the secretary of the Board of Education TWO complete sets of plans and specifications as above enumerated, on or before the 9th day of March, 1914, and one of the sets furnished by the successful architect shall be kept as a public record from the date of and following the selection by the Board of Education of such plans and specifications for the construction of a public building. The successful architect will be required to finally furnish a complete set of plans and specifications, and four full sets of blue-print detail drawings. Full-size detail drawings for all mill work, steel and iron work, and for the proposed structure shall be furnished and delivered to the board by the successful architect within three weeks from the date of the official adoption of the plans for the building.

In case the successful architect becomes the superintendent of construction of the building, the Board will allow as an entire compensation 6 per cent of the contractor's price of the building exclusive of furnishing and fixtures. In case the architect does not become the superintendent of building construction, then compensation of 6 per cent shall be divided between the architect and the superintendent in accordance with the prescribed rules for architect's fees. The entire compensation of the successful architect is to be dependent upon the cost of the building, without change in plans or specifications, from original filed copies. The total cost, as shown in regular bids, but not by contractors, to not exceed the sum of \$30,000. In case the board fails to erect a bid from a reliable contractor to erect the proposed building for \$30,000 or less, then the architect furnishing the plans, etc., shall forfeit all claim to any compensation whatever for his plans and specifications, etc.

The Board of Education expressly reserves the right to reject any or all bids, and to require any minor changes as may be found necessary before the final adoption of any plan.

CHAS. H. CAMPER,
Secretary, Board of Education,
City Hall, Chico, Cal. (*)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 826—Proposal for Sand Blast Equipment, Galvanized Sheet Steel, Steel Cable, Chain, Wire, Bolt, Plate Washers, Sheet Brass, Sheet Copper, Bronze Bars, Brass Tubing, Copper Tubing, Brass Unions, Sheet Zinc, Solder, Shovels, Hammers, Hinges, Wheelbarrows, Iron Pumps, Life Preservers, Hose, Manila Rope, Magnesia Pipe Covering, Paving Brick, Fire Clay and Lambdian. Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 12 o'clock, noon, on February 18, at which time they will be opened in public, for furnishing the above mentioned articles. A deposit of Ten (\$10.00) Dollars will be required on plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Erection of Recreation Hall, Napa State Hospital, Napa, California."

(SIGNED) W. F. McCURE,
State Engineer. (*)

NOTICE TO CREOSOTING PLANTS.

OFFICE OF THE BOARD OF STATE HARBOUR COMMISSIONERS, Union Depot and Ferry House, San Francisco, Cal., February 17, 1914.

SEALED PROPOSALS or bids will be received at this office on or prior to 11 o'clock A. M. on Thursday, March 5, 1914, for furnishing and delivering at wharf tackle, San Francisco, creosoted piles in accordance with the specifications prepared therefore, by the Assistant State Engineer, and adopted by the Board, February 5, 1914, and on file in this office, to which special reference is hereby made.

The piles must be fresh cut, first quality Douglas yellow fir piles; the creosote used must come from works making bituminous coal gas, and the piles to be impregnated with not less than twelve (12) pounds of creosote per cubic foot of wood; the penetration of the heavier black oils must not be less than $\frac{1}{2}$ inches at any place into the outer surface of the piles.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a five (5) per cent of the amount equal to the order of the amount of the bid, based on a delivery of 110,000 feet of piling; such check to be made payable to the order of the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The successful bidder to file a bond adequate with two or more sureties to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof; and the true satisfaction of said Board; and said bond also be effective as provided in an act approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the Assistant Secretary at or prior to 11 o'clock A. M. on Thursday, March 5, 1914, at which time and place bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids. Bidders are requested to mark envelope containing bid "Bids for furnishing Creosoted Piles."

J. J. DWYER,
THOMAS WILLIAMS,
J. H. MCCALLUM,
Board of State Harbor Commissioners.
JEROME NEWMAN,
Assistant State Engineer,
LEO V. MERLE, Jr.,
Secretary. (*)

CONSTRUCTION WORK ABROAD.

ARGENTINA.

[Review of River Plate, Buenos Aires.] Municipal Project for Workmen's Dwellings.

The budget law as projected by the budget committee of the Chamber of Deputies includes a clause exempting from payments of import duties materials destined for the construction of workmen's dwellings by the municipality of Buenos Aires to a maximum of \$250 gold per house. It will be remembered that the municipality recently entered into a contract with S. H. Pearson & Co. for the erection of 10,000 of these houses.

Railway Construction.

As a result of representations recently made to the national government by Dr. Ahumada, governor of Catamarca, the executive has promised early commencement of construction of the railway from the capital of that Province to La Cocha. Work on the first 6 miles will soon be started.

CHINA.

[Vice Consul George C. Hanson, Dalny, Manchuria.]

Railway Improvements.

The South Manchuria Railway's estimates for the next fiscal year include \$5,500,000 expenditure for earthwork, retaining walls, bridges, stations, rolling stock, construction of dredger and hopper barges, harbor works, hotel, etc. [A copy of items may be obtained from the Bureau of Foreign and Domestic Commerce.]

ACTION.

The nations are a series of short experiments. A nation may disintegrate inside of a century. It may flower inside of thirty years. It would be possible that a Middle-Western town like Cedar Rapids should tomorrow begin to put forth a group of heroes, who should overrun the earth with the charm and vigor of their ideas. A sudden quickening, mind catching flame from mind, and once again you would have the miracle of Plato's Athens, of Elizabeth's London.

It now and again some man had not decided to stop drifting and take hold of things and reshape them, there would have been no discovery, no invention, no art. He might have said, as many like to say: "Why not let my big idea rest quietly? There is time enough in the long future. Why be in a hurry? Why so hot, little man? There is quiet sleep in the churchyard for the men that have gone before, and soon I too will be there." But, prevailing, he said:

"Now is the time, and the place is here, to bring my idea to action. I insist on being heard. Here is the plan. We will not postpone it till next year. We will try it now."

It is our business to make our ideas prevail. We are not to go silent, nor to retire from activity, believing that our nation is long-lived, and that our thought has an eternity in which to come to pass. We must speak up. We must strike early and strike hard. The time is short. It is right to wish to get something done in our own lifetime.—From Harper's Weekly.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, Henry W. Jansen, 536 27th avenue, S. F. Owner, Frank Lapham, 520 15th avenue. The dwelling has been designed for a six-room house with bath, and will be erected on 18th avenue near Anza. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be a large open fire place and tile mantel. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$10,000. San Francisco. Architect, Albert Farr, Foxcroft Bldg., S. F. Owners, H. B. and L. D. Allen, 128 Sutter street, S. F. The dwelling will be erected on the west side of 8th avenue near Lawton, and has been designed to contain ten rooms, baths and sleeping porch. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will have composition floors and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. A brick veneer base will also be used. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$9,000. San Francisco. Architects, Coxhead & Coxhead, Hearst Bldg., S. F. Owner, Dr. Henry Gibbons. This dwelling will be erected on Pacific avenue, and has been designed for an eight-room house with all modern conveniences. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath room will have tile floors and wainscot. Special rooms on the ground floor will be fitted up for the doctor's home office. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

APARTMENT HOUSE — 3 story and base, frame, \$14,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on a lot 23 by 120 1/2 feet, situated on the south side of Filbert street between Hyde and Leavenworth streets. Plans provide for six apartments arranged in suites of four rooms each. Interior finish will be of pine with some oak floors and elm panels. There will be steam heat, portable vacuum cleaners and a hot water supply.

Bath rooms will be finished in tile and will have composition floors. All suites will have wall beds. Entrance will be finished in marble and tile. Exterior of the building will be covered with brick veneer and cement plaster on metal lath. Plans are nearly complete and figures will be called for within a week or ten days.

APARTMENT HOUSE — 4 story and base, reinforced concrete, \$25,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Mr. A. C. Selig. The building will be erected on the south side of Eddy street between Jones and Leavenworth Sts. Several suites besides the main entrance and lobby will occupy the first floor. Upper floors will be arranged for two and three room suites with wall beds and private bath rooms. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the living rooms. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

APARTMENT HOUSE ALTERATIONS — Frame construction, \$3,000. San Francisco. Architect, none. Owner, Charles Katz, 2400 Dolores street, S. F. This work will consist of rearranging the present three-story frame store and apartment house located on Mission street south of 17th into a modern building. Upper floors will be subdivided into eighteen suites. The work will include new partitions, plastering, mill work, carpentry, plumbing, electric work, painting and wall beds. Fire escapes, patent store fronts and plate glass windows will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE ALTERATIONS — Frame construction, \$7,000. San Francisco. Architect, J. B. Randell, 1337 Palm street, S. F. Owners, J. M. and E. M. Branscombe. The work will include both interior and exterior alteration. There will be new plumbing, painting, plastering, mill and carpentry work and electric wiring. Patent store fronts and wall beds are specified. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$4,500. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, Arthur Elvin, 3854 23rd street. The dwelling will be erected in Forest Hill and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will

be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Mary H. McGaffigan, 182 2nd avenue, S. F. The house has been designed for a six-room dwelling with bath, and will be erected on Anza east of 2nd avenue. Interior finish will be largely of pine and redwood. Oak floors will be used in the living and dining room. There will be an open fire place and brick mantel. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

SCHOOL — 3 story and base, semi-fireproof construction. Cost not stated. San Francisco. Architect, City Department of Architecture, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. The following firms submitted the lowest figures for the construction of the Washington Irving School at the last meeting of the Board of Public Works: General construction, Frank M. Garden Co., \$64,544, general construction Prop. (2); Heckenroth & Schell, \$54,910; heating and ventilating, H. Lawson & Co., \$2,985; electric work, Buile Electric and Engineering Co., \$2,060; plumbing, Alex. Colman, \$4,746. No contracts have yet been awarded. A complete list of these figures will be found under the heading of San Francisco.

HOTEL — 6 story and base. Class B construction. Cost not stated. San Francisco. Architect, Henry H. Meyers, Kohl Bldg., S. F. Owners, Hyman Estate. The building will be erected at the southwest corner of Eddy and Taylor streets and will cover a full Fifty Vara lot. There will be several stores besides the hotel lobby on the first floor. Upper floors will contain in the neighborhood of 200 guest rooms, a large percentage of which will have private baths. There will be a complete steel frame and exterior walls of brick faced with pressed brick. Interior finish will be of pine and hardwood. Metal lath and plaster interior partitions and metal window sash and frames are specified. Plans provide for steam heat, elevator service, vacuum cleaning, hot water system and special electric work. Ornamental plaster will also be used. Bath rooms will have tile wainscot and composition floors. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, M. F. Nolan, 228 Noe street, S. F. The dwelling will be erected on 22nd avenue north of Clement, and has been designed for a six-room house with bath. Interior finish will be largely of pine with some redwood. Oak floors will be used in the principal rooms. There will be a large open fire place with a tile mantel in the living room. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete

and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

Contracts Awarded.

PIER ALTERATIONS—\$14,720. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids opened at the last meeting of the State Board of Harbor Commissioners for widening pier No. 54, show Healy-Thibbitts Construction Co., S. F., low at \$14,720. They were awarded the work. A complete list of bids opened will be found under the heading of San Francisco in this issue.

Bids Opened For State Harbor Work.

Healy-Thibbitts Construction Company
Awarded Contract For Work, Three
Other Sets of Figures Submitted.

Four sets of bids were opened at Wednesday's meeting of the State Board of Harbor Commissioners for widening Pier No. 54. Healy-Thibbitts Construction Co. submitted the lowest figure at \$14,720. They were awarded the contract. Other figures submitted were as follows:

Widening Pier No. 54.

Healy-Thibbitts Constr. Co.,	\$14,720
San Francisco Bridge Co.,	16,880
Hyde-Harjes & Co.,	21,687
Pacific Construction Co.,	15,750

CITY BIDS OPENED.

**Board of Works Receives Figures For
Construction of Washington Irving
School and Other Work.**

Bids were opened by the Board of Public Works at Wednesday's session for the general construction of the Washington Irving School, for the heating and ventilating of the same, electric work, plumbing and brick work.

Bids were also opened for furnishing pumps and motors for the Commercial street sewer pumping plant and for a large amount of street and sidewalk work.

Frank M. Garden submitted the lowest figure on Proposition (1) at \$64,544 for the general construction of the Washington Irving School, while Heckenroth & Schell were low on Proposition (2) at \$54,910. H. Lawson was low on the heating and ventilating at \$2,985, the Butte Elec. & Eng. Co. were low on the electric work at \$2,060; Alex. Coleman was low on the plumbing at \$1,746 and Mealey & Collins on the brick work at \$9,925.

A complete list of all figures received is given below:

stalled. The wainscot will be used in the kitchen. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are nearly complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, E. W. Woodward, 2645 13th avenue, Oakland. The dwelling will contain seven rooms, bath and sleeping porch. Interior finish will be of pine with some elm panels and oak floors. Plans provide for furnace heat and open fire places. Mantels will be of tile. The wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Shannon. The house will be erected in East Piedmont Heights, and has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat, open fire places and automatic water heaters. Mantels will be of tile and brick. Bath rooms will have composition floors and the wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame, \$6,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, H. H. Jewett. The dwelling will be erected on Euclid avenue, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some elm panels in the living and dining rooms. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and a composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and are now out for figures.

AUDITORIUM—1 and 2 story and base. Class A construction. Cost not stated. Oakland, Cal. Supervising Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. The following firms have applied for plans and specifications for the work on the Oakland Municipal Auditorium. Bids are to be opened on February 26th. Lewis A. Hicks Co., Foster-Vogt & Co., Williams Bros. & Henderson, Snund Construction and Engineering Co., Van Sint-Houghton, Clinton Fireproofing Co., F. Roland, Newsom, Wold & Kohn, L. A. Norris Co., and McLaren & Petersen.

HOTEL—7 story and base. Class B construction, \$10,000. Oakland, Cal. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owner, F. W. Bilger. The building will be erected on the north side of 16th street between San

Fabio and Telegraph avenues, covering an area of 150 by 100 feet. There will be a complete steel frame, brick and concrete walls and wood floors. Interior has been arranged for 170 guest rooms, a large percentage of which will have private baths. Interior finish will be of pine and hardwood. Metal window sash and frames are specified. Plans provide for steam heat, elevator service, a hot water system and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and ornamental plaster will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story, attic and base, frame, \$12,000. Oakland, Cal. Architect, David C. Coleman, Merchants' National Bank Bldg., S. F. Owner's name withheld. The dwelling will be erected in Linda Vista and has been designed for a ten-room house with three baths and sleeping porches. Interior finish will be of pine, redwood, hardwoods and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, none. Owner, Mrs. H. H. Brown. The dwelling will be erected in the Thousand Oaks Tract, and has been designed for an eight-room dwelling with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood panels and oak floors. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mrs. Mitchell. The dwelling will be erected on Elvarado Road, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE—2 story and base, frame, \$3,750. Berkeley, Alameda Co., Cal. Architect, Patrick-Nelson Co., 2011 Shattuck avenue, Berkeley. Owner, F. A. Brown. The house will be erected in Cragmont, and has been designed for a seven-room dwelling with

bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior will be covered with shingles. Plans are complete and the work will be done by Day Labor.

HOTEL—2 story and base, frame. Cost not stated, Oakland, Cal. Architect, none. Owner, Ben O. Johnson. 2014 East 30th street, Oakland. The building will be erected on the west side of San Pablo avenue, north of 27th street. There will be one store on the first floor and a number of single rooms and baths on the second floor. Interior finish will be of pine and redwood. There will be a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owner, Mrs. Annie H. Lewis. The dwelling will be erected in the Claremont Tract, and has been designed for a ten-room house with three baths and sleeping porch. Interior finish will be of pine, redwood, hardwood veneer and white enamel. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will be finished in tile and will have composition floors. Automatic water heaters are specified. Exterior of the house will be covered with shakes. Plans are complete and in the hands of the owner who is now taking figures on the work.

BRIDGES—Reinforced concrete. Cost not stated. San Mateo County, Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans have been completed and approved for two small reinforced concrete bridges which are to be erected in San Mateo County. One bridge will be erected in Woodside on the Redwood and La Honda Road and the other on the La Honda and San Gregorio Road. Plans and specifications can be secured by addressing the County Clerk. Bids will be opened on March 2nd at 10 a. m. Official proposals appear in another column of this issue.

LIBRARY—2 story and base. Class A construction. Cost not stated. Palo Alto, Santa Clara Co., Cal. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Leland Stanford, Jr. University. Architects Bakewell & Brown are working on preliminary plans for the new library building which is to be erected at Palo Alto for the Leland Stanford University. The library is to form the central building of the proposed new quadrangle, and will be located midway between Encina Hall and the present quadrangle. Construction will be of the Class A type throughout the design being similar to that of the present library building. Librarian George T. Clarke of Stanford University has outlined to the architects the requirements of the building, and these plans show a two-story structure with the main reading room occupying the second floor. The system planned will be what is known as a general library as opposed to the departmental system now in use at the University.

BOX CULVERT—Reinforced concrete. Cost not stated. San Mateo County, Cal. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans are complete and figures will be opened on March 2nd for constructing a reinforced concrete culvert over the Canyada road near Woodside. Plans and specifications can be secured from the County Surveyor. An official proposal appears in another column of this issue.

Contracts Awarded.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

BATH HOUSE—1 story, reinforced concrete, \$25,000. San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, 104 D street, San Rafael. Owners, City of San Rafael. Bids were opened by the Trustees on Monday evening, February 9th, for the construction of the reinforced concrete bath house. Bonds in the amount of \$25,000 were recently voted, but as the lowest bid received was in excess of this amount no contract was awarded. Checks of the three lowest bidders were held and definite action will be taken at the next meeting. A complete list of these figures will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

Bids On San Rafael Bath House Opened.

All Bids Received for Construction of Building Are in Excess of Amount Available.

Bids were opened by the Trustees of San Rafael on Monday evening for the construction of the reinforced concrete bath house, designed by Architect Thomas O'Connor. Bonds in the amount of \$25,000 were recently voted, but as the lowest bid received was in excess of \$25,000 no contract was awarded. Checks of the three lowest bidders were held and definite action will be taken at the next meeting, Friday 13th.

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

COUNTY JAIL—2 story, base and mezzanine floor. Class A construction, \$150,000. Bakersfield, Kern Co., Cal. Architect, Orville L. Clark, Brower Bldg., Bakersfield. Owners, Kern County. The Board of Supervisors recently selected the designs of Architect Clark for the new County Jail and awarded the second prize to Thomas B. Wiseman of Bakersfield, \$250, and third prize to J. W. Dooliver of San Francisco, \$125. The building will be classic in design, of reinforced concrete construction faced with terra cotta. Floors and roof slabs will be of reinforced concrete. Interior partitions will be of hollow tile and metal lath and plaster. The structure will cover an area of 112 by 100 feet. Basement will contain mechanical room, engineer's quarters, fumigation and bath rooms, armory, storage space and garage. The sheriff's office, three deputy's offices, jailer's rooms and two tiers of steel cells will occupy the first floor. Second floor will be arranged for wash room, dining rooms and kitchen and quarters for the female prisoners. Interior finish will be largely of metal and hardwood. A hospital and cells for inebriates are also provided for in the plans. There will be a steam heating system, vacuum cleaning and hot water supply. Plans are complete and out for figures. Bids close March 6th.

SCHOOL—2 story and base, reinforced concrete, \$30,000. Bishop, Inyo Co., Cal. Architect, G. B. Clement, Bishop. Owners, Bishop School District. Plans for the building to be erected in the Bishop District have been completed and approved and are now out for figures. The structure will be practically fireproof and will contain eight class rooms, assembly hall and principal's office. Interior finish will be of pine. Maple floors will be used in the class rooms. There will be a central system of heating. Exterior of the building will be faced with cement plaster. Bids are now being taken and will be opened on March 10th.

HOTEL AND STORES—3 story and base, brick and steel. Cost not stated. Fresno, Fresno Co., Cal. Architect, Eugene Mathewson, Forsythe Bldg., Fresno. Owner, Paul Mayer. The building will be erected at the corner of Kern and H streets and will cover a considerable ground area. There will be a number of stores on the first floor besides the hotel entrance and lobby. Upper floors have been arranged for a total of 150 guest rooms and several baths. Interior will be finished in pine throughout. Patent store fronts, steam heat and a hot water system are specified. Bath rooms will have tile wainscot and composition floors. Plans are being prepared.

HOTEL—4 story and base, brick, \$100,000. Brawley, Imperial Co., Cal. Architect, L. Roehrig, American Bank

Bldg., L. A. Owner, C. A. Johnson. Only preliminary plans for this work have been prepared and it is impossible to publish details of construction at this time. As soon as further plans are made more information will be given.

LIBRARY—2 story and base, reinforced concrete, \$20,000. Coalinga, Fresno Co., Cal. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Coalinga Union High School Library District. The building will be designed in the classic style and will be of semi-fireproof construction. Interior will provide two reading rooms, stack rooms, librarian's office and storage room. Pine and hardwood trim and maple floors will be used. There will be a central heating system and vacuum cleaning. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be opened on February 28th. Plans and specifications can be secured from the architects.

THEATRE—2 story and base, reinforced concrete. Cost not stated. Modesto, Stanislaus Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Messenger. The building will be erected on the site of the structure recently destroyed by fire, and will be designed to contain a large auditorium, gallery and stage. Construction will be practically fireproof with reinforced concrete walls and floors. Interior will be finished in pine and ornamental plaster. There will be a central heating system, metal trim and modern system of ventilation. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

BRIDGE—Wood construction. Cost not stated. Reedley, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. The County Surveyor has been instructed to prepare plans for a pile and wooden bridge which is to be constructed over the lower Kings River near Reedley. Bids will be called for as soon as plans can be completed. The old bridge was washed away during the recent heavy storms and trade with the upper country is being badly handicapped.

Contracts Awarded.

SCHOOL—1 story and base, brick and concrete, \$23,000. Bakersfield, Kern Co., Cal. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Bakersfield School District. Contractor, M. T. Kean, Bakersfield. Contract price, \$17,980. Note: This is the building which was abandoned by Contractor F. J. Amweg.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

RESIDENCES—1 story, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: George E. J. Willis, 40th street, 4 room frame cottage, \$1,000; P. G. Mikie, 3600 35th street, addition to residence, \$1,000; L. F. Schwilk, 2021 9th street, alteration to frame residence, \$1,300, and William Weisker, 1714 30th street, 5 room frame cottage, \$1,900.

San Francisco

ton Meat Packing Co. The architect has completed plans for the new packing plant which is to be erected for the Swanston Meat Packing Co. on the property recently purchased by them in the Haggin Grant. Construction will be of steel and concrete. The structure will be 320 feet long and 60 feet wide. Equipment and building will represent an investment of \$200,000. On the main floor will be installed the \$25,000 worth of machinery necessary to operate the plant. There will also be a large casing room for the preparation of the meats, and at one end will be a large cold storage room. The second and third floors will be devoted principally to the killing of the cattle. The knocking pens and other devices for killing are all equipped with drains. Above all the killing pens will be a platform for an inspector of the meat. The platform will be so located as to allow the inspector to observe the killing in all pens. If he is doubtful as to the appearance of any of the animals, they will be kept over night in a separate room and thoroughly examined again in the morning. The fourth floor will be devoted to ice making. Between eight and ten tons daily will be manufactured for the company's use. A large chute from the top floor will convey the ice directly into the interior of the refrigerator cars on the railroad tracks below.

WATER PIPE—Cast iron. Cost not stated. Sacramento, Cal. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Plans have been approved for the purchase of considerable cast iron water pipe, which is to be delivered f. o. b. corporation yards, Sacramento. Bids will be opened on February 19th. The following quantities and sizes are called for in the specifications: 3,500 feet of 6 inch pipe and 1,000 feet of 8 inch pipe. An official proposal appears in another column of this issue.

HOTEL ADDITION—6 story and base, Class B construction. Cost not stated. Sacramento, Cal. Architect, E. C. Hemmings, Sacramento. Owner, Mrs. Nettie Evans, owner of the Land Hotel. The Land Hotel on K street is to have a new addition of six stories erected in the rear of the present building. Only preliminary sketches have been prepared and details of construction have not been made public. Further mention will be made of the work as the plans progress.

SCHOOL—2 story and base, reinforced concrete. \$200,000. Sacramento

Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, Sacramento School District. The opening date for figures on the building which is to be erected from plans by Shea & Lofquist has been postponed until March 6th.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base, brick, \$10,000. Los Angeles, Cal. Architects, Western Architectural and Building Co., Coulter Bldg., L. A. Owner, Mr. Newton. The building will be erected on South Bonnie Brae street and will be arranged for 68 rooms divided into two and three room suites. Interior will be finished in pine with some elm panels. Oak floors will be used in the halls and living rooms. There will be steam heat, a hot water supply and vacuum cleaning. All suites will have wall beds and private bath rooms. Tile wainscot and composition floors will be used in the baths. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and work will be carried on by Day Labor under the direction of the architects.

BRIDGE—Reinforced concrete. Cost not stated. Ventura and Santa Barbara Counties, Cal. Engineer, William H. Thomas, L. A. Owners, Ventura and Santa Barbara Counties. Plans have been completed and have received the approval of both Boards of Supervisors for a three-binged reinforced concrete bridge which is to be erected over Rincon Creek on the State Highway. Plans can be secured from the engineer. Bids are now being taken and will be opened on March 2 at 2 p. m.

COLD STORAGE PLANT—1 and 2 story, brick. Cost not stated. Long Beach, Los Angeles Co., Cal. Architects, C. M. Gay & Son, 333 Towne avenue, L. A. Owners, Home Ice and Cold Storage Co. The building will cover a considerable ground area and will house the ice making equipment and cold storage departments in separate sections of the building. Equipment will call for compressors, engine, two boilers, pumping and refrigerating equipment. Interior will be finished in pine. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

LODGE HALL AND STORES—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, J. T. Zeller, Currier Bldg., L. A. Owners, Lars Swedia's Lodge, Charles E. Strolsee, 2240 Wall street, chairman. The building will be erected at the corner of 18th and Flower streets, covering an area of 52 by 154 feet. There will be six stores on the first floor besides the entrance to the upper floors. Auditorium, ball room, kitchens and dining rooms will occupy the second floor. The third floor will be arranged for lodge rooms. Interior finish will be of pine and hardwood with maple floor in the ball room. There will be steam heat and a vacuum cleaning system, patent store fronts and marble wainscoting. Exterior of the building will be faced with pressed brick. Plans are being prepared.

HOTEL—4 story and base. Class C construction. Cost not stated. Los

Angeles, Cal. Architects, Walker & Vawter, Hibernian Bldg., L. A. Owner, D. F. Hill. The building will be erected at the northwest corner of 6th and Wall streets, having a frontage on one street of 70 feet and 120 feet on the other. First floor will contain four stores and the hotel lobby. Upper floors will be arranged for a total of 110 guest rooms and 40 baths. Interior finish will be of pine and redwood. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. There will be metal window sash and frames and metal lath and plaster partitions. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Marble and tile will be used in the stores and lobby. Plans are being prepared. Bids will be called for shortly.

HOTEL—3 story and base. Class C construction. \$60,000. Los Angeles, Cal. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner, Louis Nordlinger and W. W. Paden. The building will be erected on Flower street between 3rd and 4th streets, covering an area of 80 by 150 feet. Entire building will be occupied by the hotel. Plans provide for a total of 120 guest rooms and 60 baths. Interior will be finished in pine and hardwood. There will be steam heat, hot water supply and vacuum cleaning system. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are now practically complete and figures will be called for at once.

HOTEL—3 story and base. Class C construction. \$15,000. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Mrs. Squires. The building will be erected on Wilde street near Central avenue, covering an area of 110 by 125 feet. There will be a total of 135 guest rooms with private and public baths. Plans provide for steam heat, a hot water supply and vacuum cleaning. There will be metal window sash and frames. Interior will be finished in pine. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Bids will be taken from contractors who can finance the project either wholly or in part. Working drawings have been completed.

SCHOOL GROUP—1, 1 and 2 story, brick and concrete, \$150,000. Venice, Los Angeles Co., Cal. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, City of Venice. The group will consist of the Administration building, Science building, Household Arts building and Manual Training building. The style of architecture will be Lombardic Italian. The Administration building will be a two-story and basement structure 152x144 feet, and will contain the administrative offices, auditorium, study and choral halls, library and twelve class rooms. In the basement there will be a cafeteria, kitchen, bicycle rooms, etc. The central heating plant will be constructed in connection with and at the rear of the administration building. The science building will be a two-story L-shaped structure with no basement; extreme dimensions 148x126 feet. It will contain twelve class rooms, work rooms, offices, recitation rooms, etc. The household arts

building will be two stories 110x120 feet, and will contain a modern bungalow, cooking department, laundry, lecture rooms, seven class rooms and sewing and millinery departments. The mechanical arts building will be one story 112x114 feet, with an interior court. The building will be connected by arcades. They will be of brick construction, with concrete foundations, exterior facing of different shades of light-colored brick, tile roofs, pine and hardwood trim, pine and maple floors, lavatories, plumbing, electric wiring, heating system. Plans are complete and figures are now being taken. Bids will be opened on February 24th. Plans and specifications can be secured from the architects.

STORES AND LOFTS—8 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Morgan, Walls & Morgan, Van Nuys Bldg., L. A. Owner, S. K. Lindley, 11 W. Hellman Bldg. This structure will be erected on West Fourth street adjoining the Grant building, and will have a frontage of 90 feet by a depth of 124 feet. Construction will be of the class A type throughout with a complete steel frame, concrete and brick walls and reinforced concrete floors. Interior partitions will be of hollow tile and metal lath and plaster. There will be steam heat, freight and passenger elevators, vacuum cleaning and mail chutes. Plans provide for metal window sash and frames and fireproof doors. Exterior of the building will be faced with cement plaster and pressed brick. Interior finish will be of pine throughout. There will be sidewalk doors, lifts and lights. Plans are now being prepared. Figures will be called for as soon as working drawings can be completed.

APARTMENT HOUSE—4 story and base, brick and steel, \$70,000. Los Angeles, Cal. Architects, Webb & O'Neil, Lankershim Bldg. L. A. Owner, A. S. O'Neil. The building will be erected on Figueroa street near 4th, covering an area of 48 by 120 feet. The building will contain a total of 120 rooms arranged in two and three room suites. Interior will be finished in pine and hardwood with marble and ornamental plaster in the lobby. There will be steam heat, a hot water supply, vacuum cleaning system and electric elevator. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Metal window sash and frames are specified. Exterior of the building will be faced with glazed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner's name withheld. The building has been designed to contain thirty suites of two and three rooms with baths, and will be erected near St. James Park, covering an area of 60 by 145 feet. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. Plans provide for steam heat, wall and disappearing beds and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

ORPHANS HOME—2 story and base, reinforced concrete, \$50,000. Los Angeles, Cal. Architect, I. H. Seehorn, 328 South Clay street, L. A. Owners, Missionary Sisters of the Sacred Heart, Contractor, S. Solano, 1770 North Main street, L. A. Contract price, \$50,000.

H. T. L.—12 story and base. Class A construction, \$300,000. Los Angeles, Cal. Architect, Charles Gordon, Los Angeles Investment Bldg., L. A. Owner, Verne C. Gutter, Contractors, Dutro-Wren Construction Co., Van Nuys Bldg., L. A. Contract price, \$300,000.

PORTLAND AND OREGON.

APARTMENT HOUSE—5 story and base, brick and steel. Cost not stated. Portland, Ore. Architects, Clausen & Clausen, Macleay Bldg., Portland. Owner, Mrs. C. Brown. The building will be erected at the corner of 15th and Lowndale streets, and will cover a large ground area. Each of the upper floors will be divided into nine suites of from two to four rooms and bath. Provision has also been made for three small suites in the basement. Interior will be finished in pine and hardwood. There will be elevator service, dumb-waiters, vacuum cleaning system, hot water supply and steam heat. All suites will have private bath rooms and wall or disappearing beds. Bath rooms will have composition floors and tile wainscot. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGE—Steel and concrete, \$35,000. Kellogg, Ore. Engineer, County Surveyor, Roseburg. Owners, Douglas County. The bridge is to span the Umpqua River at Dimick Perry. The main span will be of steel construction and the approaches and retaining walls of reinforced concrete. Provision has been made for a twenty-foot roadway and two four-foot walks. Plans are now being prepared and figures will be called for shortly. Complete particulars can be secured from the County Surveyor at Roseburg.

ASSOCIATION BUILDING—2 story and base, brick, \$15,000. Astoria, Ore. Architects, McNaughton & Raymond, Title and Trust Bldg., Portland. Owners, Young Men's Christian Association. Only preliminary plans for this building have been prepared and the architects state that construction will not be started until sometime in July. Further mention will be made of the work. Details of construction are not yet settled.

ASSOCIATION BUILDING—3 story and base, brick, \$28,000. La Grande, Ore. Architect, Milton S. Block, La Grande. Owners, Young Men's Christian Association. The building will cover a considerable ground area, the main floor containing entrance, business offices, class rooms and auditorium. Second floor will be arranged for the gymnasium and special rooms. Seventeen sleeping rooms will occupy the third floor. Basement will contain a plunge 15 by 40 feet, locker rooms, heating system and social hall. Interior will be finished in pine. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL—5 story and base, reinforced concrete, \$15,000. Portland, Ore. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, The Emanuel Lutheran Hospital, 209 10th street. The building will be erected on property bounded by Commercial, Graham and 45th streets, covering an area of 15 by 100 feet. The building is to be the first unit of a large group which will cover an area of 128 by 270 feet. The present structure will contain private rooms, wards, operating rooms, maternity wards and nurses' rooms. Construction will be fireproof with reinforced concrete walls and floors. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service and metal window sash and frames. Exterior of the building will be faced with a light grey pressed brick. Plans are being prepared.

INFIRMARY—2 story and base, brick. Cost not stated. Roseburg, Ore. Architect, F. C. Flagler, Roseburg. Owners, City of Roseburg. The building will cover an area of 56 by 60 feet. First floor will be arranged for general office, dining room, kitchen, women's ward and two sick wards. Upper floor will contain the children's wards and library. Interior finish will be of pine and hardwood. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans have been completed and received the approval of the City Council. Bids will be called for at once.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Portland, Ore. Architects, Clausen & Clausen, Macleay Bldg., Portland. Owner, I. Holzman. The building will be erected at the corner of 21st and Overton streets, covering a ground area of 50 by 100 feet. Interior will be arranged for a large number of two and three room suites, all of which will have private bath rooms and wall beds. Pine and hardwood veneer will be used for interior finish. Some oak floors will be specified. Plans provide for steam heat, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

CHURCH—1 story and base, brick and concrete, \$6,000. La Grande, Ore. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owners, Church of Our Lady of the Valley. The church will be of the Gothic style, 45x120. Exterior finish will be of pressed brick trimmed with terra cotta or cut stone. Basement will contain janitor's quarters, heating plant and storage rooms. Main auditorium will have a seating capacity of 530. Altar and communion rail will be of onyx. There will be a choir loft which will have a large pipe organ. Bids will be called for about May 1st, all work to be bid under separate contract. The parish house will be a two-story brick, and will contain twelve rooms. All modern conveniences will be installed.

Contracts Awarded.

STORES AND OFFICES—2 story and base, reinforced concrete, \$15,000. Lents, Ore. Architect, none. Owner, Mrs. H. Yott, Contractor, V. L. Irish, Lents. Contract price, \$15,000.

SEATTLE AND WASHINGTON.

APARTMENT HOUSE—4 story and base, brick and steel, \$15,000. Seattle, Wash. Architect, W. H. Miller, Arcade Bldg., Seattle. Owner, F. F. Adams. The building will be erected on Marion street and will have a frontage of 60 feet by a depth of 120 feet. Only preliminary sketches have been prepared, but these show in the neighborhood of thirty suites of two, three and four rooms. Interior finish will be of pine and hardwood with oak floors. There will be steam heat, elevator service and a hot water system. Bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGE—Steel and concrete, \$200,000. Vancouver, B. C. Engineer's name not given. Owners, City of Vancouver. Plans and specifications are now ready for contractors to figure on the proposed Second Narrows Bridge, which calls for a structure provided with a single line of steam track, two lines of electric track, two lines of roadway, a footway, together with the necessary approaches thereto, as well as the machinery for the opening span of the bridge and other incidental works. Plans are now out for figures and can be secured from the City Clerk.

BRIDGE—Steel and reinforced concrete, \$50,000. Wenatchee, Wash. Engineer, County Surveyor, Wenatchee. Owners, Chelan County. Plans and specifications have been adopted by the County Commissioners for a steel and reinforced concrete bridge, and bids will be called for about March 1st. The engineer's estimate shows that about 100 tons of structural steel and 2,500 cubic yards of concrete will be required. Full particulars can be secured from the County Surveyor at Wenatchee.

STEAM PLANT—2 story and base, reinforced concrete, \$50,000. Seattle, Wash. Architect, City Architect, Seattle. Owners, City of Seattle. The building will cover an area of 88 by 98 feet, and will be of fireproof construction throughout. Metal window sash and frames and cement floor are specified. Contracts for the machinery have already been awarded to C. C. Moore & Co., and Allis-Chalmers Co., at a cost of approximately \$100,000. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SHIP YARDS, ETC.—\$100,000. Vancouver, B. C. Architect, N. A. Leech, 615 Pender street, West Vancouver. Owners, English Syndicate represented by Kenneth E. Burnett, J. D. Burdis and J. D. McGee. The plant will be erected on a site on the north arm of the Fraser River near Sea Island. An option has been secured on the site, but only preliminary plans for the plant have been prepared. Further mention will be made of this work.

THEATRE—2 story and base, reinforced concrete, \$100,000. Tacoma, Wash. Architect, R. E. Borbok, Savage-Schofield Bldg., Tacoma. Owner, Eugene Levy. The building will adjoin the present Tacoma Theatre and is to be fireproof throughout. There will be a main auditorium and two galleries. Interior will be finished in pine, metal trim and ornamental plaster. There will be steam heat, a modern system of ventilation and vacuum

cleaning. Complete stage equipment will be installed. Exterior of the building will be faced with cement plaster. Plans are to be completed so that work may be started by early spring.

HOTEL—5 story and base, frame. Cost not stated. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. The building will be erected on 6th avenue between Main and Jackson streets, and will cover an area of 60 by 120 feet. There will be a total of 135 rooms and a number of public baths. Interior will be finished in pine. There will be steam heat and a hot water system. Bath rooms will have composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

Contracts Awarded.

APARTMENT HOUSE—6 story and base, reinforced concrete, \$75,000. Seattle, Wash. Architect, none. Owner, W. D. Perkins. Contractor, David Dow, 21st avenue and Spruce street, Seattle. Contract price, \$75,000.

RULINGS OF THE INDUSTRIAL ACCIDENT COMMISSION INTERPRETING THE WORKMEN'S COMPENSATION, INSURANCE AND SAFETY ACT.

As a result of a widespread request from employers, attorneys and employees throughout the States, the Industrial Accident Commission has interpreted several of the more important clauses of the Workmen's Compensation, Insurance and Safety Act previous to any case having been brought before it for adjudication. The following rulings are not to be looked upon as being the final opinions of the Commission; they have been made subject to change or modification.

CHAUFFEURS.

The Commission holds that chauffeurs, private or otherwise, come under the Compensation Provisions of the Workmen's Compensation, Insurance and Safety Act without any election on the part of the employer being necessary. They are not to be classed as household domestic servants.

AMBULANCE FEES.

It has also expressed itself as being of the opinion that the reasonable cost of necessary transportation immediately connected with the injury is a proper charge for medical treatment under the Compensation Act.

VOLUNTARY FIRE DEPARTMENTS, AND PUBLIC OFFICERS WORKING WITHOUT SALARY.

It has ruled that members of voluntary fire departments, operating without remuneration, and public officers, who serve without remuneration, are entitled to medical and surgical benefits, but are not entitled to any other compensation benefits.

FARM EMPLOYEES.

In the case of farm employees, it expressed the opinion that work done on a farm by employees of the farmer for the maintenance and operation of such farm, is excluded from the compulsory provisions of the Compensation Law, but that such farm employees, however, can proceed against their employers by means of a suit for damages, said suit being filed under the first two sections of the Roseberry Act.

INTERSTATE COMMERCE EMPLOYEES.

The Commission has also stated that it will assume jurisdiction where employees residing in California make a contract of hire in California, without reference where any accidental injury or death may take place.

EARNINGS OF SEASONAL EMPLOYEES.

In each case where subdivisions 1 and 2 of subsection (a) of section 17, of the Compensation Act cannot reasonably and fairly be applied, the Industrial Accident Commission holds that it will seek to ascertain the average annual earnings by testimony showing the earnings throughout the year of the individual concerned.

PROCESSES FOR FIREPROOFING WOOD.

[Consul General John L. Griffiths, London, England.]

Considerable attention has been given in the United Kingdom to the best method for fireproofing wood, especially in connection with railroad construction. The following is a description of a process which, it is claimed, has received the favorable consideration of the British Admiralty.

The wood is placed in large iron cylinders, the doors of which are hermetically sealed. The wood is then subjected to a course of steaming, and under vacuum the air and moisture in the pores of the wood are removed and the sap vaporized. The fireproofing solution is thereafter run into the cylinders, and under pressure forced throughout the pores and fibres. Subsequently the water in the solution is evaporated in drying kilns, and the chemicals, in minute crystal form, are left embedded in the wood. When heat is applied, these crystals expand to many times their original size, forming a glassy coating to the fibres of the wood which excludes the oxygen in the air. In time the heat causes the crystals to collapse, but further crystals in the wood immediately expand, and the same process of resistance against fire continues. The chemicals used are antiseptic and preservative, consisting chiefly of phosphate of ammonia. As a result of the treatment, the life of the wood is also lengthened, for the cause of decay (sap water) is eliminated. This process is claimed to be especially satisfactory, inasmuch as the material treated is not saturated with a solution of salt, nor are such chemicals used as tungstate of soda, sulphate of ammonia, sulphate of alumina, alum, etc., which invariably cause discoloration of the wood, corrosion of metals, destruction of fibres, and prevent satisfactory painting or polishing. After this treatment the wood can be worked, nailed, glued, painted, polished, etc., as though it had not been subjected to any special process. All kinds of timber can be treated, including oak, teak, deal, pine, mahogany, walnut, beech, birch, ash, maple, whitewood, pitch pine, larch, etc.

Adopted by Underground Railways and British Navy.

The first railway company to take advantage of this process was the Underground Electric Railways of Lon-

dun, and at the present time it is stated that the woodwork of all the cars of the company has been subjected to the treatment. It is also stated that after exhaustive tests the British Admiralty has adopted the process, that the company is engaged in fireproofing large quantities of wood for 70 motor boats for the British warships *Indomitable* and *Monarch*, and that the two new superdreadnoughts now building, the *Queen Elizabeth* and *Warspite*, are to have their woodwork fireproofed by this process.

The company using the process states that as a result of the recent disaster at Aislig, the Midland Railway (on whose system the accident occurred) has requested the fireproofing company to submit a tender for erecting a fireproofing plant at the company's works in Derby, and that, pending the erection of such a plant, the company has sent 144,000 feet of timber to be treated by the fireproofing company.

The cost of rendering wood fireproof by this process is a uniform one of 73 cents per cubic foot, for all woods excepting oak and teak, for which the charge is 85 cents per cubic foot.

Another Process.

There is another fireproofing process known as the "Snowdon process," the chief feature of which is a chemical mixture, but the formula is not disclosed. By the use of this mixture it is claimed that woodwork and all manner of fabrics may be rendered non-inflammable and insect proof. In the case of wood already in position, it may be painted or washed with three or more coats according to density, when the solution penetrates to a depth of about one-eighth of an inch. When treated prior to construction, the wood is usually soaked in the solution in tanks, but if it is desired to render the wood fireproof throughout, pressure cylinders are used to force the liquid into every fibre.

[The consul general sent numerous samples of the fireproofed wood of the first process, and a circular of the Snowdon system, which will be loaned on application to the Bureau of Foreign and Domestic Commerce.]

VERY ANNOYING.

It was deucedly thoughtless of Congressman Lewis, of Maryland, to gather all those revealing statistics about telephones and telegraphs. Where ignorance is bliss, 'tis folly to find out that our telegraphic rates are the highest among twenty countries and that, as one consequence thereof, we rank but ninth as telegraph users. And of course it is no less disturbing to discover that in the matter of local telephone charges, we rank but fourteenth among sixteen countries.

But it is done now and the only thing left is to think about it as little as possible. To brood over the matter would simply end in our having to do something and that in turn might disarrange some of our most cherished dividend-paying traditions. Everybody knows that the proper way to have telephones and telegraphs is to make dividends the chief desideratum. Now, then, let everybody close his or her mind and let there be an end on't.—E. O. J. in Life.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Building operations for San Francisco for the month of January, 1914, amounted to \$1,928,563. This includes all construction within the city limits. This, however, does not include permits for 16 new Exposition buildings, which totaled some 6 million dollars.

Compared to last year the construction work for the city is somewhat less for the same month, the total for January, 1913, being \$2,655,990.

Generally speaking the total for the month throughout the country is somewhat less than last year. Official reports from about 65 different cities representing building centers throughout the country printed in the American Contractor, Chicago, show a loss of about 8 per cent for the month.

The following is a comparative tabulation:

	January 1914.	January 1913.
Akron	\$ 138,150	\$ 208,230
Albany	149,065	91,030
Atlanta	320,365	395,095

Topeka	58,455	20,917
Washington	461,760	707,252
Wichita	18,905	29,600
Wilkes-Barre	103,109	82,329
Worcester	503,184	159,222
Total	40,408,476	45,812,923

The building permits from the Board of Public Works, as previously printed in the "Builder," show that more than 6 million is to be spent for Exposition buildings. As this is not yet started nor contracts filed it is not included in this month's estimate. Taking these figures into consideration the total given out to the Eastern papers amount to \$7,349,816. This amount is sure to be expended in the near future. So that while January may not have equaled last year's totals the coming year looks auspicious in its prospects.

From time immemorial the laws delays have been a theme for criticism of all people. To remedy this existing evil legislation has been invoked and laws innumerable have been passed. But little has been effected to expedite justice and hasten the process of its administration. These long delays and uncertainties have resulted in the people asking to have some say in the matter, and the passage of recall amendments to our fundamental laws has placed in their hands a means of preventing unfit judges from continuing in office after they have proved themselves to be unfit and virtually negating all the good results of worthy legislation.

To reform the practice and interpretation of the law in the Superior Courts of the City and County of San Francisco, Presiding Judge George A. Sturtevant has instituted a plan to expedite the affairs of the court that bids fair to do more in the way of reform than all the legislation of recent years. The plan is to assign to particular departments the different classes of cases. This will enable the trial judges to become specialists along these particular branches of the law and they will thus be able to render decision with greater promptness.

It also enables attorneys to know just what department their cases will

be assigned to in advance. So too it provides for the setting of a definite number of cases for trial each week in each department and assigns a judge to the hearing of insanity cases, incompetency and guardianship and removes the hearing of naturalization cases from the interference of actual trials. It further provides that cases must be decided by the judges within the statutory time when they are taken under submission and in cases where they can not so be decided that the judge may have assistance.

In presenting this plan to the judges the Presiding Judge stated:

"There is much talk about the reform of the law. A great American once said, 'We have never taken refuge behind criticism and complaint instead of action.' Let us all follow that statement. **The law is all right if it is correctly interpreted and practiced.** Let us try to act together and make one mighty effort to show that our work can be conducted with the same dispatch and accuracy as other large business interests are conducted."

The presiding judge should be most highly commended for taking this important step in the matter of expediting the administration of justice. It will save endless time and expense. It will lessen the expense of litigation many times and materially shorten the endless and vexatious delays incident to trials. It is a good thing for the people that they have a presiding judge that has the initiative and backbone to formulate such a plan and put it into active operation.

A letter from ex-Boss Croker to his former political associates in New York concludes: "I hope some good men will get in and drive them grafter-contractors out." Which shows that since his retirement Mr. Croker's political views have improved, even if his grammar hasn't.—Kansas City Star.

As the Exposition buildings develop and near completion an idea of their beauty begins to be suggested. And not the least element of the scheme is the coloring. The Machinery Hall, for instance, is beginning to take on the hues of the orient. As the staff is placed and the structures assume their complete form the artistic side becomes more and more apparent.

As is necessary in a world's fair the architecture is something of a medley of all nations. And often all one is constrained to the limitations which even in this age of steel is prescribed by the profession. No new or dominant note is struck. But is a sort of medley of all nations with its personifications, its types and differentiations. It will be something to look upon mainly because of demonstrations by present day methods of the possibilities of structural beauty embodying the forms and types worked out by the ancestors of the present day peoples of the world.

It is reported that the electric Iron Smelter at Heroult in Shasta County has closed down, not from any fault of the work but to install an even cheaper method of reducing the iron ore. This calls attention to a notable fact. That it is possible to smelt iron ore by the electric process at a small cost. And that means a great deal to California.

For it has vast ore deposits and untold water power. The great difficulty has been the cost of smelting and reducing the ore. With the electric process reduced to a commercial basis a great industry will be opened up which will bring great wealth to the people generally.

Lord Decies and wife (who was Vivien Gould) are still on the coast, and certain journals furnish lengthy accounts of their daily doings.

One newspaper in particular went so far as to give a detailed description of the mislaying by Lord Decies of his toilet set, explaining how he was forced to use his wife's brush and comb!

And this was considered important enough to be put on the wires and sent to various publications in various cities!

Consider how much space would have been devoted to the thrilling incident if Lord Decies had lost his

But why continue the terrible breeches, and had been forced to—thought!

Men and teams have been engaged and actual construction work has been begun on the Hetch-Hetchy project. It is probable that the amount of work done at present will simply comply with the law, which provides that actual work must be commenced within sixty days after granting of the permit. At any event it is a report of progress. And any action after twelve years of waiting and marking time is certainly welcome news.

Christofferson has succeeded in flying from San Francisco to San Diego and has conquered the wind currents of the mountain passes. These are like rapids in a stream and the aviator who passes over high mountain barriers is forced to go high into the air and force his way against strong and uncertain winds.

The proposal of the Panama Exposition to hold an aviation meet wherein a large prize will be offered for a race around the world seems to be of doubtful value and very difficult of execution. It would require the expenditure of a great deal of money, and entail an almost certain loss of life. And the result would probably not be of very great value. It would demonstrate that such a feat is possible, but it would not add anything to the safety of aerial navigation. As a theatrical stunt it would be of doubtful value for the people would only see the start and the finish. And the aviator, if he possibly escaped being dashed to death or shot by ignorant people in some part of the world or drowned in the ocean, would be a battered wreck at the end of the journey.

There seems to be a way out of the Panama tolls controversy by not exempting coast wise shipping and thus giving all nations an equal chance. At the same time a subsidy could be given American shipping so that it would in effect amount to the same thing. It may be unjust in theory to build up one industry at the expense of another. This is the theory of the protective tariff and in many cases it has developed monopolies. But nearly all the nations of the world have sub-

sidized their shipping interests and as a result American ships can not compete with them in carrying rates. The only reason subsidies have not been granted the same as other interests have been protected is that such an action would militate against the freight rates charged by the railroads. Certainly it would seem that the United States would have the right to exempt its coastwise shipping if it so desired. But if it violates treaty rights the same result can be obtained by granting a subsidy to our own ships. This would tend to lower freight rates and benefit everybody generally and not a few people of a favored industry as the protective tariff has often done.

The banquet held at Richmond last week to commemorate the establishment of the inner harbor at that growing city marks a distinct improvement for San Francisco Bay. The United States Government has approved the plan by the Rivers and Harbors Committee of the House and has recommended an initial appropriation of \$428,000.

All these things tend to build up a greater San Francisco. As Richmond is the terminal of the oil pipe line and the terminal of a transcontinental railroad it is a place for factory sites and a shipping point of first value. What-ever helps the Bay cities helps San Francisco. So that the growth of these Bay cities demand a water supply and a general welfare for the whole community.

A plan has been formed by a Mr. Pitkin to provide for transportation to the Fair site from the ferry building on a gravity railway on the same principle that beer cases are sent down the incline in a brewery. It seems feasible and no doubt would be a most interesting trip to take. There is no question but that the project would pay for itself in a short while and as the problem of transportation is a serious one it looks like a practical solution of the matter.

Architect G. Alexander Wright in the last edition of the Quantity Surveyor makes a plea for more complete plans and specifications. As this lack of completeness is the cause of as much difficulty and differences as any thing else in the building business, his words on this subject are worthy of universal notice. His argument is herewith quoted in full:

CANAL EXCAVATION IN DECEMBER.

The grand total of canal excavation to January 1st, 1914, was 215,458,272 cubic yards, leaving to be excavated 16,894,728 cubic yards. The total excavation for the month of December was 1,581,726 cubic yards. In the central division, including Culbra, the total was \$60,429 cubic yards, of which 161,000 cubic yards was removed by steam shovels from the top of the banks of Culbra cut in the zone of the slides, in order to relieve pressure, 417,807 cubic yards were taken out of the slides, and 141,000 cubic yards removed by the Culbra sluicing plant.—Sacramento Bee.

Scientifically Designed Kitchens.

By George E. Walsh, In The House Beautiful.

Until quite recently the kitchen received less attention from architects than almost any other part of the house, and their designs followed conventional lines of the past, or no lines at all, but were built in a haphazard way without much thought of convenience or suitability. We have erred in the past in both ways by building too small or too large kitchens. A revolt from the pantry-like kitchens so common in apartments led to the other extreme—large airy, oversized kitchens. A little calculation of the number of steps a housewife must take to prepare meals and serve them will show the chief objection to large kitchens. If the housewife prepares three meals a day, or 1,100 meals a year, she will walk about 20 miles in doing this work if the distance from the range to the dining room table is 25 feet. The size of the kitchen must be considered, and also the location of the range in its relationship to the position of the dining room table, the sink, pantry and other important parts of the workshop of the house.

First, consider the location of the kitchen. It should have a northern exposure as a rule, with only eastern or western windows besides those on the north. This keeps the kitchen cool in summer, while one with a southerly exposure is almost unendurably hot. The living rooms should have the southerly exposure with its flood of sunlight, but the kitchen does not need it. Proper ventilation, with windows or doors on opposite sides to give a cross draft, will keep the kitchen cool, airy and sanitary winter and summer.

The kitchen should be made as nearly square as possible, and not oblong as so many have been planned in the past. A square room saves many steps in the course of a day or week. In an oblong kitchen the range, sink or closet must be set at an unnecessary distance from the dining room, and a few steps extra to cover this space means in the course of a year a good many miles. In the modern scientifically planned kitchen the first consideration is to save steps. The kitchen should consequently be of medium size so that all parts of it can be reached with a few steps. The size must of course depend largely on the size of the house and the family. An architect who has tried to reduce the kitchen to a scientific basis, so that every unnecessary step is eliminated, estimates that for a family of five or under a kitchen ten by ten feet is of the proper size, and for larger families a kitchen twelve by twelve feet should answer all purposes, and a fourteen by fourteen size should seldom be built except for unusually large houses and families.

The arrangement of the various conveniences and useful equipments should follow some particular plan. The range should be placed in the middle of the wall next the dining room, with the door opening into the later

or a butler's pantry near to it. The sink should be placed in the middle of the wall at right angles to the range, and not opposite. The reason for this is that the housewife must pass constantly from sink to range in cooking, and the distance between the two should be cut down to the smallest space. If possible there should be placed in the wall between the sink and range the kitchen closet or pantry. By grouping these three important parts of the house laboratory close together one can cook often for hours without moving more than a step or two. If there is a gas range in the kitchen in addition to the coal stove it should have a position next to the latter, and provision must be made for this in designing the room at the beginning.

The pantry, closet or shelves adopted for a kitchen should never run down lower than within 30 inches of the floor. The upper tier should not exceed five feet. One of the hardest kinds of work in the kitchen is the constant stooping to get things out of the closet or hauling up a chair to reach some article above the head. By bringing everything within reaching distance much of the hard, back-breaking labor is eliminated. Likewise there should be some reform attempted in the kitchen range. The stove should be high enough so that the oven can be opened and closed without stooping to an unusual degree. The top of the stove should be on a level with the waist, and the oven as high up as possible. A low stove should be placed on a concrete base raised to a sufficient height to overcome its defect in this respect.

The kitchen sink should have no woodwork about it to harbor grease, dirt and germs, but should be of enameled ware or some sanitary stone or slate material. The spigots should be equipped with threads so that a short hose length can be attached for drawing water to any part of the kitchen. This will save carrying many pails of water for washing or scrubbing. Brass spigots are not as desirable as nickelled, for they are not as sanitary and they take more labor to keep clean. A combination spigot of hot and cold water is better than two separate ones, for then the temperature of the water can be regulated at any time to suit the needs.

The cost of equipping a kitchen properly must often be regulated by one's pocket book, and consequently one may not have all the modern improvements and sanitary arrangements. Where expense does not interfere, the kitchen should have a tile floor, which can be easily cleaned and is non-absorbent and perfectly sanitary. The glazed tiles are better for this purpose than the unglazed, and the prettiest shades for a kitchen are buff, browns and terra cotta. Glazed tiles, marble mosaic, terrazzo and granolithic floors are all sanitary and suitable for the kitchen, but they

all have the disadvantage of being cold to stand on. To overcome this kitchen floors made with these materials may have strips of carpet spread over them in cold weather. In recent years a good deal of effort has been expended in trying to find the ideal sanitary floor covering for model kitchens. Several of the compositions known as lignolith, monolith and asbestolith are made of wood fibre and plaster put in when in a plastic condition. They are troweled down to a smooth finish, polished and colored to suit. They are fireproof, and leave no joints or cracks where dust can collect, but the top surface in time wears off and they require revarnishing and repolishing the same as hardwood floors. They are not quite so cold to stand on as tile or cement compositions.

Tile and Cement Floors.

One did not desire a well-laid rift-sawn hard pine wood floor can be made to do good service. The chief thing is to see that it is laid on a solid foundation which will not vibrate with each tread of the foot. Then crack and joint fillers will not work loose so readily. Cracks should be filled up with some kind of good filler, and then oiled, varnished and rubbed down. A shellac finish is good, or even an oil finish. The corners of the rooms should be rounded out with a curved piece of moulding and the cracks filled. The worst places for collecting dust are in the corners and this can be avoided.

Wall papers should be rigidly banished from the kitchen walls. If tiles cannot be afforded use paint. If a hard cement plaster composes the walls several coats of white lead and oils should be applied. The wall may be grooved in lines to resemble tiles, and when a final coat of some shade of enamel paint is applied the effect is all that one can desire. Oil mixed with varnish can be rubbed into the ordinary wall until a soft yellow tint is applied, and each successive application will darken the surface a little. When the varnish is added to the oil the surface can be washed, and even steam will not discolor or affect it.

A generous hood should be placed over the kitchen range and connected with the ventilating flue, or if there is a register in the chimney connect it with that. This will carry the smoke and odors of cooking out of the room. Gas stoves have been improved in recent years, so that the odor no longer fills the kitchen as formerly, but such a range should be placed so that all possible odors can be carried up under the range hood.

Locating the Refrigerator.

In the modern sanitary and scientifically designed kitchen, the refrigerator is never placed directly into the kitchen, but is built into the wall, with an inside and outside entrance. The outside entrance is for cleaning and ventilating purposes and for putting in ice. The inside entrance is for reaching the articles stored there. On the

outside a door is made to open in two sections. The upper section is for filling with ice, and admits to no other part of the refrigerator, and the lower half is for cleaning and ventilating. If possible, the inside of the built-in refrigerator should come flush with the wall, but if this is not feasible the wall can be built out. The advantages of such an ice box are many. It is more sanitary than one in the kitchen, for the drainage is all through a pipe which drips outdoor and can be easily reached, the ice-box is always cooler, and the saving in ice is not inconsiderable, and the dirt is kept from the kitchen every time the ice-man calls. Improved built-in ice boxes have thin copper wire meshes on the outside so that the outside air can be admitted in winter, and for months at a time perfect refrigeration is obtained without the use of any ice. Even in summer the ice bill is considerably reduced by such an ice-box when located on the north side away from the sun.

Many conveniences can be arranged in a kitchen other than the above which will save time and footsteps. One in particular, suitable for summer houses, and used in some town homes, is to construct a china closet within the partition separating the kitchen from the dining room. This closet, with its series of shelves, has glass door opening on either side, one in the kitchen and one in the dining room. The china dishes most used are kept in this closet, and they can be reached equally well from either room. In addition to this, one of the shelves can be used for changing the dirty dishes or for putting food from the stove to the table. Before leaving either room the shelf can be filled with dishes and then taken off in the other room without additional steps. This double wall closet does not detract from the appearance of the dining room if finished off properly, and its double usefulness is exposed only when the door in the kitchen is opened.

A model kitchen designed by an architect in Paris has the novelty of an endless or moving platform which carries dishes and articles from the stove to the dining room and back again to the sink. It facilitates work and lessens the labor of the housewife. The hot dishes are placed on the moving shelf direct from the stove or oven. A slight push or pull of the hand carries the steaming viands through a narrow aperture in the wall to a glass closet in the dining room. By opening the door of this closet the dishes can be reached and placed on the table. Then dirty dishes are put back in the closet on the movable shelf, and another push sends them to the sink, where they are removed and washed. When cleaned the dishes are once more put on the endless platform and they are carried to the china closet to be put away for another meal. In working out this idea the French architect estimates that the movable shelf saves on an average one step in four in the preparation and serving of every meal. If this is true it should mean a saving of a walk of something like fifty miles each year.

All sorts of furniture have been invented, discarded or adopted for kitchens. Collapsible and convertible tables, and chairs which can be turned into step ladders and clothes horses,

are features of this sort of furniture. But, after all, plainness and simplicity are desirable. When articles become complicated one loses more time in operating them than they save through novel devices. An elaborate kitchen table, with drawers, shelves, hooks and sundry other devices, may look well and seem theoretically very helpful, but a plain, simple table with a few drawers will prove the most advantageous. One table so designed had to be opened in the center to reach certain articles, the inventor never realizing that it might be a little inconvenient to divide the table and open it for some article when the top was covered with numerous articles of cookery.

Local Company Secures Export Agents.

W. R. Grace & Co. Will Handle the Paint Products Sales in South America and Australia.

The Paint Products Corporation, Sharon Bldg., 55 New Montgomery St., San Francisco, has completed arrangements with W. R. Grace & Company for the marketing of their L & S Cement Paint in Central and South America and Australia.

This firm is represented, or has connections in most of the cities of Central and South America, also Australia and New Zealand, and in many European countries. The fact that Grace & Company has taken up the sale of L & S Cement paint is good evidence that the Paint Products Corporation will do a large export business.

The following letter has been issued by W. R. Grace & Company to its various agents:

L & S Cement Paint.

We are sole export agents for Central and South America, and Australia. This paint is different from all others. It meets all the requirements of a first class oil and lead paint, is better than the most expensive kinds, and it offers numerous advantages to which no other paint can lay claim. It costs less, goes further, and lasts longer.

L & S Cement Paint is not a cold water paint, but is compounded from the best obtainable linseed oil, French zinc, non-fading colors, and Portland Cement. It does not settle and is not inflammable in the containers. It is fireproof, acid proof, vermin proof, and weather proof to the fullest extent. It will not crack, blister or peel from any heat or flame. The rain cannot wash it off, the sun cannot crack or discolor it.

It adheres to any surface—wood, brick, concrete, steel, black or galvanized iron, and ready made roofing. It clings to all kinds of material as though it were a part of the material itself, giving somewhat the appearance of a cement finish. Colors of every hue can be supplied. It is guaranteed to adhere to galvanized iron better than the galvanizing coat. It is thus of inestimable value for all localities where galvanized iron, either smooth or corrugated, is used in roofing and building.

L & S Cement Paint thoroughly fills a long felt need in tropical countries,

where galvanized iron rapidly deteriorates in the moist atmosphere, and no lasting protection has ever been found in ordinary paints. Upon request we will furnish interested parties samples of galvanized iron coated with L & S Cement Paint.

L & S Cement Paint can be applied equally well with brush or spraying machine, and sets hard within 50 or 60 hours, producing a flat finish. As it does not set too quickly it covers and spreads better, and goes one-third further, than the best lead and oil. L & S Cement Paint is made in any color, from pure white to the most brilliant shades, and we can match all standard colors to a nicety.

Packing.

Cases—2 5 gallon cans; gross 142½ lbs.; net 127 lbs.

Case—1 5 gallon can; gross 72 lbs.; net 63½ lbs.

Cases—6 1 gallon tins; gross about 91 lbs.; net 76 lbs.

Barrels of 50 gallons—about 700 lbs.; net 635 lbs.

EXPOSITION NOTES.

The gigantic Palace of Machinery is completed, the Palace of Education is 95 per cent finished, and all of the eight exhibit palaces in the main group have passed the 50 per cent mark in point of completion, according to the latest report of building progress issued by Harris D. H. Connick, Director of Works of the Panama-Pacific International Exposition.

Besides the Palace of Machinery, four of the main exhibit palaces are 75 per cent or more completed and four others have passed the 50 per cent mark. It is estimated that the Palace of Education will be finished during February and that the Palaces of Mines and Metallurgy, Varied Industries and Agriculture will be completed during March.

Construction of the Idaho Building at the exposition, begun early in February, is progressing rapidly and will be completed early in March, according to present estimates. The New York Pavilion and the Canadian building also are under way.

The list of conventions to meet in San Francisco during the progress of the Panama-Pacific International Exposition now totals 212, the last convention formally booked being the National Optical Association. One convention a day for the past week is the rate at which fraternal bodies, commercial and industrial organizations, and learned societies, have signified their intentions of meeting in San Francisco during the exposition.

Announcement was made on Monday, February 2, of the Panama-Pacific International Aviation race around the world to take place in May, 1915, starting and ending on the exposition grounds. The exposition has offered a prize of \$150,000 which will be increased to \$300,000 or more by contribution from private individuals and cities along the route to be chosen.

In point of prize value, this becomes the greatest single sporting event in the history of the world. The course around the world will be patrolled by the various nations through whose

domain the route runs and across the Atlantic and Pacific by France, England and American, and by Japan respectively.

President Charles C. Moore of the exposition has been advised that both houses of the Chilean Congress have passed the appropriation bill of \$180,000 gold for the exhibit of Chile at the 1915 universal celebration. This appropriation completes the chain of principal South American Republics which have appropriated funds to participate in the exposition.

Laying of the foundation for the New York Pavillon at the Panama-Pacific International Exposition was begun February 13th. Neil A. McLean, the contractor, expects to complete the building in 200 days.

Edmund Clifton, New Zealand's commissioner to the exposition, is in San Francisco and announces that plans will be rushed for the New Zealand building.

A Stirling Calder, acting chief of the sculpture of the exposition, announces that one-third of the enlargements in heroic size of the statuary that is to adorn the Panama-Pacific International Exposition, have been completed or now are under way.

FOREST NOTES.

Receipts from the use of national forest resources were greatest in Arizona last year.

Dr. C. D. Marsh of the federal bureau of plant industry is delivering a series of illustrated lectures to stockmen in the west on the subject of plants poisonous to stock.

The Biltmore forest school, established in 1893 and therefore the oldest forest school in America, has been discontinued. Dr. C. A. Schenck, its director, has returned to his home in Germany.

The forest service is compiling a new volume table for calculating the board contents of standing western yellow pine trees in the southwest. It is based on actual measurements of 6,000 trees.

In trying to find uses for blight-killed chestnut it has been found that it can not be utilized for crating stone; quarry owners say that chestnut wood leaves an indelible stain on the marble or granite.

JAMES A. WILSON, PRESIDENT OF BUILDERS' EXCHANGE, PASSED AWAY.

James A. Wilson, one of the founders of the Builders' Exchange, died last Saturday after a very brief illness. He was buried yesterday under auspices of Mission Lodge of Masons, of which he was a Past Master.

Mr. Wilson was born 55 years ago, coming to San Francisco at an early age and identifying himself with the building industry, first as a journeyman and later as a General Contractor.

Mr. Wilson was recognized as the

guiding genius of the Builders' Exchange, serving that body as Secretary for fifteen years and as President for the past two years, which position he filled at the time of his death.

No important gathering of the Con-

tractors was ever complete without the attendance of Mr. Wilson, whose wit, humor and sound judgment were always in demand.

The Exchange has lost one of its most valued members.

ANNUAL BANQUET SHEET METAL CONTRACTORS ASSOCIATION OF S. F.

The recent banquet held by the Sheet Metal Contractors Association of San Francisco was attended by almost the entire membership. Those who did not attend are out and injured, because the affair was a glorious success from the opening cock tail to the closing black coffee and cigars.

The affair was held in the beefsteak room of the Hof Brau Cafe. When once in the room you feel that you are in the country, because the room is a typical reproduction of a country barn. It must be seen to be appreciated. And the banquet too was unique because it was simple and solid. Just the kind of a dinner a healthy, vigorous sheet metal worker likes to put under his belt. Here is what the boys got for their money:

MENU.

Martini Cocktail	Radishes
Combination Salad	
Consomme with Rice	
Celery	Olives
Filet of Sole, Tartar Sauce	
Jullienne Potatoes	
Pounded Ramp Steak a la Hof-Brau	
Ice Cream	Assorted Cakes
Cheese	Coffee
Red and White Wine	
Good fellowship reigned supreme under the guidance of Toastmaster H. J. Hughes, who kept the revelers entertained with speeches and songs.	

One of the happy surprises of the evening was the presentation to Past President, H. J. Hughes, of a beautiful clock in recognition of his valuable services as President.

Addresses were made by President Geo. Forderer, Vice President, Chas. J. McDonnell, R. B. Moore, President of the Building Trades Employers Asso-

ciation; Wm. E. Hague, Secretary of the General Contractors' Association; Mr. Meyers of Berger Carter Co.; M. C. Kidder of the Accident and Insurance Board, etc.

Songs were sung by Miss Jessie Dale, Messrs. Wm. E. Hague, Otis Johnson, L. A. Larsen, etc. Everybody expected Thos. Gullifoy to sing "Red Wing," but he disappointed everybody—said he forgot his music.

In addition to the above members the following were also present, viz.:

Chas. Amsler, Chas. F. McDonnell, T. J. Topper, Thos. Gullifoy, Thos. Comyns, Wesley Heldt, Chas. Conlin, Chas. Morrison, T. Lahaye, Jos. Schwartz, J. A. Korell, Wm. H. Yates, A. G. Overpack, W. A. Clauser, Ideal Cornice Co., R. W. Glenn, Mr. Meyer of Berger Mfg. Co., Mr. Emanuel and Ray Nolan of Pacific Hardware & Steel Co., a representative from Holbrook, Merrill & Stetson.

The annual report read by Secretary Geo. S. McCallum showed the association had done fine work for the members, both in State and Civic Legislation, and the association was in a very healthy financial condition.

The following are the officers of the Association:

Officers

George Forderer, President; Chas. McDonnell, Vice-President; Geo. S. McCallum, Secretary.

Executive Committee

H. J. Hughes, T. Lahaye, Arthur Conlin, Thomas Comyns and Chas. Amsler.

Banquet Committee

H. J. Hughes, Wesley Heldt, Geo. S. McCallum.

Toastmaster

H. J. Hughes.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, brick. Cost not stated. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. H. Herbert. The building will be erected at the corner of Clay and Jones streets, and will contain a number of three and four room suites with baths and wall beds. Interiors will be finished in pine and redwood with some elm panels. There will be steam heat and a hot water system. The owner has not fully decided on whether to make the structure a three-story frame or add one more story and make it a brick building. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with either pressed brick or cement plaster on metal lath. Figures are being taken on the foundation work.

SAN FRANCISCO—Apartment house, 4 story and base, brick, \$20,000. Architect, Edward E. Young, 251 Kearny street, S. F. Owner Herman Hogrefe. The building will be erected on the east side of Leavenworth street south of Sutter, covering an area of 25 by 84 feet. Plans provide for eight large apartments. Interior finish will be of pine and redwood with elm panels and oak floors. There will be steam heat and a hot water system. An automatic elevator may be installed. Bath rooms will have the wainscot and composition floors. All suites will be equipped with wall beds. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Apartment house, 7 story and base, reinforced concrete, \$150,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected at the corner of Powell and California streets and will cover a large ground area. Construction will be of reinforced concrete type and throughout and will be practically fireproof. There will be but two suites on each floor, the apartments varying from eight to nine rooms. Interiors will be handsomely finished in pine and selected hardwoods to suite the taste of the occupant. All suites will have wall beds, private bath rooms and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. There will be a steam heating system, hot water supply and vacuum cleaning. Marble and tile will be used extensively. Exterior of the building will be faced with white cement plaster in imitation of cut stone. Plans are now complete and figures are being taken. All parts of the work will be segregated.

SAN FRANCISCO—Apartment house alterations, frame construction, \$3,000. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name not given. The three-story building located on Sacramento street west of Jones will undergo extensive alterations, and will be made into a first-class apartment house structure. Included in the work will be new interior partitions, plumbing,

plastering, painting, mill work and electric work. Exterior of the building will also be altered. Marble and tile will be used in the entrance. Plans are complete and figures have been taken. A general contract will be let within a few days.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$30,000. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner's name withheld. The building will be erected on Perkins street at the corner of Grand avenue and will cover a considerable ground area. There will be a total of 66 rooms in the building, which are to be arranged in two, three and four room suites, all with private bath and wall beds. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living rooms. Plans provide for steam heat and a hot water system. Marble and tile will be used in the entrance. Bath rooms will have the wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath, rustic and shiplap. Plans are now being prepared.

STOCKTON, SAN JOAQUIN CO., CAL.—Apartment house alterations, 2½ story and base, frame. Cost not stated. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, A. B. Munson. The present 2½ story frame residence located on Pilgrim street at the corner of South will be extensively altered and arranged for two and three room apartments, which will be equipped with all modern conveniences. The work will require new interior partitions, plastering, plumbing, painting and electric work. New interior finish and considerable exterior alteration will also be made. Plans are complete and figures are now being taken.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$25,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, The Eisenbach Co. The building will be erected on Leavenworth street between Turk and Eddy streets. Plans are arranged for stores on the first floor and a number of two and three room suites on the two upper floors. There will be steam heat and a hot water supply. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Interior of the apartments will be finished in pine with some oak floors and elm panels. Exterior of the building will be faced with cement plaster. Plans are now nearly complete.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$25,000. Architect, John Carson, Bacon Bldg., Oakland. Owners, Loewe and Fause. The building will be erected at the corner of 10th and Madison streets. Interior will be arranged for a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and redwood with some elm panels. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot

and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are nearly complete and work will shortly be started by Day Labor. All materials are now being purchased.

BATH HOUSES.

Contracts Awarded.

SAN RAFAEL, MARIN CO., CAL.—Bath house, 2 story and base, reinforced concrete. Cost not stated. Architect, Thomas O'Connor, San Rafael. Owners, City of San Rafael. Contractor, J. A. Kappennann, Jr., San Rafael. Contract price, \$31,300.

BRIDGES AND DAMS.

SAN FRANCISCO—Creosoted pile. Cost not stated. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans are complete for furnishing a large number of fresh-cut, first-quality Douglas Fir piles which have been treated, according to specifications, with creosote. Bids for this work will be opened on March 5th. Plans and specifications and full particulars can be secured by applying to the State Board of Harbor Commissioners, Ferry Bldg. An official proposal appears in another column of this issue.

KINGS RIVER, FRESNO CO., CAL.—Wagon bridge, pile and timber construction. Cost not stated. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed and have received the approval of the Fresno County Supervisors for the construction of a wagon bridge over the Kings River near Reedley. The bridge will replace the one recently washed out by the heavy rains. Bids have been advertised for and will be opened on March 6th. Plans and specifications can be secured from the County Clerk at Fresno.

VANCOUVER, B. C.—Viaducts, reinforced concrete and steel, \$350,000. Engineer, City Engineer, Vancouver. Engineer, City Engineer, Vancouver. Owners, City of Vancouver. Plans have been completed and are now out for figures for the construction of the four east viaducts which are to span the Great Northern tracks at Hastings, Bender, Keefe and Harris streets. Bids will be received on March 4th and may be addressed to City Clerk W. McQueen. Separate bids will be received for each viaduct and also for the work as a whole. Plans and specifications can be secured from the office of the City Engineer, Vancouver.

CHURCHES.

WALLA WALLA, WASH.—Mausoleum, 1 story, reinforced concrete, \$100,000. Architect, W. Marbury Somerville, White Bldg., Seattle. Northwest Mausoleum Co. Contractors, Cornell Bros., Savage-Seafeld Bldg., Tacoma. Contract price, \$100,000. Note: Cornell Bros. will construct all buildings to be erected by the Northwest Mausoleum Company in Washington and Oregon. The company now has under consideration mausoleums in several of the large cities and towns in the two states mentioned.

FACTORIES & WAREHOUSES.

OAKLAND, CAL.—Ice and cold storage plant, 1 and 2 story, brick. Cost not stated. Engineers, Paget Engineering Co., 354 Pine street, S. F. Owner's name withheld. The building will be erected in a district close to spur track facilities and adjoining the commission district. Besides the cold storage plant the buildings will house a complete ice making plant. Interior will be finished in pine. There will be cement floors and metal window sash and frames. Special cold storage machinery and ice making plant will be installed. Exterior of the building will be faced with stock brick. Further mention will be made of this work when plans are ready for figures.

1 and 2 story, brick. Cost not stated. Oakland, Cal. Engineers, Paget Engineering Co., 354 Pine street, S. F. Owner's name withheld. The building will be erected in a district close to spur track facilities and adjoining the commission district. Besides the cold storage plant the buildings will house a complete ice making plant. Interior will be finished in pine. There will be cement floors and metal window sash and frames. Special cold storage machinery and ice making plant will be installed. Exterior of the building will be faced with stock brick. Further mention will be made of this work when plans are ready for figures.

Contracts Awarded.

PORTLAND, ORE.—Creamery, 2 story and base, reinforced concrete, \$22,000. Architects, Emil Schaacht & Son, Commonwealth Bldg., Portland. Owners, Townsend Creamery Co. Contractors, Boye-John-Arnold Co., Panama Bldg., Portland. Contract price, \$22,000.

FLATS.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$3,000. Architect, none. Owner, H. R. Picken, 1412 Guerrero street, S. F. The building will be erected on the south side of Welsh street, covering an area of 20 by 46 feet. Interior will be arranged for two modern flats of five rooms and bath. Interior finish will be of pine and redwood with oak floors in the living and dining rooms. There will be open fire places and tile mantels. Tile wainscot will be used in the bath room and kitchen. Entrances will be finished in terrazzo. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

SAN FRANCISCO.—Flats, 3 story and base, frame, \$6,500. Architect, J. A. Porporato, 619 Washington street, S. F. Owner, M. M. Porporato. The building will be erected on the east side of Leavenworth street south of Union. The building will have a frontage of 25 feet and a depth of 50 feet. There will be three modern four and five room flats with baths. Interior finish will be of pine and redwood. Each living room will have an open fire place with tile mantel. Bath rooms will have tile wainscot and composition floors. Thirty-gallon boilers are specified. Oak floors will be used in the living and dining rooms. Entrance

will be finished in mosaic. Exterior of the building will be covered with rustic and shiplap. A pressed brick base will be used. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO.—Flats, 2 story and base, frame, \$4,500. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, F. Hock. The building will be erected on the north side of Anza street east of 9th avenue, covering an area of 25 by 61½ feet, and has been arranged for two modern flats. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be two open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed in each flat. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

SAN FRANCISCO.—Flats, 3 story and base, frame, \$6,000. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner, D. Cavallieri. Contractor, N. P. Anderson, 320 Market street, S. F. Contract price, \$6,000.

GARAGES.

Contracts Awarded.

ST. HELENS, ORE.—Garage, 2 story and base, brick and concrete, \$20,000. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owner, Columbia Country Auto Club. Contractor, W. B. Donahue, 869 East 13th street, North Portland. Contract price, \$20,000.

GOVERNMENT WORK AND SUPPLIES.

Steel for Coaling Plant.

In connection with bids to be opened March 28 at the bureau of yards and docks for erecting structural steel work for coaling plant at Pearl Harbor the specifications state as follows:

General Intention.—It is the acknowledged intention and meaning to provide and secure the erection and painting of all the structural steel work shown upon the plans, ready for placing upon it the railway and coal-hoisting tower tracks; two movable coal chutes are also to be installed in complete working order. The piers in the coal basin will be of concrete and will be built by the government ready to receive the trusses. The government will also build all piers for the trestle towers and will furnish and set all anchor bolts and furnish and install all ties, tie fastenings, rails, splices, spikes, frogs, switches, etc.

General Description.—The work comprises a steel trestle on the main wharf for carrying the rails to support coal-hoisting towers of 30-foot gage, center to center of rails, and a standard gage railway track, supported by brackets extending beyond the outboard trestle columns. There are also trestles on the approach piers carrying the standard gage railway track and connecting with shore trestles, which in turn connect with six lines of single track over the coal basins. On the shore, with the exception of the trestles over the coal basins, the track girders are supported on braced steel towers.

Girder ends over the coal basins are to be carried by concrete piers to be built by the government. At the inshore track running parallel to the southerly side of the coal basin there shall be a steel trestle ramp connecting the elevated track with the surface track. Two large portable coal chutes hung to steel frames, supported upon wheels running upon a rail on the wharf floor are to be installed; the chute frames are to be held near their upper end by trolleys bearing against the flanges of a horizontal longitudinal girder fastened to the outboard column brackets. The power for operating the chutes shall be manual.

General Dimensions.—The trestle on the main wharf is 460 feet long, center to center of end posts on the wharf.

The curved trestle on the south approach wharf to the main pier is about 200 feet long and 15 feet wide, center to center of columns.

The trestle on the north approach to the main pier is about 200 feet long and 15 feet wide, center to center of columns.

On shore outside of the coal basin there is about 1,000 feet of straight elevated track and about 700 feet of curved track; over the basin there is about 2,700 feet of straight elevated track and about 2,000 feet of curved track. The total amount of elevated trackage, including wharf and approaches, is about 7,600 feet.

San Francisco Circular No. 122.

The following proposals were received by the depot quartermaster, San Francisco, Cal., under office circular No. 122, for 65,000 shingles, cedar:

McCullough Lumber Co., Royal Insurance Building, San Francisco, Cal., \$2.25 per M; delivery immediately.

Hart-Wood Lumber Co., 304 Berry street, San Francisco, Cal., \$2.20 per M; 1 day.

The Charles Nelson Co., 16 California street, San Francisco, Cal., \$2.09 per M; 1 day; accepted.

Union Lumber Co., 1008 Crocker Building, San Francisco, Cal., \$2.25 per M; 5 days.

Redwood Manufacturers' Co., 453 Bryant street, San Francisco, Cal., \$2.25 per M; 5 days.

Pope & Talbot, foot of 3rd street, San Francisco, Cal., \$2.24 per M; 1 day.

Van Arsdale-Harris Lumber Co., 5th and Brannan streets, San Francisco, Cal., \$2.09 per M; 2 days.

San Diego, Cal., Vault Shelving.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for installing metal vault shelving in the U. S. post office at San Diego, Cal.:

The Berger Mfg. Co., Canton, Ohio, \$1.122.

The H. H. Shults Co., Gowanda, N. Y., \$1.298.

Art Metal Construction Co., Jamestown, N. Y., \$1.400.

The Van Dorn Iron Works, Cleveland, Ohio, \$1.400.

Crown Metal Construction Co., Jamestown, N. Y., \$1.454.

Pearl Harbor, H. T., Structural Steel.

The following bids were received by the chief of the bureau of yards and docks, Navy Department, Washington, D. C., for fabrication and delivery of structural steel for five shop buildings

at the U. S. naval station, Pearl Harbor, H. T.:

Item 1, material, complete, in accordance with plans and specifications, f. a. s. New York; 2, do, f. a. s. Philadelphia; 3, do, f. o. b. cars manufacturer's works; 4, do, f. o. b. cars, Pearl Harbor, H. T.

Hamilton & Chambers, 29 Broadway, New York city, item 1, \$58,793; 2, \$58,440; 3, \$56,959; 4, \$72,550.

R. C. Hoffman & Co., Inc., Baltimore, Md., item 1, \$59,800; 2, \$59,200; 3, \$58,400.

United States Steel Products Co., 30 Church street, New York city, item 1, \$48,816; 2, \$48,458; 3, \$49,126; 4, \$62,530.

The Ritter-Conley Mfg. Co., Leetsdale, Pa., item 1, \$52,517.35; 2, \$52,288.50; 3, \$50,093.47; 4, \$67,984.

The McClintic-Marshall Co., 1421 Chestnut street, Philadelphia, Pa., item 1, \$54,000; 2, \$53,500; 3, \$32,500.

The Belmont Iron Works, 22nd and Washington avenue, Philadelphia, Pa., item 1, \$50,645; 2, \$50,195; 3, \$49,525; 4, \$63,425.

Problem of Naval Construction.

If the Secretary of the Navy had not been so much occupied last week with daily hearings before the House Naval Committee, he would probably have been able to give further consideration to the placing of the contracts for the construction of the supply ship and the transport, bids for which were opened on December 20, on which occasion the Newport News Shipbuilding and Dry Dock Company appeared as the lowest bidder in prices ranging from \$1,315,000 to \$1,350,000 for the supply ship and from \$1,695,000 to \$1,730,000 for the transport, according to the class of bid and place of trial. It was expected that the contract would be awarded to the Newport News firm on the basis of these bids, in accordance with the recommendation which, it was understood, was made by the chief constructor and engineer in chief. The Navy Department, however, obtained bids for the same work from various navy yards, and it now appears that Secretary Daniels is inclined to place the order for the construction of the transport at the Philadelphia navy yard in the sum of \$1,350,000, in round figures, and at the Boston navy yard for the construction of the supply ship at a cost of about \$1,047,000. The difference in amount between the navy yard estimates and the bid of the Newport News firm is such as to at once excite comment and to lead to the suggestion that the Navy Department proceed with caution in any decision which may result in building these vessels at the Philadelphia and Boston navy yards, where, it is pointed out, there are at present no facilities in the way of cranes and building ways for the conduct of this work, and it is estimated that the cost of the necessary installation will be from \$50,000 to \$75,000 at each establishment. While these facilities would be permanent and should be installed with a view of extensions so as to provide for larger ships at some future time, it is realized that the cost of the equipment must be added to the navy yard estimate. Aside from that factor, some of the advisors of the Secretary of the Navy entertain considerable doubt as to the reliability of the estimates from

Philadelphia and Boston, and this has led Secretary Daniels to call for additional information which shall reveal to the Navy Department the itemized amounts which go to make up the estimate in total. It has been remarked that of all the navy yards only those at New York and Mare Island are in a position of constructing the transport and supply ship, so far as the possession of facilities has any bearing on the projects; then, too, there is considerable doubt as to the means existing at the other navy yards for making an estimate of cost of construction upon which the Navy Department may depend. It has been freely predicted that neither the Philadelphia nor the Boston estimate represents an amount within which it will be possible to build the new vessels at those navy yards. There is no check which the Navy Department may apply at the navy yard where the work would be done so as to require that the construction shall be at a cost within the estimates given, or, for that matter, within the limit of cost imposed by Congress. Under such circumstances, in view of the unreliability of navy yard estimates and the disadvantage to which the shipbuilding firms are placed in making bids on what is obviously an unfair system of competition, it is quite evident that the shipbuilders who go to the trouble and expense of preparing bids have a right to entertain a grievance against the Navy Department. It is only natural that they should feel that the political favoritism exerted in behalf of navy yards is at their expense.

St. Mary's Canal.

The Reclamation Service is asking for proposals for construction of a portion of the St. Mary's Canal, St. Mary's storage unit, Milk River irrigation project, Mont. The work includes about 560,000 cubic yards of excavation, 7,750 cubic yards of concrete, 13,000 square yards of paving, 700 cubic yards of riprap, and 5,500 cubic yards of puddling; the placing of about 455,000 pounds of steel reinforcement bars, and 293,000 feet, board measure, of lumber in wood structures, and the erection of about 105,000 pounds of miscellaneous metal work. The work is situated in the Blackfeet Indian Reservation, about 40 miles northwest of Browning, Mont. The bids will be opened at 2 o'clock p. m. April 15, 1914, at the office of the Reclamation Service, Great Falls, Mont.

San Francisco, Cal., Mint.

The bid of the Butte Engineering & Electric Co., San Francisco, Cal., \$3,300 in amount, has been accepted for the installation of a burglar alarm system in the U. S. Mint at San Francisco, Cal.

Washington Office, Panama Canal.

On and after April 1 next the office of the Isthmian Canal Commission in this city will be practically abolished and will thereafter be known as the Washington office of the Panama Canal. Major F. C. Boggs will remain in charge of the office. It is not expected that any immediate change will be made in the office force.

Walla Walla, Wash., Vault Shelving. The contract for installing metal

vault shelving in the U. S. post office at Walla Walla, Wash., has been awarded to Crown Metal Construction Co., Jamestown, N. Y., at \$782.60.

Metal Flumes.

The Reclamation Service is asking for proposals for furnishing and erecting metal flumes on irrigation projects in Montana, Wyoming and North Dakota. The work involves the furnishing of about 7,357 linear feet of flumes of various diameters, ranging from 2 feet 6 1/2 inches to 14 feet, and the erection of about 3,950 linear feet of flume of 8 feet 3 1/2 inches diameter. The bids will be opened at 2 o'clock p. m. March 9, 1914, at the office of the Reclamation Service at Great Falls, Mont.

Grand Junction, Colo., Post Office.

All bids received by the supervising architect, Treasury Department, Washington, D. C., for the construction, complete, including mechanical equipment of the U. S. post office at Grand Junction, Colo., have been rejected.

Roller Dams.

Under authority of the Secretary of the Interior, contract has been awarded for furnishing roller dams to constitute a movable crest for the Grand River dam of the Grand Valley irrigation project, Colo. The apparatus includes one steel roller 60 feet in length and six rollers 70 feet in length, complete, with all operating devices, except electric motors, the total cost being \$27,846 f. o. b. Antwerp. The roller dams covered by the patents under which this apparatus is to be manufactured are of the most satisfactory type available for movable crests of the lengths required in this case. In 1912 a similar contract was executed for the manufacture of a roller weir for the diversion dam of the Boise project, Idaho, and the apparatus furnished has in every way met the expectations of the engineers and has given excellent work.

HALLS & SOCIETY BLDGS—

SAN FRANCISCO—City Hall work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been completed and are now out for figures on the electric work, installation of vacuum cleaning system and pneumatic tubes. This work will be figured as a whole. Bids are also being called for on the furnishing of a water supply to the City Hall. Bids for this work and that above mentioned will be opened on March 4th by the Board of Public Works. Official proposals appear in another column of this issue. Plans and specifications can be secured from the Board of Public Works.

SAN MATEO, SAN MATEO CO., CAL.—City Hall, 2 story and base, reinforced concrete, \$40,000. Architects, Havens & Toepke, 46 Kearny street, S. F. Owners, City of San Mateo. Bids opened for this work show Caldwell & Wisnom low on the general construction at \$32,128; Snook & Co. low on the plumbing and heating at \$4,957, and J. F. Killelea low on the painting at \$1,690. Contracts will probably be awarded these firms. A complete list of the

bids received will be found under the heading of San Jose and the Santa Clara Valley in this issue.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$75,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor, having a frontage of 27½ feet and a depth of 137½ feet. There will be two stories besides the hotel entrance, office and lobby on the first floor. Upper six floors will contain a total of 66 rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service, a vacuum cleaning plant, hot water supply and metal window sash and frames. Entrance and lobby will be finished in marble and ornamental plaster. Exterior of the building will be faced with dark red pressed brick trimmed in heavy white ornamental terra cotta. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete. Cost not stated. Architect, L. Mastropasqua, 580 Washington street, S. F. Owner, Nicola Capurro, 1351 Grant avenue. The building will be erected at the southeast corner of Broadway and Bartol Place and will cover an area of 40½ by 57½ feet. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for a number of guest rooms and public baths. All interior finish will be of pine and redwood. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SEASIDE, ORE.—Hotel and stores, 2 story and base, reinforced concrete, \$50,000. Architect, P. Manson White, Seaside. Owners, Alex Grant and Son. The building will be erected on a corner site and will cover an area of 170 by 174 feet. There will be fourteen stores on the first floor. An uncompleted wing in the rear 98 feet in length is also included in the plans. Second floor will contain a total of 92 guest rooms and a number of offices. Plans provide for steam heat and a hot water system. Interior will be finished in pine throughout. There will be a cement first floor, patent store fronts and metal window sash and frames. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

FRESNO, FRESNO CO., CAL.—Hotel alteration, 3 story and base, brick, \$19,000. Architect, E. A. Mathewson, Forsythe Bldg., Fresno. Owner, H. Graff. The present building located on K and Kern streets will be rearranged and upper floors partitioned off for modern hotel rooms and baths. The first floor will be arranged for stores. Work will include interior partitions, plastering, painting, plumbing, mill work, electric work and hot water system. Marble base and patent store fronts will be used. Exterior of the

building will be faced with cement plaster. Plans are being prepared.

SAN FRANCISCO—Hotel and stores, 6 story and base. Class C construction, \$125,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, P. J. Gartland. The building will be erected at the southwest corner of Geary and Larkin streets, covering an area of 76 by 120 feet. There will be several stores on the first floor besides the hotel lobby and office. Upper floors will be arranged for a number of guest rooms, a large percentage of which will have private baths. Interior will be finished in pine and Janesboro, with ornamental plaster and tile wainscot in the lobby. Plans provide for steam heat, a hot water system, elevator service and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Hotel and stores, 7 story and base, brick and steel, \$80,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Roger Coit. The building will be erected at the northwest corner of 14th and Harrison streets, and has been designed to contain several stores on the first floor while upper floors will be arranged for a total of 80 rooms and baths. Interior finish will be largely of pine with some hardwood and ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the stores and hotel lobby. Exterior of the building will be faced with pressed brick. All work will be carried on under the superintendence of F. A. Muller, Syndicate Bldg., Oakland, and he has already let contracts for the excavating and grading to J. M. Yunker and F. M. Maestratti, and a contract for the steel to the Central Iron Works. Figures are now being taken on the balance of the work.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Exposition building, 1 and 2 story, frame and plaster. Cost not stated. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Working drawings for the exhibit building which is to be erected by the Territory of Hawaii at the Panama-Pacific International Exposition have been completed and received the approval of the Hawaiian Commissioners. Bids will be advertised for as soon as official word can be secured from Honolulu. Further mention will be made of the building at that time.

SAN FRANCISCO—Court of Abundance, 2 story, frame and plaster. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Working drawings for the building which is to be known as the Court of Abundance have been completed and are now out for figures. Bids will be opened by the Buildings and Grounds Committee on March 3rd. Plans and specifications can be secured from the Director of Works, Service Bldg., S. F.

An official proposal appears under another heading in this issue.

POST OFFICES.

BERKELEY, ALAMEDA CO., CAL.—Post office, 2 story and base. Class A construction. Cost not stated. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. Bids opened in Washington on February 18th for the construction of this building show Frank Gallagher of San Francisco low on propositions 1 and 2 as follows, \$122,500 and \$122,400. Van Sant-Houghton Co., also of San Francisco, were low on propositions 3 and 4 as follows, \$128,000 and \$128,000. No contract has been awarded. A complete list of the bidders as received by special wire from the Supervising Architect's office will be found under the heading of Oakland and Alameda County in this issue.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad construction. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Supervisors has instructed the Board of Works to complete plans and advertise for bids for constructing the following municipal street railroads: Commencing at Van Ness and Market street, thence on Van Ness to Chestnut, thence on Chestnut to Scott, thence on Scott to Greenwich, thence on Greenwich to Steiner, and thence on Steiner to Union street. An official proposal will be published as soon as working drawings are completed.

SAN FRANCISCO—Car barn addition, 2 story and base, reinforced concrete, \$159,663. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last Wednesday meeting of the Board of Public Works for the construction of an addition to the Municipal Car Barn show James L. McLaughlin, 244 Kearny street low at \$159,663. A contract will probably be awarded to Mr. McLaughlin. A complete list of the figures submitted appears under the heading of San Francisco in this issue.

Contracts Awarded.

BAKERSFIELD TO MOJAVE, CAL.—Railroad construction, \$7,000,000. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractors, Majave and Bakersfield Railway Construction Co. Contract price, \$100,000 per mile including tunnels and bridges. Total miles 69.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$1,500. Architect, Joseph A. Leonard, 85 Cerros street, S. F. Owners, Urban Realty Co. The dwelling will be erected on Soto street near Urbano Drive, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the

living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Ralph J. Button, 1212 4th avenue, S. F. The dwelling has been designed to contain six rooms and bath, and will be erected on the east side of 26th avenue 125 feet north of Irving. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be an open fire place and tile or brick mantel. Bath room and kitchen will have some tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO — Residence, 2 story, attic and base, frame, \$20,000. Architect, Charles J. Colley, Pacific Bldg., S. F. Owner, Mrs. S. Lovegrove. The dwelling will be erected at the northwest corner of Washington and Presidio avenue, and has been designed for a modern city home containing twelve rooms, baths and sleeping porch. Interior finish will be largely of hardwoods and pine. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, probably furnace heat, open fire places and vacuum cleaning. Bath rooms will be finished in tile. Mantels will be of tile and brick. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and a general contract will shortly be awarded.

BUILDING.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals, plainly marked on the outside of the sealed envelope "Proposals for Brick Cottage Dormitories at Pueblo Bonito Indian School, N. Mex.," and addressed to the "Commissioner of Indian Affairs, Washington, D. C.," will be received at the Indian office until 2 o'clock p. m.

of March 19, 1914, for furnishing materials and labor for the construction of three brick cottage dormitories at the Pueblo Bonito Indian School, N. Mex., in strict accordance with plans, specifications and instructions to bidders, which may be examined at the office of the paper or periodical in which this advertisement appears, the U. S. Indian warehouses at Chicago, Ill.; St. Louis, Mo.; Omaha, Neb.; and San Francisco, Cal., and at the Pueblo Bonito Indian School. For further information apply to the superintendent of the Pueblo Indian School, Crownpoint, N. Mex. CATO SELLS, commissioner.

NOTICE FOR BIDS.

THE BOARD OF TRUSTEES of the Sanger Union High School District will receive sealed proposals at the High School Building, Sanger, California, up to but not later than 2 o'clock P. M. on Friday, the 13th day of March, 1914, for the construction of a brick high school building for the said school district to be erected upon a tract of land in the town of Sanger. The building to be constructed is to be constructed according to the plans and specifications prepared by Swartz, Hotchkin & Swartz, architects, which have been adopted by the Board of Trustees.

Plans and specifications may be had from the architects, room 619 Rowell Building, Fresno, Cal. Deposits of ten Dollars will be required from contractors receiving plans and specifications from the architects.

All bids for general construction of the building must be accompanied by a certified check on some solvent bank in the amount of Three Thousand Dollars (\$3,000.00) in favor of J. J. Edgar, clerk, as a guarantee that the person whose bid is accepted, will within ten days after the acceptance of the bid and awarding of the contract, execute a contract for the construction of the building and give approved bonds for the faithful and complete performance of the contract as required by law.

Separate bids will be received for the construction of the heating and ventilating system which bids must be accompanied by a certified check in the amount of Five Hundred Dollars (\$500.00) on conditions above stated.

The Board reserves the right to reject any and all bids without recourse.

Clerk of the Board of Trustees of the Sanger Union High School District.

NOTICE TO CROSBOTING PLANS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, Cal., February 17, 1914.

SEALED PROPOSALS or bids will be received at this office at or prior to 11 o'clock A. M. on Thursday, March 5, 1914, for furnishing and delivering at ship's tackle, San Francisco, croseots in accordance with the specifications on file in the office of the Assistant State Engineer, and adopted by the Board, February 5, 1914, and on file in this office, to which special reference is hereby made.

The piles must be fresh cut, first quality Douglas yellow fir piles, the croseots must be made of good quality making bituminous coal gas, and the piles to be impregnated with not less than twelve (12) pounds of croseote per cubic foot. The croseote must be of the heavier black oils must not be less than 7/8 inches at any place into the outer surface of the piles.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the bid, based on a delivery of 110,000 feet of piling; such check to be made payable to the order of the Board of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail to execute the contract, the amount of the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed to be a forfeiture of the bid, for such failure and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The successful bidder to file a bond in such sum as the Board may deem adequate with two or more sureties to be approved by the Board of State Harbor Commissioners and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board and to the Board of Supervisors and said bond shall also be effective as provided in an act approved May 1, 1911, for the protection of material men, mechanics and laborers.

Bids will not be considered by this Board unless delivered to the Secretary or to the assistant secretary at or prior to 11 o'clock A. M. on Thursday, March 5, 1914, at which time and place bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Bidders are requested to mark envelope containing bid "Bid for furnishing Creosoted Timber."

Secretary. (*)

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock A. M. on Monday, March 2, 1914, for constructing a bridge over the Canyada road near Woodside, Third Road District, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 3, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said County in an amount not exceeding the contract price, or to enter into a written contract with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,

County Clerk.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock A. M. on Monday, March 2, 1914, for constructing a reinforced concrete bridge over the La Redwood City road at Woodside, in the Third Road District, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 3, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as

liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said County in an amount not exceeding the contract price, or to enter into a written contract with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,

County Clerk.

PROPOSALS FOR MAGAZINE BUILDING.

BUILDING - Sealed proposals for the construction of a Magazine Building, will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C. until 11 o'clock A. M. March 7, 1914, and then they will be publicly opened, for one brick and concrete magazine with structural steel roof framing at the navy yard, Mare Island, Cal. Estimated cost, \$12,000. Plans and specifications can be obtained on application to the bureau or to the commanding officer of the navy yard named. H. R. STANFORD, chief of bureau.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock A. M. on Monday, March 2, 1914, for constructing a reinforced concrete bridge on the La Honda-San Gregorio road across creek separating the Third and Fourth districts, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 3, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned, Clerk of said Board of Supervisors, same to be forfeited to the County of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the Chairman of the Board of Supervisors of said County in an amount not exceeding the contract price, or to enter into a written contract with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard, to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids.

JOS. H. NASH,

County Clerk.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 218, in the Merchants Building, Fillmore and Chestnut Streets, San Francisco, California, at 3:00 P. M. Tuesday, March 3, 1914, for Constructing the specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Electric Wiring, Gas and Water, Steam, Gas and Drain Piping.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount of the bid, or the same will be considered void. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposals, and the check will be returned upon the successful bidder signing the contract and filing the required bond. A bond in the sum of fifty per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, 1100 Fillmore and Chestnut Streets, San Francisco, and the sum of \$50.00, which amount will be refunded to contractors submitting bona fide bids. All persons submitting plans and failing to submit bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

By order of the Buildings and Grounds Committee.

WILLIAM H. CROCKER,
Chairman. (*)

NOTICE TO ARCHITECTS.

For the benefit of architects inquiring concerning plans for a new brick school building to be erected in Chico School District, the Board of Education of the City of Chico in and for Chico School District hereby invite architects to submit designs for a school building that shall furnish the last mentioned minimum accommodations as a minimum requirement. The Board of Education shall judge and select the best plan. It is especially understood that no premium or award shall be offered for any design submitted. The accepted plan shall become the basis and plan from which the building shall be erected.

Plans for the proposed new Oakdale grammar school building shall be made to the scale of 1/4 inch to one foot, and shall consist of the following drawings:

Foundation plan.
Basement story plan.
Main floor plan.
Second story plan.
Roof plan, and a longitudinal and a transverse section, four elevations, front, rear and both sides. The proposed building to be combined elementary and grammar school for approximately 400 pupils, half boys and half girls. The building shall be two stories and basement in height—not fewer than twelve class rooms size 24x32x2 about 14 feet high. In the basement, each class room with built-in bookcases, not less than 12 cu. ft. inside. One office. One library well provided with shelving. One auditorium with seating capacity not less than 600. Two basement rooms for manual training. Two basement rooms for domestic arts. Two basements for plumbing, for water and gas. Entrances, for electricity. Basement to contain heating plant for auditorium, and a room for bicycle and toilet system other than for teachers use installed. Small lavatory and drinking fountain must be on each floor.

Plans shall be completely and accurately figured with all necessary dimensions and spacings, and thickness of wall in each story shall be clearly indicated. Specifications shall be complete, and shall accurately describe all materials and labor required in the construction and finishing of the building. Each architect who submits plans shall furnish the secretary of the Board of Education TWO complete sets of plans and specifications as above enumerated, on or before the 1st of March, 1914, and one of the sets furnished by the successful architect shall be kept on record from the date of and following the selection by the Board of Education of such plans and specifications for use in the construction.

struction of a public building. The successful architect will be required to finally furnish four full sets of plans and specifications, and four full sets of blue-print detail drawings. Full-size detail drawings for all mill work, stair work, and other parts of the proposed structure shall be furnished and delivered to the board by the successful architect within three weeks from the date of the official adoption of the plans for the building.

In case the successful architect becomes the superintendent of construction of the building, the Board will allow as an entire compensation 6 per cent of the contractor's price of the building exclusive of furnishing and fixtures. In case the architect does not become the superintendent of the building construction, then compensation of 6 per cent shall be divided between the architect and building superintendent in accordance with the prescribed rules for architect's fees. The entire compensation of the successful architect is to be dependent upon the cost of the building without change in plans or specifications, from original filed copies, the total cost, as shown by regular bids from reliable contractors, not to exceed the sum of \$30,000. In case the board fails to get a bid from a reliable contractor to erect the proposed building for \$30,000 or less, then the architect furnishing the plans, etc., shall forfeit all claim to any compensation whatever for his plans and specifications, etc.

CHAS. H. CAMPER,
Secretary Board of Education,
City Hall, Chico, Cal. (*)

PROPOSALS FOR CONSTRUCTING

REINFORCED CONCRETE BRIDGE.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, to the effect of 10 o'clock a. m. on Monday, March 2, 1914, for constructing a reinforced concrete bridge on the La Honda-San Gregorio road across creek separating the Third and Fifth road districts, per plans and specifications prepared by the County Surveyor and adopted by the Board of Supervisors on Monday, February 2, 1914, which said plans and specifications are now on file in the office of the Clerk of said Board, where same may be inspected.

All bids must be addressed to the Clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned Clerk of said Board of Supervisors, same to be forfeited to the county of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard to be used in estimating the value of extra work, if required.

The right is reserved to reject any and all bids. JOS. H. NASH,
County Clerk.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 819—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrance to the Panama Canal. Bids and proposals will be received at the office of the general purchasing officer, United States Army, Washington, D. C., on or before March 2, 1914, at which time they will be opened in public for furnishing the above mentioned tugboats. Bids and gen-

eral information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from

the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame, \$4,500. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos street, S. F. Owners, Urban Realty Co. The dwelling will be erected on Soto street near Urbano Drive, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Ralph J. Butten, 1212 4th avenue, S. F. The dwelling has been designed to contain six rooms and bath, and will be erected on the east side of 26th avenue, 125 feet north of Irving. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be open fire places and tile or brick mantel. Bath room and kitchen will have some tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story, attic and base, frame, \$20,000. San Francisco. Architect, Charles J. Colley, Pacific Bldg., S. F. Owner, Mrs. S. Lovegrove. The dwelling will be erected at the northwest corner of Washington and Presidio avenue, and has been designed for a modern city home containing twelve rooms, baths and sleeping porch. Interior finish will be largely of hardwoods and pine. Hardwood floors will be used in the principal rooms. Plans provide for a central heating system, probably furnace heat, open fire places and vacuum cleaning. Bath rooms will be finished in tile. Mantels will be of tile and brick. An automatic water heater will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and a general contract will shortly be awarded.

RESIDENCE — 2 story and base, frame, \$2,500. San Francisco. Architect, none. Owners, MacArthur Bros., 1560 Fell street, S. F. The dwelling will be erected on the east side of 5th avenue near Cabrillo, and will contain six rooms and bath. All interior finish will be of pine. Oak floors will be used in the principal rooms. Plans provide for open fire place and

tile mantel. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—4 story and base, brick. Cost not stated. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner, A. H. Herbert. The building will be erected at the corner of Clay and Jones streets, and will contain a number of three and four room suites with baths and wall beds. Interiors will be finished in pine and redwood with some elm panels. There will be steam heat and a hot water system. The owner has not fully decided on whether to make the structure a three-story frame or add one more story and make it a brick building. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with either pressed brick or cement plaster on metal lath. Figures are being taken on the foundation work.

APARTMENT HOUSE—4 story and base, brick, \$20,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, Herman Hogrefe. The building will be erected on the east side of Leavenworth street south of Sutter, covering an area of 25 by 84 feet. Plans provide for eight large apartments. Interior finish will be of pine and redwood with elm panels and oak floors. There will be steam heat and a hot water system. An automatic elevator may be installed. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Exterior of the building will be faced with pressed brick. Plans are complete and the work will be done by Day Labor.

APARTMENT HOUSE—7 story and base, reinforced concrete, \$150,000. San Francisco. Architect, C. A. Meussdorfer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected at the corner of Powell and California streets and will cover a large ground area. Construction will be of the reinforced concrete type, throughout and will be practically fireproof. There will be but two suites on each floor, the apartments varying from eight to nine rooms. Interiors will be handsomely finished in pine and selected hardwoods to suit the taste of the occupant. All suites will have wall beds, private bath rooms and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. There will be a steam heating system, hot water supply and vacuum cleaning. Marble and tile will be used extensively. Exterior of the building will be faced with white cement plaster in imitation of cut stone. Plans are now complete and figures are being taken. All parts of the work will be segregated.

APARTMENT HOUSE ALTERATIONS—Frame construction, \$2,000. San Francisco. Architects, O'Brien Bros., Clunie Bldg., S. F. Owner's name not given. The three-story frame building located on Sacramento street west of Jones will undergo extensive alterations and will be made into a first-class apartment house structure. Included in the work will be new interior partitions, plumbing, plastering, painting, mill work and electric work. Exterior of the building will also be altered. Marble and tile will be used in the entrance. Plans are complete and figures have been taken. A general contract will be let within a few days.

CREOSOTED PILES—Cost not stated. San Francisco. Engineer, Assistant State Engineer Newman, Ferry Bldg., S. F. Owners, State of California. Plans are complete for furnishing a large number of fresh-cut, first-quality Douglas Fir piles which have been treated, according to specifications, with creosote. Bids for this work will be opened on March 5th. Plans and specifications can be secured by applying to the State Board of Harbor Commissioners, Ferry Bldg. An official proposal appears in another column of this issue.

FLATS—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, H. R. Pickens, 1412 Guerrero street, S. F. The building will be erected on the south side of Welsh street, covering an area of 20 by 46 feet. Interior will be arranged for two modern flats of five rooms and bath. Interior finish will be of pine and redwood with oak floors in the living and dining rooms. There will be open fire places and tile mantels. The wainscot will be used in the bath room and kitchen. Entrance will be finished in terrazzo. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor. Materials are now being purchased.

FLATS—3 story and base, frame, \$6,500. San Francisco. Architect, J. A. Porporato, 619 Washington street, S. F. Owner, M. M. Porporato. The building will be erected on the east side of Leavenworth street south of Union. The building will have a frontage of 25 feet and a depth of 50 feet. There will be three modern four and five room flats with baths. Interior finish will be of pine and redwood. Each living room will have an open fire place with the mantel. Bath rooms will have tile wainscot and composition floors. Thirty-gallon hollers are specified. Oak floors will be used in the living and dining rooms. Entrance will be finished in mosaic. Exterior of the building will be covered with rustic and shiplap. A pressed brick base will be used. Plans are complete and work will be done by Day Labor.

CITY HALL WORK—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Plans have been completed and are now out for figures on the electric work, installation of vacuum cleaning system and system of pneumatic tubes. This work will be figured as a whole. Bids are also being called for on the

furnishing of a water supply to the City Hall. Bids for this work and that above mentioned will be opened on March 4th by the Board of Public Works. Official proposals appear in another column of this issue. Plans and specifications can be secured from the Board of Public Works.

HOTEL—7 story and base, brick and steel, \$75,000. San Francisco. Architects, Smith & Stewart, 241 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor, having a frontage of 27 1/2 feet and a depth of 137 1/2 feet. There will be two stores besides the hotel entrance, office and lobby on the first floor. Upper six floors will contain a total of 66 rooms, all of which will have private baths. Interior finish will be of pine and hardwoods. There will be steam heat, elevator service, a vacuum cleaning plant, hot water supply and metal window sash and frames. Entrance and lobby will be finished in marble and ornamental plaster. Exterior of the building will be faced with dark red pressed brick trimmed in heavy white ornamental terra cotta. Plans are nearly complete and figures will be called for shortly.

HOTEL—4 story and base, reinforced concrete. Cost not stated. San Francisco. Architect, L. Mastrospasqua, 550 Washington street, S. F. Owner, Nicola Capurro, 1351 Grant avenue. The building will be erected on the southeast corner of Broadway and Bartol Place, and will cover an area of 40 1/2 by 57 1/2 feet. There will be one store besides the hotel entrance and lobby on the first floor. Upper floors will be arranged for a number of guest rooms and public baths. All interior finish will be of pine and redwood. Bath rooms will have composition floors and tile wainscot. Plans provide for steam heat and a hot water supply. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

EXPOSITION BUILDING—1 and 2 story, frame and plaster. Cost not stated. San Francisco. Architect, C. W. Dickey, Central Bank Bldg., Oakland. Owners, Territory of Hawaii. Working drawings for the exhibit building which is to be erected by the Territory of Hawaii at the Panama-Pacific International Exposition have been completed and received the approval of the Hawaiian Commissioners. Bids will be advertised for as soon as official word can be secured from Honolulu. Further mention will be made of the building at that time.

COURT OF ABUNDANCE—2 story, frame and plaster. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Working drawings for the building which is to be known as the Court of Abundance have been completed and are now out for figures. Bids will be opened by the Buildings and Grounds Committee on March 3rd. Plans and specifications can be secured from the Director of Works, Service Bldg., S. F. An official proposal appears under another heading in this issue.

APARTMENT HOUSE—2 story and base, reinforced concrete, \$25,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, The Eisenbach Co. The building will be erected on Leavenworth street between Turk and Eddy streets. Plans are arranged for stores on the first floor and a number of two and three room suites on the two upper floors. There will be steam heat and a hot water supply. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Interior of the apartments will be finished in pine with some oak floors and elm panels. Exterior of the building will be faced with cement plaster. Plans are now nearly complete.

RAILROAD CONSTRUCTION—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. The Board of Supervisors has instructed the Board of Works to complete plans and advertise for bids for constructing the following municipal street railroads: Commencing at Van Ness and Market street, thence on Van Ness to Chestnut, thence on Chestnut to Scott, thence on Scott to Greenwich, thence on Greenwich to Steiner, and thence on Steiner to Union street. An official proposal will be published as soon as working drawings are completed.

CAR BARN ADDITION—2 story and base, reinforced concrete, \$159,663. San Francisco. Architects, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last Wednesday meeting of the Board of Public Works for the construction of an addition to the Municipal Car Barn show James L. McLaughlin, 244 Kearny street, low at \$159,663. A contract will probably be awarded to Mr. McLaughlin. A complete list of the figures submitted appears under the heading of San Francisco in this issue.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Karl Yngve, 132 Alpine street, S. F. The dwelling will be erected on Upper Terrace street and will contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the building will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Thomas Hamill, 269 25th avenue, S. F. The dwelling, which has been designed for a seven-room house, will be erected on the west side of 18th avenue north of Anza street. Interior will be finished in pine and redwood with some elm panels in the dining room. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile

wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

FLATS—2 story and base, frame, \$4,500. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, F. Hock. The building will be erected on the north side of Anza street east of 9th avenue, covering an area of 25 by 61½ feet, and has been arranged for two modern flats. Interiors will be finished in pine and redwood with hardwood floors in the principal rooms. There will be two open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed in each flat. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

HOTEL AND STORES—6 story and base. Class C construction, \$125,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, P. J. Gartland. The building will be erected at the southwest corner of Geary and Larkin streets, covering an area of 76 by 120 feet. There will be several stores on the first floor besides the hotel lobby and office. Upper floors will be arranged for a number of guest rooms, a large percentage of which will have private baths. Interior will be finished in pine and Jenassero, with ornamental plaster and tile wainscot in the lobby. Plans provide for steam heat, a hot water system, elevator service and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. The dwelling will be erected on the east side of 16th avenue north of California, and has been designed to contain six rooms and bath. Interior will be finished in pine and redwood with some oak floors. There will be an open fire place and tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PUMPING PLANT EQUIPMENT—Cost not stated. San Francisco. Engineer, City Engineer. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans are being completed for a new well and for furnishing and installing new pumps in the Municipal Pumping Station at Leland avenue. Bids will be advertised for within a week or ten days by the Board of Public Works.

UNDERTAKING PARLORS—2 story and base, frame, \$12,000. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. White. The building will be erected at the northwest corner of Sutter and Pierce streets, covering an area of 75 by 137½ feet. The entire first floor will be

given over to the chapel, office and display rooms. Upper floor will contain a modern flat of six rooms and bath. Interior finish will be of pine and hardwood. Art glass will be used in the chapel. There will be oak floors and ornamental plaster. A central heating system will be installed. Exterior of the building will be faced with cement plaster on metal lath. Working drawings are complete and figures are being taken.

Contracts Awarded.

FLATS—3 story and base, frame, \$6,000. San Francisco. Architect Charles J. Rousseau, 46 Kearny street, S. F. Owner, D. Cavalleri, Contractor, N. P. Anderson, 320 Market street, S. F. Contract price, \$6,000.

City Bids Opened.

James L. McLaughlin Low Man For Construction of Municipal Car Barn Addition, Contract Awarded.

Bids were opened at the Wednesday afternoon meeting of the Board of Public Works for the general construction of the addition to the Municipal Car Barns. The building will be of reinforced concrete and steel. The lowest figure was presented by James L. McLaughlin, 244 Kearny street, for \$159,663. Other bids received were as follows:

Municipal Car Barns.

James L. McLaughlin.....	\$159,663
M. Fisher	187,000
Clinton Fireproofing Co.....	175,500
Monson Bros.	204,458
T. W. Clenahan & Co.....	174,730
Sound Constr. & Eng. Co....	174,965

Contracts were awarded at the same meeting for the general construction of the Washington Irving School to F. M. Garden Co. at \$64,544; heating and ventilating to H. Lawson at \$2,985; electric work to the Butte Elec. & Eng. Co. at \$2,060, and the plumbing to Alex Coleman at \$4,746.

Feb. 19, 1914—E THIRTY-SEVENTH

RESIDENCE — 2 story and base, frame, \$10,000. Berkeley, Alameda Co, Cal. Architects, W. Garden Mitchell and Charles Edward Hodges, Bankers' Investment Bldg., S. F. Owner, Dr. David Hadden. The dwelling will be erected in Rock Ridge Park, and has been designed for an eight-room house with baths and sleeping porch. Interior finish will be of pine and redwood with some hardwood panels. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile floors and wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken on the work.

RESIDENCE — 2 story and base, frame, \$7,500. Oakland, Cal. Architect, William Knowles, Central Bank Bldg., Oakland, Owner, A. Vernon. The dwelling has been designed for a seven-room house and will be erected in Adams Point. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased through the office of the architect.

RESIDENCE — 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, William A. Newman, David Hewes Bldg., S. F. Owner, Mr. Davis. The dwelling will be erected in Berkeley, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some oak floors. There will be furnace heat and open fire place. Mantel will be of tile or brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central

Bank Bldg., Oakland. Owner, H. H. Jewett. The dwelling will be erected on Euclid avenue, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Plans also provide for furnace heat. An automatic water heater will be installed. Bath room will be finished in tile and will have composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$2,500. Berkeley, Alameda Co, Cal. Architect, Leonard L. Ford, 2136 Center street, Berkeley. Owner, D. J. Horgan. The dwelling will be erected at the corner of Arch and Eunice streets, and will contain seven rooms and bath. All interior trim will be of pine or redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire place. Mantel will be of tile. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,000. Piedmont, Alameda Co, Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, H. P. Houston. The dwelling will contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, \$6,000. Berkeley, Alameda Co, Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Mr. Brownlee. The dwelling will be erected at the corner of Arch and Virginia streets, and has been designed to contain eight rooms, bath and sleeping porch. Interior finish will be of pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater is specified. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now nearly complete and figures will shortly be taken.

BUNGALOW — 1 story and base, frame, \$2,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Al Wilkinson. The dwelling will contain five rooms and bath, and will be erected in the Country Club Heights. Interior will be finished in pine and redwood throughout. Oak floors will be used in two rooms. There will be a large open fire place in the living room with a tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the

house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$3,600. Oakland, Cal. Architect, none. Owners, Fedt Bros, 528 25th street, Oakland. The dwelling has been designed for a seven-room house, and will be erected on Santa Rey avenue near Rosal. Interior finish will be of pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE — 3 story and base, frame, \$30,000. Oakland, Cal. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner's name withheld. The building will be erected on Perkins street at the corner of Grand avenue, and will cover a considerable ground area. There will be a total of 66 rooms in the building, which are to be arranged in two, three and four room suites, all with private bath and wall beds. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living rooms. Plans provide for steam heat and a hot water system. Marble and tile will be used in the entrance. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath, rustic and shiplap. Plans are now being prepared.

APARTMENT HOUSE — 3 story and base, frame, \$25,000. Oakland, Cal. Architect, John Carson, Bacon Bldg., Oakland. Owners, Loewe and Fausse. The building will be erected at the corner of 10th and Madison streets. Interior will be arranged for a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and redwood with some elm panels. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be faced with cement plaster on metal lath. Plans are nearly complete and work will shortly be started by Day Labor. All materials are now being purchased.

POST OFFICE — 2 story and base. Class A construction. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Supervising Architect, Oscar Wendroth, Washington, D. C. Owners United States Government. Bids opened in Washington on February 18th for the construction of this building show Frank Gallagher of San Francisco low on propositions 1 and 2 as follows, \$122,500 and \$122,400. Van Sant-Houghton Co. also of San Francisco, were low on propositions 3 and 4 as follows, \$128,000 and \$128,000. No contract has been awarded. A complete list of the bidders as received by special wire from the Supervising Architect's office will be found under the heading of Oakland and Alameda County in this issue.

RESIDENCE — 3 story and base, frame, \$6,000. San Francisco. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Horn Building Co., 660 Market street, S. F. The dwelling will be erected on lot 1 in the Sea Cliff Tract, and will contain eight rooms and two baths. Interior will be handsomely finished in pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. San Francisco. Architect, George A. Schastey, Monadnock Bldg., S. F. Owner, Abbott Hanks. The dwelling will be erected on the Presidio wall, and has been designed to contain eight rooms, two baths and sleeping porch. Interior will be finished in pine, blue gum and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. There will be an automatic water heater and other modern conveniences. Bath rooms will be finished in tile and will have composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 1½ story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owners, East Bay Home Builders, Inc., 1754 Broadway, Oakland. The dwelling has been designed for an eight-room residence, and will be erected on the west side of Winsor street north of Lake Shore. Interior finish will be of pine, redwood and hardwood veneer. Oak floors are specified for the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials will be purchased by the owners.

RESIDENCE — 1 story and base, frame, \$3,000. Oakland, Cal. Architect, Hiram K. Lovell, South Berkeley Bank Bldg., Berkeley. Owner, Frank F. Lewis. The dwelling has been designed for a seven-room dwelling with bath and sleeping porch and will be erected on Grand avenue. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and two open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$6,500. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514

Hillegass avenue, Berkeley. Owner, J. W. McKibben. The dwelling will be erected on Piedmont avenue near Dwight Way, and has been designed for an eight-room house with baths and sleeping porch. Interior will be finished in pine, white enamel and hardwoods. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath rooms will be finished in tile and will have composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

SORORITY HOUSE — 3 story and base, frame, \$25,000. Berkeley, Alameda Co., Cal. Architect, William C. Hayes, Foxcroft Bldg., S. F. Owners, Alpha Tau Omega. This work was mentioned here several months ago when working drawings were first started. The building will cover an area of 50 by 70 feet, and will be designed for a large living room, library, study rooms and bed chambers. Interior will be finished in pine and hardwoods with oak floors in the principal rooms. Plans provide for furnace heat and large open fire places. Mantels will be of tile or brick. Bath rooms will be finished in tile. An automatic water heater will be installed. Exterior of the house will be covered with rustic and shiplap. Plans are complete and figures are now being taken.

RESIDENCE — 2 story and base, frame, \$5,500. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegass avenue, Berkeley. Owner, C. E. Miller. The dwelling will be erected on Claremont Boulevard, and has been designed to contain seven rooms, two baths and a sleeping porch. Interior of the house will be finished in pine and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and two open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 1 story and base, frame, \$2,500. Oakland, Cal. Architect, Hiram K. Lovell, South Berkeley Bank Bldg., Berkeley. Owner, Louis Bernstein. The dwelling will be erected on Grand avenue, and has been designed for a seven-room dwelling with bath and sleeping porch. Interior finish will be of pine and redwood with hardwood floors in the living room, dining room and reception hall. There will be furnace heat and open fire places. The sum of \$10 has been allowed for mantels. A Ruud water heater will be installed. Bath room will be finished in tile and will have composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HOTEL AND STORES — 7 story and base, brick and steel, \$80,000. Oakland, Cal. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Roger Coit. The building will be erected at the northwest corner of

14th and Harrison streets, and has been designed to contain several stores on the first floor while upper floors will be arranged for a total of 90 rooms and baths. Interior finish will be largely of pine with some hardwood and ornamental plaster in the lobby. Plans provide for steam heat, elevator service and a vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the stores and hotel lobby. Exterior of the building will be faced with pressed brick. All work will be carried on under the superintendence of F. A. Muller, Syndicate Bldg., Oakland, and he has already let contracts for the excavating and grading to J. M. Younger and F. M. Maestratti, and a contract for the steel to the Central Iron Works. Figures are now being taken on the balance of the work.

Award Contract On Reedley Sewer Work.

**Chambers & Heafey of Oakland Given
the Work. Five Other Contractors
Submitted Figures.**

Bids for the construction of a municipal sewer and water system in Reedley shows Chambers & Heafey of Oakland low on the work at \$27,768.45. A contract was awarded the firm. Other figures submitted were as follows:

Reedley Sewer System.

Chambers & Heafey, Oakland, \$27,768.45
N. Nickkevich, L. A., 36,073.40
Hall & Hunt, Fresno, 29,989.80
C. D. Vincent, Oakland, 31,539.00
William Heafey, S. F., 34,991.90

Bids on Water System.

Minneapolis Steel & Machinery Co.,
Salt Lake, Utah; Item No. 1 Steel tank
and tower, \$5246.
Samson Iron Works, Stockton, Cal.;
Item No. 3, \$2750.

1, \$4370; (2) \$13,780; (3) Proposition
No. 1, \$7823; Prop. No. 2, \$7121; Prop.
No. 3, \$7280; Prop. No. 4, \$6436.

The bid of E. W. Redman was ac-
cepted on Item No. 2.

The bid of Des Moines Co was ac-
cepted on Item No. 1.

Item No. 3 has not yet been decided.
The bids accepted above were the low-
est which fully complied with the spec-
ifications.

This year's appropriation for the pos-
tal service carries with it 310 million
dollars. Since the adoption of the par-
cel post and free rural delivery the
Post Office Department has become
quite a little institution.

Bids Opened For Berkeley Post Office.

WASHINGTON, D. C., Feb. 19 (By Special Wire)—Bids opened here yesterday for construction of the Berkeley Post Office, California, showed that Frank Gallagher of San Francisco was lowest on Propositions 1 and 2 and that Van Sant-Houghton, San Francisco, were lowest on Propositions 3 and 4.

Bids were called on four propositions, as follows:

Proposition No. 1—Non-fire proof construction except 1st floor and lime stone except where granite and exterior marble are required.

Proposition No. 2—Non-fireproof except first floor using sand stone.

Proposition No. 3—Fireproof except roof, which shall be semi-fireproof using lime stone.

Proposition No. 4—Fireproof except roof, using sandstone.

The following is a complete list of bidders:

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

WAGON BRIDGE—Pile and timber construction. Cost not stated. Kings River, Fresno Co., Cal. Engineer, County Surveyor, Fresno. Owners, Fresno County. Plans have been completed and have received the approval of the Fresno County Supervisors for the construction of a wagon bridge over the Kings River near Reedley. The bridge will replace the one recently washed out by the heavy rains. Bids have been advertised for and will be opened on March 6th. Plans and specifications can be secured from the County Clerk at Fresno.

HOTEL ALTERATION—3 story and base, brick, \$19,000. Fresno, Fresno Co., Cal. Architect, E. A. Mathewson, Forsythe Bldg. Fresno. Owner, H. Graff. The present building located on K and Kern streets will be rearranged and upper floors partitioned off for modern hotel rooms and baths. The first floor will be arranged for stores. Work will include interior partitions, plastering, painting, plumbing, mill work, electric work and hot water system. Marble base and patent store fronts will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

SCHOOL—2 story and base, brick and steel, \$43,500. Sanger, Fresno Co., Cal. Architects, Swartz, Hotchkin & Swartz, Rowell Bldg., Fresno. Owners,

Sanger Union High School District. The building has been designed to contain eight class rooms, assembly hall and domestic science and manual training rooms. Interior finish will be of pine with maple floors in the class rooms and assembly hall. Plans provide for a central heating system with oil burning plant. There will be vacuum cleaning and program clocks. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken. Bids will be opened on March 13th. A certified check of \$3,000 is required, and plans and specifications can be obtained from the architects on a deposit of \$10. An official proposal appears in another column of this issue.

PARENTAL SCHOOL—2 story and base, frame. Cost not stated. Bakersfield, Kern Co., Cal. Architect, Thomas B. Wiseman, Producers' National Bank Bldg., Bakersfield. Owners, Kern County. The building will cover an area of 63 by 85 feet, and will contain office, assembly hall, dining room, library and class rooms on the first floor. Upper floor will be arranged for dormitories and twelve private bedrooms. Basement will contain training shops, heating system and storage space. Interior finish will be of pine and redwood. There will be a central heating system. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

SCHOOL—2 story and base, brick, \$10,000. Corcoran, Kings Co., Cal. Architect, J. Carl Thayer, Fresno. Owners, Corcoran Union High School. The building will cover a considerable ground area and when complete will be one of the most modern and up-to-date high schools in the state. Provision has been made for a number of standard sized class rooms, assembly hall, principal's office, teachers' rooms and departments for manual training and domestic science. Interior finish will be of pine with maple floors in the class rooms. There will be steam heat with an oil burning plant. Plans also provide for vacuum cleaning and program clocks. A clay tile roof will be used. Exterior of the building will be faced with cement plaster. Plans are being prepared.

STORM WATER SEWER SYSTEM—\$125,000. Fresno, Fresno Co., Cal. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. City Engineer B. E. Cronkite has submitted complete drawings for a modern storm water sewer system covering the entire city. The engineer's estimate is placed at from \$118,000 to \$125,000. Plans will receive the approval of the City Council at the next meeting.

Contracts Awarded.

RAILROAD CONSTRUCTION—\$7,000,000. Bakersfield to Majave, Cal. Engineers, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Co. Contractors, Majave and Bakersfield Railway Construction Co. Contract price, \$160,000 per mile including tunnels and bridges. Total miles 63.

SEWER AND WATER SYSTEM—Cost not stated. Reedley, Fresno Co., Cal. Engineer's name not given. Owners, City of Reedley. Contractors, Chambers & Heafey, Oakland. Sewer work, \$27,768.45; E. W. Redman, Fresno, item No. 2 of water system, \$11,1-

966; Des Moines Bridge and Iron Works, item No. 1 of water system, \$1,950. Item No. 3 has not been decided.

THEATRE AND STORES—3 story and base, brick and steel, \$50,000. Modesto, Stanislaus Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Mr. Mensinger. The building will be erected at the corner of 10th and Main streets, and will cover an area of 64 by 155 feet. Interior will be arranged for a main auditorium and one balcony the two seating in the neighborhood of 1,500 people. Interior will be handsomely finished in pine, ornamental plaster and special decoration. Construction will be of the semi-fireproof type. Stores will have patent fronts and plate glass windows. Exterior of the building will be faced with pressed brick. A modern system of heating and ventilating will be installed. Plans are being prepared.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

BUNGALOWS AND RESIDENCES—Frame construction. Cost not stated. Sacramento, Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: Claude Speckard, 3703 Palm avenue, 1 story four room cottage, \$1,400; A. W. Casselman and Son, 3131 Olive avenue, 1 story five room cottage, \$1,100; P. F. Reed, 2613 28th street, 1 story five room cottage, \$2,750; A. L. Johnson, 2915 1/2 31st street, 2 story six room house, \$2,800; J. Boehenek, 425 O street, 1 story five room frame cottage, \$1,500; O. H. Moore, 2903 35th street, 1 story five room cottage, \$1,600, and D. La-morne, 4219 Stanford street, 1 story five room frame cottage, \$1,400.

COTTAGE—1 story and base, frame, \$2,500. Stockton, San Joaquin Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owner, E. N. Piers. The dwelling will contain six rooms and bath. Interior finish will be of pine and redwood with oak floors in the living room and dining room. There will be a large open fire place and tile or brick mantel. The water closet will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are being prepared. Exterior of the house will be covered with rustic. Plans are being taken.

APARTMENT HOUSE ALTERATIONS—2 1/2 story and base, frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows Bldg., Stockton. Owner, A. B. Munson. The present 2 1/2 story frame residence located on Pilgrim street at the corner of South will be extensively altered and arranged for two and three room apartments, which will be equipped with all modern conveniences. The work will require new interior partitions, plastering, plumbing, painting and electric work. New interior finish and considerable exterior alteration will also be made. Plans are complete and figures are now being taken.

HIGH SCHOOL—2 story and base, reinforced concrete, \$150,000. Eureka, Humboldt Co., Cal. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Eureka High School District. Bids opened for this work show Robert Trost low at \$113,510; T. C. Caldwell next at \$114,500, and the Clinton Fireproofing Co. next low at \$114,750. Rob-

ert Trost will probably be awarded the contract.

HIGHWAY CONSTRUCTION—Cost not stated. Mendocino County, Cal. Engineer, County Engineer, Ukiah. Owners, Mendocino County. Bids will be opened on March 3rd for the construction of Section No. 2 of the proposed Two Rivers and Covel Road in Mendocino County. The approximate length of the road is 5.24 miles. Plans and complete data can be secured from the County Surveyor.

Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

SCHOOL—3 story and base, brick, \$110,000, Eugene, Ore. Architects, Hunzicker & Preusse, Eugene Owners, City of Eugene. The building will cover an area of 250 by 125 feet, and is so designed that additions may be made without destroying the architecture. There will be fifteen classrooms, library, music room, a large auditorium seating 500 people and completely equipped with stage and raised seats. Domestic science department is provided for on the roof. Interior finish will be of pine with maple floors. There will be steam heat, program clocks and vacuum cleaning. Exterior of the building will be faced with

pressed brick. The architects have just been commissioned to prepare plans. Working drawings will be complete within three weeks or a month. Further mention will be made of the work.

Contracts Awarded.

GARAGE—2 story and base, brick and concrete, \$20,000, St. Helens, Ore. Architects, Houghtaling & Dougan, Henry Bldg., Portland. Owners, Columbia Country Auto Club. Contractor, W. B. Donahue, 869 East 13th street, North Portland. Contract price, \$20,000.

CREAMERY—2 story and base, reinforced concrete, \$22,000, Portland, Ore. Architects, Emil Schacht & Son, Commonwealth Bldg., Portland. Owners, Townsend Creamery Co. Contractors, Boyajohn-Arnold Co., Panama Bldg., Portland. Contract price, \$22,000.

SEATTLE AND WASHINGTON.

VIADUCTS—Reinforced concrete and steel, \$350,000, Vancouver, B. C. Engineer, City Engineer, Vancouver. Owners, City of Vancouver. Plans have been completed and are now out for figures for the construction of the four east viaducts which are to span the Great Northern tracks at Hastings, Pender, Keefe and Harris streets. Bids will be received on March 4th and may be addressed to City Clerk W. McQueen. Separate bids will be received for each viaduct and also for the work as a whole. Plans and specifications can be secured from the office of the City Engineer, Vancouver.

Contracts Awarded.

MAUSOLEUM—1 story, reinforced concrete, \$100,000, Walla Walla, Wash. Architect, W. Marbury Somerville, White Bldg., Seattle. Owners, Northwest Mausoleum Co. Contractors, Cornell Bros., Savage-Scofield Bldg., Tacoma. Contract price, \$100,000. Note: Cornell Bros. will construct all buildings to be erected by the Northwest Mausoleum Company in Washington and Oregon. The company now has under consideration mausoleums in several of the large cities and towns in the two states mentioned.

THEATRE AND STORES—1 story and base. Class A construction, \$100,000, Spokane, Wash. Architect, E. W. Houghton, Collins Bldg., Seattle. Owner, August Paulsen. Contractor, Fred Phair, Paulsen Bldg., Spokane. Contract price, \$100,000.

THE QUANTITY SURVEYOR.

The February number of The Quantity Surveyor is now being distributed and should be in the hands of every Architect, Contractor and Engineer.

This movement for better estimating and contract methods should receive the hearty support of all who are called upon to furnish estimates.

The present loss an unbusinesslike methods are relics of by-gone days that should have been remedied years ago. It's up to all of us to help the movement along.

Get a copy of The Quantity Surveyor from Mr. G. Alexander Wright, 571 California street, or better still, enroll as a charter member of the organization and send a dollar for a year's subscription to their monthly magazine.

This movement is a purely voluntary movement and no one makes any money out of it except the printer and Uncle Sam.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Editorial Comment.

Ex-Governor Francis of Missouri is quoted as saying that the exposition is far ahead of any other up to date. This is an important thing for no matter what preparations are made for such an affair it usually happens that everything is not ready when the time comes. With a California summer to work in there can be no excuse as to weather and if financial plans do not fall the Exposition should be ready in record time.

Reports state that Colonel Goethals who is now in New York, is reported as saying that the canal will be ready for the passage of merchant ships by the 1st of July next. So that if nothing unforeseen happens the canal will be opened and the Exposition will be ready in advance of the time promised.

The Insurance plan adopted by the State seems to be meeting with success. After seven weeks of operation the department for the service report a fund of approximately \$338,000 on hand, representing funds of \$168,000 from two appropriations and \$220,000 collected from actual premiums.

It is reported that more than 2500 applications for state insurance have been granted making the state responsible for policies on pay rolls amounting to 30 million dollars in the aggregate. The practical value of state insurance will be demonstrated before very long. How the state will take care of those who are rendered dependent by no act of their own will be worked out on a practical basis.

Out of the mass of plays that are being presented to the American public there are a great number that have no value whatever and are patronized only from the fact that they are salacious or deal with the social evil. So great has this catering to the morbid sense of humanity become that it has been deemed wise for intelligent people to get together and set some sort of standard that right minded parents may follow for their children. Accordingly members of the Catholic Church have organized what is known as the Catholic Theatre Movement and has arranged for publishing a monthly bulletin wherein will be published approval of wholesome plays. There seems to be no attempt to set any rigid standard, only that the play be decent and have some merit to recommend it. So for the first bulletin recommended the following:

"Milestones," "Bunty Pulls the Strings," "D'Israeli," "Liberty Hall," "Little Women," "Officer 666," "Peg of My Heart," "Pomander Walk," "Poor Little Rich Girl," "Rebecca of

Sunnybrook Farm," "The Governor's Lady," "The Things That Count,"

These are all good plays and this is a movement in the right direction. It would do well for other societies to take up some similar movement so far at least as to give some intelligent direction to the young.

To an inquirer who wanted to know the meaning of the wireless signal, "S. O. S.," a Central Kansas editor explains that it is an abbreviation of Sinking out of Sight.

The following editorial from the Sacramento Bee compares the new Workmen's Compensation Act recently enacted in New York with that now in force in California. As they are in most ways similar it is of interest to note the differences:

"New York's Workmen's Compensation Act, which does not go into effect until next July, applies to forty-two groups of occupations classed as hazardous.

In this it differs materially from the California law, which makes no such enumeration or classification but applies to all employments, save only household domestic service and those of an agricultural or rural sort.

In practice, the law of this State is likely to be found much more satisfactory in that respect. Otherwise the New York enactment is much like the California law, and is regarded as a great boon to upwards of 1,000,000 employees.

In one particular the New York law is better than that of this State; it requires employers either to insure against liability or furnish the Industrial Accident Commission satisfactory proof of ability to pay.

The California law calls for no such security. It leaves employers free to insure or not, as they may see fit. Yet many employers are incurring liabilities which they might be unable to meet. Either they have neglected to insure or deliberately have decided to go without insurance and "take chances."

In this respect, as The Bee before has shown, our State law should be amended when the Legislature meets next Winter."

Speaking of morbid crowds that attend the white slave plays and the public trials of sensational cases the following account of a trial at Emporia, Kansas, by Will Allen White is good example:

"A big-eared mob jammed the district courtroom yesterday to listen to the details of a particularly revolting trial," reports the Emporia Gazette. "It was necessary for the attorneys to go frankly into certain delicate matters, for a crime had been done, and

the crowd showed its appreciation of the law's effort to fasten the blame by laughing and crowing over some bit of evidence. Court officers could not keep the noise down altogether, though they tried sternly to control it. People jammed the doors, the windows, and even the space reserved for witnesses and officials. Probably one-tenth of the mass were women and girls; and some of the old hens sat around with a prissy expression on their faces which showed that they were just dying to be shocked. Another tenth was colored men, and the rest were white men and boys. None of this crowd had any business at the trial—there were not more than a dozen witnesses called—and vulgar curiosity is about the only motive that can be given for their presence. All boys and girls under 16 were excluded from the room, but the other boys and girls remained in the foul, stuffy atmosphere and absorbed fouler knowledge. Some of the girls were sassy little pullets, too, whose mothers ought to bring out the old fashioned hair brush for this occasion. "Every man is entitled by the law of our land to the privilege of a public hearing," said Judge Harris; "otherwise, I certainly would have this courtroom cleared. Just look at that bunch of women there."

Ex-Governor David R. Francis of Missouri in a speech on the Exposition stated that prosperity followed the exposition at St. Louis. That is interesting to learn as the great cry by those who are inclined to be pessimistic has been that the exposition here would be followed by a depression. If prosperity followed as a result of the St. Louis Exposition there should be prosperity follow the exposition here for a hundred different reasons. St. Louis is an old city, as far as American cities go. It was founded as a trading post before the Constitution was adopted. It has been a commercial center for more than a century. Its surrounding country is well known and except in the south well developed. The exposition gave no new industry or means of access to St. Louis. Its resources were the same. Nothing was different except that a vast number of people attended St. Louis and there was an advertisement of the city.

Here there will be the demonstration of the fact that the world's lines of commerce have been changed. The great resources of the West will be demonstrated. San Francisco will get an advertisement such as she never has received before. And aside from the great harbor that nature has bestowed here in San Francisco bay, the varied resources of the West should lead to a development that will continue for many years to come.

Under the head of the Parcels Post the Chronicle prints an editorial which states that government competition is the merest of all competition. Evidently the express companies are giving up their 400 per cent dividends with a great deal of reluctance. And as the advantages of the parcels post become more and more apparent the fat monopoly of the express companies will become more and more a thing of the past and sensible people will wonder how they were ever hoodwink-

ed into being robbed by these plunderers.

The same argument that applies to the express companies could be applied to the mails. For these methods of transportation that everybody uses indiscriminately are matters that require government control or ownership. That is the only excuse for ship subsidies. For cheaper freight benefits all and while the people pay the subsidy they get it back again in reduced cost of living.

These facts are becoming more and more apparent. That when a public utility is used by every body and depends upon a public franchise, the proper person to control it is the public itself. Hence the post office, the telegraph, the telephone and other things of like nature are proper objects of government ownership and control. The fact of allowing private monopolies to control these institutions is an anomaly. The public has been bunked into believing that a few men possess all the business brains in the world when the real facts are that these same men have been those who employ sharp practice in business dealings which is neither an evidence of brains nor of moral sense.

Smoke as a nuisance in a city has long been recognized not only as an inconvenience but also as a costly nuisance. In the current number of the Scientific American the annual bill of Pittsburgh, Pennsylvania on account of the smoke nuisance is presented in a tabulated form, figures of J. J. O'Connor Jr., who has investigated the subject from the standpoint of dollars and cents. The items are as follows:

Cost to the smoke maker from the imperfect combustion of fuel, \$1,520,740.

Cost to the individual citizen: 1) laundry bills, \$1,500,000; (2) dry cleaning bills, \$750,000.

Cost to the household: (1) exterior painting, \$330,000 (2) sheet metal work, \$1,000,000; (3) cleaning and renewing wall paper, \$350,000; (4) cleaning and renewing lace curtains, \$360,000; (5) artificial lighting, \$84,000.

Cost to wholesale and retail stores: (1) merchandise, \$1,650,000; (2) extra precautions, \$150,000; (3) cleaning, \$750,000; (4) artificial lighting, \$650,000. (5) department stores, \$175,000.

Cost to semi public buildings: (1) office buildings, \$90,000; (2) hotels, \$22,000; (3) hospitals, \$55,000.

These items are gone into in detail showing how the amounts are arrived at and the basis of calculation. Altogether the bill foots up \$9,944,740 for the year. And no attempt has been made to include such things as depreciation of value of property, absence of various industries which are practically excluded by the smoky atmosphere and injury to human health.

It is a concrete illustration of what the smoke nuisance really is in a town like Pittsburgh. The same is true in a greater or less degree of every other manufacturing city in the United States. And the smoke problem is one

A MAN WHO MADE HIMSELF FELT.

Joseph Fels had a deep conviction that the existing social scheme was wrong; and that it would be made right by a general change of taxation so that land values created by the community should be taken for the community's

use. This being his sincere belief he did the rational thing under the circumstances. He devoted his leisure and his surplus wealth to promoting the change he believed in.

Of course this policy made him seem a fanatic. But it was the way to get results. Progress comes through the refusal of men to go along the beaten path. If every man conformed to the accepted way of thinking society would stagnate, as China did.

Life isn't so very long, and the opportunities that come to any one person to make himself felt in the world are confined to a few years. If that person sees a real chance to help the game along and merely cherishes the idea as a dream, doing nothing to make it come true, then he will have missed the opportunity to make himself a factor in bringing the better day.

This Philadelphia soap manufacturer, believing sincerely, fought earnestly for the reforms he had at heart, and so made himself count in his day and generation.

CHARACTER.

Someone has said: "Character is what a man is in the dark." What he is without an audience. His reputation may be grandstand play; a safe, senseless slide to second with the ball a quarter of a mile away—a cloud of dust and thunders of cheers from people who don't know the game. His character may be the sacrifice hit that brings him hisses from the same class of people—and advances the team.

What you wish you were, that's your ideal. What people think you are, that's your reputation. What you know you are, that's your character. To paraphrase Abraham Lincoln, you may fool some other people all of the time, but you can't fool yourself one little bit of the time.

Reputation is a variable estimate, depending not upon what people know about you, but upon their guesses, made from what they see of you. "We have lived together for fifty years," said the Left Hand, "and I never saw him do one charitable action." That's reputation. But all that time the generous Right Hand was the almoner of God, working in loving and secret fellowship with Him. That's character.

You will not drink wine, not even for politeness's sake, and at the table of an esteemed friend, and "our Best Society" says you are a fanatical, bigoted prohibitionist. You refuse to encourage a vile story with a smile. Some people say you are a coldblooded hypocrite. You will not permit yourself to laugh at a funny story, well told, in which all the "laugh" is in its profanity. And folk say you are self righteous. And you carry your Bible in your hand when you walk to church. And they say a "canting Pharisee." Yet all the while your character is that of a sober, pure-minded, reverent, God-fearing man—a Christian. Four reputations—all bad, and one character which outweighs and outlasts the going into eternity with you.—Robert J. Burdette, in National Magazine.

"SERVICE WORK IN VARNISH SHOP" by Robert Mawson. Read it in American Machinist, January 15, 1914. Pages 111-115. Then profit by this Ser-Brooklyn, New York. San Francisco, vice. Moller & Schumann Co., Chicago.

FOREST FIRES OF 1913

Many Fires in Different Districts, But Well Controlled.

(From the Forest Service, U. S. Department of Agriculture.)

During 1913 the forces on the national forests fought 4,526 fires, or nearly twice as many as started in 1912, the best year the forests have ever had.

Fire Damage Kept Down.

Notwithstanding the great increase in the number of fires, Forester Graves considers that the showing made by the forest service was quite as favorable as that in the preceding year, because the damage done and the costs of fire fighting were no greater proportionately than in 1912. In both years practically 50 per cent of all fires were detected and extinguished before they burned over a quarter of an acre, and 25 per cent of both years' fires were put out before they covered 10 acres. Of last year's fires, 3,278, or considerably more than the whole number of fires in 1912, were confined to areas of less than 10 acres, and in 1,080 additional fires less than \$100 damage was done by each. In only 25 fires did the damage amount to \$1,000.

The aggregate loss in timber is estimated at 59 million board feet, valued at about \$82,000, and the damage to young growth and forage is estimated at about \$110,000, making a total of about \$192,000. About 18 per cent of this loss, however, was incurred on private lands within the forests where 16 per cent of the fires had their origin.

Care With Engines Increasing.

One encouraging feature is that the total number of fires set by railroad locomotives was scarcely more than in the preceding year and represented only 12 per cent of all fires, as against nearly 19 per cent in 1912; also the proportion set by sawmills and other engines in the woods was considerably less than in 1912. This indicates very plainly, Mr. Graves says, that the public is awakening to the need of spark arresters and care with engines in the woods.

Causes of Increase in Fires.

Looking for the reason of the increase in number of fires, the forester finds three main causes:

First of all, the unprecedented electric storms which swept the whole state of California at the end of a long dry season and set, almost simultaneously, about 700 fires. The 804 fires set by lightning in California formed nearly 50 per cent of the 1,628 fires on the national forests of the state from all causes, and were more than half of the 1,571 lightning-set fires in all the 21 states reporting.

In the second place, there were 757 fires which started outside the forests, of which 641 were stopped by the government's fire fighters before they reached the forest boundaries, as against 424 which started on outside areas in 1912. However, the proportion of such fires to all those which the service battled with was about the same for 1912 and 1913.

Incendiary Fires.

The other increased cause of fires was incendiarism, but this increase was confined to three states, Arkansas, California and Oregon, all others showing a marked decrease. Of the 452 incendiary fires, 128 were in Arkansas, 133 in California, and 142 in Oregon, where two brothers were known to have set 72 on one forest alone. These two and other incendiaries were, of course, severely dealt with by the law. On the Arkansas forest, too, it has been assumed that the 351 fires classed under the general heading of "origin unknown" were mainly incendiary. In California the incendiary fires are largely attributable to what is known as the "light-burning theory," which advances the argument that forests should be burned over frequently to prevent the accumulation of debris. The forest service considers this a pernicious theory because it scars the standing timber and thus reduces its value; it robs the forest soil of its ability to retain moisture, and effectually prevents the reproduction of the forest, since such fires destroy all tree seedlings before they have a chance to get a good start.

Lightning Caused Most Fires.

In 1912, lightning caused more fires than any other agency, followed closely by railroads, campers and incendiaries, in the order given. In 1913, however, the fires caused by lightning outnumbered the next nearest cause by more than three to one, but the order—railroads, campers, and incendiaries remained the same as in 1912. A considerable decrease in the proportion set by railroads and campers indicates, according to forest officers, a growing carefulness on the part of the general public.

Last year, as in 1912, California led all others in number of fires, this lead being natural because California has such a long dry season. It was followed by Arkansas, Arizona, and Oregon, in the order named. Kansas, which had only one fire in 1912, escaped without any in 1913. North Dakota repeated its record of 1912 and had no fires on its one small forest. Not a single severe fire occurred during the year in District 4, which includes Utah, Nevada, and southern Idaho, and in which a large proportion of the forests reported no fires at all.

Losses on Private Lands.

There was proportionately greater loss on Private lands within the forest boundaries than on the public lands. It is pointed out by the forest officers that these lands cover approximately 11 per cent of the total area included within the forest boundaries, yet the area burned over on these private lands was more than 25 per cent of all. The forest service expended more than \$20,000 in protecting the private lands within the forests and lands adjacent to and outside of the forests. In addition to this cost, services and supplies to the value of more than \$17,000 were

contributed by co-operators for fire-fighting on these areas.

Fires Came at End of Season.

In the middle of the fire season, that is in July, the service had high hopes of small fire damage during 1913, and this hope kept up until the middle of September, when the fire season on the national forests ordinarily is about at an end. At that time there was less damage than had ever been recorded, and only 2,260 fires as against 2,470 in 1912, with about 60,000 acres burned as compared with 230,000 in 1912 and 780,000 in 1911. At the end of the month, however, the electric storms in California and one or two outbreaks of incendiarism changed the whole situation.

But even in the face of these difficulties, the fire-fighting force, with its plans and experience from preceding years, was able to cope with the situation. In California, in particular, it was as if a military leader, represented by the district forester at San Francisco, was holding, with a comparatively small number of men or a mere skirmish force, a line of defense extending 750 miles in a north and south direction. This force received, as if from an attack by the heavy artillery of an opposing army, the electric storms, generally unaccompanied by rain, which played havoc all along the Sierras and Coast Range. That the California force was able to cope with the situation was, according to Mr. Graves, an evidence of the efficiency of the men and the organization.

MINE DISASTERS IN THE UNITED STATES.

The statistics of coal-mine fatalities in the United States during last August, just published by the Bureau of Mines, show 230 deaths, as compared with 211 during the same month of 1912. During the first eight months of 1913, the fatalities numbered 1,673 compared with 1,589 during the corresponding period of 1912. These shocking figures emphasize the importance of the humanitarian activities and investigations in which the Bureau of Mines has taken the lead.

CONSERVATION AND A RAILROAD.

An Alaska railroad, built by the federal government, is now assured. Only formal steps, to ratify what has been agreed to, remain until the bill goes to the President. As he has pressed its passage he will of course sign it.

The era of conservation, given its first great impetus in the Roosevelt administration, is already returning substantial results. The natural resources of the great possession in the Northwest will most surely now be developed fairly. Of even greater importance, the Nation has definitely overcome an earlier timidity regarding measures called "paternalistic." All questions of that character will more and more be determined, not by fetiche but by facts and reason.—Kansas City Star.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$68,000. Architect, G. Albert Linsburg, 709 Mission street, S. F. Owners, Gaffney Estate Co. The building will be erected on a portion of the company's property at the northwest corner of Sutter and Taylor streets, covering an area of 60 by 137 1/4 feet. Upper floors will be arranged for a number of two and three room suites with private baths. Interior finish will be of pine and hardwood veneer and oak floors in the halls and living rooms. Plans provide for steam heat, a vacuum cleaning system, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Marble will be used in the entrance lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, E. J. Keller. The building will be erected on the east side of 12th avenue north of Irving street, covering an area of 75 by 33 feet. Interior has been arranged for a total of nine apartments of two and three rooms. Pine, redwood and hardwood veneer will be used in the interior finish. Some oak floors are also specified. All suites will have private bath rooms and wall beds. There will be steam heat and a hot water supply. Portable vacuum cleaners will be installed. Bath rooms will be finished in tile and composition floors. Exterior of the house will be covered with veneer pressed brick and cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$10,000. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected on 36th street and has been designed to contain a number of two and three room suites. All apartments will have wall beds and private bath rooms. Interiors will be finished in pine and redwood. Oak floors will be used in the hallways and dining rooms. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and terrazzo. Exterior of the house will be covered with rustic and shiplap. Plans are now being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$30,000. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, C. W. Howard. The building will be erected on South Fremont street, having a frontage of 48 feet and a depth of 128 feet. Plans provide for a total of 69 rooms, which will be arranged in two and three room suites. All apartments will have private bath rooms and wall beds. Plans provide for steam heat, a hot water supply and

vacuum cleaning. Interior will be finished in pine with some oak floors. Bath rooms will have tile wainscot and composition floors. Metal window sash and frames are specified. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

PORTLAND, ORE.—Apartment house, 5 story and base, brick and steel, \$109,000. Architect, none. Owners, R. F. Wassell Co., 19th and Lovejoy streets, Portland. The building will be erected at the corner of 19th and Lovejoy streets, covering a large ground area. There will be a total of 57 suites arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interior finish will be of pine and hardwood. Oak floors will be used in the living and dining rooms. Plans provide for steam heat, elevator service, vacuum cleaning and hot water supply. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and the owners are now taking figures on the following: Dumbwaiters, elevator, steam heating plant, cement, brick, lumber, plumbing, and bids for the balance of the work will be called for at a later date.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$16,000. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owners, Braun Realty Co. The building will be erected at the northwest corner of Cumberland and Guerrero street on property 39 by 63 feet. Plans provide for twelve suites arranged in apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interiors will be finished in pine, redwood and some elm panels. Bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be faced with rustic and shiplap. Plans are complete and figures are now being taken.

BRIDGES AND DAMS.

THALHEIM, STANISLAUS CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Modesto. Owners, Stanislaus County. Plans have been completed and received the approval of the Board of Supervisors. The bridge will be erected near Thalheim and has been designed for a highway bridge with road way and foot way. There will be concrete abutments and some ornamental iron. Plans are now out for figures and bids will be opened on March 10th at 10 o'clock. A certified check of 10% of the amount of the bid is required. Plans can be secured from the County Clerk, H. Benson, at Modesto.

PORTLAND, ORE.—Bridges, reinforced concrete. Cost not stated. Engineer, County Engineer, Portland.

Owners, Multnomah County. Plans have been completed by the County Engineer for six bridges which are to be erected in Multnomah County. Plans and specifications can be secured from the County Commissioners, Court House, Portland. Following is a complete list of the work included: At Latourelle Falls, one reinforced concrete bridge, three 80-foot arches. At Youngs Creek, near Bridal Veil, 100-foot, reinforced concrete arch. At Bridal Veil, one reinforced concrete girder bridge across Bridal Veil Falls. At Multnomah Falls, two reinforced concrete viaducts and one reinforced concrete bridge. At Oneonta Gorge, one reinforced concrete girder bridge. At Horse Tail Falls, one reinforced concrete girder bridge, together with reinforced concrete slabs on three openings between Mist and Multnomah Falls on the Columbia River Highway.

SOLANO-SACRAMENTO CO., CAL.—Bridge, Steel lift type. Cost not stated. Engineers, County Surveyors of Sacramento and Solano Counties, Owners, Sacramento and Solano Counties. County Surveyor F. A. Steiger of Sacramento has been in San Francisco in conference with the Federal authorities in reference to the proposed bridge over the Sacramento River between Solano and Sacramento Counties at Rio Vista. The proposed bridge is to be about 3,200 feet long, consisting of 20 150-foot stationary spans and 1 200-foot lift span, under which the steamers will pass. It will leave a space of 100 feet in the clear when lifted. The plans call for a modern steel structure, set on cylindrical piers driven to bedrock or into gravel. For one-half its distance the bridge will pass over the present river channel and the other half will be over what is now, except in the time of freshet, dry land. It is reported that Federal approval will be forthcoming.

TACOMA, WASH.—Municipal dock, timber and concrete construction, \$125,000. Engineer, City Engineer, Tacoma. Owners, City of Tacoma. The Commissioners of Public Works has been authorized to complete plans for a municipal dock large enough to care for ocean-going vessels and of a permanent type of construction. Money in the amount of \$125,000 is now available for construction. Further mention will be made of this work.

COURT HOUSES

ALTURAS, MODOC CO., CAL.—Court House, 2 story and base, reinforced concrete, \$90,000. Architect, F. L. De Longchamps, Reno, Nevada. Owners, Modoc County. Architect De Longchamps has completed working drawings for the new county court house and these plans have received the approval of the County Supervisors. Construction will be started as soon as bids can be secured. An official advertisement will be published on March 2nd and bids will be opened on April 2nd. Plans and specifications will be available about March 8th and can be secured from the architect. The structure will be fireproof throughout, and, besides providing offices for the county officials, will contain a large meeting room for the supervisors, judges' chambers and the county jail. Considerable marble and tile work will be used. There will be steam heat,

vacuum cleaning and fireproof vaults. Exterior will be faced with cement plaster and native stone.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Bakery, 2 story and base, brick, \$10,000. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner's name withheld. This building will be erected on 4th street near Stevenson, and will cover an area of 50 by 55 feet. First floor will contain the bakery proper and upper floor will be arranged for office and shipping rooms. Interior will be finished in pine throughout. A cement floor will be used on the ground floor. Special machinery and equipment will be installed. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

SAN FRANCISCO—Warehouse, 3 story and base, reinforced concrete, \$12,000. Engineer, James T. Ludlow, 604 Mission street, S. F. Owners, National Ice Cream Co. The building will be in the nature of an addition to the company's plant on Guerrero street north of 16th. Construction will be of the reinforced concrete type throughout with concrete floors and walls. Interior will contain the offices, factory, cold storage rooms and packing and shipping departments. Interior will be finished in pine. Special machinery will be called for. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

SAN FRANCISCO—Laundry addition, 1 and 2 story and base, brick. Cost not stated. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owners, Galland Laundry Co. The building will be erected at the southeast corner of 8th and Folsom streets in the rear of the company's present building. There will be a cement first floor. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be covered with stock brick. Plans are complete and figures are being taken.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$500,000. Engineer, Assistant Engineer Henry Baetz, Port of Seattle Commission, Seattle. Owners, City of Seattle. The building is to be located at the corner of Whatcom and Spokane streets and will cover an area of 147 by 210 feet. Interior will provide 1,500,000 cubic feet of storage space. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. There will be hollow tile and metal lath and plaster interior partitions, metal window sash and frames and fireproof doors. Elevator service is provided. Exterior of the building will be faced with cement plaster. Plans will be complete and ready for figures early in the summer. Further information can be secured from the Port of Seattle Commission.

FLATS.

SAN FRANCISCO—Flats alterations, 3 story, frame, \$8,000. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The present three story frame building will be altered into modern flats. This work will in-

clude modern plumbing, new interior finish, painting, plastering and carpentry work. There will be four open fire places and tile mantels. Some exterior alterations will also be made. Plans are nearly complete and figures will be called for shortly.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, E. J. Duffey. The building will be erected on the south side of Green street west of Jones, and has been designed to contain two modern flats with garages in the basement. Each flat will consist of five rooms and bath. Interior will be finished in pine, redwood and hardwood panels. Oak floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with a pressed brick veneer base and cement plaster on metal lath. Plans are complete and the owner will shortly take figures.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic streets, S. F. The building, which has been designed to contain two flats of five and six rooms, will be erected on the east side of Masonic avenue north of Hayes and will cover an area of 25 by 60 feet. Interiors will be finished in pine and redwood with some oak floors. There will be an open fire place in the living room of each flat. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Composition floors will be used in the baths. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owners and the work will be done by Day Labor.

SAN FRANCISCO—Flat, 2 story and base, frame, \$2,000. Architect, none. Owner, M. Ferrazzo, 284 Lee avenue, S. F. The building has been designed to contain two flats and one store, and will be erected on the south side of Ocean avenue east of Lee street. Interior finish will be of pine, redwood and elm panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Flat, 2 story and base, frame, \$2,500. Architect, A. W. Richardson, 2877 Mission street, S. F. Owner, D. Liebel, 317 Market street, S. F. The present building located at 2905 and 2907 Pine street will undergo extensive alterations. When complete the structure will contain two modern flats of five and six rooms. Interior finish will be of pine and hardwood with oak floors in the living rooms and dining rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$5,000. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owners, Coit Investment Co. The building will be erected at the corner of 54th and Dover streets and has been designed to contain four flats of four and five rooms. Interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be carried on by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$6,000. Architect, L. M. Hausman, Sharon Bldg., S. F. Owners, M. W. and J. H. Cain, 620 4th avenue, S. F. The building has been designed to contain two modern flats and will be erected on the north line of Clement street west of 15th avenue, the property having a frontage of 25 feet and a depth of 90 feet. Each flat will consist of six rooms and bath. Interiors will be finished in pine and redwood with elm panels in the living and dining rooms. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have the wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

GOVERNMENT WORK AND SUPPLIES.

Denver, Colo., Interior Finish.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C., for the interior finish of the U. S. post office at Denver, Colo.:

Bid 1. Norman Ker Co., 1123 Broadway, New York City.

2. Thomas J. Steen Co., 30 Church street, New York City.

3. Grant Fee, 2440 16th street, San Francisco, Cal.

4. Hedden Construction Co., 1 Madison avenue, New York City.

5. Wm. Dall, 501 Marion Building, Cleveland, Ohio.

6. J. H. Wiese, 1301 City National Bank Building, Omaha, Neb.

7. Frank Kirchhof Lumber Co., 7th and Lawrence streets, Denver, Colo.

Complete—Bid 1, \$686,000; 2, \$696,000; 3, \$710,000; 4, \$714,591; 5, \$755,000; 6, \$776,440, if marble other than that in the present building is acceptable for exterior marble work, \$703,260; 7, \$798,750.

For alternate 1 substitution of vault lights for granolithic floor finish of terrace for Champa street side of building, add—Bid 1, \$3,500; 2, \$5,500; 3, \$3,000; 4, \$5,500; 5, \$4,000; 6, \$4,576; 7, \$8,500.

For alternate 2 (substitution of granolithic finish for sidewalks and walks within the lot line for stone paving specified), deduct—Bid 1, \$34,000; 2, \$45,000; 3, \$26,000; 4, \$30,000; 5, \$36,000; 6, \$26,260; 7, \$35,000.

For alternate 3 a change in main stairs for purpose of introducing a

mezzanine platform between first and second floor), add—Bid 1, \$720; 2, \$1,500; 3, \$600; 4, \$750; 5, \$1,000; 6, \$4,000; 7, \$1,850.

For alternate 4 (substitution of plain marble curbs same as shown at side of walks for the marble balustrade indicated on the drawings), deduct—Bid 1, \$6,200; 2, \$5,900; 3, \$6,900; 4, \$6,000; 5, \$6,000; 6, \$24,000; 7, \$15,000.

For alternate 5 (omission of floor waterproofing) deduct—Bid 1, \$1,200; 2, \$6,800; 3, \$5,500; 4, \$5,500; 5, \$9,000; 6, \$8,500; 7, \$5,200.

For alternate 6 (substitution of cast iron for bronze for elevator fronts specified under paragraph 462), deduct—Bid 1, \$1,300; 2, \$1,300; 3, \$300; 4, \$3,000; 5, \$1,200; 6, \$3,000; 7, \$1,352.

For alternate 7 (substitution of Keene's cement finish for shafts of all marble pilasters and columns and wainscot, except in toilets and like places), deduct—Bid 1, \$18,400; 2, \$16,500; 3, \$18,000; 4, \$18,000; 5, \$18,000; 6, \$16,000; 7, \$20,000.

For alternate 8 (omission of ornament on the plaster ceilings), deduct—Bid 1, \$500; 2, \$1,100; 3, \$2,500; 4, \$400; 5, \$500; 6, \$2,600; 7, \$1,150.

For alternate 9 (substitution of Keene's cement finish for marble doorways), deduct—Bid 1, \$2,600; 2, \$3,000; 3, \$2,300; 4, \$2,500; 5, \$2,000; 6, \$2,800; 7, \$3,500.

For alternate 10 (substitution of wood wainscot for steel in post office workroom) deduct—Bid 1, \$1,900; 2, \$1,800; 3, \$2,000; 4, \$1,800; 5, \$1,000; 6, \$2,000; 7, \$2,200.

For alternate 11 (substitution of composition ornament for carving in connection with the wood finish), deduct—Bid 1, \$200; 2, \$300; 3, \$530; 4, \$100; 5, \$200; 6, \$200; 7, \$450.

For alternate 12 (substitution of Keene's cement and plaster for wood finish in library), deduct—Bid 2, \$600; 3, \$1,000; 4, no bid; 5, \$200; 7, \$2,445.

For alternate 13 (substitution of wood floors for cork floors), deduct—Bid 1, \$1,500; 2, \$1,500; 3, \$2,000; 4, \$2,000; 5, \$2,000; 6, \$2,500; 7, \$2,200.

Denver, Colo., Mechanical Equipment.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C. for the mechanical equipment, except roof drainage and elevators, of the U. S. post office at Denver, Colo.:

Evans, Admiral & Co., New York City, \$149,725.

G. A. Kees Domestic Engineering Co., St. Paul, Minn., \$133,797.

Downey Heating and Supply Co., Milwaukee, Wis., \$160,000.

Chris Irvin Plumbing and Heating Co., Denver, Colo., \$155,389.

Johnson and Davis Plumbing and Heating Co., Denver, Colo., \$153,518.

Warner & Rittenhouse, Washington, D. C., \$137,891.

W. G. Cornell Co., Washington, D. C., \$134,985.

Farwell Heating Co., Atchison, Kan., \$149,790.

Denver, Colo., Post Office.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C. for the construction of minor outside work and for the interior finish of the U. S. post office at Denver, Colo.:

Wm. Dall, Denver, Colo., \$755,000.

Thomas J. Steen Co., New York City, \$696,000.

J. H. Wiese, Omaha, Neb., \$766,440; alternate bid, if marble other than the present is used for exterior, \$703,200.

Frank Kerchoff Lumber Co., Denver, Colo., \$798,750.

Grant Fee, San Francisco, Cal., \$71,000.

Norman Ker Co., New York City, \$656,000.

Hedden Construction Co., New York City, \$714,591.

Denver, Colo., Elevator Equipment.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C. for the installation of an elevator plant in the U. S. post office at Denver, Colo.:

Otis Elevator Co., Washington, D. C., \$36,882; time September 1, 1914.

A. Kiechheffer Elevator Co., Milwaukee, Wis., \$44,490; time March 30, 1914.

Presidio Stable Authorized.

The quartermaster general has directed the construction quartermaster, San Francisco, Cal. to advertise for bids for the construction of a stable at the Presidio of San Francisco.

Naval Armor Plate Plant.

The statement made to the House Naval Committee by the Secretary of the Navy and the chief of ordnance of the navy on the subject of a government armor plate plant are said to have been quite impressive. The statistics, which were submitted of course, have not been officially contradicted, nor have they been fearfully questioned, to which they might easily be subjected, it is understood; for, as is so often the case, there happens to be two sides to this armor plant problem, and so mar the Navy Department has, naturally presented only one phase of the situation for the benefit of the committee. It is by no means certain that the subject will be regarded as of sufficient importance to engage the attention of the committee to a greater extent than the time already allotted to it. Mr. Daniels has been able to present his case in so plausible a way as to give every encouragement to those who advocate the establishment and maintenance of a government plant for the manufacture of armor. It is the fashion now in Congress to take sides against the private plant and to support the cause of the government establishment, whatever or wherever it may be. At the same time, the amount of money which would be required to fully equip an armor plant gives pause to the committee, and probably nothing more definite will be accomplished at this session than the provision of means by which Congress may come into the possession of more information, which, in the minds of conservative representatives and senators, should be acquired before the government is committed to the expenditure of a large sum of money on the representation that the government can produce armor at much less cost than that of the material obtained under contract.

Pocatello, Idaho, Plaster Models.

The following bids were received by the supervising architect, Treasury Department, Washington, D. C. for

furnishing plaster models for the U. S. post office at Pocatello, Idaho:

C. W. Buhler, 1130 19th street, N. W., Washington, D. C., \$178.

E. C. Bairstow, 1313 13th street, Washington, D. C., \$178.

Lombard & Ludwig, Washington, D. C., 309 14th street, Washington, D. C., \$206.

J. Brys & F. Bruyninck Co., Inc., 1416 N street, Washington, D. C., \$210.

E. Jung, 1508 14th street, Washington, D. C., \$225.

Albany, Ore., Post Office.

In the construction of the U. S. post office at Albany, Ore., for which Fred A. Brixson, Salem, Ore., has the contract, fixtures manufactured by the following named firms will be used: Lighting fixtures, M. J. Walsh Co.; pendant switches, Perkins; sockets, Pass & Seymour; insulating joints, MacAllen; glassware and reflectors, Macbeth-Evans Co.

Albino, H. T., Post Office.

The supervising architect, Treasury Department, Washington, D. C. will request supplementary bids for the construction of the above named building.

Sewer System, Fort Mason.

The contract for extending sewer system at Fort Mason, Cal., has been awarded to D. F. Bienfield, of San Francisco, Cal., at \$5,800.

Compressed Air Locomotive.

The compressed air locomotive for the naval station at Pearl Harbor, Hawaii, bids for which are to be opened March 14 at the Navy Department, is to be a compound four-wheel connected type for 36-in gauge track; weight approximately 15,000 lbs; tractive force 3,000 lbs. The air compressor shall be motor driven, 3 stage, 1,000-lb pressure, capacity 75 cu ft free air per min. Flat cars of 20,000 lbs capacity each, 36-gauge track. Pipe and fittings extra heavy for 1,000 lbs air working pressure.

Pasadena, Cal., Post Office.

As previously reported the contract for the construction, complete, of the U. S. post office at Pasadena, Cal., was awarded to Eugene Schuler, Santa Barbara, Cal., at \$184,246, who will use the following fixtures and material in the construction of the building: Plumbing fixtures, John Douglas Co.; cast iron column radiators, American Radiator Co.; wall radiators, American Radiator Co.; non-conducting coverings, H. W. Johns-Manville Co.; damper regulator, Fess; air exhausting apparatus, Bishop-Babcock-Becker Co.; air valves for radiators, do; air valves for end of steam mains, do; cabinet and tablet, W. A. McNally & Co.; rubber-covered wire, John A. Roebeling's Sons Co.; light fixtures, Reading Chandelier Works; radiator valves, Crane Co.; conduit, Central Tube Co.; snap switches, Perkins Electric Mfg. Co.; pendant switches, do; keyless sockets, Weber; reflectors, Holaphane; glassware, Lighting Studio Co.; canopy switches, Cutter-Hammer Mfg. Co.

Pearl Harbor Dry Dock.

There have been no hearings before the House Naval Committee, as was expected, concerning the resumption

of work on the damaged dry dock at the Pearl Harbor naval station, regarding which the Secretary of the Navy is in possession of reports from the experts who made a careful examination of the situation and presented recommendations. There have been numerous conferences at the Navy Department during the past two or three weeks, attended by Representatives Padgett and Roberts, of the naval committee. It has been decided to proceed with the work along new lines, the approved plan contemplating the employment of floating boxes in the completion of the dock, in accordance with the recommendations of Civil Engineer F. R. Harris, U. S. Navy, and the civilian expert, Mr. Noble, who was specially engaged by the Secretary of the Navy to visit Pearl Harbor and make a thorough observation of the conditions there. There will have to be a committee hearing later, because it is evident that the limit of cost for the dry dock must be increased by \$1,500,000.

—HALLS & SOCIETY BLDGS—

OAKLAND, CAL.—Municipal auditorium, 2 story. Class A construction. Cost not stated. Architect, J. J. Donovan, associated with Walter Mathews, Oakland. Owners, City of Oakland. Contracts Awarded.

LOS ANGELES, CAL.—Hospital, 5 story and base. Class A construction, \$110,000. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Contractor, George H. Whyte, Paloma Street near Allen avenue, Pasadena. Contract price, \$110,000.

HOTELS.

SAN FRANCISCO.—Hotel and stores, 3 story and base, reinforced concrete, \$20,000. Architects, Phillip Schwerdt & Co., Phelan Bldg., S. F. Owners, H. and I. Wolf. The building will be erected on Sixth street south of Howard, having a frontage of 25 feet and a depth of 155 feet. There will be one store besides the hotel entrance on the first floor. Upper two floors will contain a number of single rooms and public baths. Interior finish will be of pine and redwood. Plans provide for a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Patent store fronts and plate glass windows are specified. Plans are complete and a contract will be let within a few days.

SAN FRANCISCO.—Hotel, 4 story and base, brick and steel. Cost not stated. Architect, Albert W. Burgen, Holbrook Bldg., S. F. Owner, William Roeder. The building will be erected at the northwest corner of Turk and Leavenworth streets, covering a considerable ground area. There will be

a store and the hotel lobby and office on the first floor. Upper floors will contain 51 guest rooms and 40 baths. Interior finish will be of pine and hardwood with some oak floors. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Ornamental plaster and marble and tile will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Hotel addition, 2 story and base, frame, \$10,000. Architect, M. L. Newsom, 1852 5th avenue, Oakland. Owner, T. Galvan. The building at the corner of 7th and Henry streets will undergo repairs and two additional stories will be added. These new floors will contain 24 rooms and several public baths. Interior finish will be of pine and redwood. A hot water system will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

ARCADIA, HUMBOLDT CO., CAL.—Hotel, 4 story and base, reinforced concrete, \$60,000. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Arcadia Hotel Co. A site has been secured at the corner of 9th and G streets and a new hotel and store building, covering an area of 50 by 110 feet will be erected. There will be a number of stores on the first floor and 75 guest rooms and a number of private baths on the upper floors. Plans provide for steam heat, a hot water system and vacuum cleaning. There will be patent store fronts and metal window sash and frames. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SEATTLE, WASH.—Hotel, 2 story and base, brick, \$30,000. Architect, C. H. Bebb, Denny Bldg., Seattle. Owners, Horton Estate. The building will cover an area of 114 by 120 feet and will be arranged for stores on the first floor and a large number of single rooms and public baths on the upper floor. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water supply. Metal window sash and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Separate figures will be taken for the plumbing, heating, electric work and painting.

LIBRARIES.

SAN ANSELMO, MARIN CO., CAL.—Library, 1 story and base, reinforced concrete, \$10,000. Architect, W. Garden Mitchell, Bankers' Investment Bldg., S. F. Owners, San Anselmo. Preliminary plans have been submitted to the Library Trustees for approval. These plans show a building containing a large reading room, stack rooms and office. Interior finish will be of pine with maple floors. A central heating system will be installed. Exterior will probably be faced with cement plaster. Definite action has not been taken. Further mention will be made of the work.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Walter Vodden, 101 Cole street, S. F. Owners, Thomas Vodden and Son, 1015 Cole street, S. F. The dwelling, which has been designed for a seven-room house, will be erected on the east side of 18th avenue north of California street. The dwelling will be erected on Calaveras avenue, and will contain five rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

STOCKTON, SAN JOAQUIN CO., CAL.—Residences 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: H. Anderson, 1310 South California street,

1 story frame dwelling, \$1,800; John Lucas, 1235 South American street, 1 story frame dwelling, \$1,000; Mrs. L. Pealand, Stockton, 1 story frame dwelling, \$1,800; Charles Eachan, Stockton, 1 story frame dwelling, \$2,500; R. Godsil, 516 West Park street, 1 story frame dwelling, \$2,500; Frank P. Gorton, 1215 South American street, 2 story frame dwellings, \$1,500 each; W. R. Pease, 1314 East Oak street, 1 story frame dwelling, \$1,000; R. F. Ames, 420 McClellan avenue, 1 story frame dwelling, \$2,000, and C. R. Campbell, Stockton, 1 story frame dwelling, \$1,500.

SEWERS, STREET WORK AND WATER SYSTEMS.

UMATILLA, ORE.—Water system, \$20,000. Engineer, Louis C. Kelsey, Selling Bldg., Portland. Owners, City of Umatilla. Bonds have been voted in the sum of \$20,000 to construct a municipal water system. Engineer's plans show a pumping plant with oil engine, steel tank and tower and direct connected pumps. Both cast iron and steel pipe will be used. Bids will be called for as soon as bonds can be sold. Further mention will be made of this work.

SAN MATEO AND SAN DIEGO COUNTIES, CAL.—State Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Bids opened by the State Highway Commission on February 27th for the construction on highways in San Mateo County show Bates, Borland & Ayer low at \$59,925.40, and in San Diego County Taylor & Berliner of Los Angeles low at \$74,951. Contracts have not been awarded. A complete list of these figures together with the engineer's estimate of cost will be found under the heading of San Francisco in this issue.

SCHOOLS.

STOCKTON, SAN JOAQUIN CO., CAL.—School, 2 story and base, brick and concrete, \$75,000. Architects, Stone & Wright, Stockton. Owners, City of Stockton. Only three sets of figures were received by the Stockton Board of Education on February 25th for the construction of the East Side Grammar School and these figures were rejected. Plans will be put out for figures again without revision. The lowest bid was from Graham & Jensen of San Francisco at \$78,585. A complete list of the figures will be found under the heading of Sacramento, Stockton and Northern California in this issue.

BISHOP, INYO CO., CAL.—School, 1 story and base, reinforced concrete, \$35,000. Architect, G. C. Clements, Bishop. Owners, Bishop School District. Plans for the new reinforced concrete school have been completed and approved by the Board of Education. There will be a number of standard sized class rooms, principal's office, teachers' rooms and an assembly hall. System of oil burning furnace, direct steam, oil burning furnace, pine trim and maple floors in the class rooms. Exterior of the building will be faced with cement plaster. Plans can be seen from the architect. Bids are now being taken and will be opened on March 10th.

TUSTIN, ORANGE CO., CAL.—School, 1 and 2 story and base, brick and concrete. Cost not stated. Architect, Frederick H. Eley, Register Bldg., Santa Ana. Owners, Tustin School District. Plans have been completed for the new brick grammar school building which is to be erected in the Tustin School District. Plans are now out for figures and separate bids will be taken for the general construction, heating and ventilating and plumbing and electric work. Plans can be secured from the architect. Bids will be opened on March 18th.

HYDE PARK, LOS ANGELES CO., CAL.—School, 1 and 2 story, brick and cement plaster, \$100,000. Architect, George A. Howard, Jr., Grant Bldg., L. A. Owners, Hyde Park School District. The sketches provide for six buildings, four, two-room buildings and an auditorium will be erected on the present school site at Hyde Park, and two two-story eight-room buildings will be erected on a new site to be purchased at Angelus Mesa. The buildings will be of frame construction with brick or hollow tile walls, plastered on the exterior. Only preliminary plans have been prepared and further mention will be made of the work at a later date.

VENICE, LOS ANGELES CO., CAL.—School group, 1 and 2 story and base, brick. Cost not stated. Architect, C. H. Russell Co., Union League Bldg., L. A. Owners, Venice Union High School District. Plans for this group of buildings, which have been fully described in these columns before, have been complete, and have received the approval of the Board of Education. Bids for the work are now being taken and will be opened by the Board on March 9th at 3 p. m. Bids will be taken for the general construction with alternates A, B, C, D, E, F, G, and H as per plans and specifications. Plans may be obtained from the architects on deposit of \$20.

ARLINGTON, ORE.—School, 2 story and base, reinforced concrete and brick, \$15,000. Architect, Charles H. Burgraff, Albany, Ore. Owners, Arlington School District. Alternate bids will be taken for reinforced concrete and brick construction. The building will contain four class rooms on the first floor, together with a large corridor; second floor will contain three class rooms, an office and the balance of the floor will be left unfinished at present. Basement will consist of playrooms, lavatories, furnace and fuel rooms. Separate proposals will be received for heating and plumbing, and the balance to be included in the general contract. Plans can be had from the architect. Bids are now being taken and will be opened on March 6th.

ASTORIA, ORE.—School addition, 1 story and base, brick, \$20,000. Architects, Whitehouse & Foulhouse, Wilcox Bldg., Portland. Owners, Astoria School District. The work will consist of the erection of an addition to be used as an auditorium with gallery and seating 800. Other work included in the contract is the completion of the basement. Structure will contain equipped rooms for manual training, domestic science and sewing. Plans will be completed in about one month when bids will be called for. Bonds in the sum of \$20,000 have been voted for this purpose.

Contracts Awarded.
PALMS, LOS ANGELES CO., CAL.—School, 1 story and base, brick, \$34,174. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Palms School District. Contractors, The Hunsberger-Reed Construction Co., Van Nuys Bldg., L. A. Contract price, \$34,174.
EUREKA, HUMBOLDT CO., CAL.—School, 2 story and base, reinforced concrete, \$113,510. Architect, W. H. Weeks, 75 Post street, S. F. Owners, Eureka Union High School District. Contractor, Robert Trost, S. F., general construction. Contract price, \$113,510.

STORES.

SAN FRANCISCO.—Store, 1 story and base, frame, \$5,000. Architect, none. Owner, R. W. Moller, 185 Stevenson street, S. F. The building will be erected on the west side of Montgomery street south of Filbert, and has been designed to contain one store. Interior finish will be of pine throughout. There will be plate glass windows in patent store fronts. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

PASADENA, LOS ANGELES CO., CAL.—Stores and lofts, 6 story and base. Class A construction, \$75,000. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, North Raymond Avenue Co. The building will be erected on Raymond avenue near Holly street, and will have a frontage of 50 feet by a depth of 103 feet. Ground floor will be arranged for stores and the upper five floors for light lofts. Construction will be of the reinforced concrete type throughout with reinforced concrete walls, floors, stairways and roof slabs. Interior finish will be of pine and metal. There will be metal window sash and frames, fireproof doors and patent store fronts. Plans provide for two elevators, a hot water system and steam heat. Exterior of the building will be faced with cement plaster. Plans are now being prepared. The work will be carried on by Mathew Slavin, Slavin Bldg., Pasadena.

PORTLAND, ORE.—Stores, offices and theatre, 4 story and base, reinforced concrete, \$100,000. Architect, Aaron H. Gould, Henry Bldg., Portland. Owners, Portland Theatre Syndicate. The building will be erected near the corner of Stark and Park streets, covering an area of 100 feet square. Construction will be of the fireproof type with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Trim will be of hardwoods and metal. Metal window sash and frames and patent store fronts are specified. Plans provide for eight stores on the first floor besides the theatre proper, which will have a seating capacity of 2,000 people. Upper floors will be arranged for offices. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with cement plaster. Actual construction will begin early in March.

SEATTLE, WASH.—Stores and offices, 2 story and base, brick and steel, \$15,000. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owner, Edgar

Eames. The building will be erected at the southwest corner of 2nd avenue and Stewart street, covering an area of 90 by 110 feet. There will be several stores on the first floor and a number of modern offices on the upper floor. Interior will be finished in pine floor and hardwood. There will be metal trim, metal window sash and frames and patent store fronts. Steam heat is specified. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

SEALED PROPOSALS.

NOTICE TO CONTRACTORS.

Office Constructing Quartermaster, Fort Mason, Cal., February 25, 1914.—**SEALED PROPOSALS**, in triplicate, for constructing a ward at Letterman General Hospital, San Francisco, Cal., and installing plumbing, heating and electric wiring in same, will be received here until 11 a. m., March 25, 1914, and then opened. Plans, specifications, etc., can be obtained here. Deposit of \$100.00 required to insure return of plans, etc. Envelopes containing proposals to be addressed to LIEUT. COL. GEO. MCK. WILLIAMSON, Q. M. C. (*)

PROPOSALS FOR ELECTRICAL CONDUCTORS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 4 o'clock p. m. on **Wednesday, the 4th day of March, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

For the furnishing and installing overhead electrical conductors for the Union Street Line of the Municipal Railway.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within sixty (60) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$15,000.00.

All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Board of Supervisors of said City and County, for an amount not less than ten per centum of the aggregate of the proposal. Printed proposal forms will be furnished gratis upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

F. J. CHURCHILL, Secretary.

PROPOSALS FOR ELECTRICAL CONDUCTORS.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 4 o'clock p. m. on **Wednesday, the 4th day of March, 1914**, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 829—Proposals for Electrical Fittings and Fixtures, Electric Wire, Soldering Sticks, Wire Clamps, Pliers, Galvanized Wire, Nails, Bolts, Repair Links, Stovepipe, Valves, Tackles, Blocks, Slinging Gaskets, Rubber Valves, Wheels for Wagons, Steel Tapes, and Vitrified Sewer Pipe.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. March 10, 1914**, for furnishing the above mentioned articles. Bids and general information relating to this circular may be obtained from the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also, from the following cities: Seattle, Wash.; Los Angeles, Cal. F. C. BOGGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR EARTH WORK AND TUNNEL.

EARTHWORK AND TUNNEL—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, St. Ignatius, Mont., until **2 o'clock p. m. March 20, 1914**, for earthwork and tunnel, Pablo canals, lateral 31A, involving about 3,400 cubic yards of open-cut excavation and about 520 linear feet of tunnel. The work is located about six miles southwest of Polson, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont.; or St. Ignatius, Mont. F. H. NEWELL, director.

PROPOSALS FOR LOCOMOTIVE.

COMPRESSED-AIR LOCOMOTIVE—Sealed proposals, indorsed "Proposals for Compressed-Air Locomotive and Accessories," will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **12 o'clock a. m. March 14, 1914**, and then there publicly opened for one compressed-air locomotive, a three-stage charging compressor, pipes and fittings, four stations, water and charging stations, and four flat cars for the naval magazine, Kahana Island, Pearl Harbor, Hawaii. Estimated cost, \$7,500. Specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

NOTICE TO BIDDERS.

PURSUANT to an order of the Board of Supervisors of the County of Stanislaus State of California, made and entered on the 11th day of February, 1914, notice is hereby given that sealed bids will be received by the undersigned Clerk of the said Board up to and not later than the hour of **10 a. m. of the 10th day of March, 1914**, for the construction of a reinforced concrete bridge near Thalmheim in the County of Stanislaus, State of California, in accordance with the plans and specifications on file in my office where the same may be inspected by intending bidders during office hours.

All bids must be accompanied by a certified check on some solvent bank of the state of California in a sum

equal to ten per cent of the amount bid, conditioned that the successful bidder will enter into such contract and furnish such bond as may be required within ten days after such award, or failing so to do will forfeit the amount of such check as liquidating damages for such failure. The Board reserves the right to reject any or all bids.

H. BENSON,
Clerk of the Board of Supervisors.

PROPOSALS FOR METAL FLUMES.

METAL FLUMES—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the United States Reclamation Service, Great Falls, Mont., until **2 o'clock p. m. March 9, 1914**, for furnishing and erecting metal flumes. The work involves the furnishing of about 7,357 linear feet of flumes of various diameters, ranging from 2 feet 6 1/2 inches to 11 feet, and the erection of about 9,050 linear feet of flume 8 feet 3 1/4 inches diameter. For particulars address the United States Reclamation Service, Washington, D. C., or Great Falls, Mont. F. H. NEWELL, director.

PROPOSALS FOR MACHINERY.

MACHINERY—Department of the Interior, U. S. Reclamation Service, Meadow Creek, Wash.—Sealed proposals will be received at the office of the United States Reclamation Service, Meadow Creek, Wash., until **2 o'clock p. m. March 7, 1914**, for furnishing machinery for the Storage Unit, Yakima Project, Wash. For particulars address the United States Reclamation Service, Meadow Creek, Wash. CHARLES H. SWIGART, supervising engineer.

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until **12 o'clock a. m. March 14, 1914**, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, at navy yard, San Francisco, Cal., appraised value, 10,000; U. S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila will be sold as cash to the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information and conditions of sale may be obtained upon application to the bureau of supplies and accounts, Navy Department, Washington, D. C.; or DANIELS, Secretary of the Navy.

PROPOSALS FOR STRUCTURAL STEEL.

STEEL WORK FOR COAL PLANT—Sealed proposals, endorsed "Proposals for Erecting Steelwork" will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until **2 o'clock a. m. March 28, 1914**, and then there publicly opened for erecting structural steelwork for coaling plant, Philadelphia, Pa., for coal, estimated cost, \$60,000. Plans and specifications can be obtained on application to the bureau or to the commanding officer of the naval station named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR STEEL TOWERS.

STEEL TOWERS—Sealed proposals, indorsed "Proposals for four 300-Foot Towers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until **11 o'clock a. m. March 28, 1914**, and then there publicly opened for the construction of four steel towers on the Canal Zone. Separate proposals will be received for steelwork and for foundation. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

PROPOSALS FOR BUILDING.

BUILDING, ETC.—Department of the Interior, Office of Indian Affairs, Wash-

ington, D. C.—Sealed proposals, plainly marked on the outside of the sealed envelope "Proposals for Additions to Two Western Bonito Indian Schools, Anglo Indian School, Ariz.," and addressed to the "Commissioner of Indian Affairs, Washington, D. C.," will be received at the office of the Indian School, March 23, 1914, for furnishing materials and labor for the construction of additions to two stone dormitories at the Western Bonito Indian School, Ariz., in strict accordance with the plans and specifications, and instructions to bidders, which may be examined at the office of the paper or periodical in which this advertisement appears, the U. S. Indian warehouse at Chicago, Ill.; St. Louis, Mo.; Omaha, Neb.; and San Francisco, Cal., and at the Western Navajo Indian School. For further information apply to the superintendent of the Western Navajo Indian School, Tuba, Ariz. CATO SELLS, commissioner.

PROPOSALS FOR BUILDING.

BUILDING—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals, plainly marked on the outside of the sealed envelope "Proposals for Erick Cotton Dormitories at Pueblo Bonito Indian School, N. Mex.," and addressed to the "Commissioner of Indian Affairs, Washington, D. C.," will be received at the Indian office until **2 o'clock p. m. of March 10, 1914**, for furnishing materials and labor for the construction of three brick cottage dormitories at the Pueblo Bonito Indian School, N. Mex., in strict accordance with the plans and specifications, which may be examined at the office of the paper or periodical in which this advertisement appears, the U. S. Indian warehouse at Chicago, Ill.; St. Louis, Mo.; Omaha, Neb.; and San Francisco, Cal., and at the Pueblo Bonito Indian School. For further information apply to the superintendent of the Pueblo Indian School, Crownpoint, N. Mex. CATO SELLS, commissioner.

NOTICE FOR BIDS.

THE BOARD OF TRUSTEES of the Sanger Union High School District will receive sealed proposals at the High School Building, Sanger, California, up to and not later than **10 o'clock a. m. on Friday, the 13th day of March, 1914**, for the construction of a brick high school building for the said school district, in the town of Sanger, California.

The said building is to be constructed according to the plans and specifications prepared by Swartz, Hotchkiss & Swartz, architects, which have been adopted by the Board of Trustees.

Plans and specifications may be had from the architects, room 401, Rowell Building, Fresno. A deposit of ten dollars will be required from contractors receiving plans and specifications from the architects.

All bids for the general construction of the building must be accompanied by a certified check on some solvent bank in the amount of Three Thousand Dollars (\$3,000.00) in favor of J. J. Edgar, clerk, as a guarantee that the proposer of the bid is accepted, within ten days after the acceptance of the bid and awarding of the contract, execute a contract for the construction of the building, and approved bonds for the faithful and complete performance of the contract as required by law.

The successful bidder will be received for the complete installation of the heating and ventilating system which bids must be accompanied by a certified check in the amount of Five Hundred Dollars (\$500.00) on conditions above stated.

The Board reserves the right to reject any and all bids without recourse. J. J. EDGAR,
Clerk of the Board of Trustees of the Sanger Union High School District.

NOTICE TO ARCHITECTS.

For the benefit of architects inquiring concerning plans for a new high school building to be erected in Chico

School District, the Board of Education of the City of Chicago in and for Chicago School District, hereby invite architects to submit designs for a school building that shall furnish the last mentioned rooms and accommodations as a new requirement. The Board of Education shall judge and select or reject the plans. It is especially understood that no premium or award shall be offered for any rejected plan. The accepted plan shall become the design and plan from which the building shall be erected.

Plans for the proposed new Oakdale grammar school building shall be made to the scale of $\frac{1}{4}$ inch to one foot, and shall consist of the following drawings:

Foundation plan.
Basement story plan.
Main floor plan.
Second story plan.
Roof plan, a longitudinal and a transverse section, four elevations, front, rear and both sides. The proposed building to be combined elementary and grammar school, for approximately 400 pupils, half boys and half girls. The building shall be two stories and basement in height—not fewer than eight nor more than 24'32" above ground level with cloak rooms, each class room with built-in bookcase, not smaller than 12 cu. ft. inside. One office and library for each grade. Heating plant, electric lighting and heating plant with shelving. One auditorium of seating capacity not less than 600. Two basement rooms for manual training. Two basement rooms for domestic arts. Kitchen to be plumbed for water and gas. Entrances, halls, office, and auditorium to be wired for electric lighting. Heating plant for auditorium, and a room for bicycles. No toilet system other than for teachers use need be installed. Small lavatory and drinking fountains must be on each floor.

Plans shall be completely and accurately figured with all necessary dimensions and spacings, and the thickness of each wall in each story shall be clearly indicated. Specifications shall be complete, and shall accurately describe all materials and labor required in the construction and finishing of the building. Each architect who submits plans shall furnish the secretary of the Board of Education with a complete set of plans and specifications as above enumerated, on or before the 9th day of March, 1914, and one of the sets furnished by the successful architect shall be kept as a public record from the date of and following the selection by the Board of Education of such plans and specifications for use in the construction of a public building. The successful architect will be required to finally furnish four full sets of plans and specifications, and four full sets of blue-print detail drawings. Full-size detail drawings for all mill work, stair work, and other parts of the proposed structure shall be furnished and delivered to the board by the successful architect within three weeks from the date of the official adoption of the plans for the building.

In case the successful architect becomes the superintendent of construction of the building, the Board will allow as an entire compensation for the construction of the building 6 per cent of the building exclusive of furnishing and fixtures. In case the architect does not become the superintendent of the building construction, then compensation of 6 per cent shall be divided between the architect and building superintendent in accordance with the prescribed rules for architect's fees. The entire compensation of the successful architect is to be dependent upon the cost of the building. Any change in plans or specifications, from original filed copies—the total cost, as shown by regular bids from reliable contractors, not exceed the sum of \$30,000. In case the board fails to get a bid from a reliable contractor to erect the proposed building for \$30,000 or less, then the architect furnishing the plans, etc., shall forfeit all claim to any compensation whatever for his plans and specifications, etc.

The Board of Education expressly reserves the right to reject any or all plans, also to require such minor changes as may be found necessary before the final adoption of any plan.

CHAS. H. CAMPER,
Secretary Board of Education,
City Hall, Chicago, Cal. (S)

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 819—Proposals for Four Steel Tugboats for Handling and Docking of Vessels at the Entrances of the Panama Canal—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. March 23, 1914, at which time they will be opened in public for furnishing the above

eral information relating to this circular (No. 819) may be obtained from this office or the office of the assistant purchasing agent, 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

There will be oak floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Tile wain-

scot will also be used in the kitchens. All houses will be equipped with automatic water heaters. Exterior will be covered with cement plaster on metal lath. Plans are nearly complete and work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, William Bahrs, 635 15th avenue, S. F. The dwelling will be erected on the east side of 16th avenue near Anza and has been designed for a six-room house with bath. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile mantel. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE—1½ story and base, frame, \$2,000. San Francisco. Architect, A. W. Richardson, 2877 Mission street, S. F. Owner, A. Kaufman, Isabel street. The house will be erected on Isabel street near Montcalm avenue, and has been designed to contain seven rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with rustic. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, Ben E. Tormey, 1650 Clay street. The dwelling will be erected on the west side of 33rd avenue south of Lincoln Way, and has been designed to contain six rooms and bath. Interior finish will be of pine and redwood. Oak floors will be used in the living room and dining room. There will be a large open fire place with tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCE—2½ story and base, brick veneer, \$15,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, Mrs. Meyer. The dwelling will be erected on Pacific avenue, and has been designed for a modern city home containing fourteen rooms and six baths. Interior will be finished in pine, redwood and hardwoods. Oak floors will be used throughout, except in the bath rooms which will have tile floors and wainscot. There will be a central heating system, probably furnace heat. Plans provide for six open fire places which will have tile mantels. All bath rooms will be equipped with showers. There will be vacuum cleaning and automatic water heaters. Ornamental plaster will also be used. Exterior of the dwelling will be covered with pressed brick veneer and trimmed with terra cotta. Plans are complete and figures are now being taken.

APARTMENT HOUSE—6 story and base, brick and steel, \$65,000. San Francisco. Architect, G. Albert Lansburgh, 709 Mission street, S. F. Owners, Gaffney Estate Co. The building will be erected on a portion of the company's property at the northwest corner of Sutter and Taylor streets, covering an area of 60 by 137½ feet. Upper floors will be arranged for a number of two and three room suites with private baths. Interior finish will be of pine and hardwoods veneer and oak floors in the halls and living rooms. Plans provide for steam heat, a vacuum cleaning system, elevator service and a hot water supply. Bath rooms will have tile wainscot and composition floors. Marble will be used in the entrance lobby. Exterior of the building will be faced with pressed brick and terra cotta. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$15,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, E. J. Keller. The building will be erected on the east side of 12th avenue north of Irving street, covering an area of 75 by 33 feet. Interior has been arranged for a total of nine apartments of two and three rooms. Pine, redwood and hardwood veneer will be used in the interior finish. Some oak floors are also specified. All suites will have private bath rooms and wall beds. There will be steam heat and a hot water supply. Portable vacuum cleaners will be installed. Bath rooms will be finished in tile and composition floors. Exterior of the house will be covered with veneer pressed brick and cement plaster on metal lath. Plans are complete and in the hands of the owner. Work will be done by Day Labor.

BAKERY—2 story and base, brick, \$10,000. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owner's name withheld. This building will be erected on 4th street near Stevenson, and will cover an area of 50 by 85 feet. First floor will contain the bakery proper and upper floor will be arranged for office and shipping rooms. Interior will be finished in pine throughout. A cement floor will be used on the ground floor. Special machinery and equipment will be installed. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are being prepared and figures will be called for shortly.

WAREHOUSE—3 story and base, reinforced concrete, \$12,000. San Francisco. Engineer, James T. Ludlow, 604 Mission street, S. F. Owners, National Ice Cream Co. The building will be in the nature of an addition to the company's plant on Guerrero street north of 16th. Construction will be of the reinforced concrete type throughout with concrete floors and walls. Interior will contain the offices, factory, cold storage rooms and packing and shipping departments. Interior will be finished in pine. Special machinery will be called for. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken.

LAUNDRY ADDITION—1 and 2 story and base, brick. Cost not stated. San Francisco. Architect, Milton Lichtenstein, 111 Ellis street, S. F. Owners, Galland Laundry Co. The building

will be erected at the southeast corner of 8th and Folsom streets in the rear of the company's present building. There will be a cement first floor. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be faced with stock brick. Plans are complete and figures are being taken.

FLAT ALTERATIONS—3 story frame, \$8,000. San Francisco. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name withheld. The present three-story frame building will be altered into modern flats. This work will include modern plumbing, new interior finish, painting, plastering and carpentry work. There will be four open fire places and the mantels. Some exterior alterations will also be made. Plans are nearly complete and figures will be called for shortly.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, E. J. Duffey. The building will be erected on the south side of Green street west of Jones, and has been designed to contain two modern flats with garages in the basement. Each flat will consist of five rooms and bath. Interiors will be finished in pine, redwood and hardwood panels. Oak floors will be used in the living rooms and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with a pressed brick veneer base and cement plaster on metal lath. Plans are complete and the owner will shortly take figures.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic streets, S. F. The building, which has been designed to contain two flats of five and six rooms, will be erected on the east side of Masonic avenue north of Hayes, and will cover an area of 25 by 60 feet. Interiors will be finished in pine and redwood with some oak floors. There will be an open fire place in the living room of each flat. Mantels will be of tile. Bath rooms and kitchens will have tile wainscot. Composition floors will be used in the baths. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and shiplap. Plans are in the hands of the owners and the work will be done by Day Labor.

FLAT—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, M. Perrazzo, 284 Lee avenue, S. F. The building has been designed to contain two flats and one store and will be erected on the south side of Ocean avenue east of Lee street. Interior finish will be of pine, redwood and elm panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

FLATS—2 story and base, frame, \$2,500. San Francisco. Architect, A. W. Richardson, 3877 Mission street, S. F. Owner, D. Leibel, 317 Market street, S. F. The present building located at 2905 and 2907 Pine street will undergo extensive alterations. When complete the structure will contain two modern flats of five and six rooms. Interior finish will be of pine and hardwood with oak floors in the living rooms and dining rooms. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

HOSPITAL WARD—2 story, reinforced concrete. Cost not stated. Presidio of San Francisco. Architect, Constructing Quartermaster's Office, Fort Mason. Owners, United States Government. Plans for an additional ward at the Letterman General Hospital have been completed and are now out for figures. The building will be arranged to contain wards and private rooms. Interior finish will be of pine throughout. Steam heat will be supplied from the hospital's general plant. Exterior will be faced with cement plaster. A clay tile roof is specified. Plans and specifications can be secured from the Constructing Quartermaster's office at Fort Mason. Bids will be opened on March 25th. An official proposal appears in another column of this issue.

HOTEL AND STORES—3 story and base, reinforced concrete, \$20,000. San Francisco. Architects, Phillip Schwerdt & Co., Phelan Bldg., S. F. Owners, H. and I. Wolf. The building will be erected on Sixth street, south of Howard, having a frontage of 25 feet and a depth of 155 feet. There will be one store besides the hotel entrance on the first floor. Upper two floors will contain a number of single rooms and public baths. Interior finish will be of pine and redwood. Plans provide for a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Patent store fronts and plate glass windows are specified. Plans are complete and a contract will be let within a few days.

HOTEL—4 story and base, brick and steel. Cost not stated. San Francisco. Architect, Albert W. Burgess, Holbrook Bldg., S. F. Owner, William Roeder. The building will be erected at the northwest corner of Turk and Leavenworth streets, covering a considerable ground area. There will be a store and the hotel lobby and office on the first floor. Upper floors will contain 54 guest rooms and 40 baths. Interior finish will be of pine and hardwood with some oak floors. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning. Bath rooms will have tile wainscot and composition floors. Ornamental plaster and marble and tile will be used in the entrance and lobby. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—3 story and base, frame, \$16,000. San Francisco. Architect, Theo W. Lenzen, Humboldt Bank Bldg., S. F. Owners, Braun

and Kley Co. The building will be erected at the northwest corner of Cumberland and Guerrero streets on property 39 by 63 feet. Plans provide for twelve suites arranged in apartments of two and three rooms. All suites will have wall beds and private bath rooms. Interiors will be finished in pine, redwood and some elm panels. Bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water system. Entrance will be finished in tile and marble. Exterior of the building will be faced with rustic and shiplap. Plans are complete and figures are now being taken.

FLATS—2 story and base, frame, \$6,000. San Francisco. Architect, L. M. Hausman, Sharon Bldg., S. F. Owners, M. W. and J. H. Cain, 620 4th avenue, S. F. The building has been designed to contain two modern flats and will be erected on the north line of Clement street west of 15th avenue, the property having a frontage of 25 feet and a depth of 90 feet. Each flat will consist of six rooms and bath. Interiors will be finished in pine and redwood with elm panels in the living and dining rooms. Oak floors will be used in the principal rooms. There will be open fire places and tile mantels. Automatic water heaters will be installed. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

STORE—1 story and base, frame, \$5,000. San Francisco. Architect, none. Owner, R. W. Moller, 195 Stevenson street, S. F. The building will be erected on the west side of Montgomery street south of Filbert, and has been designed to contain one store. Interior finish will be of pine throughout. There will be plate glass windows in patent store fronts. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

BUILDING TOTAL FOR FEBRUARY.

\$1574281 Invested in Building Construction.

Building operations for the month of February, as reported by the Bureau of Building Inspection of the Board of Public Works, show that 157 permits have been issued for new buildings, amounting to \$4,438,567, this amount including three public buildings. This Bureau also issued 292 permits for alterations, amounting to \$134,714. The three public buildings included in the report are the New City Hall, Oriental and Cooper Schools.

Following is a complete report, as compiled by the Building Bureau:

Class	No. of Bldgs.	Amount
"A"	1	\$ 2,750
"C"	15	278,240
Frames	138	420,557
Alterations	292	134,714
Public buildings	3	3,738,000

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, I. W. Button, 347 63rd street, Oakland. The dwelling has been designed for a seven-room house with bath and sleeping porch, and will be erected on the west side of Hillegass avenue near 62nd street. Interior finish will be largely of pine and redwood. Some veneer hardwood will be used in the living and dining rooms. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath room

will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

BUNGALOW — 1 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owners, Collins Bros., 825 57th street, Oakland. This dwelling has been designed for a six-room house, and will be erected on the north side of Everett avenue near 13th avenue. Interior will be finished in pine and redwood with hardwood veneer in the living room and dining room. Oak floors will be used throughout. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, base, frame, \$9,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The dwelling will be erected on Lake Shore Drive near Rand avenue, and has been designed to contain eight rooms, bath and sleeping porch. A garage will also be erected on the property. Interior of the dwelling will be finished in pine, redwood and hardwood. Oak floors will be used throughout except in the bath which will have composition floor. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of both dwelling and garage will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BUNGALOW—1 1/2 story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, George Anderson, 6046 Lawton avenue, Oakland. Owner, Thomas A. Anton. The dwelling has been designed for a seven-room house and will be erected on Claremont avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have composition floor and tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BUNGALOW—1 1/2 story and base, frame, \$3,200. Oakland, Cal. Architects, The Elite Planners, 1844 5th avenue, Oakland. Owner, Edward Lawlor. The dwelling will be erected in Piedmont by the Lake, and has been designed to contain seven rooms, bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or the

brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now nearly complete.

BUNGALOW — 1 story and base, frame, \$3,200. Oakland, Cal. Architect, none. Owners, Collins Bros., 825 57th street, Oakland. The dwelling will be erected on Everett street near 13th avenue, and has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame. Cost not stated. Piedmont, Alameda Co., Cal. Architect, Claude B. Barton. Security Bldg., Oakland. Owner, H. P. Houston. The dwelling will be erected in Piedmont Manor, and has been designed to contain eight rooms, bath and sleeping porch. Interior will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath rooms and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster. Plans are complete and figures are now being taken by the architect.

BUNGALOW — 1½ story and base, frame, \$3,500. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, Peter Lindblad. The dwelling will be erected in the Fourth Avenue Terrace Tract, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be largely of pine and redwood. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. Hardwood floors will be used in the living room, dining room and reception hall. There will be an automatic water heater. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$7,000. Berkeley, Alameda Co., Cal. Architect, William A. Plovman, 3601 Telegraph avenue, Berkeley. Owner, William Ashland. The dwelling will be erected in Northbrae, and has been designed for an eight-room house with bath and sleeping porch. Interior will be finished in pine and redwood. Some oak floors will be used. There will be furnace heat and open fire places. Mantels will be of brick and tile. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCES — 1 1½ story and 2, 1 story, frame, \$3,000 and \$2,500. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, Edward Sommarstrom. These houses will be erected in Piedmont by the Lake, the two one-story dwellings being designed to contain six rooms each and the 1½ story house to contain seven rooms. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the living rooms, dining rooms and reception halls. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Bath rooms and kitchens will have the wainscot and composition floors. Exterior of the three houses will be covered with cement plaster on metal lath.

RESIDENCE — 2 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, F. R. Peake Co., 2127 University avenue, Berkeley. Owner, Mrs. J. U. De Roco. The house will be erected on Euclid avenue south of Keith and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood with hardwood floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor under the direction of F. R. Peake Co.

RESIDENCE — 2 story, attic and base, frame, \$23,000. Berkeley, Alameda Co., Cal. Architect, William H. Ratcliff. First National Bank Bldg., Berkeley. Owner, E. A. Nickerson, First National Bank Bldg., Berkeley. The dwelling will be erected at the junction of the Tunnel and Roble Roads, and has been designed for a ten-room house with several baths and sleeping porches. A garage will also be erected on the property. Interior finish will be of pine, redwood and hardwoods. Oak floors will be used in the principal rooms. Plans provide for furnace heat, open fire places, a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile and will have composition floors. Exterior of the dwelling and garage will be covered with cement plaster on metal lath. Plans are now practically complete and figures will be called for shortly.

RESIDENCE — 1 story and base, frame, \$3,000. Berkeley, Alameda Co., Cal. Architect, none. Owners, Junk-Riddell Investment Co., 2247 Telegraph avenue, Berkeley. The dwelling has been designed for a six-room house with bath and sleeping porch, and will be erected on Buena Vista Way near Greenwood Terrace. Interior finish will be of pine and hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the house will be covered with shakes. Plans are complete and in the hands of the owner who will do the work by

Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, none. Owner, E. J. Lloyd, 1057 Walker avenue, Oakland. The dwelling will be erected on Fairbanks avenue, and has been designed to contain eight rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Tile wainscot and composition floors will be used in the bath room and kitchen. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$9,000. Oakland, Cal. Architect, none. Owner, Edward Olsen, 277 Bay View avenue, Oakland. The dwelling will be erected at the northeast corner of College avenue and Manila. The dwelling has been designed to contain nine rooms and a store. Interior will be finished in pine and redwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Store will have plate glass windows and patent store fronts. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

APARTMENT HOUSE — 3 story and base, frame, \$10,000. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner's name withheld. The building will be erected on 36th street and has been designed to contain a number of two and three room suites. All apartments will have wall heats and private bath rooms. Interiors will be finished in pine and redwood. Oak floors will be used in the hallways and dining rooms. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and terrazzo. Exterior of the house will be covered with rustic and shiplap. Plans are now being prepared.

FLATS — 2 story and base, frame, \$5,000. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owners, Coit Investment Co. The building will be erected at the corner of 34th and Dover streets and has been designed to contain four flats of four and five rooms. Interior finish will be of pine with hardwood floors in the principal rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be carried on by Day Labor.

MUNICIPAL AUDITORIUM — 2 story. Class A construction. Cost not stated. Oakland, Cal. Architect, J. J. Donovan, associated with Walter Mathews, Oakland. Owners, City of Oakland. Bids opened on February 26th for preparing the site, concrete work, granite work

SAN JOSE AND THE SANTA CLARA VALLEY

RESIDENCE—2 story and base, frame, \$14,000. Palo Alto, Santa Clara Co., Cal. Architect, Smith O'Brien. Humboldt Bank Bldg., S. F. Owner, Mrs. Harris Allen. This work has been mentioned here before. The dwelling will contain in the neighborhood of twelve rooms, several bath and sleeping porch. Interior finish will be of pine and hardwoods with oak floors in the principal rooms. A central heating system, hot water supply and vacuum cleaning are specified. Bath rooms will have tile wainscot and floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story, attic and base, frame, \$8,000. San Bruno, San Mateo Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father W. J. Cantwell. The dwelling will be erected on property adjoining the church, and has been designed to contain nine rooms including a study and large reception room. Interior finish will be of pine, redwood and some hardwood. Oak floors will be used in the principal rooms. There will be furnace heat and three open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RUNGALOW—1 story and base, frame, \$2,500. San Mateo, San Mateo Co., Cal. Architect, O. E. Evans, 2367 Mission street, S. F. Owner's name not given. The house has been designed for a five-room dwelling with bath and sleeping porch. Interior finish will be entirely of pine or redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and brick mantel. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCES—1 and 2 story and base, frame. Cost not stated. San

Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor Jobs are reported as about to be started in San Jose: Jack Walsh, 196 North 3rd street, 1 story, five-room cottage, \$2,500; Ella Ferguson, Alnm Rock avenue, 1 story, six-room cottage, \$2,500; and J. W. Hutsler, 1004 East Santa Clara street, 2 story, frame residence, Cost not stated.

STATE HIGHWAY WORK—Cost not stated. San Mateo and San Diego Counties, Cal. Engineer, State Highway Commission, Forum Bldg., Sacramento. Bids opened by the State Highway Commission on February 27th for the construction on highways in San Mateo County show Bates, Borland & Ayer low at \$59,925.40 and in San Diego County Taylor and Berliner of Los Angeles low at \$74,951. Contracts have not been awarded. A complete list of these figures together with the engineer's estimate of cost will be found under the heading of San Francisco in this issue.

FRESNO, MODESTO, STANISLAUS. LAUS AND CENTRAL CALIFORNIA.

BRIDGES—Reinforced concrete, Cost not stated. Thalheim, Stanislaus Co., Cal. Engineer, County Surveyor, Modesto, Owners, Stanislaus County. Plans have been completed and received the approval of the Board of Supervisors. The bridge will be erected near Thalheim and has been designed for a highway bridge with road way and foot way. There will be concrete abutments and some ornamental iron. Plans are now out for figures and bids will be opened on March 10th at 10 o'clock. A certified check of 10% of the amount of the bid is required. Plans can be secured from the County Clerk, H Benson at Modesto.

SCHOOL—1 story and base, reinforced concrete, \$35,000. Bishop, Inyo Co., Cal. Architect, G. C. Clements, Bishop. Owners, Bishop School District. Plans for the new reinforced concrete school have been completed and approved by the Board of Education. There will be a number of standard sized class rooms, principal's office, teachers' rooms and an assembly hall. Plans provide for steam heat, direct system, oil burning furnace, pine trim and maple floors in the class rooms. Exterior will be faced with cement plaster. Plans can be secured from the architect. Bids are now being taken and will be opened on March 10th.

Contracts Awarded.

Bids Opened For Stockton School.

Only Three Sets of Figures Received
For East Side Grammar School. All
Bids Rejected.

Only three sets of figures were received by the Stockton Board of Education for the construction of the two-story building to be known as the East Side Grammar School. Graham & Jensen, of this city, submitted the lowest figure at \$78,555. All bids were rejected by the Board and new figures will be called for within a few days. The school was designed by Architects Stone & Wright. Following is a list of the bids as opened:

East Side School, Stockton.

Chirhardt & Nystedt, Stockton.....	\$84,000
Graham & Jensen, S. F.....	78,555
Daniels & Green, Stockton.....	79,727

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

HOTEL—4 story and base, reinforced concrete, \$60,000. Arcadia, Humboldt County, Cal. Architect, W. H. Weeks, 75 Post St., S. F. Owners, Arcadia Hotel Co. A site has been secured at the corner of 9th and G streets and a new hotel and store building covering an area of 50 by 110 feet will be erected. There will be a number of stores on the first floor and 75 guest rooms and a number of private baths on the upper floors. Plans provide for steam heat, a hot water system and vacuum cleaning. There will be patent store fronts and metal window sash and frames. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

RESIDENCES—1 and 2 story and base, frame. Cost not stated. Sacramento, Cal. Architect, none. The following Jay Labor jobs are reported as about to be started in Sacramento: C. J. Hopkinson, 1818 25th street, 1 story, five-room residence, \$4,000, and E. G. Gross, 2194 East avenue, 2 story, 13 room residence and 1 store, \$4,000.

BRIDGE—Steel lift type. Cost not stated. Solano, Sacramento Co., Cal. Engineers, County Surveyors of Sacramento and Solano Counties. Owners, Sacramento and Solano Counties. County Surveyor F. A. Steigler of Sacramento has been in San Francisco in conference with the Federal authorities in reference to the proposed bridge over the Sacramento River between Solano and Sacramento Counties at Rio Vista. The proposed bridge is to be about 3,200 feet long, consisting of 20 150-foot stationary spans and one 200-foot lift span, under which the steamers will pass. It will leave a space of 100 feet in the clear when lifted. The plans call for a modern steel structure set on cylindrical piers driven to bed-rock or into gravel. For one-half its distance the bridge will pass over the present river channel and the other half will be what is now, except in time of freshet, dry land. It is reported that Federal approval will be forthcoming.

COURT HOUSE—2 story and base, reinforced concrete, \$90,000. Alturas, Modoc Co., Cal. Architect, F. L. De Longchamps, Reno, Nevada. Owners, Modoc County. Architect, De Longchamps has completed working drawings for the new County Court House and these plans have received the approval of the County Supervisors. Construction will be started as soon as bids can be secured. An official advertisement will be published on March 2nd and bids will be opened on April 2nd. Plans and specifications will be available about March 5th and can be secured from the architect. The structure will be fireproof throughout, and, besides providing offices for the county officials, will contain a large meeting room for the supervisors, judges' chambers and the county jail. Considerable marble and tile work will be used. There will be steam heat, vacuum cleaning and fireproof vaults. Exterior will be faced with cement plaster and native stone.

RESIDENCES—2, 1 story and base.

Smooth Finish Lasting Quality

That's the whole story of the tremendous favor with which the WYBRO PANELS are meeting.

Smooth finish—evenness—lasting quality—and reasonable prices have placed the WYBRO in the front rank of Paneldom.

168 varieties to select from.

frame, \$3,000 and \$2,700 respectively. Sacramento, Cal. Architect, none. Owner, E. A. Pierce, 3526 Park avenue, Sacramento. These two houses will be erected in the West Curtis Oaks Tract and will contain five and six rooms. Interiors will be finished in pine and redwood with oak floors in the living and dining rooms. There will be open fire places and tile or brick mantels. Automatic water heaters are specified. Bath rooms will have tile wainscot. Exteriors will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

BUNGALOW—1 story and base, frame, \$2,000. Sacramento, Cal. Architect, none. Owner, H. F. Carstens, 1831 I street, Sacramento. The dwelling will be erected on Calaveras avenue and will contain five rooms and bath. All interior finish will be of pine or redwood. Oak floors will be used in the living and dining rooms. There will be a large open fire place and tile mantel. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and shiplap. Plans are in the hands of the owner and the work will be done by Day Labor.

RESIDENCES—1 and 2 story, frame. Cost not stated. Stockton, San Joaquin Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in Stockton: H. Anderson, 1310 South California street, 1 story frame dwelling, \$1,800; John Lucas, 1235 South American street, 1 story frame dwelling, \$1,000; Mrs. L. P. Leander, Stockton, 1 story frame dwelling, \$1,800; Charles Echan, Stockton, 1 story frame dwelling, \$2,500; R. Godsil, 516 West Park street, 1 story frame dwelling, \$2,500; Frank P. Gurgon, 1215 South American street, 2, 1 story frame dwellings, \$1,500 each; W. R. Pease, 1314 East Oak street, 1 story frame dwelling, \$1,000; R. F. Ames, 420 McCloud avenue, 1 story frame dwelling, \$2,000, and C. R. Campbell, Stockton, 1 story frame dwelling, \$1,500.

SCHOOL—2 story and base, brick and concrete, \$75,000. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, Stockton. Owners, City of Stockton. Only three sets of figures were received by the Stockton Board of Education on February 25th for the construction of the East Side Grammar School and these figures were rejected. Plans will be put out for figures again without revision. The lowest bid was

from Graham & Jensen of San Francisco at \$78,585. A complete list of the figures will be found under the heading of Sacramento, Stockton and Northern California in this issue.

Italian Villa style, and will be erected
at the corner of 3rd street and An-

draws Boulevard. Walls will be of hollow tile faced with cement plaster. Interior will be finished in pine, hardwoods and white enamel. Oak floors will be used throughout. Bath rooms will have tile wainscot and floors. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Roof will be of clay tile. Plans are complete and figures are now being taken.

APARTMENT HOUSE—3 story and base. Class C construction. \$30,000. Los Angeles, Cal. Architect, Leonard L. Jones, 1. W. Hellman Bldg., L. A. Owner, C. W. Howard. The building will be erected on South Fremont street, having a frontage of 48 feet and a depth of 128 feet. Plans provide for a total of 69 rooms which will be arranged in two and three room suites. All apartments will have private bath rooms and wall beds. Plans provide for steam heat, a hot water supply and vacuum cleaning. Interior will be finished in pine with some oak floors. Bath rooms will have tile wainscot and composition floors. Metal window sash and frames are specified. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for shortly.

SCHOOL—1 and 2 story and base, brick and concrete. Cost not stated. Tustin, Orange Co., Cal. Architect, Frederick H. Eley, Register Bldg., Santa Ana. Owners, Tustin School District. Plans have been completed for the new brick grammar school building which is to be erected in the Tustin School District. Plans are now out for figures and separate bids will be taken for the general construction, heating and ventilating, and plumbing and electric work. Plans can be secured from the architect. Bids will be opened on March 18th.

SCHOOL—1 and 2 story, brick and cement plaster, \$160,000. Hyde Park, Los Angeles Co., Cal. Architect, George A. Howard, Jr., Grant Bldg., L. A. Owners, Hyde Park School District. The sketches provide for six buildings, four, two-room buildings and an auditorium will be erected on the present school site at Hyde Park, and two, two-story, eight-room buildings will be erected on a new site to be purchased at Angelus Mesa. The buildings will be of frame construction with brick or hollow tile walls, plastered on the exterior. Only preliminary plans have been prepared and further mention will be made of the work at a later date.

SCHOOL GROUP—1 and 2 story and base, brick. Cost not stated. Venice, Los Angeles Co., Cal. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, Venice Union High School District. Plans for this group of buildings, which have been fully described in the columns before, have been completed and have received the approval of the Board of Education. Bids for the work are now being taken and will be opened by the Board on March 9th at 3 p. m. Bids will be taken for the general construction with alternates A, B, C, D, E, F, G and H as per plans and specifications. Plans may be obtained from the architects on deposit of \$20.

STORES AND LOFTS—6 story and base. Class A construction. \$75,000.

Pasadena, Los Angeles Co., Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, North Raymond Avenue Co. The building will be erected on Raymond avenue near Holly street, and will have a frontage of 50 feet by a depth of 103 feet. Ground floor will be arranged for stores and the upper five floors for light lofts. Construction will be of the reinforced concrete type throughout with reinforced concrete walls, floors, stairways and roof slabs. Interior finish will be of pine and metal. There will be metal window sash and frames, fireproof doors and patent store fronts. Plans provide for two elevators, a hot water system and steam heat. Exterior of the building will be faced with cement plaster. Plans are now being prepared. The work will be carried on by Mathew Slavin, Slavin Bldg., Pasadena.

Contracts Awarded.

HOSPITAL—5 story and base. Class A construction, \$110,000. Los Angeles, Cal. Architects, Garrett & Farrell, Currier Bldg., L. A. Owners, Methodist Hospital Association. Contractor, Geo. H. Whyte, Paloma street near Allen avenue, Pasadena. Contract price, \$110,000.

SCHOOL—1 story and base, brick \$34,174. Palms, Los Angeles Co., Cal. Architects, Dennis & Hewitt, Fay Bldg., L. A. Owners, Palms School District. Contractors, The Hunsberger-Reed Construction Co., Van Nuys Bldg., L. A. Contract price, \$34,174.

PORTLAND AND OREGON.

APARTMENT HOUSE—5 story and base, brick and steel, \$100,000. Portland, Ore. Architect, none. Owners, R. F. Wassell Co., 13th and Lovejoy streets, Portland. The building will be erected at the corner of 13th and Lovejoy streets, covering a large ground area. There will be a total of 57 suites arranged in two and three room apartments. All suites will have wall beds and private bath rooms. Interior finish will be of pine and hardwood. Oak floors will be used in the living and dining rooms. Plans provide for steam heat, elevator service, vacuum cleaning and hot water supply. Bath rooms will be finished in tile with composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and the owners are now taking figures on the following: Dumbwaiters, elevator, steam heating plant, cement, brick, lumber, plumbing, and bids for the balance of the work will be called for at a later date.

BRIDGES—Reinforced concrete. Cost not stated. Portland, Ore. Engineer, County Engineer. Portland. Owners, Multnomah County. Plans have been completed by the County Engineer for six bridges which are to be erected in Multnomah County. Plans and specifications can be secured from the County Commissioners, Court House, Portland. The following is a complete list of the work included: At Latourelle Falls, one reinforced concrete bridge, three 80 foot arches. At Youngs Creek, near Bridal Veil, 100 foot, reinforced concrete arch. At Bridal Veil, one reinforced concrete girder bridge across Bridal Veil Falls. At Multnomah Falls, 2 reinforced concrete viaducts and one reinforced concrete bridge. At Oneonta Gorge, one reinforced concrete girder bridge. At

Horse Tail Falls, one reinforced concrete girder bridge, together with reinforced concrete slabs on three openings between Mist and Multnomah Falls on the Columbia River Highway.

WATER SYSTEM—\$20,000. Umatilla, Ore. Engineer, Louis C. Kelsey, Selling Bldg., Portland. Owners, City of Umatilla. Bonds have been voted in the sum of \$20,000 to construct a municipal water system. Engineer's plans show a pumping plant with oil engine, steel tank and tower and direct connected pumps. Both cast iron and steel pipe will be used. Bids will be called for as soon as bonds can be sold. Further mention will be made of this work.

SCHOOL—2 story and base, reinforced concrete and brick, \$15,000. Arlington, Ore. Architect, Charles H. Burgraff, Albany, Ore. Owners, Arlington School District. Alternate bids will be taken for reinforced concrete and brick construction. The building will contain four class rooms on the first floor, together with a large corridor; second floor will contain three class rooms, an office and the balance of the floor to be left unfinished at present. Basement will consist of playrooms, lavatories, furnace and fuel rooms. Separate proposals will be received for heating and plumbing, and the balance to be included in the general contract. Plans can be had from the architect. Bids are now being taken and will be opened on March 6th.

SCHOOL ADDITION—1 story and base, brick, \$20,000. Astoria, Ore. Architects, Whitehouse & Foulhoux, Wilcox Bldg., Portland. Owners, Astoria School District. The work will consist of the erection of an addition to be used as an auditorium with gallery and seating 800. Other work included in the contract is the completion of the basement. Structure will contain equipped rooms for manual training, domestic science and sewing. Plans will be completed in about one month when bids will be called for. Bonds in the sum of \$20,000 have been voted for this purpose.

STORES, OFFICES AND THEATRE

—1 story and base, reinforced concrete, \$100,000. Portland, Ore. Architect, A. H. Gould, Henry Bldg., Portland. Owners, Portland Theatre Syndicate. The building will be erected near the corner of Stark and Park streets, covering an area of 100 feet square. Construction will be of the fireproof type with reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal hatch and plaster. Trim will be of hardwoods and metal. Metal window sash and frames and patent store fronts are specified. Plans provide for eight stores on the first floor besides the theatre proper which will have a seating capacity of 2,000 people. Upper floors will be arranged for offices. There will be steam heat, elevator service, a vacuum cleaning system and mail chutes. Exterior of the building will be faced with cement plaster. Actual construction will begin early in March.

SEATTLE AND WASHINGTON.

WAREHOUSE—4 story and base, reinforced concrete, \$100,000. Seattle, Wash. Engineer, Assistant Engineer Henry Baetz, Port of Seattle Commission, Seattle. Owners, City of Seattle.

The building is to be located at the corner of Whatcombe and Spokane streets, and will cover an area of 147 by 210 feet. Interior will provide 1,500,000 cubic feet of storage space. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. There will be hollow tile and metal lath and plaster interior partitions, metal window sash and frames and fireproof doors. Elevator service is provided. Exterior of the building will be faced with cement plaster. Plans will be complete and ready for figures early in the summer. Further information can be secured from the Port of Seattle Commission.

HOTEL—2 story and base, brick \$30,000. Seattle, Wash. Architect, C. H. Bebb, Denny Bldg., Seattle. Owners, Horton Estate. The building will cover an area of 114 by 120 feet and will be arranged for stores on the first floor and a large number of single rooms and public baths on the upper floor. Interior finish will be of pine. Bath rooms will have tile wainscot and composition floors. There will be steam heat and a hot water supply. Metal window sash and frames and patent store fronts are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken. Separate figures will be taken for the plumbing, heating, electric work and painting.

MUNICIPAL DOCK—Timber and concrete construction. \$125,000. Tacoma, Wash. Engineer, City Engineer, Tacoma. Owners, City of Tacoma. The Commissioner of Public Works has been authorized to complete plans for a municipal dock large enough to care for ocean-going vessels and of a permanent type of construction. Money in the amount of \$125,000 is now available for construction. Further mention will be made of this work.

RESIDENCES—3, 2 story and base, brick, \$19,500 each. Seattle, Wash. Architect, Robert Knipe, Henry Bldg., Seattle. Owner's name withheld. These houses will be erected on Newton street near Broadway, and each has been designed to contain ten rooms, three baths and sleeping porches. Interiors will be finished in pine and hardwoods. Oak floors will be used throughout except in the bath rooms which will be finished in tile and will have composition floors. Plans provide for a central heating system, probably hot water, vacuum cleaning and automatic water heaters. There will be open fire places and tile or brick mantels. Exteriors will be faced with pressed brick trimmed with terra cotta. Plans are now nearing completion.

STORES AND OFFICES—2 story and base, brick and steel, \$45,000. Seattle, Wash. Architect, Charles H. Bebb, Denny Bldg., Seattle. Owner, Edgar Eames. The building will be erected at the southwest corner of 2nd avenue and Stewart street, covering an area of 90 by 110 feet. There will be several stores on the first floor and a number of modern offices on the upper floor. Interior will be finished in pine and hardwood. There will be metal trim, metal window sash and frames and patent store fronts. Steam heat is specified. Exterior of the building will be faced with pressed brick. Plans are nearly complete and figures will be called for shortly.

HARDWOODS OF PANAMA.

[Consul James C. Kellogg, Colon.]

The following report on hardwoods of Panama was compiled from data furnished by Mr. S. P. Verner, sanitary inspector, Isthmian Canal Commission, who has traveled extensively in the Provinces and is familiar with the forests and the timber industry of the country. The botanical names have been verified and corrected by the Forest Service of the United States Department of Agriculture.

The cacique (*Eugenia lepidota*, family Myrtaceae) is a small tree, growing about 4 feet high and a foot thick, in scattered clumps or thickets on the hills. It is comparatively rare and the timber should therefore be taken out in connection with the general lumber industry in any given locality. The timber is generally considered the most valuable in the Republic, being durable, hard, impervious to insects, and very beautiful. The ground color of the wood, when cut and aged, is a rich deep red, with black spots and stripes. The natives demand at least \$5 for a cacique whiststock or cane, and such canes have sold in New York for \$25. The cured timber is quoted at 35 cents per pound. There are probably about 100,000 trees of timber size in the Republic, and the value of the timber, aside from the cost of getting it out, would be about \$7,000,000.

The name of this tree comes from the fact that the ancient Indian chiefs (caciques) used the wood for their scepters or batons of office. The ground wood is used by the natives as a styptic.

Caoba and Espave Trees.

The word caoba refers, in common Central American usage, to three kinds of trees: *Guarea caoba*, *Curatella guianensis* and *Swietenia mahagoni*. All three occur in the higher parts of Panama. The first two attain a height of 100 feet or more. Their timber is so similar to Honduras mahogany (*Swietenia mahagoni*) that it is equally valuable—about \$90 per 1,000 feet. The *Guarea caoba* will run from 3,000 to 5,000 feet per acre, and the amount now standing in the country is valued at \$180,000,000.

The espave (*Anacardium rhinocarpus*, family Anacardiaceae), often 5 feet thick at the base, grows to a height of 80 to 120 feet, of which 40 feet from the base is clear. Some of the large branches are available for lumber. Some forests average 15 big trees to the acre. The leaves are large, somewhat heart-shaped, light green, and very abundant. The espave is prized so much by the natives as a shade tree that they usually spare it in clearing for planting. They use the timber, however, for their canoes, many of which last for a generation or more. The wood is of a reddish bay color, resembling mahogany, for which it is often mistaken. It is close-grained, durable, and uniform in texture, takes a polish, and works readily. There are probably 1,500,000 of these trees in Panama. The timber is worth \$80 per 1,000 feet and the total value is about \$130,000,000.

Guayacan, Laurel, and Santa Maria.

The guayacan (*Tecoma chrysantha*, family Bignoniaceae) is somewhat smaller than most hardwoods, averaging

70 feet high and 2 feet thick and branching 30 feet from the ground. The leaves are small and compound, and the grayish black bark is rough and shaggy, with longitudinal furrows. The inflorescence is a mass of magnificent golden blossoms. The wood, hardest and most durable of the timbers of Panama, is akin to the lignum-vite (*Gualicum*) of the West Indies. It is much heavier than water, and to be rafted must be carried with lighter wood. Railway ties of guayacan have been in use on the Panama Railroad for more than 50 years. Since it is so hard that holes had to be bored for the spikes, it might be advisable to work it green for some purposes. The small waste of the industry might be used for shuttle blocks, of which the supply in the United States is fast becoming exhausted. There are probably 1,000,000 of these trees in Panama, worth about \$10,000,000.

The laurel (*Cordia gerascanthus*, family Boraginaceae), 3 feet in diameter, grows on hillsides to a height of 100 feet. The bark is white. The wood is yellow, hard, fine-grained, durable, and easily worked. It is said to be good for piling. There are probably more than 1,000,000 laurel trees in Panama, with an average yield of 1,000 feet per tree and a total value of \$60,000,000.

The Santa Maria or calaba (*Calophyllum calaba*, family Guttiferie) is a large evergreen, attaining a height of 100 feet or over with more than 50 feet clear and with a diameter at the base of about 3 feet. The bark is comparatively thin, mottled gray and black, and slightly rough. It peels from the wood readily. The wood is grayish white, as hard and elastic as hickory and also similar to teak. It is durable, straight, and close-grained, takes a good polish, and splits longitudinally better than most tropical hardwoods. It was used by the Indians for poles and is employed almost exclusively for palanquin poles. There is probably \$70,000,000 worth of this timber in Panama.

CONVENTIONS AT THE PANAMA-PACIFIC EXPOSITION.

Two hundred and six conventions now have been formally booked to meet in San Francisco in 1915 during the progress of the Panama-Pacific International Exposition. The last convention to be secured is that of the National Conference on Weights and Measures, which is composed of State weights and measures inspectors, city-inspectors of weights and measures, manufacturers of weighing and measuring apparatus, and Federal officials.

Three of the other most recent conventions assured to San Francisco in 1915 are of the American Association of Masters, Mates, and Pilots of Steam Vessels; the American Druggists' Syndicate; and the American National Live Stock Association.

GENERAL CONTRACTORS' ASSOCIATION HONORS MEMORY OF JAMES A. WILSON.

On Monday, February 16th, the General Contractors' Association closed its doors at 1:30 P. M. in honor of the memory of the late James A. Wilson, late President of the Builders' Exchange.

Junction Market, Mason and Turk Streets

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hosteries with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Stockton, North Point and Beach Sts.
San Francisco

Offices in all Principal Cities of the World.

OFFICE PACIFIC TEL. & TEL. CO.

Basement walls 22 ft. high. Cement plastered on inside against severe water pressure. Plaster waterproofed with Imperial Water Proofing.

Benj. G. McDougall, Architect.
ST. LUKE'S CHURCH, S. F.

South and east cement walls waterproofed with Imperial Water Proofing. Color effect produced with Imperial Concrete Finish to match stone work of street fronts

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd
San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

How fast the affairs in Mexico are moving remains to be discovered. Only one thing is certain and that is that life and property is not safe there for any person. So as events move forward the time will soon come when the powers of earth will have to unite in putting an end to a state of anarchy in the country to the south of us or there will have to be some representative of constitutional government arise that is strong enough to maintain order and maintain some semblance of proper government. It is a sorry mess and the outlook is not at all hopeful.

Despite the weather prophets March has come in like a lamb, and a spring lamb at that, gamboling on the greco of California hills. After two months of rain storm the first month of spring has opened with bland skies and open sunshine. Abundant rains of the winter speaks for a fruitful year. With the currency question settled and the new tariff adjusted, business should rapidly and permanently adjust itself. A prosperous season means a prosperous year and a prosperous year means better buildings and more of them. We can stand the rain and storm. For after the storm comes the sunshine and the rains are the life blood of the State. Whether we get any more rain in March or not we are practically assured a prosperous season in California.

Building construction for the month of February went along at a rather slow pace in San Francisco, the total for private work amounting to \$1,091,119 and an additional amount of \$519,325 for Panama-Pacific work. This was less than two million, although the city let contracts to the extent of \$294,125 for buildings and \$193,314 for street and sewer work. To this is added \$233,953 for State work in the city bringing the total up to \$2,331,866 all together.

February is a short month and considering the rainy winter the total is about up to the average for the month. In February, 1913, the total construction for San Francisco amounted to \$2,736,813. So that the difference is comparatively small.

One thing about the record for last month is that the contracts for brick buildings and permanent construction was small, the total amounting to \$407,075 as against \$541,928 for frame construction. So that the building record for the past month is mainly one of small buildings, residences and buildings outside of the fire limits. In detail the figures are as follows:

Brick & concrete constr. \$ 404,074

Frame	541,928
Alterations	145,136
P. P. I. E. work.....	519,325
City Buildings	294,125
City streets and sewers..	233,953

Total\$2,331,866

The total for January, 1914, amounted to \$1,928,563 so that even with a short month there was a substantial gain.

Compared to former years the figures are as follows:

February.	
1905	\$1,200,880
1906	1,791,858
1907	4,355,513
1908	2,662,143
1909	2,871,495
1910	2,066,034
1911	1,568,680
1912	1,696,332
1913	2,655,990
1914	2,331,866

It is to be noted that 1913 and 1914 contain the City, State and Government contracts, while the years previous to that do not. It happens, however, that both in 1913 and 1914 there was less than half a million contracts let for all these combined for the month of February. So that while last month was slow so far as business is concerned it was about an average for the years.

Architect G. Alexander Wright keeps steadily at the proposition of seeking better methods of estimating. His latest issue of the Quantity Surveyor reiterates his oft repeated statements concerning better estimating and contract methods and draws especial attention to the fact that the system that he advocates necessitates the furnishing of perfectly clear drawings, complete specifications, and final interpretation of all doubtful questions before a contract is let.

This is at least one important reform that should be effected. Most contractors go broke because of incomplete data. During periods of depression, at least, the fellow who makes a mistake usually gets the contract and then he discovers it too late.

Indefiniteness is the great trouble with the building game. It is the cloak that covers a multitude of sins. It hides the incompetent architect and permits him to slide with either the owner or the contractors as his interest may dictate. And it is usually the rock upon which the responsible man is wrecked. Clear drawings and complete specifications are the first requisite to a definite contract. Final interpretation of doubtful questions before the contract is let would remove the cause for most of the disputes and expensive litigation. Architect Wright is on the right track. He should have the support of all who desire to better the building business.

Scientific Sewage And Garbage Disposal.

Reports from Foreign Cities by the U. S. Consular Service.

American cities are paying increased attention to the problem of purifying sewage before discharging it into rivers or other convenient bodies of water. The necessity of such purification is generally recognized, but the selection of an economical and efficient method to meet the requirements of a particular city is a difficult matter. Much can be learned from the experiments of the comparatively few American cities that have attempted scientific treatment of sewage, and the methods adopted in certain European cities, especially in England and Germany, are particularly interesting and instructive. For instance, a number of European cities have attempted to meet the expense of purification by selling sludge to farmers and by using liquid sewage on irrigation farms.

The following synopsis of a series of consular reports on the subject of sewage and garbage disposal in Europe aims to show what progress has been made in a number of cities where scientific methods have been adopted. The reports were prepared by the consuls at the request of the commission on sewage disposal by one of the largest American cities. Cities with a population of less than 50,000 have not been included in the synopsis, nor have cities that make no attempt at sewage purification; the latter include nearly all the municipalities of southern and eastern Europe, as well as a few others located near the seashore. Reports from London, Berlin, and Paris were not called for.

Annual reports on the operation of sewage-disposal plants are issued by most of the cities mentioned, and these, together with other details that may be desired, can usually be obtained by addressing the engineering departments of the various cities.

UNITED KINGDOM.

Birmingham Consular District.

In Birmingham the household wastes and street washings flow through the same sewers. More than half the houses of the city are connected with sewers. The sewage is first run into settling tanks and then treated on biological filters. The sludge is treated biologically, rendered inodorous and afterwards dried on drying beds. The first attempt to eliminate impurities from the sewage was made in 1859, when two precipitation tanks were built and several acres of land acquired for irrigation. The purification effected was not satisfactory. Several methods of chemical precipitation were subsequently tried, but in 1871 a committee reported adversely on these methods. Since then the tank capacity has been greatly increased and a much larger area acquired for irrigation. Street sweepings, garbage, and ashes are burned in incinerators.

In Wolverhampton, a city with a population of over 95,000, sinks and water-closets are connected with sewers. There are some 10,000 pan closets, which are emptied weekly and the

contents, mixed with ashes, sold to farmers. Separate sewers are provided for street washings in about two-thirds of the borough. The sewage is subjected to precipitation with lime, followed by land filtration. The sludge is pressed and sold to farmers in winter and air-dried on land in summer. Septic treatment of sewage was tried, but was considered unsatisfactory.

In the city of Bradford, population 258,000, household wastes and street washings are run into the same sewers. The sewage is purified by chemical precipitation and filtration. The sludge is filter-pressed for the extraction of wool grease, the yearly value of grease recovered being about \$250,000; part of the press cake is sold as manure at 74 cents a long ton, and part is used as fuel. The first method of sewage purification tried in Bradford was filtration through peat. Later, lime precipitation followed by filtration through coke was tried, but this method also failed. The street sweepings are tipped onto vacant land, and house garbage and ashes are part tipped and part burned.

In Halifax, population over 100,000, household wastes and street washings flow into the same sewer. The sewage is treated in precipitation tanks and bacterial filters (double contact beds and percolating filters.) The sludge is pressed and carted away by farmers. Street sweepings, garbage, and ashes are tipped onto vacant land.

Leeds Consular District.

The city of Leeds has a population of 445,000 and maintains five sewage works. Household wastes and street washings flow into the same sewers. The sewage is subjected to bacteriological treatment after chemical precipitation and the sludge is pressed into cakes and disposed of as fertilizer. Sixty per cent of the house garbage and ashes collected in the city is disposed of in destructors; the remaining 40 per cent is deposited on land as manure or is used to fill quarries. The street sweepings are sold at 18 cents a ton to farmers and market gardeners. For 10 years the city has experimented with practically all the known methods of treating sewage.

In Wakefield, a town of 51,000 inhabitants, located 9 miles from Leeds, the household wastes and street washings are run into the same sewers, although there are a number of special storm sewers to take away surface waters from the streets. The sewage is subjected to chemical precipitation-percolation through bacteria beds, and settlement in humus tanks. The sludge is trenching into land formerly used for filtration purposes. At one time land filtration after chemical precipitation was tried, but the land proved unsuitable.

Previous reports on sewage disposal in Leeds and Wakefield were published in Daily Consular and Trade Reports for October 21, 1910. A detailed description of the methods employed in Wakefield, furnished by the borough

engineer, may be had from the Bureau of Foreign and Domestic Commerce, Washington, D. C.

Sewage Farming at Liverpool.

Nine-tenths of the sewage of Liverpool is discharged into the Mersey without treatment of any kind. The remaining one-tenth comprises the sewage of districts known as the West Derby and Walton and is treated on the West Derby and Walton sewage farms, the system adopted being broad irrigation without chemical treatment, but assisted by bacterial and storm-water beds. The West Derby farm has an area of 207 acres and receives the sewage of about 56,000 inhabitants. The Walton farm has an area of 277 acres and receives the sewage of about 61,800 inhabitants. The crops on both farms consist chiefly of rye grass, caldages, potatoes, mangel-wurzel, and beets.

Manchester Consular District.

In Salford, a town of 231,000 lying opposite Manchester, one system of sewers is used for both household wastes and street washings. The sewage is subjected to chemical precipitation, in which lime and salts of iron are used, and the tank effluent is then passed through rough filters and finally bacterial filters. The sludge is sent to sea in a 60-ton sludge steamer. Street sweepings are sold as manure, and the house garbage, ashes, etc., are burnt in destructors. Many methods of sewage purification, probably 20 to 30, have been tried in the last 25 to 30 years.

In Oldham, a town of more than 117,000 population, all household wastes and street washings are carried off in the same sewers. The sewage is treated by precipitation, settlement, and contact and sprinkling beds. The sludge is given to farmers. Street sweepings are used as manure, and garbage and ashes are burned in destructors.

Sewage Disposal System of Sheffield.

Until 1886 the sewage of Sheffield flowed in an untreated condition into the rivers and watercourses. In that year a main sewerage scheme was completed at a cost of \$750,000, and sewage-disposal works were constructed at a further cost of \$220,000, the process adopted being that of lime precipitation. The works were designed to treat a flow of 10,000,000 gallons of sewage per day, but for several years a flow of 17,000,000 gallons has been dealt with, and since 1886 the population has increased from 304,720 to 470,000, and the introduction of the water-carriage system, the extension of the drainage area, and the increased requirements have necessitated improved methods of treatment in addition to increased capacity. It was finally decided after exhaustive experiments to adopt a scheme consisting of continuous-flow settling tanks and contact beds. The local government has approved the scheme, which is now partly in operation, and the remainder is approaching completion.

The estimated cost of the extensions was \$1,350,000, but it appears probable that the work will be completed for \$35,000 less than that amount. In addition to this the city has bought lands for the present works and future extensions at a cost of \$130,000.

The principal features of the scheme include a new main valve chamber, into which a 5-foot barrel sewer discharges and also a 7-foot duplicate sewer. A storm-water overflow arranged to discharge the excess flow above 615,000 gallons per day to a storm-water conduit is fixed in the chamber.

A large penstock, with opening 5 by 12 feet, admits the sewage to a conduit 12 feet wide, which conveys it to the catch pits. Two pairs of catch pits, 42 feet long, 29 feet wide, and 13 feet deep, have been constructed; they are fitted with new screens, which extend the whole length of the pits and which are cleaned by hand rakes. The catch pits are in the form of a double hopper and retain the heavier grit, garbage and larger objects. Each pair is fitted with endless-chain bucket elevators for cleansing purposes. Two additional catch pits have been added, approximately twice the size of the older ones, and fitted with mechanical screens and an electrically driven traveling bucket dredger. The sewage passes from the catch pits through branch and main conduits 1 foot, 16 feet, and 20 feet wide, built in brick and covered with girders and concrete to the settling-tanks. The complete scheme includes 17 continuous-flow settling tanks, each holding approximately 1,000,000 gallons, which are now in operation.

Sixty contact beds, each half an acre in area, and 16 storm beds of similar design but twice the size are in course of construction. The works will provide for the treatment of a maximum quantity of 64,500,000 gallons of sewage a day, and will be one of the largest of its kind.

Sheffield has two extensive garbage destructors, the refuse destroyed in 1912 and 1913 amounting to 42,898 and 32,805 tons respectively, at a cost of \$28,760 and \$21,450. For dumping 35,663 tons of garbage requiring railway transportation there was expended, in addition to these amounts, \$20,435.

A plant for converting fish refuse into fertilizer recovered 82½ tons during 1913; it was sold at a profit to the municipality of \$600. There is also a can-bundling plant that handles 300 to 400 tons of used cans a year.

Methods Employed in Belfast, Ireland.

The single-sewer system is in use in Belfast. At one time all sewers emptied directly into the River Lagan, but sedimentation tanks are now used and the purified effluent is stored in ponds until high tide, when the discharge commences. The sludge is pumped into a ferro-concrete loading tank, whence it is discharged into a steamer and carried to sea. Experiments have been made with various systems of sewage disposal, but the city authorities are of the opinion that the method now used is the most economical for a city situated on the seashore. A refuse destructor having 12 cells, each with a capacity of 10 tons per 24 hours, has been constructed. An incinerator furnace has been added, and in this are consumed all infected

articles, typhoid excreta, diseased carcasses, fish offal, and other objectionable material. Unobjectionable matter is either used to fill up hollow ground or sold for manure.

Glasgow Consular District.

The single-sewer system is used in Glasgow, Scotland, and the sewage is purified by chemical precipitation; a portion is filtered. A portion of the sludge is filter-pressed; the bulk of it is sent to sea. Part of the street sweepings, garbage and ashes is destroyed in destructors and part sold. Reports on the garbage disposal system of Glasgow were published in Daily Consular and Trade Reports for October 21, 1910, and March 12, 1913. A copy of the annual report of the manager of the sewage-purification works of Glasgow will be loaned by the Bureau of Foreign and Domestic Commerce.

In Greenock, a town of over 74,000, the household sewage and the street washings are carried off in the same sewer; the sewage is emptied into the river without previous treatment. Street sweepings, garbage, and ashes are sold as manure, tipped onto vacant land, or sent to the destructor, depending on the character of the material.

GERMANY.

Barmen Consular District.

Barmen, a city of 172,000, depends chiefly on the Trennung (divided) system of sewerage, in which the sewer has two parts, the upper and larger for street washings and the lower for household wastes. The street washings are emptied directly into the river. The sewage is mechanically cleared. An experimental plant for further purification has recently been put into operation. Street sweepings are dumped. Garbage and ashes are burned in the municipal garbage plant. The present garbage-burning plant was constructed in 1907 and has given satisfaction in every respect. Not only is the city's garbage disposed of in a sanitary manner, but incidentally a fine quality of sand is produced, and the heat produced by the burning garbage is converted into electricity. The slag is reduced by crushing to various grades of sand that have been used with splendid results for building purposes and for the manufacture of bricks. The hot gases from the burning garbage are conducted to a boiler, and the steam raised is used to run a steam turbine that is connected with a dynamo. The current developed is sold to the municipal electric works at 0.833 cent per kilowatt hour. The plant produces annually 11,000 tons of slag or clinkers from 22,000 tons of garbage, and the electric current produced amounts to 1,700,000 kilowatt hours per year.

Elberfeld, population over 172,000, has the double-sewer system in some parts of the city and the single system in others. The sewage is treated in mechanical settling basins, and the sludge is used for filling in land. Street sweeping, garbage, and ashes are also used for filling in.

In Dusseldorf, population 400,000, household wastes and street washings are carried off in the same sewers. The sewage is purified in a Fein-Rechenanlage (fine raking plant), and the sludge sold to farmers. Street sweepings, garbage, and ashes are carted away at present, but a plant for burning such

refuse is contemplated, and it is planned to use the waste of this plant in making artificial stone, fertilizer, etc.

Hamburg Consular District.

Hamburg, with a population of over 1,000,000, is located on the Elbe River at a point where the tidal ebb and flow amounts to 6.56 feet, and where conditions are such that the current of the river itself is disregarded as an influence in the matter of sewage disposal. Household wastes and street washings flow into the same sewers. The contents of the main sewer, before being discharged into the Elbe, pass through collecting basins in which the swinging dredges continually remove solid and floating material, which is then transferred in barges to a low-lying island in the river, the level of which is being slowly raised. The waste water then flows into the river through three final discharging pipes. Owing to the tides there is a steady circulation of fresh water and a continual churning of the refuse, which facilitates its destruction. No general attempt has been made to sterilize sewage at Hamburg. Garbage and ashes are collected in carts and incinerated. Previous articles on sewage and garbage disposal in Hamburg have been published in Daily Consular Reports for October 21, 1910, February 13, 1912, and March 12, 1913.

Harburg, with a population of 67,000, is located on the south branch of the Elbe, opposite Hamburg. Separate sewage systems are maintained for household wastes and street washings, and practically all houses are connected with the sewer system. All waste water is led into a clearing plant, where by means of dredging rakes and cesspools it is mechanically clarified. No other process has ever been employed.

In Rostock, population 70,000, the household and street wastes flow into the same mains, and the sewage is purified in Emscher wells or cesspools. Garbage and city wastes of all kinds are collected and used for filling land.

FRANCE.

Method of Purification Employed in Rhelms.

In the city of Rhelms, with a population of 115,000, the kitchen slops in the modern buildings are connected with the sewers, and in about 200 of the 13,221 buildings of the city the water-closets are also connected. Rain water is carried off in the storm sewers. Since 1885 the city has clarified the sewage by irrigation on agricultural land. This purification, which is considered very satisfactory, is effected on fields of a chalky nature comprising some 1,400 acres. The work is carried out by a private company. Previous to 1885 chemical purification was attempted, but proved a failure. The street sweepings, garbage, and ashes are carried away by private contractors, to whom the city pays annually about \$15,000. After sorting, this refuse is sold for fertilizing purposes. The authorities are considering the advisability of changing this method of utilizing the city sweepings.

Brickmaking from City Refuse in the Commune of Villenrhanne.

In the commune of Villenrhanne, adjacent to the city of Lyon, the city refuse is burned and bricks are made from the residue. This has been a pri-

has arranged for the purchase of the crematory. The crematory is a model plant, and annexed to it is a brick-pressing plant. The furnace serves not only to burn the refuse, but also to operate, by steam, the various machines in the factory.

The residue from the furnace is first carried through a series of heavy rollers, after which it is delivered in the vate enterprise but the municipally form of a fine powder to a mixing trough. Here it is mechanically mixed with a heavy lime in the proportion of 80 per cent of residue to 20 per cent of lime. This mixture is emptied into another longer trough by a system of buckets operated on a chain, where the proper amount of water is added, and the material is then fed to the brick-pressing machine, which is of English manufacture and capable of turning out 20,000 bricks per day. After 28 or 30 days the drying is completed, but the bricks are as a rule not used for 60 days from the time they leave the press. The only kinds of refuse not used in this manufacture are empty cans, metal barrel hoops, and other similar waste, which may easily be sold as scrap metal.

The bricks sell at the factory in ordinary wholesale quantities at \$3.79 per thousand. If ordered in very large quantities, this price is sometimes reduced to \$5.40, or even \$5.20. The bricks are of good quality, strong and durable, and light gray in color. They are said to be especially appreciated by the masons on account of their smooth surface and even edges. It must be understood that the above prices are those of a private concern, which would naturally be interested in making the figures as high as possible. Were the work completed under municipal supervision, the cost of manufacture would be less, and the expense of disposing of the city waste could probably be fairly met by the profits derived from the incineration of the refuse and the building material made therefrom.

AUSTRIA.

Sewage Disposal in Prague.

The sewage from the city of Prague, population 375,000, is conducted through four large sewers to a cleaning plant at Bubenc, one of the suburbs. The sewage is first passed through a system of screens, which catch the coarser materials. The balance of the material then passes along, and is distributed to 10 oblong basins 285 feet long, 18 feet wide, and 9 feet deep, where the solid substance settles to the bottom. About 163 cubic yards of sediment results each day. The thinner sediment is conducted onto an island, where it flows into trenches, and during the winter months the sediment from these trenches is taken to a point down the river Moldau, where it is again placed in open trenches to evaporate, when it is sold as fertilizer. It is taken down the river in closed tanks on open boats. After removing all the solid substances the water remaining runs into the river. Kitchen sinks and water closets are connected with the sewers. The street washings flow into the same sewers. Practically the entire city is provided with sewers for household waste. There has not been any other method of treatment. Street sweepings, garbage, and ashes are

hauled to depositories in the suburbs and sold to farmers.

RUSSIA.

Modern Methods of Sewage Disposal in Moscow.

The city of Moscow has a population of about 1,550,000, and about 40 per cent of the city is provided with sewers for household wastes. A separate system of canalization is provided to carry off the street washings. The sewage is filtered on sewage fields and part of it is subjected to biological treatment on the city station. The sewage fields are giving very good results. The waters, after passing several filters, are used to irrigate plantations of cabbage and other vegetables, which find a ready sale in the city. The city is still making experiments with the biological purification of the sewage.

Sewage Disposal in Odessa.

The sewage of the city of Odessa, population 520,000, is to a large extent used on irrigation fields, where it gives excellent results. Good crops of vegetables are obtained and fair results have been obtained with wheat. The street sweepings, garbage, and ashes are dumped outside the city, although a small portion is destroyed in a destructor.

TRIBUTE TO JAMES A. WILSON.

Masons and Builders Pass Resolutions of Respect and Appreciation of Late President of Builders' Exchange.

San Francisco, March 2, 1914.

WHEREAS, the hand of Providence having removed from our midst our

highly esteemed friend and associate, James A. Wilson, whose genial nature, ability and integrity made him available as a certain choice for the highest honors at the hands of the members of all the many fraternal and business organizations with which he was affiliated, and

WHEREAS, through all his associations during his long and useful life he reflected credit upon the bricklaying craft, of which craft he was a past master, therefore be it

RESOLVED, that the members of the Masons' and Builders' Association of San Francisco take this means of expressing our heartfelt appreciation of the hallowed memory of our departed brother, and in regretting his removal from our midst we mourn for one who was in every way worthy of our respect and regard, and be it further

RESOLVED, that in the death of James A. Wilson the Masons' and Builders' Association has lost a true and faithful exponent of the ancient and honorable craft and the City of San Francisco has lost a leading progressive citizen whose example should be emulated by all who would better themselves and the community, and be it further

RESOLVED, that we sincerely condole with the children of our departed brother and congratulate them that their father has left them as a heritage an honored name, which is more to be desired than great riches.

N. LARSEN,
JOSEPH J. PHILLIPS,
E. J. BRANDON,
Committee.

MOTOR TRUCK ON ITS WAY TO TAHITI.

"A Federal Passenger Truck recently delivered to Atkins, Kroll & Co. in this city, is the latest commercial car of this type to be exported," says P. S. Nichols, Commercial Car Manager of the Pacific Kessel Kar Branch.

"In the past two months," says Nichols, "we have exported no less than five of these trucks—three to the Hawaiian Islands, one to Tahiti and one to South America, and from this fact it is very evident that these foreign climes are going to prove quite a harvest to commercial car dealers in San Francisco."

Firms dealing news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel, \$35,000. Architect, W. G. Hind, 16 Kearny street, S. F. Owner, Dr. Clyde S. Payne. This building will be erected on the north side of Bush street, 90 feet west of Stockton, and will have a frontage of 50 feet by a depth of 68 feet 9 inches. A modern French style of architecture has been used. There will be four stories on the first floor and a total of 24 two and three room suites on the upper floors. Interiors will be finished in redwood and white enamel. Oak floors will be used in the living rooms and halls. Plans provide for steam heat, an automatic elevator, portable vacuum cleaners and a hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile with composition floors. Entrance and lobby will have marble and tile wainscot. Exterior of the building will be faced with white enamel brick. Plans are complete and segregated figures are being taken on the various parts of the work.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$22,000. Architect, Charles J. Rousseau, 16 Kearny street, S. F. Owner's name withheld. The building will be erected on Scott street near Lombard, close to the Exposition grounds, and will cover an area of 50 by 100 feet. The design is in the Classic style. Interior will be arranged for 18 apartments of two and three rooms, some of which will have dining rooms connected with the living room by sliding doors. Interior finish will be of pine and hardwood veneer. Oak floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. The wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with pressed brick veneer. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$12,000. Architect, Ernest Hildebrand, Crocker Bldg., S. F. Owner, Ernest Hildebrand. The building will be erected on the west side of Larkin street near Union, and has been designed to contain 12 modern suites of three and four rooms. Interior finish will be of pine and redwood with some oak floors. There will be steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. All suites will have private baths and wall beds. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

SAN FRANCISCO—Apartment house addition, 1 story, frame, \$2,500. Architect, Henry Shermund, Mills Bldg., S. F. Owner, Henry Proll. The present building located at the southwest corner of Clay and Larkin streets will be altered and an additional story con-

structed. New portion of the building will contain two and three room suites, and will be arranged to correspond with the present building. The work will include interior finish, plastering, plumbing and electric work. Extensive alterations will also be made to the old portion. Exterior will be covered with rustic. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 2 story and base, frame, \$10,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Segala. The building will be erected on Pfeiffer near Stockton street, and has been arranged to contain four modern suites of three rooms and bath each. Interior will be finished in pine and redwood. There will be a hot water supply, wall beds and private bath rooms. Some hardwood panels will be used. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and ship-lap. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$10,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on Pacific street near Taylor, and contain six suites of two and three rooms with private baths. All interior finish will be of pine or redwood. Some oak floors will be used. There will be a hot water supply. Bath rooms will have the wainscot and composition floors. Wall beds are specified. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are now being prepared.

ALAMEDA, ALAMEDA CO., CAL.—Apartment house alterations, frame construction, \$6,000. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name withheld. The present two-story frame residence on San Antonio avenue will be altered and rearranged for modern apartments of two and three rooms. The work will include new plastering, partitions, plumbing, painting, electric work and mill work. Interior finish will be of pine throughout. There will be wall beds and private bath rooms. Exterior of the building will also undergo alterations. Plans are being prepared and figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 5 story and base, brick and steel, \$85,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, George Clark and J. A. Elston, 948 Market street, S. F. The building has been mentioned in these columns before, and will be erected at the southeast corner of Durant and Telegraph avenue. The building will cover a considerable ground area, and will contain a total of 78 rooms, which will be arranged in two and three room suites with private baths. Interior will be finished in pine and elm panels. Some oak floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply.

All suites will have wall beds. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Marble and tile will be used in the lobby and vestibule. Plans are complete and segregated figures are being taken on the various parts of the work.

LOS ANGELES, CAL.—Apartment house, 4 story and base. Class C construction. Cost not stated. Architects, Withey & Davis, Story Bldg., L. A. Owner, Leon Fighiera. The building will be erected on Beacon street near arranged to contain a total of 110 between 7th and 8th streets, and will be rooms, which will be divided into two and three room suites. All apartments will have wall beds and private baths. Interior will be finished in pine and hardwood with some oak floors. Plans provide for steam heat, elevator service and a hot water supply. Vacuum cleaning will also be installed. Bath rooms will have the wainscot and composition floors. Exterior of the building will be faced with artificial stone. Plans are complete and figures are being taken.

SEATTLE, WASH.—Apartment house, 4 story and base, brick and steel, \$40,000. Architect, V. W. Voorhees, Eltel Bldg., Seattle. Owner, H. McBride. The building will be erected at the corner of 3rd avenue and Battery street, and will cover an area of 60 by 180 feet. There will be a total of 42 suites of two rooms and bath each. Interior finish will be of pine and hardwood. Plans provide for steam heat, a hot water system, elevator service and vacuum cleaning. All suites will have wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architects, Collischonn & Meeth, 521 11th avenue, S. F. Owner, Mrs. R. Ellen. The building will be erected on 5th avenue near Clement street and has been designed in the modern Mission style. Interior will be arranged for a total of 15 suites of three and four rooms. Interiors will be finished in pine and elm panels. Some hardwood floors will be used. Plans provide for steam heat. Wall beds and a hot water supply. Portable vacuum cleaners will also be installed. Bath rooms will have the wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick, \$40,000. Architects, Blanchard, Green & Tifal, Van Nuys Bldg., L. A. Owner, F. F. Stevens. Contractors, Webb & O'Neill, Lankershim Bldg., L. A. Contract price, \$40,000.

BRIDGES AND DAMS.

ASTORIA, ORE.—Docks and warehouses, timber construction, \$500,000. Engineer, W. J. Walsh, Astoria. Owners, City of Astoria. Preliminary

plans are being prepared for a number of new docks which will be erected with the proceeds of the recent bond election held in Astoria. Each of the docks will have an average length of 1,200 feet. Two story frame warehouses will be constructed on the docks. Only preliminary plans are now being worked out and it will be some time before bids will be called. Further mention will be made of the work.

HONOLULU. H. T.—Pile driving machinery, etc. Cost not stated. Engineer, Board of Harbor Commissioners, Honolulu. Owners, City of Honolulu. Plans have been completed calling for furnishing the city with pile driving equipment and machinery. Bids are now being called for and will be opened on March 28th. Plans and specifications together with complete information may be obtained from the Honolulu Harbor Commissioners.

Contracts Awarded.

SAN FRANCISCO—Ferry slip, \$34,587. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, The Thompson Bridge Co., S. F. Contract price, \$34,587. Note: Bids were also opened by the State Board of Harbor Commissioners for furnishing a large amount of creosoted piles. No contract was awarded however. A complete list of all figures will be found under the heading of San Francisco in this issue.

CHURCHES.

HOLY CROSS CEMETERY, SAN MATEO CO., CAL.—Mausoleum, 1 story, reinforced concrete, \$6,000. Architect, J. A. Porporato, 619 Washington street, S. F. Owner's name withheld. The building is designed in the Classic style and will contain six receptacles. There will be a cement or tile floor, art glass and ornamental iron and bronze. Exterior will be faced with cement plaster. Plans have been out for figures and a contract will be awarded shortly.

LOS ANGELES, CAL.—Church addition, frame construction. Cost not stated. Architects, Alfred W. Rea and Charles E. Garstang, Black Bldg., L. A. Owners—Weslake Methodist Church. Two new additions will be made, each two stories in height, one covering an area of 14 by 72 feet and the other 14 by 50 feet. The new portion of the building will be used for class rooms, there being eighteen rooms in all, separated by rolling doors. Interior finish will be of pine with maple floors. There will be steam heat, blackboards and six toilets. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FACTORIES & WAREHOUSES.

Contracts Awarded.

SALEM, ORE.—Canning plant, 1 story and base, reinforced concrete, \$50,000. Architect, F. A. Dickson, Salem. Owners, Hunt Bros., Salem. Contractor, A. J. Anderson, Salem. Contract price, \$50,000.

FIRE HOUSES AND JAILS.

BERKELEY, ALAMEDA CO., CAL.—Fire houses, 3, 2 story and base, frame. Cost not stated. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. These buildings will be erected on Le Roy avenue, Ellis street and Claremont avenue. Each building will contain space for two pieces of apparatus and quarters for the men. Interiors will be finished in pine throughout. There will be special plumbing and electric work. Exteriors will be covered with cement plaster on metal lath. Plans have received the approval of the City Council and bids are now being taken. Figures will be opened on March 27th.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,000. Architect, Theo. W. Lenzen, Humboldt Bank Bldg., S. F. Owner, E. Lange. The building will be erected on the west side of 9th avenue near Irving street, and will contain one store and two modern flats. Interiors will be finished in pine and redwood with some elm panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Louis De Martini. The building will be erected on Union street west of Stockton, covering an area of 28 feet 9 inches by 61 feet. There will be four flats of five rooms each. Interior will be finished in pine and redwood with some hardwood floors. Each living room will have an open fire place and tile mantel. Bath rooms and kitchens will have tile wainscot. Entrance will be finished in tile and terrazzo. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and all work except mill and carpentry work will be done by Day Labor. The owner is now in the market for all materials.

SAN FRANCISCO—Flats, 4, 2 story and base, frame, \$4,000 each. Architect, none. Owners, Tyler-Schmidt Building Co., 1921 Oak street, S. F. These buildings will be erected on 17th avenue north of California and each will contain two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and shiplap. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Flats, 2 story and base, frame, \$10,000. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The building, designed for residential flats, will contain four flats of five and six rooms. Interiors will be handsomely

finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Flats, 2 story and base, frame, \$7,500. Architect, A. Willomer, Oschner Bldg., Sacramento. Owner, E. E. Juergenson. The building has been designed to contain six modern flats of three and four rooms. Interior will be finished in pine and redwood with some hardwood panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are being prepared.

GARAGES.

STOCKTON, SAN JOAQUIN CO., CAL.—Garage, 1 story, base and mezzanine floor, brick and steel, \$5,000. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, Mr. Eshbark, 203 West Fremont street, Stockton. The building will be erected on North Hunter street, and has been designed to contain a large show room, offices, repair shop and storage space. A concrete floor will be used. Entire structure will have a floor space of 23,000 square feet. Interior of the office and display room will be pine and hardwood. There will be an electric elevator, two 500-gallon steel tanks and metal window sash, frames and ceilings. Patent store fronts are also specified. Roof will be of asbestos. Exterior of the building will be faced with pressed brick. Plans are being prepared.

GOVERNMENT WORK AND SUPPLIES.

Canal Circular 829.

- Class 1. Outlet boxes, switch boxes, cut-outs, push buttons, etc.
- Class 2. 1/8" snap, knife and marine switches.
- Class 3. 25 marine fixtures.
- Class 4. 650 fuses.
- Class 5. 140 conduit.
- Class 6. 144 portable lamp guards.
- Class 7. Bushings, elbows, and lock-nuts.
- Class 8. 47,000 feet rubber covered and weatherproof wire.
- Class 9. 300 pounds magnet wire.
- Class 10. 1,000 soldering sticks.
- Class 11. 12 clamps.
- Class 12. 150 pairs pliers.
- Class 13. 300 prs side-cutting pliers.
- Class 14. 500 pounds galvanized soft steel wire.
- Class 15. Common wire nails and galvanized nails.
- Class 16. Marine bolts.

Class 17. 659 connection links.
Class 18. 500 lengths stovepipe.
Class 19. 165 brass globe valves, 2-in.
Class 20. 50 brass swing-check valves, 4-in.
Class 21. 36 wood tackle blocks.
Class 22. 750 pounds square packing.
Class 23. 2,096 asbestos gaskets.
Class 24. Medium rubber valves.
Class 25. Wheels for dump wagon.
Class 26. 50 steel tapes.
Class 27. 1,000 feet vitrified sewer pipe.

Electrical Equipment for Canal Fortifications.

The Isthmian Canal Commission will soon issue proposals for lighting fixtures and supplies, switch panels and feeder boxes, cable, hangers, and armored cable for wiring material for us on the fortifications now in course of erection at the Atlantic and Pacific ends of the Panama Canal.

Removing Rock, San Francisco Bay.
The Standard American Dredging Co., of San Francisco, Cal., presented the successful bid at \$61,500 for removing Centisima rock near entrance to San Francisco Bay, Cal.

Submarines for the Navy.

The Secretary of the Navy has decided upon the award of three submarines authorized by act of Congress approved March 4, 1913. Bids were opened for these submarines on December 2, 1913, but the decision as to award of contracts has been delayed, owing in part, to the financial state of one of the companies bidding.

The secretary has decided upon the following awards:

To the Electric Boat Company, two submarines of their type 37-H, to be built at the works of the Fore River Shipbuilding Corporation.

One boat of the Lake Torpedo Boat Company's type, to be built in a navy yard; complete detail working plans for this boat and license to construct are to be furnished by the Lake Torpedo Boat Company. The navy yard at which the vessel will be built has not yet been decided upon.

The contract for the other submarine has not yet been awarded.

American Firm Secures Italian Aqueduct.

Walter Wood, a representative of the firm of R. D. Wood & Co., of Philadelphia, which secured a contract on February 4 to furnish 45,000 tons of pipe to be used in the construction of the Apulia aqueduct, is in London trying to discount \$2,500,000 of treasury bonds, payable in three years, the proceeds from which are to be used in filling the contract. If Mr. Wood is successful in this transaction, and this is practically certain, he may secure another contract for 50,000 tons of cast iron pipe, as the terms offered by his firm are more advantageous than those of the Italian, French, British, and German firms, which combined to divide the contract. The Apulia aqueduct, which is expected to be completed in 1921, will be the largest in the world. The course of the Sele River has been diverted. A collecting basin has been built at its source, 1,370 feet above the level of the sea, whence the waters are to be conveyed by tunnel for seven and a half miles, penetrating a water-

shed and then the aqueduct, which is 155 miles long, to the Apulian provinces of Bari, Foggia, and Lecce. The aqueduct is to cost \$33,000,000.

Reclamation Work.

The Reclamation Service is asking for proposals for earthwork and tunnel, Pablo Canals, in connection with the Flathead irrigation project in Montana. The work is located about six miles southwest of Poison, Mont., and involves about 3,400 cubic yards of open-cut excavation and about 520 lin ft of tunnel. Bids will be opened at 2 o'clock p. m. March 20, 1914, at the office of the Reclamation Service, St. Ignatius, Mont.

Pocatello, Idaho, Post Office.

As previously reported, the contract for the construction, complete, of the U. S. post office at Pocatello, Idaho, was awarded to Palmberg & Mattson, Astoria, Ore., at \$93,555. In the construction of the building fixtures and material manufactured by the following named firms will be used: Plumbing fixtures L. Wolf Mfg. Co.; direct cast-iron radiators, American Radiator Co.; wall radiators, do; radiator valves, Jenkins Bros.; cabinet and tablet, Frank Adam Electric Co.; conduit, the Conduit Co. (I. & D.); rubber-covered wire, John A. Roebbling's Sons Co.; lighting fixtures, Frank Adam; pendant switches, Cutler-Hammer Mfg. Co.; insulating joints, Macallen Co.; keyless sockets, Perkins; chain-pull sockets, Bryant; porcelain sockets, Pass & Seymour; indirect radiators, American Radiator Co.; damper regulator, do; plug receptacles and snap switches, General Electric Co.; reflectors, globes, and glassware, Holaplane; air valves for end of steam mains and indirect radiators, Monash-Younger Co.

Cement, Reclamation Service.

The Secretary of the Interior has awarded contract to the Inland Portland Cement Co. of Spokane, Wash., for furnishing 10,000 barrels of cement at 95 cents per barrel f. o. b. cars Metairie Falls, W. S. This cement is for use on the Okanogan project, Washington, and the St. Mary storage unit of the Milk River project in Montana.

San Diego, Cal., Vault Shelving.

The contract for installing metal vault shelving in the U. S. post office, San Diego, Cal., has been awarded to the Berger Mfg. Co., Canton, Ohio, at \$1,122; time to complete 90 days.

Availability of Navy Funds.

Secretary Daniels has made an important recommendation to Congress to the effect that 10 per cent of the annual appropriations for the naval establishment, exclusive of public works and increase of the Navy, shall be available interchangeably for expenditure on the objects named in the appropriations. This is to be done only in cases of emergency arising subsequent to, and unforeseen at the time of, submitting the annual estimates to Congress. Under the annual various appropriations there are always sufficiently large amounts of unexpended balances to more than offset the amount of any deficiencies that may be incurred in other appropriations. With this provision on the statute books it

would be possible to transfer from one appropriation where the money is not required to the appropriation which is deficient a sufficient amount to offset the deficiency and obviate the necessity of going to Congress for additional money when the unexpended balance under the first appropriation would be carried to the surplus fund. The present practice swells the apparent total of appropriations for the naval establishment without actually increasing the amount of money drawn from the treasury. Such a provision would also enable the department to take care of serious casualties which might occur. For instance, if the hull of one or more of the vessels was seriously damaged, necessitating extensive repairs at a time when no funds were available under the appropriation for repairs to hulls, it would be possible to take the money from another appropriation where the need for work was less pressing and make immediate repairs to the hull of the damaged vessel.

MARE ISLAND, SOLANO CO., CAL.—

Magazine building, 1 story, reinforced concrete, \$12,500. Architects, Bureau of Yards and Docks, Washington, D. C. Owners, United States Government. Bids opened in Washington on March 17th for this work show Monson Bros. of San Francisco low at \$11,950. A complete list of bids will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue. A contract for the work has not been awarded.

—HALLS & SOCIETY BLDGS—

SAN FRANCISCO—City Hall work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday session of the Board of Public Works for the electric, vacuum cleaning system and pneumatic tubes for the new City Hall. The Newbery-Bendheim Electric Co. were low on the work at \$77,000 and will probably be awarded the contract. Bids were also opened at the same meeting for furnishing the City Hall water supply. The Scott Co. were low on the work at \$13,475. A complete list of these bids will be found under the heading of San Francisco in this issue.

SACRAMENTO, CAL.—State Capitol elevator work. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids opened by the State Engineering Department for elevator work in the State Capitol building show the Van Emon Elevator Co. low at \$5,516 for installing two passenger elevators; Ralston Iron Works low at \$970 for ornamental iron grilles in connection with the same, and Randall Elevator Door Control Co. low at \$1,234 for installing pneumatic door operating devices. A complete list of all figures will be found under the heading of Sacramento, Stockton and Northern California in this issue.

BAKERSFIELD, KERN CO., CAL.—Lodge hall and stores, 3 story and base, brick and steel, \$20,000. Architect, O. L. Clark, Brower Bldg., Bakersfield. Owners, Knights of Pythias Hall Association. The building will be designed for stores on the first floor,

lodge halls and offices of the association on the second floor and a large banquet hall and ball room on the third floor. Interior finish will be of pine and redwood with maple floors in the banquet hall and ball room. There will be steam heat and a hot water supply. Plans provide for patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans are being prepared.

OREGON CITY, ORE.—City Hall, 2 story and base, brick, \$15,000. Architect, C. A. Houghtaling, Henry Bldg., Portland. Owners, Oregon City. Two designs were submitted by this architect. Both were of the Colonial style, brick construction, and with large white pillars running from the ground to the top of the building. In both plans the structure would be trimmed in red brick. The second floor will be used for meeting rooms, while the first floor will be given over to council chambers, reception rooms, fire station and various committee rooms. Plans provide for steam heat, fireproof vaults and pine interior finish. The architect is now completing working drawings and figures will be called for shortly.

Contracts Awarded.

OAKLAND, CAL.—Municipal auditorium, 2 story and base, Class A construction, \$1,000,000. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Contractors, Christensen Bros., 237 Wayne avenue, Oakland. Note: This contract covers only the preparation of the site, granite work and setting. Contract price, \$196,360.

HOSPITALS

RED BLUFF, TEHAMA CO., CAL.—Hospital, 2 story and base, reinforced concrete. Cost not stated. Architect's name not given. Owners, St. Elizabeth's Hospital, Rev. Father E. Brady, Red Bluff. The building will replace the building recently destroyed by fire and will cover an area of 40 by 90 feet. Interior has been arranged for 25 beds, 3 wards, private rooms, operating room and nurses' quarters. Interior finish will be of pine. There will be elevator service, heating and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and an effort is being made to raise the balance of the money necessary to start construction. Information can be secured from Father F. Brady, who is in charge of the campaign.

SEATTLE, WASH.—Hospital, 4 story and base, reinforced concrete and steel, \$150,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, John Starbird. The building will be erected in the Queen Anna Hill district, and is to cover an area of 120 by 156 feet with a large L. Construction will be fireproof throughout. Details of the building have not been given out and further mention will be made of the work.

HOTELS.

SAN FRANCISCO.—Hotel, 7 story and base, reinforced concrete, \$162,000. Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owner, Mrs.

William F. Burbank. The building will be erected on property adjoining the present Union Square Hotel at the northwest corner of Post and Stockton streets, and is intended as an addition to that structure. One of the main features of the building will be a large palm court which will occupy nearly the entire first floor. Design and construction will be similar to that of the present building. Upper six floors will contain in the neighborhood of 150 guest rooms, all of which will have private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. Marble, tile and ornamental plaster will be used extensively. All bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. All work will be segregated.

SAN FRANCISCO.—Hotel, 7 story and base, brick and steel, \$75,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor and has been designed to contain two stores besides the hotel office and lobby on the first floor. The building will have a frontage of 27½ feet by a depth of 137½ feet. Upper floors will contain 66 rooms with private baths. There will be steam heat, vacuum cleaning system, elevator service and a hot water supply. All bath rooms will be finished in tile. Some marble and ornamental plaster will be used. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick trimmed with ornamental terra cotta. Plans are complete and figures are being taken.

RIVERBANK, STANISLAUS CO., CAL.—Hotel, 2 story and base, brick, \$10,000. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, R. McDonald. The building will cover an area of 50 by 90 feet and has been designed for stores on the first floor and modern hotel rooms on the upper floor. Bath rooms will have tile floors and wainscot. Exterior of the building will be faced with pressed brick. Plans also provide for patent store fronts. Bids are now being taken on the work.

BAKERSFIELD, KERN CO., CAL.—Hotel, 2 story and base, brick, \$12,000. Architects, Henry Starbuck and L. K. Condragian, Fresno. Owner, C. Petri. The building will contain stores on the first floor and hotel rooms and baths on the upper floor. All interior finish will be of pine and redwood. There will be steam heat and a hot water system. Bath rooms will have tile wainscot and composition floors. There will be patent store fronts and plate glass windows. Exterior of the building will be faced with pressed brick. Plans for the work are now being prepared.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction. Cost not stated. Architect, Arthur S. Heinemann, San Fernando Bldg., L. A. Owner, Herbert J. Goudge. The building will be erected on West 6th street near Flower, covering an area of 42½ feet

by 130 feet. Plans provide for two stores besides the hotel office and lobby on the first floor. Upper floors will contain a total of 54 guest rooms and a number of public and private baths. Interior finish will be of pine and hardwood. There will be steam heat, elevator service and a hot water supply. Patent store fronts are specified. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SEATTLE, WASH.—Hotel, 3 story and base, brick and steel, \$60,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, J. C. Peterson. The building will be erected on Pike street at the corner of 7th, covering an area of 110 feet by 120 feet. There will be a number of stores besides the hotel entrance and lobby on the first floor. Upper floors will contain in the neighborhood of 170 guest rooms and public and private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, a vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and composition floors. Patent store fronts and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

LIBRARIES.

COALINGA, FRESNO CO., CAL.—Library, 2 story and base, reinforced concrete, \$20,000. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Coalinga Union High School Library District. Bids opened for the general construction of this building show Olsen & St. Clair of Coalinga low at \$15,347. A complete list of the bids received will be found under the heading of Fresno, Modesto, Stanislaus and Central California in this issue.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO.—State exhibit building, frame and plaster construction. Cost not stated. Architect, Joseph Bell De Remer, Title Insurance Bldg., L. A. Owners, North Dakota Exposition Association. The building will be V shaped, with a central portion 39 feet square, two wings each 38 by 48 feet. Plaster exterior over metal lath, tile roof, pine floors and finish. The first floor will contain a lecture hall and balcony, offices, rest room and numerous exhibit chambers. The second story will contain exhibit rooms. Plans are now being prepared.

SAN FRANCISCO.—Concession building, frame construction, \$100,000. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Irish Village Co. It is proposed to erect a large group of buildings devoted exclusively to the Irish traditions and scenes. One of the main features of the group will be an exact replica of the Castle Blarney. Details of the buildings have not progressed far enough to give a description. Further mention will be made of the work.

POST OFFICES.

GRASS VALLEY, NEVADA CO., CAL.
—Post office, 2 story and base, semi-fireproof construction, \$55,000. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. The Supervising Architect has notified the postmaster at Grass Valley that working drawings for the new Federal building have been completed. Bids will be called for shortly. There is \$35,000 available for construction.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad tracks, poles and conduit. Cost not stated. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans and specifications of the work to be executed under Section A of Contract No. 16, Van Ness Municipal Railroad, have been completed and are now out for figures. This contract will include laying tracks, erecting poles and putting in conduit for the Van Ness Avenue line from Market street to Chestnut. Bids will be opened on March 18th. An official proposal appears in another column of this issue. Plans can be secured from the City Department of Engineering.

SAN FRANCISCO—Trolley poles, concrete construction. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications have been approved for the ornamental concrete trolley poles which are to be erected along Van Ness avenue and Chestnut street. Bids are now being taken for this work and will be opened by the Board of Public Works on March 11th.

SAN FRANCISCO—Underground and overhead conductors, Union Street Municipal Line. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at the last Wednesday meeting of the Board of Public Works for this work show the Pacific Fire Extinguisher Co., low on the overhead work at \$3,200, and the Pacific Gas and Electric Co. low on the underground work at \$3,753.73. A complete list of the bids will be found under the heading of San Francisco in this issue.

SACRAMENTO, CAL.—Freight shed, 1 story, frame, \$2,500. Architect, none. Owners, Oakland, Antioch and Eastern Railroad Co., 105 Montgomery street, S. F. Plans have been completed for a small freight shed which is to be erected on M street between 2nd and 3rd streets. No interior finish will be used. Exterior of the building including the roof will be covered with corrugated iron. Plans are complete and the work is now underway by Day Labor.

SAN DIEGO, CAL.—Passenger station, 2 story and base, reinforced concrete, \$125,000. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co. The building will cover a considerable ground area and has been designed in the Mission style. Construction will be of reinforced concrete with cement and tile floor, hollow tile interior par-

titions and metal window sash and frames. Plans include steam heat, a hot water supply and vacuum cleaning. Interior finish will be of pine and hardwood. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are nearly complete and figures will shortly be called.

RESIDENCES.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$1,500 to \$8,000 respectively. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. These houses will be erected in the Sea Cliff Tract, and have been designed to contain from seven to ten rooms with one and two baths and sleeping porches. Interiors will be finished in pine, redwood and blue gum. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. The sum of \$65 is allotted for finish hardware and \$150 for lighting fixtures. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,300. Architect, none. Owner, J. M. Olson, 125 Jersey street, S. F. The dwelling will contain six rooms and bath, and will be erected on the south side of Jersey street west of Church. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a large open fire place in the living room with a brick or tile mantel. The wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic, ship-lap and a brick veneer base. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, T. Ronneberg, 2939 Pine avenue Berkeley. The dwelling will be erected on the Tunnel road and has been designed for a ten-room house with three baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile with composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The dwelling will be erected in the Fourth Avenue Terrace and has been designed to contain seven rooms and bath. Pine, redwood and some hardwood veneer will be used for interior finish. Oak floors are specified for the living room, dining room and reception hall. Plans provide for furnace heat, open fire

places and automatic water heater. Mantels will be of tile or brick. Bath rooms will be finished in tile with composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Shannon. The dwelling will be erected in East Piedmont and will contain eight rooms, baths and sleeping porches. Interior will be finished in pine and redwood and some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Claude B. Burton, Security Bank Bldg., Oakland. Owners, Newman and Wilkinson. The dwelling will be erected at the corner of Bryant and College avenue and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Peters. These two houses will each contain seven rooms, bath and sleeping porch. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$5,000. Architects, Realty Syndicate, Realty Syndicate Bldg., Oakland. Owner, Mr. Morehouse. The dwelling will be erected in the Arbor Villa Tract, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Bungalow, 1½ story and base, frame, \$2,500. Architect, none. Owner, W. A. Farris, 16 Monte Vista avenue, Oakland. The dwelling will contain six rooms, bath and sleeping porch and will be erected on Broadway near College avenue. All interior trim will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,600. Architect, none. Owner, J. A. Brett, 737 59th street, Oakland. The dwelling will be erected on the west side of Santa Clara avenue south of Crescent street and will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. Tile wainscot will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$1,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, E. F. Joyce, 544 Irving street, S. F. The dwelling will be erected on the east side of Carlton street south of Prospect, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Composition floors are specified. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, J. D. Foster, 1715 Telegraph avenue, Oakland. The dwelling will contain eight rooms and bath, and will be erected on Terrace street south of Mather. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Frank S. Forster, 1117 Arch street, Berkeley. Owner, Harry A. En-

cell. The dwelling will be erected in the Fourth Avenue Terrace and has been designed to contain seven rooms, bath and sleeping porch. Pine and redwood interior finish will be used. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot and composition floors will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

OAKLAND, CAL.—Bungalows, 20, 1 story and base, frame, \$1,500 to \$2,100. Architect, none. Owners, Oakland Homes Corporation, First National Bank Bldg., Oakland. These houses will be erected in Redwood Court at 35th avenue on a large tract recently purchased. The smaller houses will contain five rooms and the larger ones six and seven rooms. Interior finish will be of pine and redwood. Some oak floors will be used. There will be open fire places and brick and tile mantels. Bath rooms will be finished in tile and will have composition floors. Exteriors will be covered with rustic, cement plaster on metal lath and shingles. Plans are in the hands of the owners and work will be started at once. Materials are now being purchased.

PORTOLA, SAN MATEO CO., CAL.—Residence, 1½ story and base, frame. Cost not stated. Architect, S. D. Willard, care of Bliss & Faville, Balboa Bldg., S. F. Owner, E. D. Conolley. The dwelling has been designed for a handsome country home and will be erected on a large tract near Redwood City. Interior will be finished in pine, redwood and white enamel. Hardwood floors will be used in the living room, dining room, reception hall and library. Plans provide for a total of ten rooms, sleeping porches and four baths. There will be furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters are specified. Bath rooms will be finished in tile and will be equipped with shower baths. Exterior of the house will be covered with cement plaster on metal lath. Plans are out for figures.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$1,500. Architect, none. Owner, J. J. Jennings, 719 J street, Sacramento. The dwelling will be erected in the East End Addition and will contain six rooms and bath. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a large open fire place in the living room with a tile or brick mantel. Tile will be used in the bath room and kitchen. Exterior of the house will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SACRAMENTO, CAL.—Bungalow, 1½ story and base, frame, \$1,000. Architect, A. Willoner, Ochser Bldg., Sacramento. Owner, A. W. Clifton. The dwelling will be erected in Oak Park, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer and oak floors. Plans provide for furnace heat

and open fire places. Mantels will be of tile and brick. Bath room will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and figures are being taken by the architect.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Edward Lawlor. The dwelling will be erected in Piedmont by the Lake Tract, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

HILLSBOROUGH, SAN MATEO CO., CAL.—Residence, 2 story, attic and base, reinforced concrete, \$200,000. Architects, Willis Polk & Co., Merchants' Exchange Bldg., S. F. Owner, William Bourn, President Spring Valley Water Co. The dwelling will be erected near Crystal Spring Lake and will be designed in the Italian Villa style. There will be in the neighborhood of twenty rooms, a number of bath rooms and sleeping porches. Interior finish will be of pine and hardwood. There will be steam heat, vacuum cleaning system, hot water supply and other modern conveniences. Bath rooms will be finished in tile. Exterior of the house will be faced with cement plaster. Plans are nearly complete and figures will be called for at once.

SACRAMENTO, CAL.—Bungalow, 1 story and base, frame, \$1,500. Architect, none. Owners, Growel and Smoll, 2945 Lower Stockton avenue, Sacramento. The dwelling, designed for a five-room house, will be erected in Palmetto Heights. Interior finish will be of pine and redwood with some oak floors. There will be a large open fire place in the living room with a tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

VENICE, LOS ANGELES CO., CAL.—Residence, 2 story and base, hollow tile construction, \$25,000. Architects, C. H. Russell Co., Union League Bldg., L. A. Owner, Abbott Kinney. The dwelling will be erected on Ocean Front and Breeze streets, and has been designed in the Italian Villa style. There will be a total of twelve rooms, three baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters and shower baths are also specified. Bath rooms will have tile wainscot and

composition floors. Exterior of the house will be covered with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Residence, 2 story and base, frame, \$10,000. Architect, Edward E. Young, 251 Kearny street, S. P. Owner, P. H. McCarthy. The dwelling will be erected in Ingleside Terrace, and has been designed for a twelve-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,600. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, A. P. Anderson. The dwelling will be erected at the corner of Clifton and Manila streets and has been designed for a six-room house with bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

Contracts Awarded.

SAN BRUNO, SAN MATEO CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, John J. Foley, 46 Kearny street, S. F. Owner, Father W. J. Cantwell. Contractor, N. A. Carlson, 926 Potrero avenue, S. F., general construction only. Contract price, \$6,190.

SCHOOLS.

LONE STAR, FRESNO CO., CAL.—School, 1 story and base, concrete and brick veneer, \$7,000. Architect, J. Carl Thayer, Forsythe Bldg., Fresno. Owners, Lone Star School District. The building has been designed to contain four class rooms and teachers' room. Interior will be finished in pine with some maple floors. Modern plumbing and electric work will be used. Exterior of the building will be faced with pressed brick veneer. Plans are now being prepared.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete. Cost not stated. Architects, Shea & Loftquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Bids opened for the East Side School show the Sound Construction and Engineering Co., S. F., low on all three propositions. A contract will probably be awarded them. A complete list of the figures received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

VAN NUYS, LOS ANGELES CO., CAL. School group, 1 and 2 story and base, brick, \$120,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Van Nuys High School District.

The architects have just been commissioned to prepare plans for this work and details of construction have not been determined. The group plan will probably be followed and all construction will be of brick. The sum of \$120,000 is available for construction. Further mention will be made of the work.

REDONDO BEACH, LOS ANGELES CO., CAL.—School, 2 story and base, brick and steel, \$150,000. Architect, L. B. Pemberton, auditorium Bldg., L. A. Owners, Redondo Beach High School District. The building will be semi-circular in shape and will contain in the neighborhood of 40 class rooms, study hall and open air rooms. Entire length of the building is 288 feet. Fireproof interior partitions, stairways and corridors will be used. Plans provide for steam heat, program clocks, vacuum cleaning and other modern school improvements. Exterior of the building will be faced with cement plaster. Plans are nearly complete. A bond election will be called on March 24th to vote the required sum.

SILVERTON, ORE.—School, 2 story and base, brick, \$20,000. Architect, Charles H. Burgraff, Albany, Ore. Owners, Silverton School District. The building will cover a ground area of 60 by 120 feet, and will contain eight class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans are to be completed at once and bids will be called for before the end of March.

SEATTLE, WASH.—School, 3 story and base, reinforced concrete, \$10,000. Architect, H. H. Ginnold, Mehlhorn Bldg., Seattle. Owners, School District No. 28. Only two stories of the structure will be built at this time, which will cost approximately \$20,000. Basement will contain boys' and girls' playrooms, Plenum heating plant and lavatories. Specifications call for tar and gravel roof. Plans will be ready for general contract figures about March 15th. H. D. Stewart is clerk of the district.

Contracts Awarded.

INGLEWOOD, LOS ANGELES CO., CAL.—School buildings, 1 and 2 story and base, brick, \$99,720. Architect, Norman P. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Polytechnic High School District. Contractors, Nance & Phelps, 9th and Central avenue, L. A., general construction, \$99,720; J. Hokom, 4312 Moneta avenue, L. A., plumbing, \$14,257; Machinery and Electric Co., 351 North Main street, L. A., heating and ventilating, \$13,169; Leon Mazy, 947 Lucile avenue, L. A., painting, \$5,104; Robertson & Packard, Santa Ana, electric wiring, \$2,300 and The Standard Electric Time Co., program clocks, \$930.

SEWERS, STREET WORK AND WATER SYSTEMS.

SACRAMENTO, CAL.—Pumping station, 1 story and base, reinforced concrete. Cost not stated. Engineer, George N. Randle, 329 J street, Sacramento. Owners, Reclamation District No. 1500. Plans are now out for figures for a reinforced concrete pumping station which is to be erected near

Sacramento Slough in Sutter County. Work will require approximately 3,000 cubic feet of concrete, 195 tons of reinforcing bars, 287 concrete piles 35 to 40 feet and 86 timber piles 35 to 35 feet. Bids will be opened on March 24th. Plans and specifications can be secured from the engineer at Sacramento.

CALIFORNIA—Highway work. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Bids will be opened on March 30th for the construction of state highways in the following counties: El Dorado, Santa Clara, Humboldt, Merced, Tuolumne, Mendocino and two pieces in San Diego. Plans and specifications can be secured from the State Highway Commission in Sacramento. An official proposal, giving the exact locations and nature of work together with the number of miles to be built in each county will be found under another heading in this issue.

OREGON CITY, ORE.—Water system, \$325,000. Engineer not given. Owners, Oregon City. For the purpose of authorizing bonds in the amount of \$325,000 for the acquisition of a new municipal water supply from the south fork of the Clackamas River and the construction of a pipe line to the reservoir at this point, a special election will probably be held within the next six weeks. The amendments empower Wm. Anderson, W. A. Long and M. D. Latourette to serve as a committee to issue and sell the bonds and to direct the expenditure of the funds. It is provided that each member file a \$10,000 bond, and the money derived from the sale of the bonds shall be deposited with the City Treasurer, who shall file an additional bond of \$10,000.

Contracts Awarded.

MIDWAY DISTRICT, FRESNO CO., CAL.—Oil tanks, 10 steel. Cost not stated. Engineer's name not given. Owners, Shell-Royal Dutch Co., Oilinga. Contractors, Llewellyn Iron Works, L. A. Contract price not stated.

STORES & OFFICE BUILDINGS

OAKLAND, CAL.—Stores and offices, 2 story and base, brick and steel. Cost not stated. Architect, William Wilde, Albany Block, Oakland. Owner, Cianciarulo. This building, which will be erected on Broadway north of 17th street, has been mentioned here before. Steel frame and foundations are designed to carry additional stories. There will be several stores on the first floor and a number of modern offices on the second floor. Interior finish will be of pine and hardwood. There will be steam heat, metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Revised plans are again out for figures.

LOS ANGELES, CAL.—Stores and offices, 12 story and base. Class A construction, \$450,000. Architects, Morgan; Walls & Morgan, Van Nuys Bldg., L. A. Owners, Haas Building Co. The building will be erected at the northeast corner of 7th and Broadway, covering an area of 53 by 148 feet. There will be six stores in the basement and the same number on the ground floor. Upper floors will contain 299 modern offices. Construction will be class A throughout with a complete steel

frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Metal window sash and frames and patent store fronts will be used. Interior will be finished in pine, hardwood and metal trim. Plans provide for steam heat, elevator service, a vacuum cleaning plant, hot water system and mail chutes. Exterior of the building will be faced with granite, pressed brick and terra cotta. Plans are complete and figures are now being taken.

LOS ANGELES, CAL.—Stores and lofts, 7 story and base, Class A construction. Cost not stated. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Engineers, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, John Kahn, J. H. Marks and Adolph Fleishman. The building will be erected on the east side of Broadway south of 9th street, covering an area of 40 by 85 feet. First floor will contain stores and upper floors will be arranged for light lofts. Interior finish will be of pine. Plans provide for steam heat, two elevators and automatic sprinkler system, metal window sash and frames and sidewalk doors and lifts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

BAKER CITY, ORE.—Stores and offices, 2 or 3 story and base, brick, \$20,000. Architect, M. P. White, Baker City. Owner, Louis Sommers, Portland. The building will cover an area of 28 by 100 feet. Alternate bids will be received for a two-story and three-story building. There will be eight offices on each of the upper floors. Interior finish will be of pine throughout. Plans provide for a vapor system of heating. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

PORTLAND, ORE.—Stores and offices, 12 story and base. Class A construction, \$1,250,000. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Meier & Frank. The building will be erected on 5th street between Alder and Morrison streets. Preparations will be started as soon as Architect Doyle returns from the east where he is visiting all large meat and candle establishments for the latest ideas. Excavation is expected to be started about July 1st, the structure to be ready for occupancy about May, 1915. Two additional stories will also be made to this firm's 10-story annex.

SAN FRANCISCO—Stores, 1 story and base, brick and steel. Cost not stated. Architects, Reid Bros., 105 Montgomery street, S. F. Owners, Peninsula Realty Co. The building will be erected at the northeast corner of Fillmore and Post streets, covering a considerable ground area. Foundations and exterior walls will be designed heavy enough to carry additional stories in the future. There will be several stories. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are practically complete.

Contracts Awarded.

SEASIDE, ORE.—Stores and offices, 2 story and base, reinforced concrete, \$37,000. Architect, F. Maunson White,

Seaside. Owners, Alex Gilbert & Sons. Contractor, E. G. Gudhart, 1081 East 21st street, Portland. Contract price, \$37,000.

SEATTLE, WASH.—Stores and offices, 3 story and base, frame and concrete, \$75,000. Architect, none. Owners, State Bank of Seattle. Contractor, David Dow, 21st and Spruce streets, Seattle. Contract price, \$75,000.

LOS ANGELES, CAL.—Stores and lofts, 5 story and base, brick and steel. Cost not stated. Architects, Edelman & Barnett, Black Bldg., L. A. Owners, Stetson, Barrett & Co. Contractor, J. E. Chatem, 2410 Raymond avenue, L. A. Contract price, not stated.

LOS ANGELES, CAL.—Store, 2 story and base, brick and steel. Cost not stated. Architect, Joseph F. Rhodes, 415 Central Bldg., L. A. Owner, Harry Gray. Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price not stated.

OAKLAND, CAL.—Telephone exchange, 3 story and base, reinforced concrete, \$40,000. Architect, Cobby, 333 Grant avenue, S. F. Owners, Pacific States Telephone and Telegraph Co. Contractor, W. G. Thornally, 3027 East 16th street, Oakland. Contract price, \$40,000.

THEATRES.

BERKELEY, ALAMEDA CO., CAL.—Theatre, 2 story and base, brick and steel, \$10,000. Architect, Hiram King Lowell, South Berkeley Bank Bldg., Berkeley. Owners, Lorin Photo Play Co. The building will be erected on Adeline street north of Felton, and has been designed for a fireproof show house. Interior will be arranged for a main auditorium seating in the neighborhood of 1,200 people. Pine and ornamental plaster will be used for interior finish. There will be a modern system of heating and ventilating. Exterior of the building will be faced with pressed brick. Considerable marble, tile and plate glass will be used. Plans are now being prepared.

SEALED PROPOSALS.

PROPOSALS FOR PILE DRIVING MACHINERY.

SEALED tenders will be received by Board of Harbor Commissioners on until 9:30 of Saturday, March 28, 1914, for the supplying of pile driving machinery and equipment to the Board of Harbor Commissioners, Honolulu, H. T.

The Board of Harbor Commissioners reserves the right to reject any or all tenders.

Plans, specifications and blank forms of proposal are on file in the office of the Superintendent of Public Works, Capitol Building, Honolulu.

BOARD OF HARBOR COMMISSIONERS.

By its chairman,
J. W. CALDWELL (S).

PROPOSALS FOR PUMPING STATION.

SEALED proposals will be received by the trustees of Reclamation District No. 1500, 329 J street, Sacramento, Cal., until 10 a. m. March 24, 1914, for the construction of a reinforced concrete pumping station on a concrete pile foundation, discharge pipes, suction forebay and timber pile bulkhead. Location of work will be on the Sutter County slough, approximately one and one-half miles from its confluence with the Sacramento River in Sutter County, California.

The work to be done involves the

placing of approximately 3,000 cubic yards of concrete, containing approximately 195 tons of reinforcing steel, driving 287 concrete piles, 35 to 40 feet long, and 86 timber piles 25 to 35 feet long.

Plans and specifications may be consulted and blank forms of proposals may be obtained at the office of the Chief Engineer of the district, George N. Bardsley, 329 J street, Sacramento, California.

Proposals must be accompanied by a certified check for 10 per cent of total amount of bid, and contractor who award is made will be required to furnish bond in sum of 50 per cent of contract price for faithful performance and 50 per cent for labor and material in accordance with the terms of the specifications.

The trustees reserve the right to reject any or all bids.

TRUSTEES OF RECLAMATION DISTRICT NO. 1500.

Per H. A. SENT, Secretary.

PROPOSALS FOR TRACK CONSTRUCTION.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 18th day of March, 1914, for doing the following work, to wit:

The installation of Track, Poles and Conduit under Section "A" of Contract No. 16 for the construction of the Van Ness Avenue and Chestnut street lines of the Municipal Railways.

Progressive payments will be made. Said work must be done in accordance with the plans and specifications therefor on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within fifteen (15) calendar days and completed within one hundred and fifty (150) calendar days from the date of the contract to be made and entered into therefor.

The amount of bond for faithful performance has been fixed at \$120,000.00. All proposals offered shall be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors of said City and County for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the City Engineer, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids.

By order of the Board of Public Works,
F. J. CHURCHILL,
Secretary.

PROPOSALS FOR EXCAVATION.

EXCAVATION—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the reclamation service, St. Ignatius, Mont., until 2 o'clock p. m. March 20, 1914, for earthwork and tunnel, Pailo canal, lateral 31 A, involving about 3,400 cubic yards of open-cut excavation and about 1,000 cubic yards of tunnel work is located about six miles southwest of Polson, Mont. For particulars address the U. S. reclamation service, Washington, D. C.; Great Falls, Mont. or St. Ignatius, Mont. F. H. NEWELL, director.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. reclamation service, Great Falls, Mont. until 2 o'clock p. m. April 15, 1914, for the construction of a portion of the Snake River project, Montana, involving about 560,000 cubic yards of excavation, 7,500 cubic yards of concrete, 13,000 cubic yards of rip-rap, 700 cubic yards of rip-rap, and 8,500 cubic yards of puddling; the placing of about 185,000 pounds of steel reinforcement, 28,000 and 28,000 feet board measure, of lumber in wooden struc-

tures and the erection of about 100,000 pounds of miscellaneous metalwork. The work is situated in the Blackfoot Indian Reservation.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 831—The General Purchasing Officer of the Isthmian Canal Commission, Washington, D. C., will receive bids until **March 14, 1914**, at the Canal Circular 831 for furnishing creosote oil, lined oil, yellow ochre, lime, jacket enamel, chrome green, locomotive black, ships' felt, inside caulking torches, spiral, asbestos, and flux packing, oars, corset lacing, belt lacing, air, steam, suction, water and fire hose, handles, gaskets, canvas, rope, ratchet drills, hammers, cutters, drills, files, wrenches, trowels, chamois, wheels for pipe cutter, chisels, parts for Stillson wrenches, caulking torches, stocks and dies, rules, hatchets, pipe cutters, braces, blocks, bits, axes, ice tombs, towels, forks, teaspoons, coffee cups, fruit dishes, oilcloth, food choppers, sprinkling cans, oil cans, wire, washers, switch ties, copper tanks, machinists' hand taps, sponges, salt water soap, laundry soap, turpentine, rock salt, oakum, lights of glass, track bolts, lubricating oil and greases.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 832—Proposals for Operating Devices for Single Pivoted Sash, Track Bolts, Wire Cable, Chain, Cable Clips, Poultry Netting, Cold Hinges, Locks, Red Casters, Cold Baskets, Grommets, Belt Rivets and Burrs, Sheet Brass, Hasps, Cocks, Hand Oilers, Grease Cups, Oil Cans, Galvanized Buckets, Marine Cloths, Stable Brooms, Scrub Brushes, Roof Brushes, Varnish Brushes, White-wash Brushes, Hoes, Lanterns, Lantern Globes, Emery Cloth, Sash Cord, and Chalk Line.—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until **10:30 a. m. March 20, 1914**, at which time they will be opened in public for the consideration of the articles mentioned in this circular. Blank and general information relating to this circular (No. 832) may be of the assistant purchasing agent, he obtained from this office or the 1086 North Point street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash., Los Angeles, Cal. F. S. GORDON, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS.

PUBLIC NOTICE is hereby given that the Board of Trustees of the City of Fresno hereby invites sealed proposals accompanied by specifications for seven (7) double and twenty (20) single fire hydrants.

Said Board of Trustees will be in session for the purpose of receiving sealed proposals therefor on the **16th day of March, 1914, during the hour beginning at 9 o'clock p. m.** and ending at 9 o'clock p. m. of said day, during which hour all proposals must be delivered to the Board.

Proposals must be made on blanks, which may be obtained from the Clerk and must be accompanied by a check for some responsible bank, payable to the order of the Mayor and Clerk of said City for the sum of \$100.00, which shall be forfeited if the successful bidder should not accept and the bidder fail to enter into a contract with the City and execute the bond or deposit the certified check hereinafter mentioned within five days after such proposal shall have been accepted.

The successful bidder shall, within five days after the contract has been awarded, enter into a bond with the City in the sum of \$250.00 or in thereof may deposit with the Clerk a check upon some solvent bank for a like amount, conditioned for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

By order of the Board.
W. H. RYAN,
City Clerk.

NOTICE TO BRIDGE CONTRACTORS.

PURSUANT to an order of the Board of Supervisors of the County of Fresno, State of California, duly made and entered on its minutes, notice is hereby given that sealed proposals will be received by said Board up to and not later than the hour of **2 o'clock p. m. of the 12th day of March, 1914**, for the construction of a **116** bridge at the Northwest corner of the Northeast quarter (N. E. $\frac{1}{4}$) of the Northwest quarter (N. W. $\frac{1}{4}$) of Section two (2), Township fourteen (14) North, Range twenty-three (23) E., M. D. B. & M., Fresno County, California, consisting of six (6) spans together with wings and approach at both ends of structure, in accordance with the plans and specifications heretofore adopted therefor and now on file in the office of the Clerk of said Board, where same may be seen and examined by intending bidders during office hours.

All bids must be accompanied by a cash check in the sum of ten (10) per cent of the amount bid, made payable to the Chairman of the Board of Supervisors, as a guaranty that the successful bidder will, within ten days after the acceptance of his bid, enter into a contract and give bonds as required by law and the order of the Board of Supervisors conditioned upon the faithful performance of said contract.

The Board reserves the right to reject any and all bids.

(Seal) D. M. BARNWELL,
County Clerk and ex-Officio Clerk of the Board of Supervisors of Fresno County, California.

By A. D. EWING, Deputy.

STATE OF CALIFORNIA
DEPARTMENT OF ENGINEERING.
CALIFORNIA HIGHWAY COMMISSION
NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which times they will be publicly opened and read for construction in accordance with the specifications therefor, to which special provisions, portions of State highway as follows:

(Until 11 o'clock A. M., March 30, 1914)
Humboldt County from Sec. 1, T. 5 S., R. 4 W., M. 1 to the Soberly River boundary (I-Hum-1-A), about 4.5 miles in length, to be graded.

El Dorado County from El Dorado to the Merced County boundary (I-El-D-1-C), about 6.5 miles in length, to be built of water-bound macadam.

Santa Clara County from San Jose to the Merced County boundary (I-S-Cl-2-B), about 1.8 miles in length, to be surfaced with asphaltic concrete.

Merced County from Merced to the Southernly Boundary (VI-Mer-4-A), about 14 miles in length, to be built of Portland cement concrete.

(Until 2 o'clock P. M., March 30, 1914.)
Tuolumne County from the Western Boundary to Keystone (III-Tuo-13-A), about 10.8 miles in length, to be graded.

Mendocino County from Forsythe Creek to Ridgewood (I-Men-1-D), about 6.5 miles in length, to be graded.

San Diego County from Las Flores to the Western Boundary (VII-S. D-2-D), about 11.5 miles in length, to be built of Portland cement concrete.

San Diego County from the San Diego to La Mesa (VII-S. D-12-A), about 2 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the divisions in which the work is situated. The Division Engineers' offices are located at Wallis, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made out on a blank form furnished by the Commission. The special attention of prospective bidders is called to the notice to Contractors annexed to the plans and specifications, and to the blanks as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all

bids or to accept the bid deemed for the best interest of the State.

CHARLES B. BLANEY,
NEWELL D. DALINGTON,
CHARLES F. STERN,
California Highway Commission.
AUSTIN B. FLETCHER,
Highway Engineer.
WILSON R. ELLIS,
Secretary. (*)

Dated: February 26, 1914.

NOTICE TO CONTRACTORS.

Office Constructing Quartermaster, Fort Mason, Cal., February 25, 1914.—SEALED proposals will be received for constructing a ward at Letterman General Hospital, San Francisco, Cal., and installing plumbing, heating and electric wiring in same, will be received here until **11 a. m. March 25, 1914**, and then opened. Plans, specifications, etc., can be obtained here. Deposit of \$100.00 required. Plans, specifications, etc., can be obtained here. Deposit of \$100.00 required. Proposals to be addressed to LIEUT. COL. GEO. MCK. WILLIAMSON, Q. M. C. (*)

PROPOSALS FOR EARTH WORK AND TUNNEL.

EARTHWORK AND TUNNEL—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, St. Ignatus, Mont., until **2 o'clock p. m. March 20, 1914**, for earthwork and tunnel, for the construction of a 31A, involving about 3,400 cubic yards of open-cut excavation and about 320 linear feet of tunnel. The work is located about six miles southwest of Polson, Mont. For particulars address the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont., or St. Ignatus, Mont. F. H. NEWELL, director.

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until **12 o'clock, noon, May 14, 1914**, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, at navy yard, Mare Island, Cal., appraised value \$10,000; U. S. S. Restless, naval reserve station, Newport, R. I., appraised value \$2,000. The Manila will be sold for cash to the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts. JOSEPHUS DANIELS, Secretary of the Navy.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to locality. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCES—8, 2 story and base, frame, \$4,500 to \$8,000 respectively San Francisco. Architect, Edward G. Bolles, 660 Market street, S. F. Owners, S. A. Born Building Co., 660 Market street, S. F. These houses will be erected in the Sea Cliff Tract and have been designed to contain from seven to ten rooms with one and two baths and sleeping porches. Interiors will be finished in pine, redwood and blue gum. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. The sum of \$65 is allotted for finish hardware and \$150 for lighting fixtures. Bath rooms will have tile wainscot and composition floors. Exteriors will be covered with cement plaster on metal lath. Plans are in the hands of the owners and work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,300. San Francisco. Architect, none. Owner, J. M. Olson, 125 Jersey street, S. F. The dwelling will contain six rooms and bath and will be erected on the south side of Jersey street west of Church. Interior finish will be of pine throughout. Some hardwood floors will be used. There will be a large open fire place in the living room with a brick or tile mantel. Tile wainscot will be used in the bath room and kitchen. Exterior of the house will be covered with rustic, shiplap and a trick veneer base. Plans done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—5 story and base, brick and steel, \$35,000. San Francisco. Architect, W. G. Hind, 46 Kearny street, S. F. Owner, Dr. Clyde S. Payne. This building will be erected on the north side of Bush street, 90 feet west of Stockton, and will have a frontage of 50 feet by a depth of 68 feet 9 inches. A modern French style of architecture has been used. There will be four stores on the first floor and a total of 24 two and three room suites on the upper floors. Interiors will be finished in redwood and white enamel. Oak floors will be used in the living rooms and halls. Plans provide for steam heat, an automatic elevator, portable vacuum cleaners and a hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will be finished in tile with composition floors. Entrance and lobby will have marble and tile wainscot. Exterior of the building will be faced with white enamel brick. Plans are complete and segregated figures are being taken on the various parts of the work.

APARTMENT HOUSE—3 story and base, frame, \$22,000. San Francisco. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Scott street near Lombard, close to the Exposition grounds, and will cover an area of 50 by 100 feet. The design is in the Classic style. Interior will be arranged for eighteen apart-

ments of two and three rooms, some of which will have dining rooms connected with the living room by sliding doors. Interior finish will be of pine and hardwood veneer. Oak floors will be used. There will be steam heat and a hot water system. All apartments will have wall beds and private baths. Tile wainscot and composition floors will be used in the bath rooms. Entrance will be finished in tile and marble. Exterior of the building will be covered with pressed brick veneer. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame, \$12,000. San Francisco. Architect, Ernest Hildebrand, Crocker Bldg., S. F. Owner, Ernest Hildebrand. The building will be erected on the west side of Larkin street near Union, and has been designed to contain 12 modern suites of three and four rooms. Interior finish will be of pine and redwood with some oak floors. There will be steam heat and a hot water system. Bath rooms will be finished in tile with composition floors. All suites will have private baths and wall beds. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and segregated figures are being taken.

APARTMENT HOUSE ADDITION—1 story, frame, \$2,500. San Francisco. Architect, Henry Sherman, Mills Bldg., S. F. Owner, Henry Proll. The present building located at the southwest corner of Clay and Larkin streets will be altered and an additional story constructed. New portion of the building will contain two and three room suites and will be arranged to correspond with the present building. The work will include interior finish, plastering, plumbing and electric work. Extensive alterations will also be made to the old portion. Plans are complete and figures are being taken.

APARTMENT HOUSE—2 story and base, frame, \$10,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Mr. Segala. The building will be erected on Pfeiffer near Stockton street, and has been arranged to contain four modern suites of three rooms and bath each. Interior will be finished in pine and redwood. There will be a hot water supply, wall beds and private bath rooms. Some hardwood panels will be used. Entrance will be finished in tile and marble. Exterior of the building will be covered with rustic and shiplap. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner's name withheld. The building will be erected on Pacific street near Taylor, and will contain six suites of two and three rooms with private baths. All interior finish will be of pine or redwood. Some oak floors will be used. There will be a hot water supply. Bath rooms will have the wainscot and composition floors. Wall beds are specified. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement

plaster on metal lath. Plans are now being prepared.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architect, Theo. W. Lenzen. Humboldt Bank Bldg., S. F. Owner, B. Lange. The building will be erected on the west side of 9th avenue near Irving street and will contain one store and two modern flats. Interiors will be finished in pine and redwood with some elm panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and figures are being taken.

FLATS—2 story and base, frame, \$4,000. San Francisco. Architect, Paul F. De Martini, 2123 Powell street, S. F. Owner, Louis De Martini. The building will be erected on Union street west of Stockton, covering an area of 28 feet 9 inches by 61 feet. There will be four flats of five rooms each. Interior will be finished in pine and redwood with some hardwood floors. Each living room will have an open fire place and tile mantel. Bath rooms and kitchens will have tile wainscot. Entrances will be finished in tile and terrazzo. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and all work except mill and carpentry work will be done by Day Labor. The owner is now in the market for all materials.

FLATS—4, 2 story and base, frame \$4,000 each. San Francisco. Architect, none. Owners, Tyler-Schmidt Building Co., 1921 Oak street, S. F. These buildings will be erected on 17th avenue north of California, and each will contain two modern flats of five and six rooms. Interiors will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exteriors will be covered with rustic and shiplap. Plans are in the hands of the owners and work will be done by Day Labor. All materials are now being purchased.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architects, Collischonn & Meeth, 521 11th avenue, S. F. Owner, Mrs. R. Ellen. The building will be erected on 7th avenue near Clement street, and has been designed in the Modern Mission style. Interior will be arranged for a total of 15 suites of three and four rooms. Interiors will be finished in pine and elm panels. Some hardwood floors will be used. Plans provide for steam heat, wall beds and a hot water supply. Portable vacuum cleaners will also be installed. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

PILE DRIVING MACHINERY, ETC.—Cost not stated. Honolulu, H. T. Engineer, Board of Harbor Commissioners, Honolulu. Owners, City of Honolulu. Plans have been completed calling for furnishing the city with

pile driving equipment and machinery. Bids are now being called for and will be opened on March 28th. Plans and specifications together with complete information may be obtained from the Honolulu Harbor Commissioners.

CITY HALL WORK—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday meeting of the Board of Public Works for the electric, vacuum cleaning system and pneumatic tubes for the new City Hall. The Newbery-Bendheim Electric Co. were low on the work at \$77,000 and will probably be awarded the contract. Bids were also opened at the same meeting for furnishing the City Hall water supply. The Scott Co. were low on the work at \$13,475. A complete list of these bids will be found under the heading of San Francisco in this issue.

HOTEL—7 story and base, reinforced concrete, \$162,000. San Francisco. Architects, MacDonald & MacDonald, Holbrook Bldg., S. F. Owner, Mrs. William F. Burbank. The building will be erected on property adjoining the present Union Square Hotel at the northwest corner of Post and Stockton streets, and is intended as an addition to that structure. One of the main features of the building will be a large palm court which will occupy nearly the entire first floor. Design and construction will be similar to that of the present building. Upper six floors will contain in the neighborhood of 150 guest rooms, all of which will have private baths. Interior will be finished in pine and hardwood. Plans provide for steam heat, elevator service, hot water supply and vacuum cleaning. Marble, tile and ornamental plaster will be used extensively. All bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken. All work will be segregated.

HOTEL—7 story and base, brick and steel, \$75,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. The building will be erected on the north side of O'Farrell street east of Taylor, and has been designed to contain two stores besides the hotel office and lobby on the first floor. The building will have a frontage of 27½ feet by a depth of 137½ feet. Upper floors will contain 66 rooms with private baths. There will be steam heat, vacuum cleaning system, elevator service and a hot water supply. All bath rooms will be finished in tile. Some marble and ornamental plaster will be used. Interior finish will be of pine and hardwood. Exterior of the building will be faced with pressed brick trimmed with ornamental terra cotta. Plans are complete and figures are being taken.

RAILROAD TRACKS, POLES AND CONDUIT—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall Bldg., S. F. Owners, City and County of San Francisco. Plans and specifications of the work to be executed under Section A of Contract No. 16, Van Ness Municipal Railroad, have been completed and are now out for figures. This contract will

include laying tracks, erecting poles and putting in conduit for the Van Ness Avenue line from Market street to Chestnut. Bids will be opened on March 18th. An official proposal appears in another column of this issue. Plans can be secured from the City Department of Engineering.

TROLLEY POLES—Concrete construction. Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans and specifications have been approved for the ornamental concrete trolley poles which are to be erected along Van Ness avenue and Chestnut street. Bids are now being taken for this work and will be opened by the Board of Public Works on March 11th.

UNDERGROUND AND OVERHEAD CONDUCTORS, UNION STREET MUNICIPAL LINE—Cost not stated. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids opened at last Wednesday meeting of the Board of Public Works for this work show the Pacific Fire Extinguisher Co. low on the overhead work at \$2,200, and the Pacific Gas and Electric Co. low on the underground work at \$5,755.73. A complete list of the bids will be found under the heading of San Francisco in this issue.

RESIDENCE—2 story and base, frame, \$10,000. San Francisco. Architect, Edward E. Young, 251 Kearny street, S. F. Owner, P. H. McCarthy. The dwelling will be erected in Ingleside Terrace and has been designed for a twelve-room house with three baths and sleeping porch. Interior finish will be of pine and hardwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

STORES—1 story and base, brick and steel. Cost not stated. San Francisco. Architects, Reid Bros., 105 Montgomery street, S. F. Owners, Peninsular Realty Co. The building will be erected at the northeast corner of Fillmore and Post streets, covering a considerable ground area. Foundations and exterior walls will be designed heavy enough to carry additional stories in the future. There will be several stories. Patent store fronts and late glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are practically complete.

STATE EXHIBIT BUILDING—Frame and plaster construction. Cost not stated. San Francisco. Architect, Joseph Bell De Remer, Title Insurance Bldg., L. A. Owners, North Dakota Exposition Association. The building will be V shaped, with a central portion 39 feet square, two wings each 33 by 48 feet. Plaster exterior over metal lath, tile floor, pine floors and finish. The first floor will contain a lecture hall and balcony, offices, rest room, numerous exhibit chambers. The 2nd story will contain exhibit rooms. Plans are now being prepared.

CONCESSION BUILDING—Frame construction, \$100,000. San Francisco. Architect, Benj. G. McDougall, Sheldon Bldg., S. F. Owners, Irish Village Co. It is proposed to erect a large group of buildings devoted exclusively to the Irish traditions and scenes. One of the main features of the group will be an exact replica of the Castle Blarney. Details of the buildings have not progressed far enough to give a description. Further mention will be made of the work.

Contracts Awarded.

FERRY SLIP—\$34,587. San Francisco. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Contractors, The Thomson Bridge Co., S. F. Contract price, \$34,587. Note: Bids were also opened by the State Board of Harbor Commissioners for furnishing a large amount of creosoted piles. No contract was awarded however. A complete list of all figures will be found under the heading of San Francisco in this issue.

City Bids Opened.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architects, Willis Folk & Co., Merchants' Exchange Bldg., S. F. Owner, T. Ronneberg, 2939 Pine avenue, Berkeley. The dwelling will be erected on the Tunnel road and has been designed for a ten-room house with three baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick and tile. An automatic water heater will be installed. Bath rooms will be finished in tile with composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who is now taking figures on the work.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Hutchinson Bros., 470 13th street, Oakland. Owner, M. C. Vaughn. The dwelling will be erected in the Fourth Avenue Terrace and has been designed to contain seven rooms and bath. Pine, redwood and some hardwood veneer will be used for interior finish. Oak floors are specified for the living room, dining room and reception hall. Plans provide for furnace heat, open fire places and automatic water heater. Mantels will be of tile or brick. Bath room will be finished in tile with composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner, Dr. Shannon. The dwelling will be erected in East Piedmont and will contain eight rooms, baths and sleeping porches. Interior will be finished in pine, redwood and some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and out for figures.

RESIDENCE—2 story and base, frame, \$1,000. Oakland, Cal. Architect, Claude E. Barton, Security Bank Bldg., Oakland. Owners, Newman and Wilkinson. The dwelling will be erected at the corner of Bryant and College avenue and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile mantels. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owners who will do the work by Day Labor. All materials are now being purchased.

RESIDENCES—2, 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John

Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Peters. These two houses will each contain seven rooms, bath and sleeping porch. Interiors will be finished in pine, redwood and hardwood veneer. Oak floors will be used in the living rooms, dining rooms and reception halls. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Tile wainscot will also be used in the kitchens. Automatic water heaters will be installed. Exterior will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE — 2 story and base, frame, \$5,000. Oakland, Cal. Architects, Realty Syndicate, Realty Syndicate Bldg., Oakland. Owner, Mr. Morehouse. The dwelling will be erected in the Arbor Villa Tract, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BUNGALOW — 1½ story and base, frame, \$2,500. Oakland, Cal. Architect, none. Owner, W. A. Farris, 16 Monte Vista avenue, Oakland. The dwelling will contain six rooms, bath and sleeping porch, and will be erected in Broadway near College avenue. All interior trim will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and a large open fire place. Mantel will be of brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$1,600. Oakland, Cal. Architect, none. Owner, J. A. Brett, 727 58th street, Oakland. The dwelling will be erected on the west side of Santa Clara avenue south of Crescent street, and will contain seven rooms and bath. Interior finish will be largely of pine with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. Tile wainscot will also be used in the kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$1,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, E. F. Joyce, 544 Irving street, S. F. The dwelling will be erected on the east side of Carlton street south of Prospect, and has been designed for a seven-room house with

bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Composition floors are specified. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, none. Owner, J. D. Foster, 1715 Telegraph avenue, Oakland. The dwelling will contain eight rooms and bath, and will be erected on Terrace street south of Mather. Interior finish will be of pine throughout. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Frank S. Forster, 1417 Arch street, Berkeley. Owner, Harry A. Encell. The dwelling will be erected in the Fourth Avenue Terrace and has been designed to contain seven rooms, bath and sleeping porch. Pine and redwood interior finish will be used. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot and composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BUNGALOWS — 20, 1 story and base, frame, \$1,500 to \$2,000. Oakland, Cal. Architect, none. Owners, Oakland Homes Corporation, First National Bank Bldg., Oakland. These houses will be erected in Redwood Court at 35th avenue on a large tract recently purchased. The smaller houses will contain five rooms and the larger ones six and seven rooms. Interior finish will be of pine and redwood. Some oak floors will be used. There will be open fire places and brick and tile mantels. Bath rooms will be finished in tile and will have composition floors. Exterior will be covered with rustic, cement plaster on metal lath and shingles. Plans are in the hands of the owners and work will be started at once. Materials are now being purchased.

RESIDENCE — 2 story and base, frame. Cost not stated. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Edward Lawlor. The dwelling will be erected in Piedmont by the Lake Tract, and has been designed for an eight-room house with bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and

brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

APARTMENT HOUSE — 5 story and base, brick and steel, \$85,000. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, George Clark and J. A. Elston, 918 Market street, S. F. The building has been mentioned in these columns before and will be erected at the southeast corner of Durant and Telegraph avenue. The building will cover a considerable ground area, and will contain a total of 78 rooms, which will be arranged in two and three room suites with private baths. Interior will be finished in pine and elm panels. Some oak floors will be used. Plans provide for steam heat, elevator service, a vacuum cleaning system and hot water supply. All suites will have wall beds. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Marble and tile will be used in the lobby and vestibule. Plans are complete and segregated figures are being taken on the various parts of the work.

FLATS — 2 story and base, frame, \$10,000. Oakland, Cal. Architect, F. D. Voorhees, Central Bank Bldg., Oakland. Owner's name withheld. The building, designed for residential flats, will contain four flats of five and six rooms. Interiors will be handsomely finished in pine, redwood and hardwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

FIRE HOUSES — 3, 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. These buildings will be erected on Le Roy avenue, Ellis street and Claremont avenue. Each building will contain space for two pieces of apparatus and quarters for the men. Interiors will be finished in pine throughout. There will be special plumbing and electric work. Exterior will be covered with cement plaster on metal lath. Plans have received the approval of the City Council and bids are now being taken. Figures will be opened on March 27th.

RESIDENCE — 2 story and base, frame, \$3,000. Oakland, Cal. Architect, Alvin J. Stern, 1522 Broadway, Oakland. Owner, A. P. Anderson. The dwelling will be erected at the corner of Clifton and Manila streets, and has been designed for a six-room house with bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room. Mantel will be of brick. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be

covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

THEATRE—2 story and base, brick and steel, \$10,000. Berkeley, Alameda Co., Cal. Architect, Hiram Kink Lowell. Sout. Berkeley Bank Bldg., Berkeley. Owners, Lorin Photo Play Co. The building will be erected on Adelaide street north of Felton and has been designed for a fireproof show house. Interior will be arranged for a main auditorium seating in the neighborhood of 1,200 people. Pine and ornamental plaster will be used for interior finish. There will be a modern system of heating and ventilating. Exterior of the building will be faced with pressed brick. Considerable marble, tile and plate glass will be used. Plans are now being prepared.

STORES AND OFFICES—2 story and base, brick and steel. Cost not stated. Oakland, Cal. Architect, William Wilde, Albany Block, Oakland. Owner, Clanciarulo. This building, which will be erected on Broadway north of 17th street, has been mentioned here before. Steel frame and foundations are designed to carry additional stories. There will be several stores on the first floor and a number of modern offices on the second floor. Interior finish will be of pine and hardwood. There will be steam heat, metal window sash and frames and patent store fronts. Exterior of the building will be faced with pressed brick. Revised plans are again out for figures.

APARTMENT HOUSE ALTERATIONS—Frame construction, \$6,000. Alameda, Alameda Co., Cal. Architect, Leonard H. Ford, 2136 Center street, Berkeley. Owner's name withheld. The present two-story frame residence on San Antonio avenue will be altered and rearranged for modern apartments of two and three rooms. The work will include new plastering, partitions, plumbing, painting, electric work and mill work. Interior finish will be of pine throughout. There will be wall beds and private bath rooms. Exterior of the building will also undergo alterations. Plans are being prepared and figures will be called for shortly.

Contracts Awarded.

MUNICIPAL AUDITORIUM—2 story and base, Class A construction, \$1,000,000. Oakland, Cal. Architect, J. J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland.  \$11,000. Riverbank, Stanislaus Co., Cal.
 Architect, Ralph P. Morrell, Oakl
 Pellers' Bldg., Stockton. Owner, R. Mc-
 Donaldou. The building will cover an
 area of 30 by 90 feet and has been de-
 signed for stores on the first floor and
 modern hotel rooms on the upper floor.
 Interior finish will be of pine through-
 out. There will be a hot water supply.
 Bath rooms will have tile floors and
 wainscot. Exterior of the building
 will be faced with pressed brick. Plans
 also provide for patent store fronts.
 Bids are now being taken on the work.

HOTEL—2 story and base, brick,
 \$12,000. Bakersfield, Kern Co., Cal. Ar-
 chitects, Henry Starbuck and L. K.
 Conradjian, Fresno. Owner, C. Petrini.
 The building will contain stores on the
 first floor and hotel rooms and bath-
 rooms on the upper floor. All interior finish
 will be of pine and redwood. There
 will be steam heat and a hot water
 system. Bath rooms will have the
 wainscot and composition floors. There
 will be patent store fronts and plate
 glass windows. Exterior of the build-
 ing will be faced with pressed brick.
 Plans for the work are now being pre-
 pared.

 Swartz of Fresno.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

HUNGALOW—1 story and base,
 frame \$1,500. Sacramento, Cal. Ar-
 chitect, none. Owner, J. J. Jennings,
 119 J street, Sacramento. The dwell-
 ing will be erected in the East End
 Addition and will contain six rooms
 and bath. Interior finish will be of
 pine throughout. Some hardwood
 floors will be used. There will be a
 large open fire place in the living room
 with a tile or brick mantel. The tile
 will be used in the bath room and kitchen.
 Exterior of the house will be covered
 with rustle and cement plaster on
 metal lath. Plans are complete and
 in the hands of the owner who will do
 the work by Day Labor.

HUNGALOW—1½ story and base,
 frame, \$1,000. Sacramento, Cal. Ar-

chitect, A. Willoner, Ochsner Bldg., Sacramento. Owner, A. W. Clifton. The dwelling will be erected in Oak Park, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine with some hardwood veneer and oak floors. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and figures are being taken by the architect.

BUNGALOW—1 story and base frame, \$1,600. Sacramento, Cal. Architect, none. Owners, Growel and Snell, 2945 Lower Stockton avenue, Sacramento. The dwelling, designed for a five-room house, will be erected in Palmetto Heights. Interior finish will be of pine and redwood with some oak floors. There will be a large open fire place in the living room with a tile or brick mantel. Tile wainscot will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and shingles. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are being purchased.

FLATS—3 story and base, frame, \$7,500. Sacramento, Cal. Architect, A. Willoner, Ochsner Bldg., Sacramento. Owner, E. E. Juergenson. The building has been designed to contain six modern flats of three and four rooms. Interior will be finished in pine and redwood with some hardwood panels. Oak floors will be used in the living and dining rooms. There will be open fire places and tile mantels. Bath and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are being prepared.

GARAGE—1 story, base and mezzanine floor, brick and steel, \$25,000. Stockton, San Joaquin Co., Cal. Architect, Ralph P. Morrell, Odd Fellows' Bldg., Stockton. Owner, Mr. Esbark, 203 West Fremont street, Stockton. The building will be erected on North Hunter street and has been designed to contain a large show room, offices, repair shop and storage space. A concrete floor will be used. Entire structure will have a floor space of 23,000 square feet. Interior of the office and display room will be pine and hardwood. There will be an electric elevator, two 500-gallon steel tanks and metal window sash, frames and ceilings. Patent store fronts are also specified. Roof will be of asbestos. Exterior of the building will be faced with pressed brick. Plans are being prepared.

STATE CAPITOL ELEVATOR WORK—Cost not stated. Sacramento, Cal. Architect, State Department of Engineering, Sacramento. Owners State of California. Bids opened by the State Engineering Department for elevator work in the State Capitol Building show the Van Emon Elevator Co. low at \$5,516 for installing two passenger elevators; Ralston Iron Works low at \$970 for ornamental iron grilles in connection with the same, and the Randall Elevator Door Control Co. low at \$1,234 for installing pneu-

matic door operating devices. A complete list of all figures will be found under the heading of Sacramento, Stockton and Northern California in this issue.

HOSPITAL—2 story and base, reinforced concrete. Cost not stated. Red Bluff, Tehama Co., Cal. Architect's name not given. Owners, St. Elizabeth's Hospital, Rev. Father F. Brady, Red Bluff. The building will replace the building recently destroyed by fire and will cover an area of 40 by 90 feet. Interior has been arranged for 25 beds, 3 wards, private rooms, operating room and nurses' quarters. Interior finish will be of pine. There will be elevator service heating and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and an effort is being made to raise the balance of the money necessary to start construction. Information can be secured from Father F. Brady, who is in charge of the campaign.

POST OFFICE—2 story and base, semi-fireproof construction, \$55,000. Grass Valley, Nevada Co., Cal. Architect, Supervising Architect, Oscar Wenderoth, Washington, D. C. Owners, United States Government. The Supervising Architect has notified the postmaster at Grass Valley that working drawings for the new Federal building have been completed. Bids will be called for shortly. There is \$55,000 available for construction.

FREIGHT SHED—1 story, frame, \$2,500. Sacramento, Cal. Architect, none. Owners, Oakland, Antioch and Eastern Railroad Co., 105 Montgomery street, S. F. Plans have been completed for a small freight shed which is to be erected on M street between 2nd and 3rd streets. No interior finish will be used. Exterior of the building including the roof will be covered with corrugated iron. Plans are complete and the work is now underway by Day Labor.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Sacramento, Cal. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. Bids opened for the First Side School show the Sound Construction and Engineering Co., S. F., low on all three propositions. A contract will probably be awarded to them. A complete list of the figures received will be found under the heading of Sacramento, Stockton and Northern California in this issue.

PUMPING STATION—1 story and base, reinforced concrete. Cost not stated. Sacramento, Cal. Engineer, George N. Randle, 329 J street, Sacramento. Owners, Reclamation District No. 1500. Plans are now out for figures for a reinforced concrete pumping station which is to be erected near Sacramento Slough in Sutter County. Work will require approximately 3,000 cubic feet of concrete, 135 tons of reinforcing bars, 287 concrete piles 35 to 40 feet and 86 timber piles 25 to 35 feet. Bids will be opened on March 24th. Plans and specifications can be secured from the engineer at Sacramento.

HIGHWAY WORK—Cost not stated. California Engineer, State Highway Commission, Forum Bldg., Sacramento, Owners, State of California. Bids will be opened on March 30th for the con-

struction of state highways in the following counties: El Dorado, Santa Clara, Humboldt, Merced, Tuolumne, Mendocino and two pieces in San Diego. Plans and specifications can be secured from the State Highway Commission in Sacramento. An official proposal, giving the exact locations and nature of work together with the number of miles to be built in each county will be found under another heading in this issue.

Bids For Elevator Work, Sacramento.

**LOS ANGELES AND SOUTH-
ERN CALIFORNIA.**

RESIDENCE—2 story and base
hollow tile construction, \$25,000. Ven-
ice, Los Angeles Co., Cal. Architects,
C. H. Russell Co., Union League Bldg.,
L. A. Owner, Abbott Kinney. The
dwelling will be erected on Ocean
Front and Breeze streets, and has been
designed in the Italian Villa style.
There will be a total of twelve rooms,
three baths and sleeping porches.
Interior finish will be of pine, hardwood
and white enamel. Hardwood floors
will be used in the principal rooms.
Plans provide for furnace heat and
open fire places. Mantels will be of
tile and brick. Automatic water heat-
ers and shower bathtubs are also speci-
fied. Bath rooms will have tile wain-
scot and composition floors. Exterior
of the house will be covered with ce-
ment plaster. Plans are now being
prepared.

APARTMENT HOUSE—4 story and
base. Class C construction. Cost not
stated. Los Angeles, Cal. Architects,
Wilbey & Davis, Story Bldg., L. A.
Owner, Leon Figliera. The building
will be erected on Beacon street be-
tween 7th and 8th streets, and will be
arranged to contain a total of 110
rooms, which will be divided into two
and three room suites. All apartments
will have wall beds and private bathtubs.
Interior will be finished in pine and
hardwood with some oak floors. Plans
provide for steam heat, elevator serv-
ice and a hot water supply. Vacuum
cleaning will also be installed. Bath
rooms will have tile wainscot and com-
position floors. Exterior of the build-
ing will be faced with artificial stone.
Plans are complete and figures are be-
ing taken.

CHURCH ADDITION—Frame con-
struction. Cost not stated. Los
Angeles, Cal. Architects, Alfred W.
Rea and Charles E. Garstang, Black
Bldg., L. A. Owners, Westlake Meth-
odist Church. Two new additions will
be made, each two stories in height,
one covering an area of 14 by 72 feet
and the other 14 by 50 feet. The new
portion of the building will be used as
class rooms, there being 18 rooms in
all, separated by rolling doors. Inter-
ior finish will be of pine with maple
floors. There will be steam heat,
blackboards and six toilets. Exterior
of the building will be covered with
rustic and shiplap. Plans are com-
plete and figures are being taken.

HOTEL—4 story and base. Class C
construction. Cost not stated. Los An-
geles, Cal. Architect, Arthur S. Heine-
man, San Fernando Bldg., L. A. Own-
er, Herbert J. Goudge. The building
will be erected on West 6th street
near Flower, covering an area of 42 1/2
feet by 130 feet. Plans provide for two
stores besides the hotel office and
lobby on the first floor. Upper floor
will contain a total of 54 guest rooms
and a number of public and private
baths. Interior finish will be of pine
and hardwood. There will be steam
heat, elevator service and a hot water
supply. Patent store fronts are speci-
fied. Bath rooms will have tile wain-
scot and composition floors. Exterior
of the building will be faced with
pressed brick. Plans are being pre-
pared.

PASSENGER STATION—2 story and
base, reinforced concrete, \$125,000. San
Diego, Cal. Architects, Bakewell &

Brown, 251 Kearny street, S. F. Owners, Santa Fe Railroad Co. The building will cover a considerable ground area and has been designed in the Mission style. Construction will be of reinforced concrete with cement and tile floor, hollow tile interior partitions and metal window sash and frames. Plans include steam heat, a hot water supply and vacuum cleaning. Interior finish will be of pine and hardwood. Exterior of the building will be faced with cement plaster. A clay tile roof will be used. Plans are nearly complete and figures will shortly be called.

SCHOOL GROUP—1 and 2 story and base, brick, \$120,000. Van Nuys, Los Angeles Co., Cal. Architects, Allison & Allison, Hilberman Bldg., L. A. Owners, Van Nuys School District. The architects have just been commissioned to prepare plans for this work and details of construction have not been determined. The group plan will probably be followed and all construction will be of brick. The sum of \$120,000 is available for construction. Further mention will be made of the work.

SCHOOL—2 story and base, brick and steel, \$150,000. Redondo Beach, Los Angeles Co., Cal. Architect, L. B. Pemberton, Auditorium Bldg., L. A. Owners, Redondo Beach High School District. The building will be semicircular in shape and will contain in the neighborhood of forty class rooms, study hall and open air rooms. Entire length of the building is 288 feet. Fireproof interior partitions, stairways and corridors will be used. Plans provide for steam heat, program clocks, vacuum cleaning and other modern improvements. Exterior of the building will be faced with cement plaster. Plans are nearly complete. A bond election will be called on March 24th to vote the required sum.

STORES AND OFFICES—12 story and base. Class A construction, \$450,000. Los Angeles, Cal. Architects, Morgan, Wallis & Morgan, Van Nuys Bldg., L. A. Owners, Haas Building Co. The building will be erected at the northeast corner of 7th and Broadway, covering an area of 33 by 148 feet. There will be six stores in the basement and the same number on the ground floor. Upper floors will contain 203 modern offices. Construction will be class A throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. Metal window sash and frames and patent store fronts will be used. Interior will be finished in pine, hardwood and metal trim. Plans provide for steam lift, elevator service, a vacuum cleaning plant, hot water system and mail chutes. Exterior of the building will be faced with granite, pressed brick and terra cotta. Plans are complete and figures are now being taken.

STORES AND LOFTS—7 story and base. Class A construction. Cost not stated. Los Angeles, Cal. Architects, Milwaukee Building Co., Wright and Callender Bldg., L. A. Engineers, Mayberry & Parker Pacific Electric Bldg., L. A. Owners, John Kahn, J. H. Marks and Adolph Fleishman. The building will be erected on the east side of Broadway south of 9th street, covering an area of 40 by 85 feet. First floor will contain stores and upper

floors will be arranged for light lofts. Interior finish will be of pine. Plans provide for steam heat, two elevators, an automatic sprinkler system, metal window sash and frames and sidewalk doors and lifts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

APARTMENT HOUSE—3 story and base, brick, \$10,000. Los Angeles, Cal. Architects, Birchard, Green & Tifal, Van Nuys Bldg., L. A. Owner, F. F. Stevens, Contractors, Webb & O'Neill, Lankershim Bldg., L. A. Contract price, \$10,000.

SCHOOL BUILDINGS—1 and 2 story and base, brick, \$99,720. Inglewood, Los Angeles Co., Cal. Architect, Norman F. Marsh, Broadway Central Bldg., L. A. Owners, Inglewood Polytechnic High School District. Contractors, Nance & Phelps, 9th and Central avenue, L. A. general construction, \$99,720; J. Hokom, 4312 Moneta avenue, L. A. plumbing, \$14,257; Machinery and Electric Co., 351 North Main street, L. A. heating and ventilating, \$13,169. Leon Mazy, 947 Lucile avenue, L. A. painting, \$5,194; Robertson & Packard, Santa Ana, electric wiring, \$2,300, and the Standard Electric Time Co., program clocks, \$930.

STORES AND LOFTS—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Edelman & Barnett, Black Bldg., L. A. Owners, Stetson, Barrett & Co. Contractor, J. E. Chalem, 410 Raymond avenue, L. A. Contract price not stated.

STORE—2 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architect, Joseph F. Rhodes, 415 Central Bldg., L. A. Owner, Harry Gray, Contractor, Joseph F. Rhodes, Central Bldg., L. A. Contract price not stated.

PORTLAND AND OREGON.

DOCKS AND WAREHOUSES—Timber construction, \$500,000. Astoria, Ore. Engineer, W. J. Walsli, Astoria. Owners, City of Astoria. Preliminary plans are being prepared for a number of new docks which will be erected with the proceeds of the recent bond election held in Astoria. Each of the docks will have an average length of 1,200 feet. Two-story frame warehouses will be constructed on the docks. Only preliminary plans are now being worked out, and it will be some time before bids will be called. Further mention will be made of the work.

CITY HALL—2 story and base, brick, \$15,000. Oregon City, Ore. Architect, C. A. Houghtaling, Henry Bldg., Portland. Owners, Oregon City. Two designs were submitted by this architect. Both were of the Colonial style brick construction, and with large white pillars running from the ground to the top of the building. In both plans the structure would be trimmed in red brick. The second floor will be used for meeting rooms, while the first floor will be given over to council chambers, reception rooms, fire station and various committee rooms. Plans provide for steam heat, fireproof vaults and pine interior finish. The architect is now completing working drawings and figures will be called for shortly.

SCHOOL—2 story and base, brick, \$20,000. Silverton, Ore. Architect, Charles H. Burggraf, Albany, Ore. Owners, Silverton School District. The building will cover a ground area of 60 by 120 feet and will contain eight class rooms and an assembly hall. Interior will be finished in pine with maple floors in the class rooms. There will be steam heat. Exterior of the building will be faced with pressed brick. Plans are to be completed at once and bids will be called for before the end of March.

WATER SYSTEM—\$225,000. Oregon City, Ore. Engineer not given. Owners, Oregon City. For the purpose of authorizing bonds in the amount of \$225,000 for the acquisition of a new municipal water supply from the south fork of the Clackamas River and the construction of a pipe line to the reservoir at this point, a special election will probably be held within the next six weeks. The amendments empower Wm. Anderson, W. A. Long and M. D. Latourette to serve as a committee to issue and sell the bonds and to direct the expenditure of the funds. It is provided that each member file a \$10,000 bond, and the money derived from the sale of the bonds shall be deposited with the City Treasurer, who shall file an additional bond of \$10,000.

STORES AND OFFICES—2 or 3 story and base, brick, \$20,000. Baker City, Ore. Architect, M. P. White, Baker City. Owner, Louis Sommers, Portland. The building will cover an area of 28 by 100 feet. Alternate bids will be received for a two story and a three story building. There will be eight offices on each of the upper floors. Interior finish will be of pine throughout. Plans provide for a vapor system of heating. There will be patent store fronts. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND OFFICES—12 story and base. Class A construction, \$1,250,000. Portland, Ore. Architects, Doyle & Patterson, Worcester Bldg., Portland. Owners, Meier and Frank. The building will be erected on 5th street between Alder and Morrison streets. Preparations will be started as soon as Architect Doyle returns from the east where he is visiting all large mercantile establishments for the latest ideas. Excavation is expected to be started about July 1st, the structure to be ready for occupancy about May, 1915. Two additional stories will also be made to this firm's 10-story annex.

Contracts Awarded.

CANNING PLANT—1 story and base, reinforced concrete, \$50,000. Salem, Ore. Architect, F. A. Dickson, Salem. Owners, Hunt Bros., Salem. Contractor, A. J. Anderson, Salem. Contract price, \$50,000.

FOREST NOTES.

The state of New York has just published a comprehensive report of its wood-using industries.

Canada has a society of forest engineers. Dr. B. E. Fernow, of Toronto, is president, and Mr. F. W. H. Jacobbe, of Ottawa, is secretary.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

CALL Douglas 2944

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT
Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires
Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London
The Ritz, London
The Hyde Park, London
The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

OTIS ELEVATOR COMPANY

Stockton, North Point and Beach Sts.
San Francisco

Offices in all Principal Cities of the World.

OFFICE PACIFIC TEL. & TEL. CO.

Frank Neidick

Carpenter and Builder

Phone Mission 5126

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

England has decided to exhibit at the Fair. This is as it should be for England above all is a manufacturing and commercial country and its shipping ranks easily first of all nations of the world. As the canal changes the world's routes of commerce the natural place for such a representation is at an exhibition commemorating the event.

There has been quite a number of world's fairs within the last twenty years. Manufacturers have been called upon to exhibit thereat and the manufactured product is no longer the object of interest to the average person that it once was. The show windows of the big stores of the great cities daily exhibit almost every product of the world. So that to be of interest to the average person the manufacturer must exhibit the process. This in many cases is undesirable from the manufacturer's standpoint, as it discloses patents and methods of manufacture that they do not wish to disclose.

So also the objection is raised that a general world's fair can not reach specialized industry as the field is too large and too complicated. This in a great measure is true as it is impossible to have a complete exhibit of everything. But the exposition will give an opportunity to exhibit for all people who are seeking a market throughout the world. For it is the last great event in shortening the lines of transportation and marks a distinct change in the world's progress.

The question came up periodically as to providing a means of access to the Marin shore from the north beach of San Francisco rather than have the boats land at the ferry as they now do. It is only a question of time till this is done and on the completion of the Stockton street tunnel the plan will become more feasible.

It would cut the bay trip in half. It would lessen the danger of collision on the bay and prevent congestion of traffic. It would shorten the distance and lessen the traffic on the lower end of Market street. The time will soon come when something like this will have to be adopted.

A picture of the remarkable growth of New York City is given by Doctor Lyman Abbott in a recent number of The Outlook. In the article he quotes a description of New York in 1810, which he wrote when a young man. At that time the great metropolis had a population of 313,000. And the attitude of the men in charge of the municipal affairs is characterized by

him as wanting in foresight and planning for the future.

"There was no forelooming," Doctor Abbott says, "to see what public interest demanded. No adequate changes had been made in the form of municipal government. * * * The municipal government was a prize, not a trust. The best citizens were too busy in attending to their own interests to care for those of the municipality. By common consent the administration of its affairs was allowed to fall into the hands of men who had no interests of their own to attend to."

The city's appearance reflected the inefficiency of its government. The traveler landing at a wharf, Doctor Abbott says, had to fight his way through a mob of profane hackmen. The streets were ill-lighted and worse paved. In many thoroughfares there was no paving at all, and horses sometimes stuck in the mud. Up to 1845 there was no sewer system. At that time a resolution was finally adopted, after a hard fight, to permit pipes which had been installed as drains to be used as sewers.

There was no police force. Constables and deputy sheriffs were on duty by day. At night laborers were employed as night watchmen. "Broadway was so infested at night that no person could pass through it after nightfall with impunity. Disorderly women thronged the public thoroughfares, insulting almost every passer-by with their obscene jests and horrible profanity. No lady could venture into the streets alone."

"If there has been an ordinance against throwing garbage into the streets there were no police to enforce it. It was a common, if not a universal practice. The public thoroughfares reeked with filth which was positively appalling. New York enjoyed and deserved the reputation of being at once the most prosperous and the worst governed city in the world."

So that with all our modern defects the present time is not much worse than the period that preceded it.

Mortgages for the past week amounted to more than a million dollars, according to reports given out by the Recorder's office. This speaks well for the building business, for perhaps more mortgages are placed on record for building and development than for any other one thing. So that there seems to be a loosening up in the money market at least and a general movement toward doing something with the opening of spring. Let the good work go on. Something doing every day and we will forget about the Mexican situation and the fact that William Randolph Hearst is hursting with the Spirit of '76 and wants to offer his life and fortune on the altar of liberty.

The Present Status Of The Rights Of Municipalities On Water Extensions And Improvements.

Address by B. D. Marx Green, City Attorney of Antioch and Pittsburgh, Before the Sixteenth Annual Convention of the League of California Municipalities Held at Venice, California, October 6-11, 1913.

Reprinted from *Pacific Municipalities*, February, 1914.

This topic naturally falls under three main heads:

(1) The right to compel extensions of service;

(2) The right to compel betterment of service for Domestic Use.

(3) The right to compel betterment of service for Fire Protection Purposes.

I will briefly take up each of these subjects in their proper order.

I.

Before Section 19, Article XI of the Constitution of the State of California was amended in 1911, the relation of the municipality towards the water company was comparatively simple. If the city did not own its water works, a water company had under the Constitution the right to use the public streets without obtaining a franchise from the city. The only control that the municipality had over the company was its right to make general regulations for damages in the tearing up of the streets and its duty to fix rates annually which was made mandatory by Section 1, Article XIV of the Constitution. After the Constitution, however, was amended in 1911, public service corporations were no longer given the constitutional right to use the public streets without a franchise.

The Appellate Court succinctly quotes the law in *Lukrawa, et al. vs. Spring Valley Water Company*, 15 C. A. D. 795, where it says:

"It will thus be seen that public service corporations have no longer any legal right to use the streets of a municipality which they did not occupy prior to the constitutional amendment of 1911, and that such corporations may now extend their service into new territory in and along the streets of a municipality only upon securing a franchise from the municipality for that purpose."

Now it is a general principal of municipal corporation law as also stated in the *Lukrawa* case:

"that a water company, committed by its charter to the public service, is in duty bound to serve the whole public, and that when necessary to such service the company's existing mains must be gradually extended so as to keep pace with the growth of the community which the company has undertaken to serve."

But when the Constitution was amended the situation became very complex. The *Lukrawa* case was a petition for a writ of mandate directed against the Spring Valley Water Company in San Francisco to compel it to extend its mains through a portion of the city which it was not then serving

and had refused to serve. The court there said that if the company had no right to voluntarily go into a street in which it had not laid its pipes before the Constitutional Amendment, no court could now compel it against its will to go into that street.

We have then this definite principle that a water company having no franchise granted by the legislative body of a municipality has now no right to enter upon any street in which it had no pipes prior to October 10, 1911, the date of the adoption of the Constitutional Amendment. So much for extensions of existing service.

II.

In regard to improvements of existing service, which do not contemplate extensions into new territory, there seems to be no doubt, judging by the recent decisions of the Railroad Commission, that upon proper complaint filed with that body, a municipality or any citizen may obtain redress against a water company which is not furnishing service adequate for domestic uses. By domestic uses I mean water for consumption as distinguished from water for fire protection purposes. If a pipe in a street is of insufficient size to furnish enough water for ordinary household use, the Railroad Commission can order the company to put in such equipment as will adequately supply the demand. To accomplish this, they cannot, however, compel the company to install service pipe in a street not already occupied by the company. They can only order the betterment and improvement of existing service.

III.

In regard to betterments for fire protection purposes, we have before us a subject which is very broad and comprehensive and in relation to which the recent decision of the State Railroad Commission in the case of *Lewis vs. Peoples Water Company* has set a far-reaching precedent. In order to get a clear grasp of the subject and a concrete point from which to commence, it might be as well to review the state of facts brought out in that case. In a recently published report by the City Club of Berkeley, voluminous statistics were produced showing that the water company supplying the county of Alameda maintained in its distributing system 47% of mains of a size of two inches and under. Naturally, under such conditions, there has been for many years grave complaint relative to the quantity of water available for fire protection purposes. As a culmination, early this spring at a fire in the hilly east section of Berkeley, two houses were totally destroyed owing to lack of water with which to fight the flames. It was necessary for the fire department to pump from a six-inch main for a distance of twenty-five hundred feet and to an elevation of three hundred feet. Under such circumstances great delay ensued, and it was impossible to obtain more than one stream of water. If the two-inch pipes nearer of access to the fire had been

larger in size there would have been plenty of water and slight loss. On this given statement of facts I filed a complaint with the Railroad Commission, asking that an order be made requiring the defendant to install and maintain for fire protection purposes a six-inch main instead of the present two-inch main. The pleadings impliedly admitted that sufficient water was furnished for domestic uses, but that for fire protection purposes the supply was insufficient. The matter was thus concretely brought before the commission.

The water company being already in possession of the street, I was not asking an extension of service, but merely an improvement. By consent it was stipulated that if the improvement could be ordered, jurisdiction so to do lay in the Railroad Commission. There had been grave doubt about the question of jurisdiction as the Berkeley Charter contained a provision that the City Council should have the right to regulate the size and location of water mains. The Public Utilities Act says that the Railroad Commission is vested with power over service, equipment, etc., unless that power has been vested in the municipality under its charter or its police power. My contention is that the above section of the Berkeley Charter is unconstitutional (and also the like sections of any city charter adopted before the Constitutional Amendment) and as the question did not really concern the merits of the case, both sides agreed that it should not be considered. But I wish to call the matter to your attention in passing as it is liable to arise in some future case.

The Railroad Commission finally decided that neither it, nor by implication any other body, has the right to order a water company to enlarge its mains for the purpose of furnishing fire protection. The opinion was handed down by Commissioner Thelen and is a very well considered collection of all the authorities and covers sixteen full typewritten pages. I shall attempt to give you a very brief resume of his reasoning, and in language as untechnical as possible. The crucial point, as I gather from his opinion, is that our Court of last resort has definitely decided that a water company cannot be held liable for damages for a fire caused by lack of water unless there is a specific contract between the water company and the consumer under which the water company agreed to furnish adequate fire protection; therefore, there cannot be a duty to have the water on hand if there is no liability for breach of that duty. In the celebrated case of *Nielson Brothers Company vs. Contra Costa County Water Company*, 153 Cal. 265, an action was brought to recover damages against the defendant water company for an alleged breach of contract to supply water to the plainiff's premises for fire protection. Plaintiff alleged that its planing mill in West

Berkeley had been destroyed by the failure to furnish sufficient water for fire protection and recovered a large judgment in the court below. The Supreme Court reversed the judgment, on the ground that there was no contract between the parties for the supply of water for fire protection purposes sufficient to justify a recovery.

The Court first finds that there was no express contract between the parties. Plaintiff then contended that an implied contract arose from the fact that plaintiff had installed fire hydrants and that under an ordinance of the city of Berkeley, 50 cents per month was payable from plaintiff to defendant for each of said hydrants. The plaintiff claimed that the ordinary relation of public distributor of water and consumer was sufficient, under the ordinance, to impose upon the defendant the obligation to supply it with water for fire protection. Referring to this point, the Court says at page 316:

"No liability such as the plaintiff claims was ever contemplated where the only relation shown is such as proceeds from the fact that the water company has undertaken to furnish the inhabitants of a municipality with water, has connected its mains with the premises of a consumer, and is charging ordinance rates for the water supplied or to be supplied."

Again at page 317:

"It would appear that in the nature of the situation itself no obligation, implied or otherwise, to have constantly on hand a supply of water for fire protection could arise."

The Court then continues as follows:

"While it is to be presumed that the rates established by a municipal ordinance are fair and reasonable, the presumption only applies as far as such rates fix the compensation to be paid the company for furnishing water to consumers as a commodity. They are not fixed as a consideration under which the company obligates itself to furnish water for the extinguishment of fires with a corresponding liability for failure to do so. And from the fact that under the ordinary relation of public service corporation and consumer that the only duty of the company is to furnish water as a commodity and not for the purpose of extinguishing fires that liability for damages for failure to supply it for the latter purpose can only be created by express contract."

The Court then, at page 317, refers to the well established rule that a property owner has no right of action against a water company under its contract with a city to supply water to public hydrants for the protection of his property, although his loss may have been occasioned by the negligent failure of the company to have on hand a supply whereby the loss might have been prevented.

Continuing, the Court says at page 318:

"Applying the reasoning of these authorities to the relation between the company and the consumer here, it is apparent that from the relation no obligation to furnish water for fire protection is implied, nor can it be said to exist in the absence of an express contract."

Referring to the question of the increased rates which would have to be paid if water companies assume to

protect against fire, the Court says at page 319:

"In the nature of things, the compensation fixed by the municipality has no relation to the assumption of any such liability; that compensation is based on the expense of furnishing water simply as a commodity; liability for destruction of premises to which the company may be required to supply water was not taken into consideration in fixing the rates, nor, we apprehend, was it even thought that any such liability could be imposed by the ordinance, or was to be assumed by the company in doing so."

Referring to the contention that a contract arose from the fact that the water company charged the monthly ordinance rates for the hydrants installed upon plaintiff's premises, the Court says at page 320:

"But these were not paid by reason of any contract between it (plaintiff) and the defendant. If a voluntary contract had been made between them under which a stipulated monthly sum was charged plaintiff by defendant for connecting its mains with the hydrants of the plaintiff, it might reasonably and plausibly be argued that fire protection was contemplated as the only advantage to be derived therefrom. Here, however, there was no such contract. While the municipality has the constitutional power to fix the rates at which a water company may supply water to its inhabitants, this applies only to the establishment of rates for the supply of water as a commodity, and while it may contract with the company for general protection against fire of the property of its inhabitants and expressly contract for protection of its own municipal property, it has no authority to arbitrarily impose upon a water company liability for the destruction of property of the individual citizen on account of an inadequate water supply by simply fixing an ordinance rate for hydrants which the citizen may install upon his premises."

The Court then refers to the enormous liability which a water company would be compelled to assume upon the plaintiff's theory without any adequate consideration and concludes at page 322, that the only relation shown to exist between the plaintiff and defendant was that the water company engaged in distributing water for public use to a consumer who had availed himself of his legal right to have the company connect its water system with his premises for the purpose of furnishing him with water solely at ordinance rates fixed by the Town of Berkeley, and that under these circumstances,

"No liability is imposed by any statute of this State upon such public service company for failure, from whatever cause, to have a supply of water available on the premises of the consumer for use in fire protection, although he may have installed ample facilities for that purpose, and no legal liability for such failure, independent of the statute, is implied from the relation; that such liability can only be created by contract between the parties under which the water company expressly assumes the liability."

As no contract was proven, the plaintiff was held to have no right to maintain the action.

My contention in response to this

case was that under Sections 13 (b) and 42 of the Public Utilities Act the Railroad Commission had the right to make it the duty of the water companies to supply sufficient water for fire read as follows:

"Sec. 13 (b). Every public utility shall furnish, provide and maintain such service, instrumentalities, equipment and facilities as shall promote the safety, health, comfort and convenience of its patrons, employees and the public, and as shall be in all respects adequate, efficient, just and reasonable."

"Sec. 42. The Commission shall have power, after a hearing had upon its own motion or upon complaint, by general or special orders, rules or regulations, or otherwise, to require every public utility to maintain and operate its line, plant, system, equipment, apparatus, tracks and premises in such manner as to promote and safeguard the health and safety of its employees, passengers, customers, and the public, and to this end to prescribe, among other things, the installation, use, maintenance and operation of appropriate safety or other devices or appliances, including interlocking and other protective devices at grade crossings or junctions and block or other systems of signalling, to establish uniform or other standards of equipment, and to require the performance of any other act which the health or safety of its employees, passengers, customers or the public may demand."

Commissioner Thelen, however, in his opinion says that he cannot find in those sections any intention to impose upon the water company a duty with reference to fire protection which did not exist before the enactment of the Public Utilities Act. He says that the effect of these sections is not to add to the duty of a water company with reference to fire protection, but rather to declare that a water company shall perform its full duty to the public in all respects in which it is under obligation to the public, and to state that the Railroad Commission may enforce the performance of those duties.

I also contended that the Niehaus case was not applicable in that we did not demand that the water company by making the improvement should be considered the insurer of property. I claimed that the company could be compelled to put in larger mains and install hydrants and then, by order of the Commission be made to furnish such water as was available. If sufficient water was not there in case of fire no liability for actual damages should rest upon the company; but if it had not complied with the order of the Commission in turning water from certain reservoirs into those pipes, then the company would have to answer for disobeying the Commission. But the Commission says that in the absence of a liability, it is difficult to find a duty, and if the company cannot under the law be held liable for damages if it does not have enough water in the pipes, then certainly neither the Commission nor any other body has the right to order it to have that water in the pipes. And yet it is very hard to reconcile the Commission's language in this case with the acts of the Commission in other cases where it has ordered extensions and improvements in

water service for domestic purposes. No one contends that the company is liable for damages if it fails to obey the Commission's order to install improved service for domestic uses, but it must face the penalties prescribed by the Public Utilities Act. Why, then, cannot an order of the Commission be made just as appropriate in cases of improvements ordered for fire protection purposes? I cannot do better in closing than to quote you verbatim the concluding portion of the order in which the Commission discusses the general aspect of the case, and the way in which it will be possible for the municipality to solve this very grave question. The Commission says:

"If the conclusions herein stated are correct, we are confronted with the practical question as to how an individual is to secure adequate fire protection for a house located in outlying sections of a territory supplied by a water company, in which the size of the mains and the pressure are not sufficient to furnish adequate fire protection. In some of the cases the Courts have suggested that a loss by fire may be guarded against by insurance, and that the collection of the insurance, if a fire results, is an adequate remedy. While such remedy may seem adequate in law, it will afford little comfort to a person who is compelled to stand helplessly by and see his property destroyed.

"The desired fire protection may, of course, be secured by contracts with water companies on the part of municipalities and individuals, in case the water companies are willing to enter into such agreements. Such conditions as may be deemed necessary may doubtless be inserted in charters and franchises and become operative as to water utilities hereafter entering the field, but this procedure could not be availed of as to companies now operating under existing charters and existing franchises not containing the desired conditions.

"San Francisco and Oakland, and possibly other cities in this State, have, at public expense, installed auxiliary fire protection systems. It may be that other cities in California will find such a course to be a solution of the difficulty with reference to fire protection in cases in which the existing water plants do not in connection with their domestic service supply facilities and water sufficient for fire protection purposes. When a city installs a fire protection system it acts under the same theory under which it acts when it installs adequate police protection. In either event, it acts in pursuance of its public safety and general welfare.

"Ownership and operation of the existing water plants by the municipalities will not in and of itself provide the desired remedy, for the reason that it has been universally held that a municipality owning and operating its own water system is not liable in damages for destruction of property caused by the failure of the municipality to supply adequate facilities for fire protection purposes. See *Town of Ukiah vs. Ukiah Water and Improvement Company*, supra, at page 178, where a large number of authorities are cited."

How then are we going to tackle this problem? The public service corporation owes a certain duty to the municipality. Some people may say that it

would bankrupt many of the water companies to be compelled to enlarge their plant to a size sufficient to afford fire protection. My answer to them is that no firm or corporation has any right to engage in the business of furnishing a public commodity to a municipality unless it has resources behind it sufficient to serve that commodity in a proper manner. If it is compelled to enlarge its plant and give better service and the municipality refuses to make each year rates adequate to pay interest on the increased investments, the utility always has the protection of the court and may throw

about itself the mantle of the Federal Constitution which provides that no man's property shall be taken without the due process of law. We have reached a grave crisis which means either municipal ownership or extensions and betterments of the existing service of private corporations. My own conclusions on the subject are that proper legislation should be enacted by the next Legislature dealing specifically with this very important problem, or, if that will not offer us a remedy, then the People should solve it by Constitutional Amendment. (Applause).

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$35,000. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. These buildings will be erected at the southwest corner of Jackson and Taylor streets, and will be built around a large open court in such a manner that all apartments will have outside exposures. The buildings will cover an area of 68 feet 9 inches by 87½ feet, and will be arranged to contain six suites of five rooms and six suites of four rooms. Interior will be finished in pine and hardwood veneer, with oak floors in the principal rooms. Plans provide for steam heat, oil burning furnace, folding ironing boards, wall beds and portable vacuum cleaners. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the buildings will be covered with cement plaster on metal lath. A brick veneer base will also be used. Plans are now being prepared.

SAN FRANCISCO—Apartment house, 3 story and base frame. Cost not stated. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, E. J. MacDonald. The building will be erected at the southwest corner of Duboce and Walter street, and has been designed to contain three suites of three rooms each, one suite of four rooms and a seven-room flat, which will be occupied by the owner. Interior finish will be of pine and elm panels. Some oak floors will be used. All suites will have wall beds and private bath rooms. There will be a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster and rustic. Plans are complete and have been out for figures. A contract will be awarded within a few days.

SAN FRANCISCO—Apartment house, 3 story and base frame, \$10,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. M. Maher. The building will be erected at the southeast corner of Cole and Fulton streets, covering an area of 25 by 62½ feet. Interior will be arranged for eight apartments of three and four rooms. All suites will have wall beds and pri-

vate bath rooms. Interior will be finished in pine and redwood with some elm panels. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with rustic and cement plaster on metal lath. Plans will be out for figures in a few days.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$10,000. Architects, Thomas & Oliver, Pantages Theatre Bldg., Oakland. Owner, Charles L. Gifford, 5631 College avenue, Oakland. The building will be erected on the east side of College avenue south of Keith, and has been designed to contain a total of 18 rooms, which will be arranged in two and three room suites with baths. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be a central heating system, probably steam heat, and a hot water plant. Bath rooms will have composition floors and tile wainscot. All suites will be equipped with wall beds. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. The owner is taking figures for materials.

LOS ANGELES, CAL.—Apartment house, 4 story and base, reinforced concrete. Cost not stated. Architect, C. W. Stewart, Waverly Apartments, 2 A. Owner, Walter I. Wilson. The building will be erected at 133 West 21st street, having a frontage of 40 feet and a depth of 100 feet. There will be a total of 2 rooms, arranged in two and three room suites. Interior finish will be of pine with some hardwood veneer. Oak floors will be used in the living and dining rooms. All suites will have private baths and wall beds. Plans provide for steam heat, an automatic elevator and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with tile. Plans are complete and work will be done by subcontract under the direction of the owner.

LOS ANGELES, CAL.—Apartment house, 4 story and base. Class C construction. Cost not stated. Architect, Leonard L. Jones, 1 W. Hellman Bldg., L. A. Owner's name withheld. The building will be erected at the corner of Orange and Kip streets, covering an area of 160 by 120 feet. There will be a total of 148 rooms arranged in two and three room suites with private baths. Interior will be finished

in pine and hardwood. Plans provide for steam heat, elevator service, wall beds, a vacuum cleaning system and hot water supply. Bath rooms will have tile wainscot and composition floors. Marble and tile will be used in the entrance. Exterior of the building will be faced with pressed brick. Preliminary plans only have been prepared.

PORTLAND, ORE.—Apartment house, 3 story and base, brick, \$35,000. Architects, Clausen & Clausen, McCleay Bldg., Portland. Owner, I. Holman. The building will be erected at the corner of 21st and Overton street on property 50 by 100 feet. Interior has been arranged for a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood veneer. Plans provide for steam heat, a hot water supply and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are now being taken.

SAN FRANCISCO—Apartment house, 7 story and base, reinforced concrete and steel, \$170,000. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected on Powell street north of California, covering an area of 68 feet 9 inches by 137½ feet. Construction will be fireproof throughout. The architect has provided for a seven-story, basement and sub-basement building covering the entire lot and containing fifteen apartments, arranged as follows: Two apartments of five rooms and bath and one apartment of seven rooms and bath on the first floor, and two apartments of eight rooms and three baths each on each of the six upper floors. Each apartment will be provided with the most modern appliances, including open fire places, dressing tables, steam heat, hardwood floors, service elevators, vacuum cleaning system, etc. A feature of these apartments will be that the main living and dining rooms will be located in the rear of the building to give the tenants an unobstructed view of the bay and Alameda a Marin shores, the main sleeping rooms being in the front and overlooking the Fairmont gardens. Annexed to the dining room in each apartment there will be an open air dining porch which will be connected by means of glass doors. The exterior of the building will be designed in French renaissance, with iron balconies at the windows and across the entire top floor, a feature familiar to all Parisian apartment dwellings. Over the main entrance will be an ornate hammered iron and copper marquise, giving approach to a Caen stone vestibule and lobby. The lobby will be finished in mahogany, with art glass ceiling lights and marble wainscot. The suites above are designed for interior decoration in French renaissance finished in combination of white china gloss and mahogany. The bath rooms are to have recessed tubs set in tile floors and walls, with automatic showers, and pedestal lavatories. Doors are arranged in groups of three to form dressing mirrors. The kitchen will

have patent coolers and a system of ventilation operated by an exhaust fan, so that no odors can escape into the building. Space has been provided for thirty servants' rooms and chauffeurs' rooms in the basement, in addition to the servants' rooms within the apartments. The main passenger elevator will be operated from the sub-basement to the roof. In the sub-basement will be a large garage for the storage of automobiles belonging to tenants. This garage is reached by means of a direct entrance from the street, which also connects directly with the elevator. Opening directly from this automobile entrance is a spacious ballroom. Contracts will be awarded shortly.

SAN FRANCISCO—Apartment house, 6 story and base, brick and steel, \$78,000. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, T. J. Young. The building will be erected on the north side of Pine street west of Leavenworth, covering an area of 50 by 137½ feet. The plans show the building to be arranged for six four-room apartments on each floor, but, by ingenious planning for fireproof sliding doors in decorative panels properly deafened, each of the small apartments can be changed at will from four rooms up to a large apartment of eight rooms, so that a selective grouping of all spaces may be obtained. All the apartments will have a large living room en suite, with the dining room and entrance foyer done in soft French gray tones, with mahogany doors. The chambers are arranged with large dressing closets, pier mirrors, etc. The baths are to have recess tubs, with automatic mixing showers and concealed supplies, pedestal lavatories and flushometer toilets. The kitchens are all to be done in white tile, with fixtures in cabinets, white enameled iron coolers, ice boxes, garbage incinerators and electric dumb waiters will afford the most modern service. A drip system of steam heating, with an oil-burning plant, is to be installed. All radiators are to be of the "direct indirect" style set in recesses of the walls, drawing air from the outside through ornamental brass screens set in the panels in the wainscot. The main rooms in general are to be hung in tapestry paper in panels, with all the woodwork painted in French gray. The larger apartments that are to be leased will be designed in different styles as desired by the lessees. The dining rooms will be wainscoted in oak to the richly ornamented ceilings in the Elizabethan style. The foyers, reception and living rooms are to be designed in the different periods ranging from early English Adam and Georgian or colonial to the various Louis. All the chambers are to be finished in French grays in Louis Sixteenth styles, with chintz hangings. An elevator will be installed running from the basement to the roof, where a solarium with a glass roof and sides with maple floor will be built. The exterior is to be in the Spanish renaissance style, with an enriched base of polychromatic terra cotta. The walls above are to be of cement, with enameled surface. On the sixth floor is an open loggia, with a projecting balcony of wrought iron. The back wall of the loggia is to be tinted in a deep crimson color, relieved by the light green

of the iron work and ornamental palms in porcelain vases. A heavy projecting cornice of metal completes the scheme. Open street courts facing the south in which the fire escapes are placed will give sun and air to the interior apartments. Work will be undertaken as soon as leases and contracts are signed.

BANKS.

Contracts Awarded.

GREAT FALLS, MONT.—Bank and offices, 5 story and base. Class A construction, \$250,000. Architect, Henry Hall Johnson, Henry Bldg., Seattle. Owners, R. S. and L. M. Ford, Contractors, Brayton Engineering Co., Portland. Contract price, \$250,000.

BRIDGES AND DAMS.

SAN LUIS OBISPO, SAN LUIS OBISPO CO., CAL.—Bridges, 2, concrete and steel. Cost not stated. Engineer, County Surveyor A. F. Parson, San Luis Obispo. Owners, San Luis Obispo County. Plans for two new bridges garita Creek and one over San Marcos to be constructed, one over Santa Mar-Creek, have been completed. Bids are now being taken and will be opened on April 7th. Complete information can be secured by addressing County Surveyor A. F. Parson.

SAN MATEO, SAN MATEO CO., CAL.—Bridge, reinforced concrete. Cost not stated. Engineer, County Surveyor, Redwood City. Owners, San Mateo County. Plans for a wagon road bridge over Cordilleras Creek in the Second Road District have been approved by the Board of Supervisors. Plans are now out for figures and bids will be opened on April 6th. Complete plans and specifications can be secured from the County Surveyor at Redwood City. An official proposal appears in another column of this issue.

COURT HOUSES.

SEATTLE, WASH.—Court house, 4 story and base. Class A construction, \$350,000. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Plans for the proposed new County Court House have been completed and have been referred by the County Commissioners to the Prosecuting Attorney. Following the attorney's approval bids will be called for at once.

OAKLAND, CAL.—Administration building, 3 story and base. Class A construction, \$50,000. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco, Oakland and Terminal Railroads. This corporation has secured a site at the corner of Twenty-second and Grove streets and will erect a substantial building in which will be housed all of the administrative branches of the company. There will be a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Interior of the building will be finished in pine and hardwood. Partitions will be of hollow tile and metal lath and plaster. There will be steam heat and a hot water system. Plans are now being prepared. Further mention will be made of the work.

Contracts Awarded.

MERCED, MERCED CO., CAL.—Court house addition, 2 story and base, reinforced concrete, \$25,400. Architect, County Engineer, Merced. Owners, Merced County. Contractors, Graham & Jensen, 46 Kearny street, S. F. Contract price, \$25,400.

FACTORIES & WAREHOUSES.

VERNON, LOS ANGELES CO., CAL.—Factory building, concrete and frame construction. Cost not stated. Architect, none. Owners, Griffin Car Wheel Co., Chicago, represented by Eccles & Smith, 243 South Los Angeles street, L. A. The building will consist of a foundry, 142 by 180; pattern house, 48 by 108; charging building, 100 by 62 feet; pattern storage vault, 21 by 48 feet; oil house, 20 by 12 feet; coke sheds, 20 by 128 feet, sand sheds, 20 by 86 feet, ovens and scrap bins. The foundry, pattern house and machine shop will be of steel frame construction, with concrete roof and corrugated iron exterior. The charging building, pattern vault, scrap bins, etc., will be of reinforced concrete construction with composition roofing. The coke and sand sheds, etc., will be of frame construction. Plans are complete and figures are now being taken by Eccles & Smith.

LOS ANGELES, CAL.—Warehouse, 3 story and base, brick and steel. Cost not stated. Architects, William Currett & Son, Title Insurance Bldg., L. A. Owners, Rudgear-Merle Co. The building will be erected at the corner of Alameda and Palmetto streets, covering an area of 100 by 272 feet, and has been designed for a warehouse and factory structure. There will be pine trim, metal window sash and frames and fire doors. Plans also provide for elevator service. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

SAN FRANCISCO—Factory, 3 story and base, reinforced concrete, \$12,000. Architect, James T. Ludlow, 604 Mission street, S. F. Owners, National Ice Cream Co. Contractor, Pasqualetti, Humboldt Bank Bldg., S. F. Contract price not stated.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owners, Leigh and Schultz, 320 8th avenue, S. F. The building will be erected on 21st avenue near Geary and will have a frontage of 25 feet and a depth of 51 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the living and dining rooms. A large open fire place and tile or brick mantel will be used in the living room. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2, 2 story and base, frame, \$4,000 each. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic avenue, S. F. These two buildings will be erect-

ed on the north side of Grove street east of Masonic avenue, and each has been designed to contain two modern flats of five rooms and bath. The buildings will cover an area of 25 by 56 feet. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters are specified. Exterior of the buildings will be covered with rustic brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architects, Havens & Toepke, 46 Kearny street, S. F. Owner, W. J. Black, 475 Fair Oaks, S. F. The building will be erected on Guerrero street south of 25th and has been designed to contain two flats of five and six rooms. The building will cover an area of 27½ by 62 feet. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor.

Contracts Awarded.

SAN FRANCISCO—Flats, 3 story and base, brick, \$6,500. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Mr. Gosliner. Contractors, John Ratto Co., S. F. Contract price, \$6,500.

GARAGES.

SAN FRANCISCO—Garage, 2 story and base. Class B construction. Cost not stated. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, Robert McMillan. The building will be erected on the west side of Valencia street south of Herman. Foundation, walls and floors will be of reinforced concrete. There will be steel roof trusses and hollow tile and metal lath and plaster interior partitions. Metal window sash and frames and special gasoline storage tanks will be used. The structure has been designed for a commercial garage and will contain besides the storage space, machine shop and office. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Garage, 2 story and base, brick and steel. Cost not stated. Architect, Grace Jewett, 560 Montgomery street, S. F. Owners, Alice Mertz et al. The building will be erected on the south side of Bush street east of Polk, and has been designed for a commercial garage. The building will have a frontage of 63 feet and a depth of 120 feet. There will be a cement floor, metal window sash and frames and steel roof trusses. Interior finish will be of pine. Special storage tanks will be specified. The building will contain a completely equipped machine shop, office and storage space. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

OAKLAND, CAL.—Garage, 2 story and base, reinforced concrete, \$20,000. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld for the present. The building has been designed for a commercial garage and will cover a considerable ground area. There will be reinforced concrete floor and walls. Interior will be arranged for office, waiting rooms, machine shop and storage space. Pine will be used for trim throughout. Plans include metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

SAN FRANCISCO—Garage, 1 story and base, brick and steel, \$14,500. Architect, J. R. Miller, Lack Bldg., S. F. Owners, San Christina Investment Co. The building has been designed for a commercial garage and will be erected on the south side of Clay street west of Polk, covering an area of 68 by 127 feet. There will be a cement floor, steel roof trusses and metal window sash and frames. Interior finish will be of pine. There will be modern plumbing fixtures, special gasoline storage tanks and special electric work. Patent store fronts will be installed. Besides the storage space plans provide for a machine shop and office. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.**Canal Circular 819.**

The general purchasing officer of the Isthmian Canal Commission has issued the following circular in connection with proposal No. 819, class 1, tugboats, opening of March 23:

Paragraph 89 of the specifications is hereby changed to read as follows: 89. Electric Plant.—This will consist of two 10-K. W. 110-volt, direct-connected, turbine-driven generators to conform to specifications of the U. S. Navy Department, "17 G. 5 Turbo-Generating Sets," dated December 1, 1913, with the exception that the overload requirement is to be ¾ instead of ½. The turbine and generator to be secured on a common bed plate. The set will be securely mounted on a suitable foundation and located as directed in the engine room. The set must be carefully balanced, run true, and must be able to run under full load continuously without excessive heating or wear. The generating set will be provided with suitable waterproof cover and all necessary tools and wrenches. Turbine and generator to be tested during the general machinery trials.

Pending Projects.

The following projects, bids for which were opened on dates indicated below, are pending in the office of the supervising architect:

Berkeley, Cal., construction, Feb. 18.
Denver, Colo., mechanical equipment, Feb. 16.
Denver, Colo., interior finish, etc., Feb. 16.
Denver, Colo., elevator plant, Feb. 16.
Hilo, H. T., construction, Jan. 15.
Jefferson, Tex., plumbing, etc., Feb. 20.

Reinforcing Steel.

Previous award for furnishing reinforcing steel for use at Fort Mills, P. I., under bids opened by the depot quartermaster at Chicago, Ill., has been canceled and the contract reawarded as follows:

For four sets infantry barracks—Trussed Concrete Steel Co., Detroit, Mich., 8,817 pieces Kahn bars, \$4,773; 12,720 sheets corrugated sheets, \$5,408; 8,640 sheets Hy-Rib-Corr-Mesh, \$5,080; deliveries f. o. b. Youngstown, N. Y.; Corrugated Bar Co., Chicago, Ill., delivery f. o. b. Chicago, bars as per proposal, \$696.98.

Seven double sets officers' quarters—Trussed Concrete Steel Co., 3,451 pieces Kahn bars, \$1,531; 3,472 corrugated sheets, \$1,307; 1,967 sheets Hy-Rib, \$1,127; deliveries f. o. b. Youngstown; Corrugated Bar Co., delivery f. o. b. Chicago, bars as per proposal, \$217.73.

Pocatello, Idaho, Plaster Models.

The contract for furnishing plaster models for the U. S. post office at Pocatello, Idaho, has been awarded to C. W. Buhler, Washington, D. C., at \$178.

Salt Lake City, Utah, Wiring, Etc.

The contract for the extension of the conduit and wiring system in the U. S. post office, Salt Lake City, Utah, has been awarded to Eardley Bros. Co., at \$1,765; included for lighting fixtures, \$300.

Puget Sound, Quay Wall.

The contract for the construction of a quay wall at the Puget Sound navy yard, Wash., has been awarded to L. L. Lent, Bremerton, Wash., at \$12,936.

SAN FRANCISCO—Stables, 5, 1 story, brick or reinforced concrete. Cost not stated. Engineer, Constructing Quartermaster, Fort Mason, Owners, United States Government. Plans for five new stable buildings to be erected at Fort Winfield Scott have been completed and the specifications are now in the hands of the printer. Each building will cover an area of 185 by 55 feet. Bids are to be taken for both brick and reinforced concrete type of construction. If brick is used it will require in the neighborhood of 900,000 stock brick and about 120,000 paving brick. Each building will accommodate 100 animals. There will be modern plumbing and electric work. An official proposal will appear in this publication.

Contracts Awarded.

SAN FRANCISCO—Elevators and fire doors, \$10,000. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Contractors, Kimball Bros., Council Bluffs. Contract price, \$9,868.

HOSPITALS

SAN FRANCISCO—Hospital, 2 story and base, reinforced concrete, \$55,000. Architect, John Baur, Sharon Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Geary and Wood streets, covering an area of 100 by 82 feet. Construction will be fireproof throughout. The building has been designed for a private institution and will contain two small wards and 35 private rooms. There will be steam heat, a hot water system and vacuum cleaning. Interior

will be finished in pine, hardwood and tile. All rooms will have private baths. No expense has been spared in the equipment, and when complete the building will be second to none in the city. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

VICTORIA, B. C.—Hospital group, 2 and 4 story, reinforced concrete, \$500,000. Architect, Loring P. Itixford, Sharon Bldg., S. F., and Victoria. Owners, Royal Jubilee Hospital. Plans are now ready and it is regarded as possible that construction tenders may be invited for the buildings. Several San Francisco contractors are to submit figures on certain parts of the work. Bids are now being taken for the construction of the administration building.

NAPA, NAPA CO., CAL.—Hospital boiler. Cost not stated. Engineer, State Department of Engineering, Sacramento. Owners, State of California. Bids opened for the installation of a 250-H. P. boiler in the State Hospital at Napa show Howard Engineering Co. low at \$4,240. A complete list of bids submitted will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

HOTELS.

OAKLAND, CAL.—Hotel, 3 story and base, brick and steel. Cost not stated. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Moffat Estate. The building will be erected on 11th street between Broadway and Franklin street, and will contain stores on the first floor. Upper floors will be arranged for modern hotel rooms. There will be a number of public and private baths. Interior finish will be of pine. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Foundations and steel will be designed heavy enough to carry additional stories. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once. The work will be segregated.

MARTINEZ, CONTRA COSTA CO., CAL.—Hotel, 4 story and base, brick and steel, \$65,000. Architect, Walter King, Elks' Bldg., Stockton. Owners, Martinez capital represented by W. J. Curtis. The building will be erected on a prominent corner and will be arranged with stores, hotel lobby and public dining room on the first floor. Upper floors will contain in the neighborhood of 20 guest rooms and a number of baths. Plans provide for steam heat, oil burning furnace, hot water supply and vacuum cleaning. There will be patent store fronts. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. Only preliminary plans have been prepared and the project depends upon the amount of capital that can be interested.

LOS ANGELES, CAL.—Hotel, 4 story and base, brick and steel, \$40,000. Architect, John E. Nicholson, Wright and Callender Bldg., L. A. Owner, Mr. Phillips. The building will be erected at the corner of East 6th and San Pedro streets, covering an area of 55 by 110 feet. There will be two stores and the hotel lobby on the first floor. Upper floors will contain a total of 60

rooms and 10 baths. Interior finish will be of pine and redwood with some hardwood. Plans provide for steam heat, elevator service and a hot water system. Bath rooms will have tile wainscot and composition floors. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and bids are now being taken by A. E. Dishman.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base, Class C construction, \$36,969. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Consolidated Realty Co. Contractors, The Los Angeles Planning Mill Co., 1812 Industrial street, L. A., general construction only. Contract price, \$36,969.

SEATTLE, WASH.—Hotel, 6 story and base, brick and frame, \$60,000. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy, Contractor, H. D. Stewart, American Bank Bldg., Seattle. Contract price, \$60,000.

LIBRARIES.**Contracts Awarded.**

COALINGA, FRESNO CO., CAL.—Library, 2 story and base, reinforced concrete, \$16,147. Architects, Swartz, Hotchkiss & Swartz, Rowell Bldg., Fresno. Owners, Coalinga Union High School Library District. Contractor, Walter J. Ochs, Coalinga. Contract price, \$16,147. Barrett-Hicks, Fresno, heating. Contract price, \$500.

PANAMA-PACIFIC EXPOSITION WORK.

SAN DIEGO, CAL.—Superior California Building, 2 story, frame, \$25,000. Architect's name not given. Owners, Superior California, including ten northern counties in the Sacramento Valley. The building will be 200 feet long and 45 feet wide. First floor will be devoted to exhibits and will also contain a large lecture room, buffet, process room and two offices. Second floor will consist of art work and reception rooms. Building is to be completed by May 1st. Plans were accepted by Director in Chief J. A. Fletcher of the Sacramento Valley Exposition Commission. Bids will be called for shortly.

SAN FRANCISCO—Festival hall, 2 story, concrete and frame. Cost not stated. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition. Plans for the last of the big exhibit palaces to be erected by the Exposition Company have been completed and are now out for figures. Separate bids will be allowed for acoustic corrections, heating, ventilating, electric work, plumbing and gas piping. Plans and specifications can be secured from the Director of Works. Bids will be opened on March 26th by the Buildings and Grounds Committee. An official proposal appears in another column of this issue.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, State of Pennsylvania, W. H. Galtzer, Secretary of the Pennsylvania State P. I. E. Commission, Harrisburg, Pa. Plans for this building have been forwarded to the Director of Works and have received official

approval. Bids are now being taken and will be opened on March 25th at Harrisburg. Plans can be secured from the Director of Works in this city. A deposit of \$10 is required on plans and specifications.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Furnishing underground conduit for Municipal Railroads. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday meeting of the Board of Public Works for furnishing the city with underground conduit for the Municipal Railroads. A complete list of the figures with their unit prices will be found under the heading of San Francisco in this issue.

Contracts Awarded.

PUGET SOUND R. R. ORE.—Grading 40 miles of roadbed and constructing bridges. \$200,000. Engineer, Engineering Department Puget Sound and Willapa Harbor Railroad, Portland. Owners, Puget Sound and Willapa Harbor Railroad. Contractors, Guthrie-McDougall Co., Lewis Bldg., Portland. Contract price, \$200,000.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling has been designed for a six-room house and will be erected on 12th avenue near Anza. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, Theo Gibson, 355 Fair Oaks street, S. F. The dwelling will be erected on the south side of Lincoln Way west of 25th avenue, and has been designed to contain seven rooms and bath. Pine, redwood and some hardwood veneer will be used for interior trim. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Tile wainscot and composition floor will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$5,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling, which has been designed for a seven-room house with bath and sleeping porch, will be erected on De Soto avenue. Interior finish will be of pine and hardwood. Oak floors will

be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. A composition floor will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be carried on by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,500. Architect, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, Arthur Elvin, 354 23rd street, S. F. The dwelling will be erected in Forest Hill, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and two open fire places. Mantels will be of tile. Bath room will have tile wainscot and a composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,750. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The dwelling will be erected on the west side of 12th avenue near Anza street, and has been designed for a seven-room dwelling with bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. A composition floor will be used in the bath room. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story, attic and base, frame, \$23,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, E. A. Nickerson. The dwelling will be erected at the junction of Tunnel and Roble Roads. The design is in the Mission style and the dwelling will contain in the neighborhood of twenty rooms, several bath rooms and sleeping porch. Interior finish will be of pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. Ornamental iron and stone fire places will be used. Plans provide for steam heat, all burning furnace and a vacuum cleaning system. Bath rooms will be finished in tile and will be equipped with showers. Tile wainscot will also be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Harris Allen, 2514 Hillegass avenue, Berkeley. Owner, C. E. Miller. The dwelling will be erected on Claremont Boulevard, and has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine

and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. E. Walsh. Automatic water heaters will be installed. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

ALAMEDA, ALAMEDA CO., CAL.—Bungalow, 1 story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Johnson. The dwelling will contain six rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the living and dining rooms. A large open fire place will be used in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, Charles E. Quigley, 730 Grand avenue, Oakland. The dwelling will be erected on Lake Shore Drive and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

OAKLAND, CAL.—Residence, 2 story, attic and base, frame, \$4,500. Architects, Oliver & Thomas, Pantages Theatre Bldg., Oakland. Owner, W. F. Gihard. The dwelling will be erected in the Fourth Avenue Terrace, and has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath room. An automatic water heater will be specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Edward Lawlor. The dwelling will be erected in Piedmont by the Luke, and has been designed for a seven-room house with bath and

sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be steam heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,500. Architect, Patrick-Nelson Co., 2011 Shattuck avenue, Berkeley. Owner, A. C. Wright. The dwelling will contain eight rooms, bath and sleeping porch, and will be erected in Cragmont. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

SAN LEANDRO, ALAMEDA CO., CAL.—Residences, 1, 2 story and 3, 1 story, frame. Cost not stated. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner's name withheld. These houses will be erected in the Huff Tract. The two-story house will contain seven rooms and will cost in the neighborhood of \$3,000. The one-story houses will contain six rooms and cost about \$2,800 each. Pine and redwood trim and some hard floors will be used. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. Tile wainscot will be used in the bath rooms and kitchens. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

HOLLYWOOD, LOS ANGELES CO., CAL.—Residence, 2 story and base, hollow tile and plaster, \$29,000. Architect, Elmer Grey, Wright and Callender Bldg., L. A. Owner's name withheld. The dwelling will contain nine rooms, three baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. There will be furnace heat, open fire places, automatic water heaters and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster. Plans are nearly complete and figures will be called for shortly.

SCHOOLS.

DEL REY, FRESNO CO., CAL.—School, 1 story and base, brick. Cost not stated. Architect, J. Carl Thayer, Fresno. Owners, Del Rey School District. The building has been designed for a four-room school and has been designed in the Mission style. Interior finish will be of pine with maple floors in the class rooms. Plans provide for a central heating system with oil-burning furnace. There will be modern school plumbing and electric work. Exterior of the building will be faced with either cement plaster or pressed brick, this question has not been fully determined by the trustees. A clay

tile roof will be used. Plans are nearly complete and figures will be called for shortly.

CHICO, BUTTE CO., CAL.—School, 2 story end base, reinforced concrete. Cost not stated. Architect, A. J. Bryan, Chico. Owners, Oakdale High School District. A report from the Chico paper states that the Board of School Trustees of the Oakdale School District at Chico will select the plans presented by Architect A. J. Bryan of Chico for the new \$50,000 school building. These plans provide for a two-story structure approximately 125 by 100 feet and containing eight class rooms, domestic and manual training departments and an auditorium seating 600 people. The report states that while official action has not been taken that all trustees favor these plans.

PORTLAND, ORE.—School, 2 story and base, reinforced concrete, \$30,000. Architect, F. A. Naramore, Portland. Owners, City of Portland. The building will be erected on the property bounded by Miles, Logan, Front and 5th streets and is to be of semi-fireproof type of construction. The building will cover an area of 112 by 63 feet and will contain four class rooms, assembly hall seating 300 people, principal's office and rest rooms. Interior finish will be of pine throughout. There will be steam heat and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for about April 1st.

Contracts Awarded.

VENICE, LOS ANGELES CO., CAL.—School group, 1 and 2 story and base, brick, \$103,932. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, Venice Polytechnic High School District. Contractor, J. F. Atkinson, Story Bldg., L. A. General construction, \$103,932. The Machinery and Electric Co., 331 North Main street, L. A., heating and ventilating, \$17,171. Bids for the program clocks were taken under advisement.

REDONDO, LOS ANGELES CO., CAL.—School, 3 story and base, Class C construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Father C. Maloney. Contractor, Lawrence Ott, 2933 Brighton avenue, L. A. Contract price not stated.

MONTEREY, MONTEREY CO., CAL.—School, 1 story and base, reinforced concrete, \$36,000. Architect, W. H. Weeks, 75 Post street, S. P. Owners, Monterey School District. Contractors, Graham & Jensen, 46 Kearny street, S. P. Contract price, \$36,000.

SEWERS, STREET WORK AND WATER SYSTEMS.

SAN RAFAEL, MARIN CO., CAL.—Incinerator. Cost not stated. Architect, Thomas O'Connor, 104 D street, San Rafael. Owners, City of San Rafael. Preliminary plans are now being prepared for a modern incinerator to be erected at San Rafael. The matter has been investigated by the City Council and final approval will be given the plans as soon as they are complete. Further mention will be made of the work.

GRANDVIEW, WASH.—Irrigation pumping plant, \$190,000. Engineers, United States Reclamation Service, Seattle. Owners, United States Govern-

ment. The sum of \$190,000 has been set aside by Secretary of the Interior Lane for the installation of a pumping plant for the Outlook, Sunnyside and Grandview irrigation projects. Machinery for this work will be purchased by the U. S. Reclamation Service.

STORES.

SAN FRANCISCO.—Stores and lofts, 3 story and base, frame. Cost not stated. Architect, none. Owner, Charles Katz, 1200 Dolores street. The building will be erected on the east side of Mission street south of 17th. There will be two stores and light lofts above. Interior finish will be of pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

THEATRES.

SEATTLE, WASH.—Theatre and offices, 4 story and base, Class A construction, \$260,000. Architect, B. Marcus Pretica, Empire Bldg., Seattle. Owner, Alex. Pantages. The building will be erected at the northeast corner of 3rd avenue and University, covering an area of 111 by 120 feet. Exterior will be of terra cotta. The office portion of the structure will contain 12 offices to each floor and will have a direct radiation heating system. Interior will be finished in the French Renaissance style, will contain main floor and balcony, with a seating capacity of 1,900. The central dome will have a clear height of 60 feet. Stage opening will be 35 feet wide and 30 feet high and will have a depth of 30 feet. Fan heating system will be used. Tennessee marble, tile and terrazzo will be used extensively. An Otis elevator and a copper marquise are specified. Bids will be taken in about two weeks.

OAKLAND, CAL.—Theatre alterations, frame and concrete, \$5,000. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mr. Smith. The work will consist of new interior finish, plumbing and electric work and the installation of about 450 new seats. Exterior of the building will also be altered and a new coating of cement plaster on metal lath will be applied. Plans are complete and figures are being taken.

SEALED PROPOSALS.

PROPOSALS FOR CANAL SUPPLIES. **CANAL CIRCULAR 833.**—Proposals for Galvanized Sheet Steel and Iron, Tire Steel, Wrought Iron and Steel Pipes, Cast Iron Pipe Fittings, Ropes, Nuts, Barbed Wire, Stovepipe, Bronze Bars, Sheet Copper, Sheet Zinc, Pig Lead, Sheet Lead, Lead Pipe, Plush Pipe, Curb, Bells, Valves, Bibbs, Ball Cocks, Steam Gauges, Pumps, Drill Sleeves, Hinges, Snatch Blocks, Tackle Blocks, Street Lamps, Ladders, Chair Seats, Life Preservers, Manilla Rope, Hose, Tarpaulins, Vitriol Sewer Pipe, Fire Clay, Calcium Carbide, Gasoline, Shellac, Waste Baskets, Blank Books, Scratch Pads, Paper, Lumber and Untreated Piles—Sealed proposals will be received at the office of the general purchasing officer, Isthmian Canal Commission, Washington, D. C., until 10:30 a. m. March 25, 1914, at which time they will be opened in public for furnishing the above mentioned articles. Blanks and general information relating to this circular (No. 833) may be obtained from this office or the of-

fice of the assistant purchasing agent, 1068 North 4th street, San Francisco, Cal.; also from the U. S. engineer offices in the following cities: Seattle, Wash.; Los Angeles, Cal.; F. C. BOGGS, major, corps engineers, U. S. A., general purchasing officer.

PROPOSALS FOR BUILDING WALL.

BUILDING WALL.—Sealed proposals will be received at the office of the light house inspector, Portland, Ore., until 2 o'clock p. m. March 25, 1914, and then opened, for furnishing material and labor for constructing retaining wall, making fill and placing riprap at Tongue Point Light House Depot, near Astoria, Ore. Blank proposals and particulars may be obtained by addressing the light house inspector, Portland, Ore.

PROPOSALS FOR SEWER WORK.

Further information may be obtained by applying at this office. W. B. McLAURIN, second lieutenant, 1st cavalry, quartermaster.

PROPOSALS FOR PLUMBING, ETC.

PLUMBING, HEATING AND LIGHTING.—Office of Constructing Quartermaster, Fort Mason, Cal.—Sealed proposals, in triplicate, for constructing a ward at Letterman General Hospital, San Francisco, Cal., and installing plumbing, heating and electric wiring in same will be received here until 11 a. m. March 25, 1914, and then opened. Plans, specifications, etc., can be obtained here. Deposit of \$10 required to insure return of plans, etc. Envelopes containing proposals be addressed to Lieutenant Colonel GEORGE McK. WILLIAMSON, quartermaster corps.

PROPOSALS FOR CANAL SUPPLIES.

CANAL CIRCULAR 834.—Office of the General Purchasing Officer, Isthmian Canal Commission, Washington, D. C.—Sealed proposals will be received at this office until 10 a. m. March 25, 1914, for furnishing light fixtures and supplies for the batteries on the fortifications on the isthmus. The specifications include lamp fixtures, switch boxes, boxes for light and power, junction boxes, couplings, plugs and nipples, globes, guards, snap switches, coupling gaskets, receptacles, switch panel boxes, switches, plugs, fuses, feeders and service boxes, cable hangers, wood screws and expansion bolts, and lead sheathed armored and unarmored cable. For further information address F. C. BOGGS, major, corps of engineers, U. S. Army, general purchasing officer.

NOTICE TO CONTRACTORS.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

SEALED PROPOSALS will be received by the Buildings and Grounds Committee of the Panama-Pacific International Exposition Company at Room 213, in the Service Building, Fillmore and Sundry, Heating and Plumbing, California, at 1600 A. M., Thursday, March 26, 1914, for Constructing Festival Hall, in accordance with specifications on file in the office of the Director of Works.

Separate proposals will be allowed on Acoustic Correction, Plumbing and Water Supply, Heating and Ventilation and Gas Piping and on Electric Wiring.

Each proposal must be accompanied by a certified check payable to the order of the Panama-Pacific International Exposition Company in the sum of ten (10) per cent of the amount bid, or the same will not be considered. When the award of contract is made all checks will be returned to the respective bidders, except that filed with the accepted proposal, or, if the check will be returned upon the successful bidder signing the contract and filing the required bond. A bond

in the sum of fifty (\$50) per cent of the contract price will be required for the faithful performance of the contract; the sureties thereon must be satisfactory to the Board of Buildings and Grounds Committee of the Panama-Pacific International Exposition Company.

Progressive payments will be made. The right is reserved to reject any and all bids and to waive technical defects if in the interest of the Exposition Company.

Plans and specifications for the work may be obtained from the Director of Works, Room 207 Service Building, Fillmore and Chestnut Streets, San Francisco, by receiving \$50.00 which amount will be refunded to contractors submitting bona fide bids. All persons taking out plans and failing to submit bona fide bids will forfeit the deposit of Fifty Dollars to the Exposition Company.

WILLIAM H. CROCKER, Chairman. (*)

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Monday, April 6, 1914, for constructing a reinforced concrete bridge on the West Union road across the Cordilleras Creek near the Finkler residence, in the Second Road District, per plans and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, March 2, 1914, which said plans and specifications are now on file in the office of the clerk of said board, where the same may be inspected.

All bids must be addressed to the clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by certified check or some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned clerk of said Board of Supervisors, same to be forfeited to the county of San Mateo as liquidated damages in case the party or parties making the same fail to execute and file, within ten days after the award of said contract, a bond to be approved by the chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bidders from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard to be used in estimating the value of extra work required.

The right is reserved to reject any and all bids.

JOS. H. NASH,

County Clerk.

PROPOSALS FOR PILE DRIVING MACHINERY.

SEALED tenders will be received by Board of Harbor Commissioners up until 10 o'clock a. m. on Monday, March 23, 1914, for the supplying of pile driving machinery and equipment to the Board of Harbor Commissioners, Honolulu, Hawaii.

The Board of Harbor Commissioners reserves the right to reject any or all tenders.

Plans, specifications and blank forms of proposal are on file in the office of the Superintendent of Public Works, Control Building, Honolulu, HAWAII. BOARD OF HARBOR COMMISSIONERS.

By its chairman, J. W. CALDWELL (S).

PROPOSALS FOR PUMPING STATION.

SEALED tenders will be received by the trustees of Reclamation District No. 1500, 229 E Street, Sacramento, Cal., up until 10 a. m. March 23, 1914, for the complete construction of a reinforced concrete pumping station on a concrete pile and slough, approximately one and one-half miles from its center, with the Sacramento River in Sutter County, California. The work to be done involves the placing of approximately 3,000 cubic

yards of concrete, containing approximately 195 tons of reinforcing steel; driving 287 concrete piles, 35 to 40 feet long, and 86 timber piles 25 to 35 feet long.

Plans and specifications may be consulted and blank forms of proposals may be obtained at the office of the Chief Engineer of the district, George N. Randle, 329 J Street, Sacramento, California.

Proposals must be accompanied by a certified check for 10 per cent of total amount of bid, and contractor to whom award is made will be required to furnish bond in sum of 50 per cent of contract price for faithful performance and 50 per cent for labor and material in accordance with the terms of the specifications.

The trustees reserve the right to reject any or all bids.

TRUSTEES OF RECLAMATION DISTRICT NO. 1500.

Per H. A. SENT, Secretary.

PROPOSALS FOR CANAL WORK.

CANAL WORK—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. reclamation service, Great Falls, Mont., until 2 o'clock p. m., April 5, 1914, for the construction of a portion of the St. Mary canal, St. Mary storage unit, Milk River project, Montana, involving about 300,000 cubic yards of excavation, 7,500 cubic yards of paving, 13,000 square yards of paving, 500 cubic yards of rip-rap, and 8,500 cubic yards of grading, the placing of about 485,000 pounds of steel reinforcement bars, and 393,000 feet, board measure of lumber in wooden structures and the erection of about 165,000 pounds of miscellaneous metalwork. The work is situated in the Blackfoot Indian Reservation.

U. S. DEPARTMENT OF CALIFORNIA, CALIFORNIA HIGHWAY COMMISSION.

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which times they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highway as follows:

(Unit H) O'clock A. M. March 30, 1914) Merced County from the Southern Boundary (I-Hum-1-A), about 4.5 miles to El Dorado.

Placerville (III-E, D-11-C), about 6.5 miles in length, to be built of water-bound macadam.

Santa Clara County from San Jose to Mula (IV-S, Cl-2-B), about 1.8 miles in length, to be surfaced with asphaltic concrete.

Merced County from Merced to the Southern Boundary (VI-Mer-4-A), about 14 miles in length, to be built of Portland cement concrete.

(Unit K) O'clock A. M. March 30, 1914) Tuolumne County from the Western Boundary to Keystone (III-Tuo-13-A), 10.8 miles in length, to be graded.

Mendocino County from Forsythe Creek to Ridgewood (I-Men-1-D), about 4.5 miles in length, to be graded. San Diego County from La Flor to the Western Boundary (VII-S, D-2-D), about 11.5 miles in length, to be built of Portland cement concrete. San Diego County from East San Diego to La Mesa (VII-S, D-12-A), about 2 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained, at the said office and may be seen at the offices of the Division Engineers of the divisions in which the work is situated. Division Engineers' offices are located at Wilbur, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

Notice to bidders, unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the

blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

CHARLES D. BLANKY,
WILLIAM D. DALRYMPLE,
CHARLES E. STEIN,
California Highway Commission.
AUSTIN B. FLETCHER,
Highway Engineer.

WILSON R. ELLIS, Secretary. (*)
Dated: February 26, 1914.

NOTICE TO CONTRACTORS.

Office Constructing Quartermaster, Fort Mason, Cal., February 25, 1914.—SEALED PROPOSALS, in triplicate, for constructing a ward at Letterman General Hospital, San Francisco, Cal., and installing plumbing, heating and electric wiring in same, will be received here until 12 o'clock a. m., May 14, 1914, when they will be publicly opened for the purchase of the following vessels: S. S. Manila, at navy yard, Mare Island, Cal., appraised value \$10,000; S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila will be sold for cash to the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts, J. H. AUS DANIELS, Secretary of the Navy.

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS.—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock, noon, May 14, 1914, when they will be publicly opened for the purchase of the following vessels: S. S. Manila, at navy yard, Mare Island, Cal., appraised value \$10,000; S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila will be sold for cash to the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and information concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts, J. H. AUS DANIELS, Secretary of the Navy.

PROPOSALS FOR STRUCTURAL STEEL.

STEEL WORK FOR COAL PLANT.—Sealed proposals, endorsed "Proposals for Erecting Steelwork" will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock a. m. March 28, 1914, and then and there publicly opened for erecting structural steelwork for coaling plant, Pearl Harbor, Hawaii. Estimated cost, \$60,000. Plans and specifications can be obtained on application to the bureau or to the commandant of the naval station named. H. R. STANFORD, chief of bureau.

PROPOSALS FOR STEEL TOWERS.

STEEL TOWERS.—Sealed proposals, endorsed "Proposals for four Steel Towers" will be received at the bureau of yards and docks, Navy Department, Washington, D. C., until 11 o'clock a. m. March 28, 1914, and then and there publicly opened for the construction of four steel towers on the Canal Zone. Separate proposals will be received for steelwork and for foundation. Plans and specifications can be obtained on application to the bureau. H. R. STANFORD, chief of bureau.

PROPOSALS FOR EARTH WORK AND TUNNEL.

EARTHWORK AND TUNNEL.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. Reclamation Service, St. Ignatius, Mont., until 12 o'clock p. m. March 26, 1914, for earthwork and tunnel, Pablo canals, lateral involving about 2,500 cubic yards of open-cut excavation and about 1,000 linear feet of tunnel. The work is located about six miles southwest of Fresno, Mon. For particular details see the U. S. Reclamation Service, Washington, D. C.; Great Falls, Mont., or St. Ignatius, Mont. F. H. NEWELL, director.

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the far part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

FESTIVAL HALL—2 story, concrete and frame. Cost not stated. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Plans for the last of the big exhibit palaces to be erected by the Exposition Company have been completed and are now out for figures. Separate bids will be allowed for acoustic corrections, heating, ventilating, electric work, plumbing and gas piping. Plans and specifications can be secured from the Director of Works. Bids will be opened on March 25th by the Buildings and Grounds Committee. An official proposal appears in another column of this issue.

STATE EXHIBIT BUILDING—2 story, frame and plaster. Cost not stated. Architect's name not given. Owners, State of Pennsylvania. W. H. Gaither, Secretary of the Pennsylvania State P. I. E. Commission, Harrisburg, Pa. Plans for this building have been forwarded to the Director of Works and have received official approval. Bids are now being taken and will be opened on March 25th at Harrisburg. Plans can be secured from the Director of Works in this city. A deposit of \$10 is required on plans and specifications.

RESIDENCE—2 story and base, frame, \$2,500. San Francisco. Architect, none. Owner, A. T. Morris, 616 9th avenue, S. F. The dwelling has been designed for a six-room house, and will be erected on 12th avenue near Anza. Interior finish will be of pine and redwood. Oak floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Theo. Gibson, 355 Fair Oaks street, S. F. The dwelling will be erected on the south side of Lincoln Way west of 25th avenue, and has been designed to contain seven rooms and bath. Pine, redwood and some hardwood veneer will be used for interior trim. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Tile wainscot and composition floors will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$5,000. San Francisco. Architect, Joseph A. Leonard, 85 Cerritos

avenue, S. F. Owners, Urban Realty Co. The dwelling, which has been designed for a seven-room house with bath and sleeping porch, will be erected on De Soto avenue. Interior finish will be of pine and hardwood. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of brick or tile. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. A composition floor will be used in the bath room. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be carried on by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$4,500. San Francisco. Architects, Fabre & Bearwald, Merchants' National Bank Bldg., S. F. Owner, Arthur Elvin, 3854 23rd street, S. F. The dwelling will be erected in Forest Hill, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and two open fire places. Mantels will be of tile. Bath room will have tile wainscot and a composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$2,750. San Francisco. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The dwelling will be erected on the west side of 12th avenue near Anza street, and has been designed for a seven-room dwelling with bath. Interior will be finished in pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. There will be a large open fire place with the tile or brick mantel. Bath room and kitchen will have tile wainscot. A composition floor will be used in the bath room. An automatic water heater is specified. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

APARTMENT HOUSES—2, 3 story and base, frame, \$35,000. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. These buildings will be erected at the southwest corner of Jackson and Taylor streets, and will be built around a large open court in such a manner that all apartments will have outside exposures. The building will cover an area of 68 feet 9 inches by 87½ feet, and will be arranged to contain six suites of five rooms and six suites of four rooms. Interior will be finished in pine and hardwood veneer with oak floors in the principal rooms. Plans provide for steam heat, oil-burning furnace, folding ironing boards, wall beds and portable vacuum cleaners. Bath rooms will have tile wainscot and composition

floors. Entrance will be finished in marble and tile. Exterior of the buildings will be covered with cement plaster on metal lath. A brick veneer base will also be used. Plans are now being prepared.

APARTMENT HOUSE—3 story and base. Cost not stated. San Francisco. Architect, O. R. Thayer, Merchants' National Bank Bldg., S. F. Owner, E. J. MacDonald. The building will be erected at the southwest corner of Duboce and Walter streets, and has been designed to contain three suites of three rooms each, one suite of four rooms and a seven-room flat, which will be occupied by the owner. Interior finish will be of pine and elm panels. Some oak floors will be used. All suites will have wall beds and private bath rooms. There will be a central heating system and hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble and tile. Exterior of the building will be covered with cement plaster and rustic. Plans are complete and have been out for figures. A contract will be awarded within a few days.

APARTMENT HOUSE—3 story and base, frame, \$10,000. San Francisco. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. M. Maher. The building will be erected at the southeast corner of Cole and Fulton streets, covering an area of 25 by 62½ feet. Interior will be arranged for eight apartments of three and four rooms. All suites will have wall beds and private bath rooms. Interior will be finished in pine and redwood, with some elm panels. Bath rooms will have tile wainscot and composition floors. Exterior will be covered with rustic and cement plaster on metal lath. Plans will be out for figures in a few days.

FLATS—2 story and base, frame, \$1,000. San Francisco. Architect, none. Owners, Leigh and Schultz, 350 8th avenue, S. F. The building will be erected on 21st avenue near Kearny, and will have a frontage of 25 feet and a depth of 51 feet. There will be two modern flats of five and six rooms. Interior finish will be of pine and redwood with some elm panels. Oak floors will be used in the living and dining rooms. A large open fire place and the tile or brick mantel will be used in the living room. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owners and the work will be done by Day Labor. All materials are now being purchased.

FLATS—2, 2 story and base, frame, \$1,000 each. San Francisco. Architect, none. Owners, C. J. and W. J. Keenan, Grove and Masonic avenue, S. F. These two buildings will be erected on the north side of Grove street east of Masonic avenue, and each has been designed to contain two modern flats of five rooms and bath. The buildings will cover an area of 25 by 56 feet. Interior finish will be of pine and redwood. Hardwood floors will be used in the living and dining rooms. There will be open fire places and tile or brick mantels. Bath rooms will have tile wainscot and composition floors. Automatic water heaters are specified. Exterior of the build-

ings will be covered with rustic brick veneer and shiplap. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$5,000. San Francisco. Architects, Havens & Toepke, 46 Kearny street, S. F. Owner, W. J. Black, 475 Fair Oaks, S. F. The building will be erected on Guerrero street south of 25th and has been designed to contain two flats of five and six rooms. The building will cover an area of 27½ by 62 feet. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be a large open fire place in each living room. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are complete and the owner will do the work by Day Labor.

GARAGE—story and base, Class B construction, Cost not stated. San Francisco. Architect, N. W. Sexton, Chronicle Bldg., S. F. Owner, Robert McMillan. The building will be erected on the west side of Valencia street south of Herman. Foundation, walls and floors will be of reinforced concrete. There will be steel roof trusses and hollow tile and metal lath and plaster interior partitions. Metal window sash and frames and special gasoline storage tanks will be used. The structure has been designed for a commercial garage and will contain besides the storage space, machine shop and office. Interior will be finished in pine. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

GARAGE—2 story and base, brick and steel. Cost not stated. San Francisco. Architect, Grace Jewett, 560 Montgomery street, S. F. Owner, Alice Mertz et al. The building will be erected on the south side of Bush street east of Polk, and has been designed for a commercial garage. The building will have a frontage of 63 feet and a depth of 10 feet. There will be a cement floor, metal window sash and frames and steel roof trusses. Interior finish will be of pine. Special storage tanks will be specified. The building will contain a completely equipped machine shop, office and storage space. Exterior will be faced with pressed brick. Plans are complete and figures are being taken.

STABLES—5, 1 story, brick or reinforced concrete. Cost not stated. San Francisco. Engineer, Constructing Quartermaster, Fort Mason. Owners, United States Government. Plans for five new stable buildings to be erected at Fort Winfield Scott have been completed and the specifications are now in the hands of the printer. Each building will cover an area of 185 by 85 feet. Bids are to be taken for both brick and reinforced concrete type of construction. If brick is used it will require in the neighborhood of 900,000 stock brick and about 120,000 paving brick. Each building will accommodate 100 animals. There will be modern plumbing and electric work. An official proposal will appear in this publication.

HOSPITAL—2 story and base, reinforced concrete, \$55,000. San Francisco.

Architect, John Haur, Sharon Bldg., S. F. Owner's name withheld. The building will be erected at the corner of Geary and Wood streets, covering an area of 100 by 82 feet. Construction will be fireproof throughout. The building has been designed for a private institution and will contain two small wards and 35 private rooms. There will be steam heat, a hot water system and vacuum cleaning. Interior will be finished in pine, hardwood and tile. All rooms will have private baths. No expense has been spared in the equipment and when complete the building will be second to none in the city. Exterior will be faced with cement plaster. Plans are complete and figures are being taken.

HOSPITAL GROUP—2 and 4 story, reinforced concrete, \$500,000. Architect, Loring P. Rixford, Sharon Bldg., S. F., and Victoria. Owners, Royal Jubilee Hospital. Plans are now ready and it is regarded as possible that construction tenders may be invited for the buildings. Several San Francisco contractors are to submit figures on certain parts of the work. Bids are now being taken for the construction of the administration building.

FURNISHING UNDERGROUND CONDUIT FOR MUNICIPAL RAILROADS—Cost not stated. San Francisco. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids were opened at the last Wednesday meeting of the Board of Public Works for furnishing the city with underground conduit for the Municipal Railroads. A complete list of the figures with their unit prices will be found under the heading of San Francisco in this issue.

RESIDENCES—5, 2 story and base, frame, \$2,500 each. San Francisco. Architect, none. Owner, J. Anderson, 423 16th avenue, S. F. These houses will be erected on 29th avenue south of Anza street, and each has been designed for a six-room house with bath. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. There will be open fire places and tile or brick mantels. Tile wainscot will be used in the bath rooms and kitchens. Automatic water heaters will be installed. Exteriors will be covered with rustic and shingles. Plans are complete and in the hands of the owner who will do the work by Day Labor.

APARTMENT HOUSE—7 story and base, reinforced concrete and steel, \$170,000. San Francisco. Architect, C. A. Meussdorffer, Humboldt Bank Bldg., S. F. Owner, A. W. Wilson. The building will be erected on Powell street north of California, covering an area of 68 feet 9 inches by 137½ feet. Construction will be fireproof throughout. The architect has provided for a seven-story, basement and sub-basement building covering the entire lot and containing fifteen apartments, arranged as follows: Two apartments of five rooms and bath and one apartment of seven rooms and bath on the first floor, and two apartments of eight rooms and three baths each on each of the six upper floors. Each apartment will be provided with the most modern appliances, including open fire places, dressing tables, steam heat, hardwood floors, service elevators, vacuum clean-

ing system, etc. A feature of these apartments will be that the main living and dining rooms will be located in the rear of the building to give the tenants an unobstructed view of the bay and Alameda and Marin shores, the main sleeping rooms being in the front and overlooking the Fairmont gardens. Annexed to the dining room in each apartment there will be an open air dining porch which will be connected by means of glass doors. The exterior of the building will be designed in French renaissance, with iron balconies at the windows and across the entire top floor, a feature familiar to all Parisian apartment dwellings. Over the main entrance will be an ornate hammered iron and copper marquise, giving approach to a Caen stone vestibule and lobby. The lobby will be finished in mahogany, with art glass ceiling lights and marble wainscot. The suites above are designed for interior decoration in French renaissance finished in combination of white china gloss and mahogany. The bath rooms are to have recessed tubs set in tile floors and walls, with automatic showers, and pedestal lavatories. Doors are arranged in groups of three to form dressing mirrors. The kitchen will have patent coolers and a system of ventilation operated by an exhaust fan, so that no odors can escape into the building. Space has been provided for thirty servants' rooms and chauffeurs' rooms in the basement, in addition to the servants' rooms within the apartments. The main passenger elevator will be operated from the sub-basement to the roof. In the sub-basement will be a large garage for the storage of automobiles belonging to tenants. This garage is reached by means of a direct entrance from the street, which also connects directly with the elevator. Opening directly from this automobile entrance and from the elevator is a spacious ballroom. Contracts will be awarded shortly.

APARTMENT HOUSE—6 story and base, brick and steel, \$78,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner, T. J. Young. The building will be erected on the north side of Pine street west of Leavenworth, covering an area of 50 by 137½ feet. The plans show the building to be arranged for six four-room apartments on each floor, but, by ingenious planning for fireproof sliding doors in decorative panels properly deafened, each of the small apartments can be changed at will from four rooms up to a large apartment of eight rooms, so that a selective grouping of all spaces may be obtained. All the apartments will have a large living room en suite, with the dining room and entrance foyer done in soft French gray tones, with mahogany doors. The chambers are arranged with large dressing closets, pier mirrors, etc. The baths are to have recess tubs, with automatic mixing showers and concealed supplies, pedestal lavatories and flushometer toilets. The kitchens are all to be done in white tile, with fixtures in cabinets, while enameled iron coolers, ice boxes, garbage incinerators and electric dumb waiters will afford the most modern service. A drip system of steam heating, with an oil-burning plant is to be installed. All

radiators are to be of the "direct indirect" style set in recesses of the walls, drawing air from the outside through ornamental brass screens set in the panels of the wainscoting. The main rooms in general are to be hung in tapestry paper in panels, with all the woodwork painted in French gray. The larger apartments that are to be leased will be designed in different styles as desired by the lessees. The dining rooms will be wainscoted in oak to the richly ornamented ceilings in the Elizabethan style. The foyers, reception and living rooms are to be designed in the different periods ranging from early English Adam and Georgian or colonial to the various Louis. All the chambers are to be finished in French Grays in Louis Sixteenth styles, with chintz hangings. An elevator will be installed running from the basement to the roof, where a solarium with a glass roof and sides with maple floor will be built. The exterior is to be in the Spanish renaissance style, with an enriched base of polychromatic terra cotta. The walls above are to be of cement, with enameled surface. On the sixth floor is an open loggia, with a projecting balcony of wrought iron. The back wall of the loggia is to be tinted in a deep crimson color, relieved by the light green of the iron work and ornamental palms in porcelain vases. A heavy projecting cornice of metal completes the scheme. Open street courts facing the south in which the fire escapes are to be placed will give sun and air to the interior apartments. Work will be undertaken as soon as leases and contracts are signed.

GARAGE—1 story and base, brick and steel, \$14,500. San Francisco. Architect, J. R. Miller, Lick Bldg., S. F. Owners, San Christina Investment Co. The building has been designed for a commercial garage and will be erected on the south side of Clay street west of Polk, covering an area of 68 feet by 127 feet. There will be a cement floor, steel roof trusses and metal window sash and frames. Interior finish will be of pine. There will be modern plumbing fixtures, special gasoline storage tanks and special electric work. Patent store fronts will be installed. Besides the storage space plans provide for a machine shop and office. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

STORES AND LOFTS—3 story and base, frame. Cost not stated. San Francisco. Architect, none. Owner, Charles Katz, 1260 Dolores street. The building will be erected on the east side of Mission street south of 17th. There will be two stores and light lofts above. Interior finish will be of pine throughout. Patent store fronts and plate glass windows will be used. Exterior of the building will be covered with ship-lap. Plans are complete and in the hands of the owner who will do the work by Labor Day.

Contracts Awarded.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story, attic and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner, E. A. Nickerson. The dwelling will be erected at the junction of the Tunnel and Robie Roads. The design is in the Mission style and the dwelling will contain in the neighborhood of twenty rooms, several bath rooms and sleeping porch. Interior finish will be of pine and hardwood. Hardwood and inlaid floors will be used in the principal rooms. Ornamental iron and stone fire places will be used. Plans provide for steam heat, oil burning furnace and a vacuum cleaning system. Bath rooms will be finished in tile and will be equipped with showers. Tile wainscot will be used in the kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegas avenue, Berkeley. Owner, C. E. Miller. The dwelling will be erected on Claremont Boulevard and has been designed for an eight-room dwelling with bath and sleeping porch. Interior finish will be of pine and hardwood. Oak floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile floor and wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Oakland, Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, H. E. Walsh. The dwelling will be erected on Shafter avenue near College, and has been designed for a seven-room house with bath. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of tile. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegas avenue, Berkeley. Owner, J. W. McKibben. The house will be erected on Fremont avenue, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and hardwood with oak floors in the principal rooms. There will be a large open fire place in the living room with a tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegas avenue, Berkeley. Owner, J. W. McKibben. Plans are complete and figures are being taken.

meda Co., Cnl. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Peters. The house has been designed for a seven-room dwelling with baths and sleeping porch. Interior finish will be of pine, redwood and hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire place. Mantel will be of brick or tile. An automatic water heater is specified. Bath room and kitchen will have the wainscot. A composition floor will be used in the bath rooms. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and bids are now being taken.

RESIDENCE — 3 story and base, reinforced concrete, \$25,000. Berkeley, Alameda Co., Cal. Architect, John Reid, Jr., Chronicle Bldg., S. F. Owners, Phi Delta Chapter House Association. The building will be erected at the corner of Hearst and Highland avenues. There will be a reception hall and store rooms in the first floor, living room, dining room, reception hall and study rooms on the second floor and ten study rooms, sleeping apartments, baths and chapter room on the third floor. Concrete will be used to the level of the second floor and above that point the building will be of frame construction. Exterior will be covered with cement plaster. There will be steam heat, a hot water supply and other modern conveniences. An estimate of \$25,000 is placed on the work. Plans are being figured.

RESIDENCE — 2 story and base, frame, \$3,500. Oakland, Cal. Architect, none. Owner, Leo D. Nichols, Mardonough Bldg., Oakland. The dwelling will be erected on Walker avenue north of Davidson, and will contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot and composition floor will be used in the bath room. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE — 2 story and base, frame, \$3,500. Piedmont, Alameda Co., Cal. Architect, C. H. Miller, Dalziel Bldg., Oakland. Owner, John H. Koylan. The dwelling will be erected in Piedmont, and has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire place. Mantel will be of brick. Tile wainscot and composition floor will be used in the bath room. An automatic water heater is specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are now being prepared.

BUNGALOW — 1½ story and base, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, none. Owner, Henry Ahnefeld, 5005 King street, Berkeley. The dwelling will be erected on El Dorado avenue near Alameda street, and has been designed for an eight-room house with bath and sleeping

porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. Bath room and kitchen will have the wainscot. An automatic water heater is specified. Plans provide for open fire places and furnace heat. Mantels will be of tile or brick. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

THEATRE ALTERATIONS — Frame and concrete, \$5,000. Oakland, Cal. Architect, Clay N. Burrell, Albany Bldg., Oakland. Owner, Mr. Smith. The work will consist of new interior finish, plumbing and electric work and the installation of about 150 new seats. Exterior of the building will also be altered and a new coating of cement plaster on metal lath will be applied. Plans are complete and figures are being taken.

APARTMENT HOUSE — 2 story and base, frame, \$10,000. Oakland, Cal. Architects, Thomas & Oliver, Pantagos Theatre Bldg., Oakland. Owner, Charles L. Gifford, 5634 College avenue, Oakland. The building will be erected on the east side of College avenue south of Keith, and has been designed to contain a total of 18 rooms, which will be arranged in two and three room suites with baths. Interior finish will be largely of pine with some elm panels and hardwood floors. There will be a central heating system, probably steam heat and a hot water plant. Bath rooms will have composition floors and tile wainscot. All suites will be equipped with wall beds. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. The owner is taking figures for materials.

GARAGE — 2 story and base, reinforced concrete, \$30,000. Oakland, Cal. Architect, Charles W. McCall, Central Bank Bldg., Oakland. Owner's name withheld for the present. The building has been designed for a commercial garage and will cover a considerable ground area. There will be reinforced concrete floor and walls. Interior will be arranged for office, waiting rooms, machine shop and storage space. Pine will be used for trim throughout. Plans include metal window sash and frames and special gasoline storage tanks. Exterior of the building will be faced with cement plaster. Plans are now being prepared.

HOTEL — 3 story and base, brick and steel. Cost not stated. Oakland, Cal. Architects, Cunningham & Politeo, First National Bank Bldg., S. F. Owners, Moffatt Estate. The building will be erected on 11th street between Broadway and Franklin street, and will contain stores on the first floor. Upper floors will be arranged for modern hotel rooms. There will be a number of public and private baths. Interior finish will be of pine. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Foundations and steel will be designed heavy enough to carry additional stories. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once. The work will be segregated.

BUNGALOW — 1 story and base, frame, \$2,500. Alameda, Alameda Co., Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Mr. Johnson. The dwelling will contain six rooms and bath. Interior will be finished in pine and redwood with hardwood floors in the living and dining rooms. A large open fire place will be used in the living room. Mantel will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$1,500. Oakland, Cal. Architect, none. Owner, Charles E. Quigley, 739 Grand avenue, Oakland. The dwelling will be erected on Lake Shore Drive, and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood veneer. Oak floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story, attic and base, frame, \$1,500. Oakland, Cal. Architects, Oliver & Thomas, Pantagos Theatre Bldg., Oakland. Owner, W. F. Gilbard. The dwelling will be erected in the Fourth Avenue Terrace, and has been designed to contain eight rooms, bath and sleeping porch. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile and brick. Tile wainscot and composition floors will be used in the bath room. An automatic water heater will be specified. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

RESIDENCE — 2 story and base, frame, \$1,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, Edward Lawlor. The dwelling will be erected in Piedmont by the Lake and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine, redwood and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have the wainscot and composition floor. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,500. Berkeley, Alameda Co., Cal. Architect, Patrick-Nelson Co., 2011 Shattuck avenue, Berkeley. Owner, A. C. Wright. The dwelling will contain eight rooms, bath and sleeping porch and will be erected in Crockett. All interior finish will be of pine or redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places.

CONTRACTORS EQUIPMENT

Telephone Sutter 1675

38-40 NATOMA ST., S. F.

Mantels will be of tile and brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor.

RESIDENCES—1, 2 story and 3, 1 story, frame. Cost not stated. San Leandro Alameda Co., Cal. Architects, Elite Planners, 1814 5th avenue, Oakland. Owner's name withheld. These houses will be erected in the Huff Tract. The two-story house will contain seven rooms and will cost in the neighborhood of \$3,000. The one-story house will contain six rooms and cost about \$2,000 each. Pine and redwood trim and some hardwood floors will be used. There will be open fire places and tile or brick mantels. Automatic water heaters will be installed. The wainscot will be used in the bath rooms and bedrooms. Exterior will be covered with cement plaster on metal lath. Plans are being prepared.

ADMINISTRATIVE BUILDING—3 story and base. Class A construction, \$50,000. Oakland, Cal. Architects, Milwain Bros., Delger Bldg., Oakland. Owners, San Francisco, Oakland and Terminal Railroads. This corporation has secured a site at the corner of 22nd and Grove streets and will erect a substantial building in which will be housed all of the administrative branches of the company. There will be a complete steel frame, exterior walls of brick, faced with pressed brick and terra cotta. Interior of the building will be finished in pine and

hardwood. Partitions will be of hollow tile and metal lath and plaster. There will be steam heat and a hot water system. Plans are now being prepared. Further mention will be made of the work.

MARIN, CONTRA COSTA AND SONOMA COUNTIES.

HOSPITAL BOILER—Cost not stated. Napa, Napa Co., Cal. Engineer, State Department of Engineering, Sacramento. Owners, State of California. Bids opened for the installation of a 250-H. P. boiler in the State Hospital at Napa show Doward Engineering Co. low at \$4,240. A complete list of bids submitted will be found under the heading of Marin, Contra Costa and Sonoma Counties in this issue.

HOTEL—1 story and base, brick and steel, \$65,000. Martinez, Contra Costa Co., Cal. Architect, Walter King, Elks' Bldg., Stockton. Owners, Martinez capital represented by W. J. Curtis. The building will be erected on a prominent corner and will be arranged with stores, hotel lobby and public dining room on the first floor. Upper floors will contain in the neighborhood of 20 guest rooms and a number of bat.s. Plans provide for steam heat, oil burning furnace, hot water supply and vacuum cleaning. There will be patent store fronts. Interior will be finished in pine throughout. Exterior of the building will be faced with pressed brick. Only preliminary plans have been prepared and the project depends on the amount of capital that can be interested.

INCINERATOR—Cost not stated, San Rafael, Marin Co., Cal. Architect, Thomas O'Connor, 104 D street, San Rafael. Owners, City of San Rafael. Preliminary plans are now being prepared for a modern incinerator to be erected at San Rafael. The matter has been investigated by the City Council and final approval will be given the plans as soon as they are complete. Further mention will be made of the work.

Bids For Boiler At Napa State Hospital.

Four Sets of Figures Received for Installation of Boiler at Napa Hospital Building.

(By Special Wire)

SACRAMENTO, Cal., March 10, 1914—Bids were opened at the Tuesday meeting of the State Board of Control for furnishing and installing a 250-h. p. steam boiler, together with oil burning furnace, valves and pipes at the State Hospital at Napa. The Doward Eng. Co. submitted the lowest bid at \$4,240. Other figures submitted were as follows:

Boiler at Napa Hospital.

Doward Engineering Co.	\$4,240
J. C. Hurley & Co.	4,260
Union Iron Works	4,436
Charles C. Moore Co.	5,058

FRESNO, MODESTO, STANISLAUS AND CENTRAL CALIFORNIA.

SCHOOL—1 story and base, brick. Cost not stated. Del Rey, Fresno Co., Cal. Architect, J. Carl Thayer, Fresno. Owners, Del Rey School District. The building has been designed for a four-room school and has been designed in the Mission style. Interior finish will be of pine with maple floors in the class rooms. Plans provide for a central heating system with oil-burning furnace. There will be modern school plumbing and electric work. Exterior of the building will be faced with either cement plaster or pressed brick, this question has not been fully determined by the trustees. A clay tile roof will be used. Plans are nearly complete and figures will be called for shortly.

SCHOOL—2 story and base, reinforced concrete. Cost not stated. Chico, Butte Co., Cal. Architect, A. J. Bryan, Chico. Owners, Oakdale High School District. A report from the Chico papers states that the Board of School Trustees of the Oakdale School District at Chico will select the plans presented by Architect A. J. Bryan of Chico for the new \$50,000 school building. These plans provide for a two-story structure approximately 125 by 100 feet and containing eight class rooms, domestic and manual training departments and an auditorium seating 600 people. The report states that while official action has not been taken that all trustees favor these plans.

reception rooms. Building is to be com-
pleted by May 1st. Plans were ac-
cepted by Director in Chief J. A. Pilch-
er of Sacramento Valley Exposition
Commission. Bids will be called for
shortly.

APARTMENT HOUSE—1 story and
base, reinforced concrete. Cost not
stated. Los Angeles, Cal. Architect,
C. W. Stewart, Waverly Apartments, L.
A. Owner, Walter L. Wilson. The
building will be erected at 133 West
21st street, having a frontage of 40
feet and a depth of 100 feet. There
will be a total of 2 rooms arranged in
two and three room suites. Interior
finish will be of pine with some hard-
wood veneer. Oak floors will be used
in the living and dining rooms. All
suites will have private baths and wall
closets. Plans provide for steam heat,
an automatic elevator and hot water sup-
ply. Bath rooms will have tile wains-
cot and composition floors. Exterior
of the building will be faced with tile.
Plans are complete and work will be
done by subcontract under the direc-
tion of the owner.

APARTMENT HOUSE—4 story and
base. Class C construction. Cost not
stated. Los Angeles, Cal. Architect,
Leonard L. Jones, 1 W. Hellman Bldg.,
L. A. Owner's name withheld. The
building will be erected at the corner
of Orange and Kip streets, covering
an area of 100 by 120 feet. There will
be a total of 118 rooms arranged in
two and three room suites with private
baths. Interior will be finished in
pine and hardwood. Plans provide for
steam heat, elevator service, wall beds,
a vacuum cleaning system and hot
water supply. Bath rooms will have
tile wainscot and composition floors.
Marble and tile will be used in the en-
trance. Exterior of the building will
be faced with pressed brick. Prelimi-
nary plans only have been prepared.

BRIDGES—2 concrete and steel. Cost
not stated. San Luis Obispo, San Luis
Obispo Co., Cal. Engineer, County Sur-
veyor A. F. Parson, San Luis Obispo.
Owners, San Luis Obispo County. Plans
for two new bridges to be constructed,
one over Santa Margarita Creek and
one over San Marcos Creek, have been
completed. Bids are now being taken
and will be opened on April 7th. Com-
plete information can be secured by
addressing County Surveyor A. F. Par-
son.

FACTORY BUILDING—Concrete and
frame construction. Cost not stated.
Vernon, Los Angeles Co., Cal. Archi-
tect, none. Owners, Griffin Car Wheel
Co., Chicago, represented by Eccles &
Smith, 213 South Los Angeles street,
L. A. The building will consist of a
foundry, 142 by 180; pattern house, 48
by 108; charging building, 100 by 62
feet; pattern storage vault, 21 by 48
feet; oil house, 20 by 12 feet; coke
sheds, 20 by 128 feet, sand sheds, 20 by
96 feet; ovens and scrap bins. The
foundry, pattern house and machine
shop will be of steel frame construc-
tion with concrete roof and corrugated
iron exterior. The charging building,
pattern vault, scrap bins, etc., will be
of reinforced concrete construction
with composition roofing. The coke
and sand sheds, etc., will be of frame
construction. Plans are complete and
figures are now being taken by Eccles
& Smith.

WAREHOUSE—3 story and base
brick and steel. Cost not stated. Los
Angeles, Cal. Architects, William Cur-
lett & Son, Title Insurance Bldg., L. A.
Owners, Rudger-Merle Co. The build-
ing will be erected at the corner of
Mamada and Palmetto streets, cover-
ing an area of 100 by 272 feet, and has
been designed for a warehouse and fac-
tory structure. There will be pine
trim, metal window sash and frames
and fire doors. Plans also provide for
elevator service. Exterior of the build-
ing will be faced with pressed brick.
Plans are being prepared.

HOTEL—4 story and base, brick and
steel, \$40,000. Los Angeles, Cal. Ar-
chitect, John B. Nicholson, Wright and
Callender Bldg., L. A. Owner, Mr.
Phillips. The building will be erected
at the corner of East 6th and San Pedro
streets, covering an area of 55 by 110
feet. There will be two stores and the
hotel lobby on the first floor. Upper
floors will contain a total of 60 rooms
and 40 baths. Interior finish will be of
pine and rewood with some hardwood.
Plans provide for steam heat, elevator
service and a hot water system. Bath
rooms will have the wainscot and com-

position floors. Patent store fronts will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and bids are now being taken by A. E. Dishman.

RESIDENCE—2 story and base, hollow tile and plaster, \$24,000. Holly-wood, Los Angeles Co., Cal. Arc. Sect. Elmer Grey, Wright and Callender Bldg., L. A. Owner's name withheld. The dwelling will contain nine rooms, three baths and sleeping porches. Interior finish will be of pine, hardwood and white enamel. There will be furnace heat, open fire places, automatic water heaters and vacuum cleaning. Bath rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster. Plans are nearly complete and figures will be called for shortly.

Contracts Awarded.

HOTEL—4 story and base. Class C construction, \$36,969. Los Angeles, Cal. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owners, Consolidated Realty Co. Contractors, The Los Angeles Planning Mill Co., 1812 Industrial street, L. A., general construction only. Contract price, \$36,969.

SCHOOL GROUP—1 and 2 story and base, brick, \$103,932. Venice, Los Angeles Co., Cal. Architects, C. H. Russell Co., Union League Bldg., L. A. Owners, Venice Polytechnic High School District. Contractor, J. F. Atkinson, Story Bldg., L. A., general construction, \$103,932. The Machinery and Electric Co., 351 North Main street, L. A., heating and ventilating, \$17,471. Bids for the program clocks were taken under advisement.

SCHOOL—3 story and base. Class C construction. Cost not stated. Redondo, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Father C. Maloney, Contractor, Lawrence Ott, 2933 Brighton avenue, L. A. Contract price not stated.

PORTLAND AND OREGON.

APARTMENT HOUSE—3 story and base, brick, \$35,000. Portland, Ore. Architects, Chrussen & Claussen, Macleay Bldg., Portland. Owner, J. Holzman. The building will be erected at the corner of 21st and Overton streets on property 50 by 100 feet. Interior has been arranged for a number of two and three room suites with private baths and wall beds. Interior finish will be of pine and hardwood veneer. Plans provide for steam heat, a hot water supply and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Tile and marble will be used in the entrance. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are now being taken.

SCHOOL—2 story and base, reinforced concrete, \$20,000. Portland, Ore. Architect, F. A. Naramore, Portland. Owners, City of Portland. The building will be erected on the property bounded by Milles, Logan, Front and 5th streets, and is to be of the semi-fireproof type of construction. The building will cover an area of 112 by 63 feet and will contain four class rooms, assembly hall seating 300 people, principal's office and rest rooms. Interior finish will be of pine throughout. There will be steam heat and a vacuum cleaning system. Exterior of the building

will be faced with pressed brick. Working drawings are nearly complete and figures will be called for about April 1st.

Contracts Awarded.

STORES AND OFFICES—2 story and base, reinforced concrete, \$37,000. Seaside, Ore. Architect, F. Manson White, Seaside. Owners, Alex Gilbert and Sons. Contractor, E. G. Gudhart, 1081 East 21st street, Portland. Contract price, \$37,000.

SEATTLE AND WASHINGTON.

COURT HOUSE—4 story and base. Class A construction, \$50,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owners, King County. Plans for the proposed new County Court House have been completed and have been referred by the County Commissioners to the Prosecuting Attorney. Following the attorney's approval bids will be called for at once.

THEATRE AND OFFICES—4 story and base. Class A construction, \$260,000. Seattle, Wash. Architect, B. Marcus Prelica, Empire Bldg., Seattle. Owner, Alex. Pantages. The building will be erected at the northeast corner of 3rd and University, covering an area of 111 by 120 feet. Exterior will be of terra cotta. The office portion of the structure will contain 12 offices to each floor, and will have a direct radiation heating system. Interior will be finished in the French Renaissance style. There will be a main floor and balcony with a seating capacity of 1,900. The central dome will have a clear height of 60 feet. Stage opening will be 35 feet wide and 30 feet high and will have a depth of 30 feet. Fan heating system will be used. Tennessee marble, tile and terrazzo will be used extensively. An Otis elevator and a copper marquise are specified. Bids will be taken in about two weeks.

IRRIGATION PUMPING PLANT—\$190,000. Granview, Wash. Engineers, United States Reclamation Service, Seattle. Owners, United States Government. The sum of \$190,000 has been set aside by Secretary of Interior Lane for the installation of a pumping plant for the Outlook, Sunnyside and Grandview irrigation projects. Machinery for this work will be purchased by the U. S. Reclamation Service.

APARTMENT HOUSE—4 story and base, brick and steel, \$40,000. Seattle, Wash. Architect, V. W. Voorhees, Eltel Bldg., Seattle. Owner, H. McBride. The building will be erected at the corner of 3rd avenue and Battery street, and will cover an area of 60 by 150 feet. There will be a total of 42 suites of two rooms and bath each. Interior finish will be of pine and hardwood. Plans provide for steam heat, a hot water system, elevator service and vacuum cleaning. All suites will have wall beds. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITAL—4 story and base, reinforced concrete and steel, \$150,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, John Starbird. The building will be erected in the Queen Anna Hill district, and is to cover an area of 120 by 156 feet with a large L. Construction will be fireproof throughout. The

plans of the building have not been given out and further mention will be made of the work.

HOTEL—3 story and base, brick and steel, \$60,000. Seattle, Wash. Architect, A. Warren Gould, American Bank Bldg., Seattle. Owner, J. C. Peterson. The building will be erected on Pike street at the corner of 7th, covering an area of 110 by 120 feet. There will be a number of stores besides the hotel entrance and lobby on the first floor. Upper floors will contain in the neighborhood of 170 guest rooms and public and private baths. Interior finish will be of pine and hardwood. Plans provide for steam heat, vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and composition floors. Patent store fronts and metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures are now being taken.

SCHOOL—3 story and base, reinforced concrete, \$40,000. Seattle, Wash. Architect, H. H. Ginnold, Mehlhorn Bldg., Seattle. Owners, School District No. 28. Only two stories of the structure will be built at this time, which will cost approximately \$20,000. Basement will contain boys and girls playrooms, Plenum heating and lavatories. Specifications call for tar and gravel roof. Plans will be ready for general contract figures about March 15th. H. D. Stewart is clerk of the district.

Contracts Awarded.

STORES AND OFFICES—3 story and base, frame and concrete, \$75,000. Seattle, Wash. Architect, none. Owners, State Bank of Seattle. Contractor, David Dow, 21st and Spruce streets, Seattle. Contract price, \$75,000.

HOTEL—6 story and base, brick and frame, \$60,000. Seattle, Wash. Architect, John Graham, Lyon Bldg., Seattle. Owner, P. J. Murphy. Contractor, H. D. Stewart, American Bank Bldg., Seattle. Contract price, \$60,000.

San Francisco Architectural Students Win Honors Abroad.

Word has been received by the San Francisco Architectural Club of the success of one of their members, Edward L. Frick, in his entrance examinations to the Ecole des Beaux Arts in Paris. In the examinations on Architectural Design, he received a mark of 17 with 20 as perfect. This mark placed him first in a class of 700 applicants of all nations and is the highest mark which has been given in this examination at the Beaux Arts in 5 years. Mr. Frick received his early training in design in the Atelier of the San Francisco Architectural Club, under the patronage of Arthur Brown, Jr., a former student at the French School. Mr. Frick, while in the Atelier of the S. F. A. C., won a thousand dollar scholarship given by the Architectural League of the Pacific Coast. Before leaving for Paris last September, Mr. Frick was connected with the firm of Bakewell & Brown, architects for the new City Hall.

The Club is also excited over the success of another of its members in the Paris Prize Competition among students of the United States. Mr. Ernest Weihe was placed fifth in the First

Preliminary of the above competition, out of all competitors in the United States. This makes him eligible to the Second Preliminary and it is hoped by his friends and patron, Mr. Arthur Brown, Jr., that he will be selected as one of the five to compete in the Final Competition, the winner of which receives \$250 quarterly for two and a half years, to be spent in study in France.

PERCY R. STUART JOINS THE EDW. L. SOULE COMPANY.

Mr. Percy R. Stuart, who for the last twelve years, has been Pacific Coast Manager for The Roebbling Construction Co., is now associated with the Edw. L. Soule Co., 916-18-20 Rialto Bldg.

Mr. Stuart is intimately acquainted with the various types of building construction and building materials and our readers are solicited to give him an opportunity to submit information and prices regarding your requirements. The company also announces that they are equipped to furnish and place reinforcing material to suit all requirements as they now handle Twisted Bars, "Unit Rectangle" Fabric Unit Spirals, Unit Frames, Furring Channels and Clips.

STATE INSURANCE AN EXPENSIVE LUXURY.

Wants Washington Accidents Reduced.

Governor Lister has instructed the Washington Industrial Insurance Commission, which administers the so-called State insurance act, to cooperate with the State labor commissioner in devising plans for reducing industrial accidents. Accidents in the industries of Washington have shown sharp increases since the State insurance law became effective, either because of the employers' indifference to safeguards, knowing they would be taxed to sustain the State insurance monopoly, or the carelessness of employees now they are certain of compensation. Six hundred and fifty Washington workmen have been killed and twenty-five thousand injured in the State's industries during the past two years, according to J. H. Wallace of the industrial insurance commission.

PANAMA-PACIFIC EXPOSITION NOTES.

A cablegram received in San Francisco March 4 from London announced that the House of Commons by a substantial majority put on record a desire that the Government re-consider its refusal to participate officially in the Panama-Pacific International Exposition and agree to participate.

Tennessee, Arkansas and Texas now have decided to participate in the Panama-Pacific International Exposition, according to telegraphic advices received March 2. Commissioners to select sites for Arkansas and Texas will arrive in San Francisco within 60 days.

Samuel G. Buckbee of San Francisco has been authorized by Tennessee to select that state's site and he has been notified that \$50,000 has been guaranteed for the Tennessee exhibit. Buck-

bee has received a telegram from R. S. Faxon, chairman of the Tennessee Commission, requesting him to choose the best site available.

The construction of a decorative parapet along the shoreline of the Esplanade of the Marina at the exposition grounds is under way. The Esplanade will be an artistically decorated promenade skirting the water's edge and the parapet will serve the double purpose of a bulkhead and a decorative feature. This parapet will be 3,000 feet long and three feet high. It will be ornamented with pedestals and illuminated in a novel manner.

CHARLES WRIGHT ELECTED PRESIDENT OF THE GENERAL CONTRACTORS' ASSOCIATION

The recently elected Board of Directors of the General Contractors' Association have elected Mr. Charles Wright to serve as President of the Association for the ensuing year.

Mr. Wright is well and favorably known to the building fraternity of this city and is a man who is highly respected by all who know him. As President of the General Contractors' Association, he will undoubtedly fill his important position with credit to the Association.

Mr. A. H. Bergstrom was re-elected Vice-President of the Association and declined to accept a nomination for President, owing to press of private business.

Mr. Chas. W. Gompertz, the retiring President, has been elected Treasurer for the ensuing year.

With these officers, backed by a strong Board of Directors, the Association will undoubtedly continue to progress as in the past.

On Saturday, March 21st, the Annual Banquet of the Association is to be held at the St. Germain Restaurant and a large number of the membership are expected to be present to help in making the occasion an event of importance and a boost for the building industry.

CALIFORNIA HIGHWAY COMMISSION BULLETIN.

The Supreme Court decision of February 21, sustaining the motor vehicle act, releases money for State highway maintenance which had been tied up during the fight on the constitutional-ity of the law. As the act was the only source of funds for maintenance of the State highway the Highway Commission was entirely without money for maintaining the road already constructed. In spite of the severe demands through abnormal weather conditions of the present winter, the highway engineer's force was able to keep up the highway without material loss.

Now that maintenance funds are made available the plans submitted to the Highway Commission sometime ago by Highway Engineer Fletcher providing for maintenance will be made effective. These include organization of a veritable "flying squadron" for maintenance of the 2700 miles of State highway on which work is now under way. By use of the motor truck the amount of territory covered by one maintenance outfit is greatly widened

and quick repair work in case of floods will be possible. The maintenance plans as developed by Highway Engineer Fletcher and approved by the Commission are especially adapted to the widely varying conditions of California highways.

The State has been laid out in seven divisions for maintenance purposes by the highway engineer, and in each of these divisions there will be installed a complete repair outfit costing probably about \$20,000. The major portion of the expense will be for motor spraying outfits for making surface applications of bitumen. These will be heavy duty trucks carrying huge tanks for California asphaltic oil, while smaller trucks will distribute sand or screenings. It is estimated that the crews with these will make as high as fifty miles in a day.

Building Construction Since Fire.

Totals Nearing \$250,000,000 Mark.

Figures, as compiled by the Bureau of Building Inspection of the Board of Public Works, for building construction since May, 1906, to February 28, 1914, show that 49,164 permits were issued amounting to \$247,098,203. The following is a list of figures as compiled by the Bureau:

Class	No. of Bldgs.	Amount
"A"	167	\$ 33,072,954
"B"	196	14,293,586
"C"	2,666	78,988,910
Frames	24,387	93,051,822
Alterations	21,726	17,505,931
Exposition Bldgs.	16	6,127,000
Public Bldgs.	6	4,058,000
Totals	49,164	\$247,098,203

WORLD'S POPULATION.

ANTWERP, Mar. 3.—The population of the earth is slightly over 1,900,000,000, an increase of 140,000,000 in the past four years, according to the Bureau of Universal Statistics, which has just announced its figures for 1913. Asia now has 933,000,000; Europe, 484,000,000; Africa, 188,000,000; America, 187,000,000; Oceania, 57,000,000.

The world's commerce now amounts to \$10,600,000,000, and it is carried on by 55,802 sailing ships and 17,714 steamers. Other figures show a total of 625,000 miles of railroads, or enough to girdle the globe twenty-five times.

A debt of \$12,960,000,000 is the total shown in the accounts of all the nations of the world.

Richmond has unique idea in planning to erect a three-story concrete building for the purpose of housing small factories. A sort of factory tenement house, so to speak. The bay city with the inner harbor and the railroad and pipe line terminal is certainly alive. And the activity evidenced by the Industrial Commission over there might well be copied with profit by the business men of the City of San Francisco.

BOOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking.

IS YOUR ADVERTISEMENT AMONG THESE?

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

The Hotel is only as good as its service

The new Ritz-Carlton Hotel, in Philadelphia, has four Electric Elevators and six Electric Dumbwaiters, furnished by the Otis Elevator Company.

ARCHITECT

Horace Trumbauer

Other Hotels of the Ritz-Carlton chain which are Otis equipped---

The Ritz-Carlton,
New York

The Ritz-Carlton,
Montreal

The Plaza, Buenos Aires

Grand Hotel et de la Plage
Guaruja, near Santos,
Brazil

The Carlton, London

The Ritz, London

The Hyde Park, London

The Ritz, Paris

And its service can be only as good as its elevators---which is one good reason why hostelrys with reputations to maintain, like the latest link in the Ritz-Carlton chain, at Philadelphia, have

Otis Elevators

Choosing from the various Otis machines, the Architects can provide hotels with elevators of the type called for by the character of the structure and insure perfect service---can equip all buildings of all classes in accordance with their needs.

Give a building unsatisfactory elevator service, and its other excellence can not overcome the handicap. Our offices in ninety-one cities in the United States are always at the Architect's call and can assist you in making your elevator specifications 100 per cent correct.

2669A Howard St., Bet. 22 nd and 23rd

San Francisco

As a carpenter and builder, Mr. Neidick has had twenty-two years of experience, during which time he has mastered the business in all its details and has established an excellent reputation for the high character of his work. This statement is proven by the fact that he has built fifty-six flats for one man all of which were erected in the most satisfactory manner. Not only is the work of Mr. Neidick of the highest standard, but his business relations with the public are characterized by the strictest integrity. Mr. Neidick has brought to a successful issue many contracts throughout this city, which stand as a testifying demonstration for his knowledge and ability in his line of business. He is also a prominent stockholder of the General Contractors' Association.

Editorial Comment.

Building for the month of February was comparatively quiet throughout the country. At that it was about an even break with February, 1913, the grand total from about 68 cities throughout the country made to the American Contractor, Chicago, varying less than \$100,000 in amount. This is a pretty good record and everything considered the Western cities have generally fared better than the Eastern. The following table shows the record of the respective building centers:

City	Feb., 1914.
Akron	\$ 198,530
Albany	200,650
Atlanta	335,391
Baltimore	417,743
Berkeley, Cal.	100,200
Buffalo	395,000
Cedar Rapids	145,800
Chattanooga	108,925
Chicago	5,098,400
Cincinnati	316,518
Cleveland	1,398,016

March ought to show a substantial gain over February. Money is getting easier and there ought to be a general loosening up of business. The time is ripe for a revival and it ought to begin with the opening of Spring.

Newspaper reports state that the cantaloupe crop in the Imperial Valley was saved from frost this year by putting paper drinking cups over the growing plants when they were quite young. As the melons were planted quite early in order to get the first fruits of the market the means for saving the earliest growth was ingenious and effective.

Now the prospect is that the valley will ship out 3000 carloads of the melons this season. This is a big return. And it is another example of the great productiveness of the California valleys and particularly of such valleys as the Imperial. That valley is practically a reclaimed district. And its wonderful productiveness is due to the fact that it is practically a river deposit that has been reclaimed by confining the California River to its proper bounds. Five thousand carloads of cantaloupes means 100 trains of 50 cars each, and a car load of melons is a good many in itself.

New features for the exposition are being mentioned all the time in press. Among these are the effects that are to be produced by artificial lighting. This science and mechanical art is being improved and advanced all the time. As the properties of light under given conditions are better understood and the mode of producing it mechanically more wonders are wrought by this means than were dreamed of two decades ago.

It is planned to even make use of the fogs and clouds that will be above the exposition grounds at night to reflect the many colored lights from them. One of the great features of the exposition will be the lighting of the palaces and domes and the night effect produced by the great mechanical contrivances.

Water Proofing Problems

An Address by Mr. Louis C. Mauer at
the Meeting of the San Francisco
Chapter A. I. A.

Mr. President and members of the Local Chapter American Institute of Architects:

The problem assigned to me this evening, namely, to speak on water proofing before your representative body, is a task that should perhaps be handled by one more competent than myself. But this being a subject in which I specialize and by practice and research work endeavor to overcome and thereby solve some of the more or less difficult problems that are daily encountered by most of you in your varied tasks to give your clients for whom you design and erect buildings, results in this particular branch of work. With your kind indulgence I want to tell you of water proofing buildings as I see it.

There are two factors and two factors only that are uppermost in every particular feature and branch of work employed in the erection of buildings, be it a material only, or more frequently a combination of material and labor.

The first factor is results by far the most important, particularly to you gentlemen upon whom rests the responsibility to obtain results for your clients, on this factor alone your service is judged. To enable you to give these results it is necessary for each man entrusted with your work to give in return conscientious service and results in each particular branch of work.

The second factor is also an important one—Cost: only too often it is looked upon by your clients as the most important, hence the consequence, results are waived, which as a rule implies cost threefold soon thereafter. This is forcefully emphasized in the water proofing branch by the recent heavy windstorms and rainfall, and fully demonstrates the necessity of particular attention being given this subject. Water Proofing.

The problem that interests all of you is, how to obtain absolute results at the minimum cost. This applies to water proofing both under and above ground.

Underground work being as a rule subjected to water pressure either by seepages, springs or direct pressure, where elements are below tide or streams. Work of this character requires distinctly different methods of treatments than buildings above ground, it must continuously withstand and endure the resistance of more or less severe water pressure.

Walls above ground are not subject to constant water pressure, therefore require a treatment to be water repellent, to be more precise, prevent the absorption of water.

There are four distinct methods employed to accomplish water proofing results.

First: By density of the materials from which your walls are constructed, density of the material itself or aggregates of which it is composed.

Second: By the membrane system. This method is used principally for underground work, for floors it is placed

between concrete slabs, or on the outside of walls where the water pressure is against the wall.

Third: By a surface coating of asphaltum, tar, or any oil base material, these being water repellent. Results are obtained by a surface coating, this is only efficient so long as the material applied remains intact.

Fourth: By non-absorption, in other words the elimination of capillary attraction. The material I have found to accomplish this result is a chemical solution, a water base material that can be readily used, to mix in the aggregates of cement plaster for underground work subjected to water pressure or by surface application above ground penetrating the substance, becoming a part thereof and not leave any surface coating.

The First Method—Density. You are all aware that the aggregates of a concrete mass of cement mixture can be proportioned in such a manner so as to obtain a density that will not permit the percolation of water, but to obtain this result in a concrete wall or plaster surface would incur a task that would not be practical for ordinary construction, nor would this method apply to any brick wall, as they are all more or less porous and absorptive, permitting percolation of water freely. Even in all mortar joints you will find this weakness.

The Second Method—Membrane System—is one that is very successfully used. To use this method for floor work it is necessary to place a concrete slab, then the membrane system composed of asphaltum and felt in such number of layers as deemed necessary, then the additional slab of concrete. The upper slab necessarily must be of sufficient strength to withstand the hydrostatic pressure. The actual cost of this method is the felt and asphaltum membrane, plus the cost of the lower slab of concrete. The membrane being composed of an absolute foreign material to the concrete does not become a component part of either slab of concrete—in fact, separates them entirely, the only bond between the two slabs being the cohesion of the asphalt itself.

Although it is claimed that a membrane system of water proofing is to a certain extent elastic, still, it is frequently found that breaks occur when the concrete slabs develop contraction cracks, thereby impairing the results of water proofing efficiency.

The membrane system is also used on the exterior of walls. This requires the necessary excavation to give room for applying the membrane. The cost of this work is the membrane plus the cost of excavation and back filling same, and in many cases a protection wall. If for any reason a membrane system could not be applied on the outside, and same would be adopted on the inside of walls, it would be necessary to construct a special wall to hold same in place, otherwise if the water would percolate through the outer walls it would press away the mem-

brane. The cost of this work would be the cost of membrane plus cost of wall to hold same in place.

If for any reason breaks should occur in the membrane system permitting water penetrating the membrane, it would not necessarily mean that the break is where it shows on the surface as the water may travel some distance between the membrane and the upper layer of concrete before finding the weakest point to the surface.

The Third Method—Surface Coating, is a method used quite extensively for treating walls above ground, and to a certain extent for underground work as well.

By applying a good surface coating of asphaltum, tar or any oil-base material where the water pressure presses the coating against the wall, good results will be obtained so long as the life of the asphaltum or oil is retained in the coating. As a rule the oils are quickly absorbed when applied to any absorptive surface, leaving the solids of the coating as a more or less inert substance with its binder. In fact, its principal element of life separated. To avoid this it is a very important factor to have a foundation that will prevent the separation of oils and solids contained in the surface coating, and at the same time obviate the disastrous chemical action of cement and brick surfaces on all oil paints.

To apply a surface coating on the inside of walls under plastering, the so-called damp proofing or plaster bond coat, is, in my opinion an absolute waste of the expense incurred. This applies to all material without exception. Whenever a wall is thoroughly saturated with water from the outside up to the point of the damp proofing coat, there is no material, be it ever so elastic, solid or efficient that will withstand the pressure. As a matter of fact it must then withstand a direct water pressure instead of being only a water repellent at intermittent intervals.

The Fourth Method—Non-absorption, in other words, the elimination of capillary attraction. Under this method and by using the materials referred to I have accomplished results on those problems that have come under my direct supervision, both underground where subjected to severe water pressure, and treating buildings above ground by surface application. This material is a chemical solution (water base contains no oils), penetrates any absorbent substance and becomes a part thereof, accomplishing the water proofing results, not by the filling of voids or a surface coating but by making the substance to which applied non-absorptive and impervious to water.

If you will carefully analyze the fact you will find even a very porous material containing a large percentage of voids will not become saturated with water unless it is absorptive, nor will you find that water will follow fine cracks in any surface, unless the sub-

stance itself has suction and absorbs water. Now then, this being a fact, the method of water proofing by having the aggregates of the material made non-absorptive to resist water pressure or the elimination of capillary attraction, for all surfaces where exposed to water absorption at intermittent intervals, is one that will solve many of your difficulties pertaining to water proofing problems.

Let us first consider its application for work below ground. In basements we accomplish results by the most direct and simple means. The plastering of the walls on the inside with water proof mortar and the floors with water proof topping, thereby saving the expense of exterior excavation and cribbing, which would be necessary in order to apply a membrane or surface coating to the outside.

On new work where the walls are green and bonding of plaster certain, no greater expense is involved than the nominal cost of water-proofing material, which is to be added to the sand and cement for plastering and topping.

But in old basements or any surface not permitting a perfect bond, quite a different problem presents itself. Here the surface to be plastered must be carefully prepared to insure proper bonding of plaster by roughening the surface. We all know the weakest point is the angle between the floor and wall, particular care must be taken to reinforce this point by forming a cove, making the connection between the floor topping and wall plaster continuous.

Should the argument be advanced that floors or walls so water proofed are liable to crack thereby causing leaks, let me say that the chances are very slight indeed if the walls are properly designed and constructed and the floors thick enough to resist the hydrostatic pressure.

Walls and floors that crack, due to contraction or expansion or other causes, will sever or open up a membrane almost as quickly as a plaster coating and what is the result? With the membrane it is virtually impossible to repair, unless a heavy expense is incurred, owing to the fact that the break in the membrane may be many feet from the point where the leakage shows on the surface. While your water proof plaster coating is repaired at a very small expense. The leakage always exists where it shows on the surface. The cracks could easily be cut out to a certain depth and pointed up, making same absolutely water tight.

Many basements in our city, presenting all sorts of conditions from seepage of ground water to tide pressure, have been successfully water proofed with this method.

Time does not permit going into this subject to such an extent as it might justify, but permit me to say, I would not hesitate to undertake to make absolutely dry any basement under the most severe water pressure, by plastering same on the inside and using this material as part of the water gauging the cement and sand mortar. This mortar can be applied even while the water is percolating through the wall.

If necessary the mortar could be held in place with boards pressed against the wall. This might develop small

holes permitting the water to escape but which could easily be plugged up after the other portions are thoroughly set.

Cement mortar applied on walls saturated with water will gradually dry out even with the water pressure against the wall.

No doubt this question will come to your mind, will the use of this material used in the aggregates of cement mortars be detrimental to its strength or cause additional labor in its use? In answer to this, I wish to state, the use of this material is a decided advantage, the initial set is somewhat retarded but in thirty-six or forty hours you will find the cement mortar much harder and stronger, this in comparison with equally proportioned cement mortar gauged with water alone. The working of cement mortar is also made much easier and smoother, the action being similar as obtained by the use of lime putty in cement mortar.

For treating a building above ground, the result can be obtained by a thorough surface application, by either brush or spray, preferably the latter, by this I mean, every particle of the wall must be saturated. This application will leave no surface coating and will not change the color or texture of any surface to which applied be it a white sand or lime stone or a red brick. A surface application will give results and become effective when applied on an absorptive material.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 3 story and base, frame, \$15,000. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mr. Hadler. The building will be erected on Mission street between 16th and 17th streets, and has been designed to contain nine apartments of three and four rooms. Interiors will be finished in pine and redwood with some elm panels. There will be steam heat, a hot water supply and patent store fronts. All suites will have private baths and wall beds. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house alterations, 3 story, frame, \$6,000. Architect, Arthur J. Laib, Russ Bldg., S. F. Owner, Miss McGough, 1256 Page street. The work will consist of altering the two lower flats of a three-story building into four modern apartments. The basement of the building will be altered to contain a store. Third floor will be arranged for one flat. New interior finish, oak floors, modern plumbing, electric work and painting will be required. Exterior of the building will also be altered. Plans are complete and figures are being taken.

OAKLAND, CAL.—Apartment house, 3 story and base, frame, \$30,000. Architect, Joseph Cahen, 43 Kearny

street, S. F. Owner's name withheld. The building will be erected at the corner of Perkins and Grand streets, and will cover a large area. Interior will be arranged for a number of two, three and four room suites. Interior finish will be of pine and hardwood veneer. Some oak floors will be used. Plans provide for steam heat, a hot water system and portable vacuum cleaners. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RICHMOND, CONTRA COSTA CO., CAL.—Apartment house alterations, 3 story, frame, \$6,000. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owner's name withheld. The building to be altered is now being used as a hospital. Included in the work will be new interior partitions, interior finish, plumbing, painting, electric work and plastering. Exterior of the building will be covered with a new coat of cement plaster on metal lath. Plans are being prepared.

SAN FRANCISCO—Apartment house, 5 story and base, brick and steel, \$80,000. Architects, Dunn & Kearns, Mo-nadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of O'Farrell street between Larkin and Polk streets, and will have a frontage of 60 feet by a

depth of 120 feet. There will be a total of 120 rooms arranged in suites of two and three rooms. Plans provide for steam heat, elevator service, hot water supply, vacuum cleaning and wall beds. All suites will have private baths. Interior finish will be of pine, redwood and hardwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house alterations, 3 story, frame, \$7,500. Architect, Charles J. Rousseau, 46 Kearny street, S. F. Owner's name withheld. This work will consist of altering a three-story flat building into six modern four-room apartments. Steam heat, wall beds, plumbing, electric work, plastering, painting and millwork will be required. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Apartment house, 4 story and base, brick and steel, \$50,000. Architect, none. Owner, A. S. O'Neil, Lankershim Bldg., L. A. Contractor, W. E. Stradley, Builders' Exchange, L. A. Contract price, \$50,000.

BRIDGES AND DAMS.

SAN FRANCISCO—Furnishing cement. Cost not stated. Engineer, Assistant State Engineer, Ferry Bldg., S. F. Owners, State of California. Bids have been called for on 50,000 barrels of cement which is to be delivered to the State Board of Harbor Commissioners, f. o. b. cars of the Belt Line Railroad at San Francisco. Bids will be opened on April 2nd. Specifications and full particulars can be secured from the Secretary's office of the State Board of Harbor Commissioners. An official proposal appears in another column of this issue.

KINNAMAN, ORE.—Bridge, steel or reinforced concrete. Cost not stated. Engineer, County Surveyor, Tillamook Owners, Tillamook County. Plans are complete and figures are being taken for a steel or reinforced concrete bridge to be constructed over the West Beaver Creek near Kinnaman. There will be one 50-foot span. Plans and specifications can be secured from the County Clerk, J. C. Holden, at Tillamook. Bids will be opened on March 27th.

Contracts Awarded.

SAN FRANCISCO—Ferry ship, timber construction, \$110,600. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Thibbitts Construction Co., S. F. Contract price \$110,600. A complete list of all figures received for this work will be found under the heading of San Francisco in this issue.

CHURCHES.

LAKEPORT, LAKE CO., CAL.—Church, 1 story and base, frame and plaster, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Franciscan Fathers Church of Lakeport. Architect Foley has just been commissioned to prepare plans for a new church, which will be de-

signed in the Elizabethan style. The main auditorium will seat 400 people. Besides this room there will be Sunday school rooms and social hall. A hot air system of heating will be installed. Interior will be finished in pine with ornamental plaster. Exterior of the building will be covered with cement plaster on metal lath. Working drawings are now being prepared.

ALAMEDA, ALAMEDA CO., CAL.—Church alterations. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Joseph's Church, Father Prout in charge. A new system of heating and ventilating, an indirect system of lighting and new lighting fixtures will be installed. Plans for this work will be ready for figures shortly.

FACTORIES & WAREHOUSES.

LOS ANGELES, CAL.—Motion picture factory, 1 and 2 story and base, reinforced concrete, \$1,000,000. Architects, A. Tilden Norton and F. H. Wallis, Title Insurance Bldg., L. A. Owners, Universal Film Co. A reinforced concrete wall 15 feet in height will be constructed along the property line where it adjoins the public highways. The buildings will consist of the administration building, projecting theatre, restaurant to seat 500, planing mill, carpenter shop, 300 dressing rooms, scene painting building, several stages, one of which will be 600 feet long, emergency hospital, property rooms, laboratory and power plant. Buildings will be designed in the Mission style and the construction will be of reinforced concrete with tile and composition roofs. Plans are being prepared.

FIRE HOUSES.

SAN FRANCISCO—Fire alarm station, 2 story and base, brick and concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, S. F. Owners, City and County of San Francisco. A two-story and basement brick and concrete building will be erected in Jefferson Square to house the central fire alarm station. Interior will be finished in pine and will contain special electric work, repair rooms and offices. There will be steam heat. Exterior of the building will be faced with cement plaster. Plans are complete and figures are now being taken by the Board of Public Works. Bids will be opened on April 8th. An official proposal appears in another column of this issue. Plans can be secured from the Department of Architecture.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$5,000. Architect, none. Owner, A. Petry, 336 Pierce street, S. F. The building will be erected on the west side of 11th avenue north of Fulton street, covering an area of 25 by 41 feet, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine, redwood and some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath

rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 3 story and base, frame, \$4,500. Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. V. Kussish. The building will be erected on Pacific street west of Powell, and will contain two flats and a store. The structure will have a 20-foot frontage and a depth of 51 feet. Interior will be finished in pine and redwood. Open fire places and tile mantels are specified. Bath room will have tile wainscot and composition floor. Exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Flats, 2 story and base, frame, \$4,000. Architect, none. Owner, V. Filippis, 866 Union street, S. F. The building will be erected at the southwest corner of Montgomery and Union streets, covering an area of 26 by 70 feet. Plans show two modern flats of five and six rooms. Interior finish will be of pine and redwood. Some oak floors will be used. Each living room will have a large open fire place with tile or brick mantel. Bath rooms will have composition floors and tile wainscot. Automatic water heaters are specified. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

GARAGES.

SAN FRANCISCO—Garage, 1 story and base, Class A construction. Cost not stated. Architect, John A. Ettler, 604 Mission street, S. F. Owner, John V. Oppel. The building will be erected on the south side of Natoma street near Second, and will cover an area of 63 by 70 feet. There will be steel frame, steel roof trusses and concrete walls and floors. Steel and foundations have been designed heavy enough to carry three additional stories. A completely equipped machine shop for automobile repairs will be installed. Exterior of the building will be covered with pressed brick. Plans are complete and figures are being taken.

GOVERNMENT WORK AND SUPPLIES.

Cement for Reclamation.

The Secretary of the Interior has directed the reclamation service to award the following contracts for Portland cement:

To the United States Portland Cement Co., of Denver, Colo., for 12,000 barrels to fill part of the requirements of the Uncompahgre and Grand Valley Irrigation projects, Colorado, at 56 cents per barrel, f. o. b. cars at Concrete, Colo. The bidder stipulated that not to exceed a total of 12,000 barrels will be furnished.

To the Colorado Portland Cement Company, of Denver, Colo., for 140,000 barrels for use on the Uncompahgre

and Grand Valley projects in Colorado, and for the Rio Grande project at Elephant Butte dam and the North Platte project in Nebraska. This cement is to be delivered f. o. b. cars at Portland, Colo., at \$1 per barrel.

To the Southwestern Portland Cement Co., El Paso, Texas, for 21,000 barrels to be used on the distribution system of the Rio Grande irrigation project, New Mexico-Texas, at \$1.50 per barrel, f. o. b. cars at El Paso, Tex.

San Francisco, Cal., Roadway.

The contract for constructing sub-base of new roadway at the U. S. Marine Hospital, San Francisco, Cal., has been awarded to W. H. O'Brien, \$1,770.

Structural Steel, Pearl Harbor.

In connection with the fabrication and delivery of structural steel for the marine railway at Pearl Harbor, Hawaii, bids for which will be opened on April 4 at the bureau of yards and docks, Navy Department, it is estimated that the following quantities are required: 520,000 pounds fabricated structural steel, 37,000 pounds plain cast iron, 8,700 pounds galvanized cast iron, 10,000 pounds plain tie rods and bolts, 1,150 pounds galvanized bolts and fastenings, 5,500 pounds plain chain, and 3,700 pounds galvanized chain.

San Francisco Circular No. 120.

The following bids were received and award made by the depot quartermaster, San Francisco, Cal., under office circular No. 129, for furnishing two tail shafts, propeller, right and left hand, for the mine planter "General Henry J. Knox":

Bethlehem Steel Co., Crocker Building, San Francisco, Cal., \$640 each; delivery in 50 days.

Moore & Scott Iron Works, 678 2nd street, San Francisco, Cal., \$547; 15 days.

Main Street Iron Works, 163 Main street, San Francisco, Cal., \$473; 16 days.

Union Iron Works Co., 311 California street, San Francisco, Cal., \$548; 12 days.

Ker Lloyd Iron Works, 352 Spear street, San Francisco, Cal., \$675; 31 days.

United Engineering Works, 224 Spear street, San Francisco, Cal., \$456; 20 days; accepted.

The U. S. Navy Yard, Mare Island, Cal., submitted an estimate of \$937 for both shafts, plus \$15 for inspection; material to be in conformity with bureau of shipping requirements, and a price of \$746 for both blades, plus \$15 for inspection, with sleeves and nuts of scrap.

Denver, Colo., Mechanical Equipment, Etc.

All bids received by the supervising architect, Treasury Department, Washington, D. C., February 16 for the mechanical equipment, minor outside work, and interior finish of the U. S. post office at Denver, Colo., have been rejected.

Denver, Colo., Post Office.

Supplemental bids have been asked by the supervising architect, Treasury Department, Washington, D. C., for minor outside work, interior finish, and mechanical equipment of the U. S. post office at Denver, Colo., bids for which were originally opened February 16.

Alameda, Cal., Shelving.

The contract for installing redwood shelving in the basement storage room of the U. S. post office at Alameda, Cal., has been awarded to A. T. Spence, 180 Jessie street, San Francisco, Cal., at \$88.

Building 58, Puget Sound.

A new advertisement for bids for fireproofing building 59 at the Puget Sound navy yard is to be issued in about two weeks.

\$23,000,000 for Reclamation.

Secretary Lane has instructed the Reclamation Commission to push to completion as rapidly as possible all uncompleted reclamation projects. The plans made by the service, which have been approved by the secretary, contemplate the expenditure of \$23,460,555 during the calendar year 1914. This amount covers the largest program ever outlined in the history of the Reclamation Service. Allotments have been made for the various projects as follows:

Arizona, Salt River.....	\$909,846.17
Arizona-California, Yuma.....	531,126.25
California, Orland.....	255,700.18
Colorado, Grand Valley.....	1,873,184.18
Colorado, Uncompahgre Valley.....	750,861.30
Idaho, Boise.....	3,600,057.35
Idaho, Minidoka.....	476,874.33
Kansas, Garden City.....	1,000.00
Montana, Huntley.....	281,000.50
Montana, Milk River.....	1,393,083.66
Montana, St. Mary Storage.....	843,630.14
Montana, Sun River.....	1,712,237.27
Montana—North Dakota, Lower Yellowstone.....	103,800.00
Nebraska-Wyoming, North Platte.....	733,875.70
Nevada, Truckee-Carson.....	807,706.17
New Mexico, Carlsbad.....	194,160.21
New Mexico, Hondo.....	110,001.11
New Mexico-Texas, Rio Grande.....	941,529.16
New Mexico-Texas, Elephant Butte Storage.....	2,741,683.61
North Dakota, North Dakota Pumping.....	70,000.00
Oregon, Umatilla.....	572,000.00
Oregon—California, Klamath.....	175,219.62
South Dakota, Belle Fourche.....	163,039.07
Utah, Starberry Valley.....	686,641.41
Washington, Okanogan.....	149,000.37
Washington, Yakima-Storage.....	608,657.61
Washington, Yakima-Sunnyside.....	658,085.38
Washington, Yakima-Tieton.....	113,997.79
Wyoming, Shoshone.....	593,399.20
Secondary.....	709,916.80
Townsites.....	4,421.97
Revolving Fund.....	394,799.11
Totals.....	\$23,460,555.05

Below is a general outline of the proposed expenditures, by states, projects, and features. The secretary's approval not only limits the expenditures on the various features, but no transfer of funds between features will be permitted except after specific approval of the secretary, and then only after detailed and itemized statements have been made by the projects showing the necessity or desirability of such transfers. These plans are based upon certain assumptions and upon the conditions that existed at the beginning of

the year; therefore, it should be borne in mind by the water users that future unforeseen conditions may materially change the proposed operations outlined below.

Arizona.

In Arizona it is proposed to expend the sum of \$909,846 on the Salt River project and \$831,000 on the Yuma project.

Salt River.—The items of expenditure approved by the secretary comprise \$154,321 on the power system; \$114,561 on the North Side Canal system; \$98,173 on the South Side Canal system; \$15,937 for wells for irrigation; \$2,500 for six sites for zanjerio houses and \$3,600 for their construction, and \$10,887 for the survey of farm unit boundaries. \$45,000 has been allotted for contingencies, and it is proposed to spend \$464,866 in the operation and maintenance of the system to irrigate the lands under cultivation. This includes the proposed expenditure of \$80,500 in the operation of the power plants.

Yuma.—The total amount to be expended is estimated at \$831,000, distributed as follows: \$10,000 on sluice and regulator works for the Laguna dam; \$20,000 on the reservation distribution system; \$10,000 on the Yuma main canal (California), and \$231,352 on the Yuma Valley distribution system. On river front protection along the Colorado River it is proposed to expend \$330,480. It is also planned to expend approximately \$50,000 on drainage on the Yuma Indian reservation, and \$112,000 in the operation and maintenance of the system as now constructed to irrigate the lands under cultivation.

California.

In California it is planned to expend \$255,700 on the Orland project and \$5,000 on the Iron Canyon project in co-operation with the state of California.

Orland.—The approved expenditures are \$179,200 on the storage works to supplement the water supply and increase the irrigable area; \$6,000 on the canal; and \$50,000 on the extension of the lateral system to increase the irrigable area 6,000 acres.

Colorado.

In Colorado the plans contemplate the expenditure of \$1,873,000 on the Grand Valley project and \$750,860 on the Uncompahgre Valley project.

Grand Valley.—The items of expenditure comprise \$300,000 on the construction of headworks; \$512,000 on the construction of the Main Canal, Canyon Division 1; \$215,000 on the Main Canal, Division 2; \$160,000 on the Main Canal, Division 3; and \$242,000 on Division 4. Telephone line construction for the year is estimated at about \$8,000, while expenditures to be made for constructing buildings and miscellaneous structures amount to \$13,600. In addition to these items it is proposed to expend \$300,000 in partially constructing the lateral system and \$7,000 in investigating power development.

Uncompahgre Valley.—The items approved are expenditures of \$1,876 for buildings, while \$60,000 is to be expended on continuing lining on the Gunnison tunnel and \$5,000 on placing riprap and grouted paving protection to the sluice works of the Gunnison River weir. In addition the plans contemplate the expenditure of \$225,000, \$35,000, \$100,000, \$50,000, and \$10,000 on

the East, West, Selig, Ironstone, and Garnet systems respectively.

Idaho.

In Idaho it is planned to expend \$3,600,000 on the Boise project and \$477,000 on the Minidoka project.

Boise.—The proposed expenditures comprise \$2,400 on camp construction; \$21,000 on wagon roads; \$30,000 on camp maintenance; \$600 on clearing Arrowrock Reservoir; \$14,000 on power development at Arrowrock; and \$459,000 on preparatory expense and incidental operations on the Boise River Storage Unit. In addition to these expenditures on the Boise River Storage, \$2,219,000 is to be expended on construction work on the Arrowrock Dam proper. The approved expenditures on the distribution unit are \$42,000 on gravel facing the Deer Flat embankment; \$55,000 for canals and lateral system on the Main Canal; \$74,000 for canals and lateral system for Deer Flat Reservoir; \$8,000 on the survey of farm units; \$150,000 on drainage in the Pioneer Irrigation District; and \$50,000 on miscellaneous drainage.

Minidoka.—The expenditures proposed to be made comprise \$46,000 on the distribution system of the gravity unit and \$52,100 on the South Side pumping distribution system; \$2,000 to complete the cottages now under construction at the power plant; \$17,570 for enlarging the capacities of the South Side pumping stations; \$3,700 on the West End pumping extension; and \$9,500 on the substations at Burley and Marshfield and for other appurtenances in connection with power deliveries. \$206,000 is to be expended for drainage. In the operation and maintenance estimate the sum of \$10,000 is included for commercial power operations.

Montana.

In Montana it is planned to expend \$251,000 on the Huntley project and \$1,293,000 on the Milk River project, exclusive of the St. Mary Storage, on which it is planned to expend \$443,530; while on the Sun River project the proposed expenditures total \$1,712,000, and on the Lower Yellowstone project, \$103,800.

Huntley.—\$56,000 is to be expended on canal extensions, \$175,000 on drainage, Milk River (exclusive of St. Mary Storage).—\$470,000 on the construction of Vandalla diversion works; \$365,000 on the canal system, \$5,000 on additional buildings; \$500,000 on Nelson Reservoir; \$500 for townsite developments, and \$15,000 for operation and maintenance during construction. \$10,000 is also provided for contingencies.

St. Mary Storage.—The proposed expenditures comprise \$2,860 for surveys; \$18,172 for real estate; \$11,928 for additional buildings; \$2,000 on telephone lines; \$10,000 on roads; \$172,500 on storage works; \$65,000 on diversion works; and \$558,000 for canals.

Sun River.—The estimated expenditures on this project are \$220,000 on the Pishkun Reservoir; \$3,000 on the Willow Creek Reservoir; \$37,895 on Sun River diversion; \$400,000 on the construction of the Pishkun Reservoir Supply Canal; \$435,000 on the construction of the Sun River Slope Canal, Spring Valley Division; and \$540,000 on construction work. Sun River Slope Canal, Greenfields Division; \$15,000 on the Fort Shaw Canal; \$5,000 on telephone lines; \$20,000 on transmission lines; \$8,000 on additional

buildings; \$3,000 on roads; \$2,000 on the examination of the project; and \$12,000 on operation and maintenance to irrigate the lands under the Fort Shaw unit.

Lower Yellowstone.—The proposed expenditures are \$53,600 for additional drainage; \$2,000 on the distributing system; \$500 on highway bridges; \$700 for lands and rights of way.

Nevada.

Truckee-Carson.—The plans for the year contemplate an expenditure of approximately \$567,700, the items comprising \$2,000 on permanent buildings; \$30,000 on extending the distribution system; \$10,000 on extension surveys; \$54,000 on the Lahontan storage works; \$10,000 on the main Truckee Canal; \$2,500 for lands and rights of way; \$5,000 on the survey of irrigable lands; \$1,000 on the extension of the telephone system; and \$50,000 on hydroelectric development. In addition \$50,000 is to be expended in constructing drainage systems, \$30,000 on the partial construction of the canal to reach the lands of the Lahontan Bench Unit.

New Mexico.

In New Mexico (exclusive of the Rio Grande project) the proposed expenditures to be made during the calendar year are \$191,100 in the Carlshad project and \$110,000 on the Hondo project.

Carlshad.—The proposed expenditures are \$72,000 for lining the present canal distribution system; \$50,000 for additional drainage; \$1,800 on laterals.

Hondo.—The estimated expenditures comprise \$6,000 on the lateral distribution system; \$94,000 on the construction of the Hondo canal; and \$10,000 on the operation and maintenance of the system.

New Mexico-Texas.

The expenditures to be made on the Rio Grande project proper are \$941,529, while on the Elephant Butte storage works the amount is \$2,741,000.

Rio Grande.—The items approved comprise \$586,500 on the construction of the Mesilla Valley canal system; \$21,000 on the El Paso Valley system; \$50,000 on river control; \$50,000 for drainage, and \$25,000 for the operation and maintenance of the present works to irrigate the lands in cultivation under the Franklin Canal and in the Leansburg Unit.

Elephant Butte Storage.—The expenditure to be made in connection with the storage works are \$12,000 for wagon roads; \$299,400 on excavation for the dam; \$1,870,000 on masonry for the dam; \$283,000 for gates and sluiceways; \$5,000 on spillway construction; \$178,000 on the embankment; and \$56,700 for camp and plant buildings.

Oregon.

The expenditures proposed to be made on the Umatilla project during the year are \$572,000; on the Klamath project, \$175,219; on the Oregon Cooperative Work, \$472,917 for construction work in co-operation with the state under an agreement dated May 3, 1913; and on Columbia River Cooperative work in Oregon, \$12,000.

Umatilla.—The expenditures planned are \$5,000 on the storage works; \$30,000 in extending the distributing system; \$5,000 for additional buildings and real estate; \$500,000 on the construction of the West extension.

Klamath.—The proposed expendi-

tures comprise \$7,000 for extending the distributing system and approximately \$101,000 on the construction of additional drainage works.

Utah.

Strawberry Valley.—The plans for this project are indefinite, owing to the fact that no satisfactory arrangement has as yet been made with the Water Users' Association regarding additional construction. Tentative expenditures have been approved for the purpose of having funds available providing a satisfactory agreement is reached. The proposed expenditures comprise \$30,000 for power plant operation and maintenance; \$322,747 on the construction of the Highline Canal; \$4,893 on Spanish Forks canals; \$180,000 on a distributing system from the Highline Canal; \$105,000 on the Goshen lateral distributing system. The total tentative expenditures aggregate \$636,000.

Washington.

The proposed expenditures to be made in this state during the calendar year are \$149,000 on the Okanogan project; \$608,600 on the Storage Unit of the Yakima project; \$658,000 on the Sunnyside Unit, and \$114,000 on the Tieton Unit.

Okanogan.—The estimated expenditures are \$133,000 on extending the distributing system, which will include the continuation of concrete lining of the present canals and pumping plant; and in addition \$16,000 for operation and maintenance of the system for the irrigation of the lands under cultivation.

Yakima Storage.—The proposed expenditures are \$14,160 on the main Kachess Reservoir; \$450,000 on the Keechelus Reservoir; \$20,000 on the Cleelum Reservoir; \$10,000 on investigations of McAllister Meadow; \$11,400 for continuing hydrographic investigations; and \$1,500 for the operation and maintenance of the Kachess Dam.

Yakima-Sunnyside.—The proposed expenditures are \$114,160 on the main canal and headworks; \$2,700 on the Snipes Mountain Division; \$8,000 on Sulphur Creek wasteway; \$200 on Mahon Division; \$15,000 on the distributing system; \$100,000 on pumping plants on the distributing system; and \$190,000 for pumping plant machinery, together with \$246,000 for the Benton extension. The construction of the last three items are contingent on the water users meeting the conditions required by the secretary.

Yakima-Tieton.—The items of expenditure comprise \$1,050 for investigation of the Tieton Canal; \$1,745 on the distributing system; \$49,200 on auxiliary storage, which provides for the construction of a regulating reservoir at the headwaters of the Tieton River; \$15,000 in connection with Bumping Lake Reservoir.

Wyoming.

Shoshone.—The estimated expenditures are approximately \$593,400, comprising \$362,508 on the Shoshone River Storage; \$80,891 on the Garland Canal and laterals; \$101,860 on drainage, and \$48,140 on operation and maintenance.

Miscellaneous.

In addition to the expenditures that can be directly applied to the various states it is planned to expend \$50,000 for exploration of the Colorado River Basin to determine questions of water storage and diversion sites, and \$50,000 on artesian well experiments.

Pearl Harbor Dry Dock.

Te naval appropriation bill, as reported from committee, increases the limit of cost of the dry dock at Pearl Harbor by \$1,500,000, in accordance with the recommendations of the Secretary of the Navy and as a result of the negotiations which have been conducted during the past month or two with the contractors for this work. It looked at one time as if the contractors would refuse to continue and that the government would be obliged to take up the project. After much discussion there has been an agreement among all those concerned as to the best method to pursue. At a conference at the Navy Department between Mr. Alfred Noble, the consulting civil engineer referred to the chief of the bureau of yards and docks (Civil Engineer Stanford), and Civil Engineer F. R. Harris all expressed the opinion that the construction of this dry dock under the present plans and specifications was not only fraught with the greatest hazard and probable delay in eventual completion, if completed at all, but was inadvisable as an engineering work and was not based on satisfactory assurance and factors of safety which are usually required in good engineering practice. In short, that it was impracticable. These three engineers agreed that a different design, depending upon the use of floating caissons or boats gave every assurance of the successful and early completion of this work, but that it would involve an increase in the authorization for this work of approximately, but not over, \$1,500,000. The contract obligation for the dry dock now stands at \$3,168,461.61, of which the sum of \$1,036,330.01 has been paid the contractor on monthly vouchers on account of work done. There are sufficient funds remaining under the appropriation to defray the cost of proceeding with this dry dock on the new plans indicated during the next fiscal year, but to enable the department to enter into an agreement with the contractors to proceed on the new plans it would be necessary to increase the limit of authorized cost for this structure. Civil Engineers L. M. Cox and F. R. Harris have been placed in charge of the work of design and readjustment in Washington and are engaged on this duty.

-HALLS & SOCIETY BLDGS-

OAKLAND, CAL.—Lodge hall, and stores, 5 story and base. Class C construction, \$200,000. Architect, Albert J. Mazurette, Albany Bldg., Oakland. Owners, Oakland Moose Hall Association. The exact location of the building has not been made public although it has been selected. The owners will occupy about three floors of the building, the first floor being designed for stores. Two of the upper floors will be arranged for offices or living apartments for the members, depending on the number of reservations that can be secured by the time construction work will be started. Full particulars will be given later.

OAKLAND, CAL.—Municipal auditorium, 3 story and base. Class A construction, \$1,000,000. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids

are now being taken for two alternate propositions. Proposition A for granite facing, Proposition B for limestone facing. These bids are to be opened on April 13th. On the same date bids will be opened for the architectural terra cotta work on the municipal auditorium. Plans and specifications together with full particulars can be secured from Architect J. J. Donovan, Security Bank Bldg. An official proposal appears in another column of this issue.

PORT ANGELES, WASH.—Lodge hall and stores, 3 story and base, brick and steel, \$35,000. Architect, Francis W. Grant, Globe Block, Seattle. Owners, Naval Lodge B. P. O. E. The building will be erected on a corner site, covering an area of 80 by 100 feet. The first floor will contain a number of stores. Upper two floors will be arranged for the lodge rooms, library, smoking rooms, offices and banquet room. Interior will be finished in pine and hardwood. Plans provide for steam heat and a hot water supply. There will be a large stone fire place. Exterior of the building will be faced with pressed brick. Working drawings are nearly complete and figures will be called for as soon as these drawings are finished.

LOS ANGELES, CAL.—Lodge hall, 3 story and base, brick and steel. Cost not stated. Architect, J. T. Zeller, Currier Bldg., L. A. Owners, Lyran Swedish Lodge Association. The building will be erected at the corner of 18th and Flower streets, covering an area of 52 by 134 feet. There will be stores on the first floor and upper floors will be arranged for the offices of the association and lodge rooms. Interior finish will be of pine and hardwood. A maple floor will be used in the ball room. Plans provide for steam heat, a hot water supply and vacuum heating. Metal window sash and frames will be used. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

HOSPITALS

OAKLAND, CAL.—Hospital group, 1 and 4 story and base. Class A construction, \$1,500,000. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. The Alameda County Supervisors, acting with Architect Charles Peter Weeks, have appointed the staff of experts who will supervise the construction of the new Alameda County Hospital buildings. The list of appointees include the following: R. W. Myers, Oakland, electrical engineer; J. E. Davies, Berkeley, structural engineer, and R. A. Hudson, Berkeley, heating, ventilating and plumbing.

STOCKTON, CAL.—Hospital elevator work. Cost not stated. Architect, State Department of Engineering, Sacramento. Owners, State of California. Bids will be opened on April 21st by the State Board of Control for the installation of a passenger elevator in the Female building at the Stockton State Hospital. Plans and specifications together with complete particulars can be secured from the State Department of Engineering, Sacramento. An official proposal appears in another column of this issue.

HOTELS.

SAN FRANCISCO—Hotel, 7 story and base, brick and steel, \$80,000. Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Trowbridge & Perkins. The building will be erected at the southeast corner of Post and Shannon streets, covering an area of 67½ feet by 85½ feet. Interior will be arranged for a large number of single rooms, all of which will have private baths. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwood. Entrance will be finished in marble and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and segregated figures are now being taken.

SAN FRANCISCO—Hotel, 4 story and base, reinforced concrete, \$24,000. Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. Mary P. Proback. The building will be erected at the corner of Pine and Powell streets, covering an area of 40 by 60 feet. There will be a total of 60 rooms, all of which will have private baths. Interior finish will be of pine and redwood with some elm panels. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are under advisement. Contracts will be let shortly.

PENDLETON, ORE.—Hotel addition and alterations, 3 story and base, brick. Cost not stated. Architects, Tourtelotte & Hummel, Rothchild Bldg., Portland. Owners, Pendleton Hotel Co. The present three-story brick apartment house will be altered into a modern hotel and two additional stories will be added, giving the building a total of 100 guest rooms and a number of public and private baths. Plans include steam heat and a passenger elevator. Considerable exterior work is also included and the entire building will be faced with cement plaster. Plans are complete and figures are being taken.

PANAMA - PACIFIC EXPOSITION WORK.

SAN FRANCISCO—State Exhibit building, frame and plaster construction. Cost not stated. Architects, Smith & Layton, Oklahoma City. Owners, State of Oklahoma. The above named firm of architects has just been commissioned to prepare plans for the Oklahoma State Building to be erected at the Panama-Pacific International Exposition. The amount of money available has not been made known. Jessie J. Dunn, of the firm of Dunn, Alked & Dunn of Oakland, is the Commissioner for Oklahoma. Bids will be called for on this work as soon as plans can be completed.

POST OFFICES.

HILO, T. H.—Post office, 3 story and base, brick and concrete, \$200,000. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. A report

from Washington, D. C., states that all figures received recently for the construction of the Federal Building at Hilo, T. H., have been rejected. The plans will be revised and new figures will be taken at once. The Campbell Building Co. of Salt Lake City submitted the lowest figure at approximately \$196,000. Only \$200,000 is available to complete the building.

Contracts Awarded.

SAN FRANCISCO—Railroad construction, \$219,754. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Mahoney Bros., Merchants' National Bank Bldg., S. F. Contract price, \$219,754. This contract covers the construction of the Van Ness and Chestnut street line.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Shop equipment, Municipal lines. Cost not stated. Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids are now being called for the shop equipment for the Municipal Railroads. Plans can be secured from the City Engineer. Bids will be opened by the Board of Public Works on April 1st. An official proposal appears in another column of this issue.

SAN FRANCISCO—Car barns, 1 story and base, reinforced concrete. Cost not stated. Architect, City Department of Architecture, Temporary City Hall, Owners, City and County of San Francisco. Contractor, James McLaughlin, 244 Kearny street, has signed a contract with the city for the construction of the new car barns. He is now in the market for the following sub-figures: Electrical wiring, sheet metal work, tar and gravel roofing, ornamental iron, glass and glazing and reinforcing steel.

SAN FRANCISCO—Railroad stations, yards and freight shed, reinforced concrete and frame, \$1,000,000. Architect, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Railroad Co. All matters under consideration with the Board of Supervisors pertaining to the Third and Townsend street depot have been settled and the company has announced that construction will be started at once. The main passenger station will be of reinforced concrete. A large amount of yard trackage and new freight sheds will be constructed. Bids will be called for within a week or ten days.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owners, Oscar Heyman & Bro., 742 Market street, S. F. The dwelling designed for a six-room house, will be erected on 23rd avenue near Irving street. Interior finish will be of pine and redwood. Some hardwood floors will be used. Plans provide for a large open fire place in the living room with a tile mantle. Bath room will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with rustic and cement plaster on metal

lath. Plans are complete and all work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,500. Architect, none. Owner, Mrs. F. Oliver, 1732 Fell street, S. F. The dwelling will be erected on 27th avenue, and has been designed to contain six rooms and bath. Pine and redwood finish and some oak floors are specified. There will be a large open fire place in the living room. Mantel will be of tile or brick. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Residences, 2, 2 story and base, frame, \$2,500 each. Architect, none. Owner, F. Nelson, 30 Presidio Terrace, S. F. These two houses will be erected on the west side of 15th avenue near California, and each has been designed to contain six rooms and bath. Interiors will be finished in pine and redwood with some elm panels in the living rooms. Hardwood floors will be used in the principal rooms. There will be large open fire places and tile or brick mantels. Bath rooms and kitchens will have tile wainscot. Automatic water heaters will be installed. Exterior will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, Alfred Swanson, Burlingame. The dwelling has been designed to contain five rooms and bath. All interior finish will be of pine or redwood. Hardwood floors will be used in the living and dining rooms. There will be an open fire place and tile mantle. An automatic water heater will be installed. Exterior of the house will be covered with rustic. Plans are in the hands of the owner and work will be done by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,500. Architect, W. L. Schmolle, 160 Geary street, S. F. Owners, Whittell Estate. The house has been designed to contain seven rooms, bath and private garage. Interior finish will be of pine and some hardwood veneer. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, A. R. Lapham, 1853 McAllister street, S. F. The house has been designed to contain six rooms and bath and will be erected on 12th avenue near Anza street. Interior finish will be of pine and redwood with hardwood floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have composition floor and tile wainscot. An automatic water heater will be installed.

Exterior of the dwelling will be covered with cement plaster on metal lath and rustic. A brick veneer base will also be used. Plans are complete and in the hands of the owner who will do the work by Day Labor.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, E. B. Pockman, 37th and Geary streets, S. F. This is one of a large number of houses to be erected in the vicinity of 21st avenue and Lake street, and will contain seven rooms, bath and a private garage. All interior finish will be of pine and redwood. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner and work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$8,000. Architect, Albert J. Mazurette, Albany Bldg., Oakland. Owner, P. Lindeblad. The dwelling will be erected on Crofton avenue and has been designed for an eight-room house with bath, sleeping porch and private garage. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be specified. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be carried on by Day Labor.

OAKLAND, CAL.—Residence, 1 story and base, frame, \$2,000. Architect, none. Owner, H. C. Pfang, 5359 Shafter avenue, Oakland. The dwelling has been designed for a six-room house and will be erected on 63rd street east of Telegraph avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Tile wainscot and composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Olin S. Grove, 2911 Telegraph Avenue, Berkeley. Owner, Frederick Townsend. The dwelling will be erected in Northbrae and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame. Cost not stated. Architect, John Hud-

san Thomas, First National Bank Bldg., Berkeley. Owner, E. L. Peters. These houses will each contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of both houses will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LIVERMORE, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, Claude B. Barton. Security Bank Bldg., Oakland. Owner's name withheld. The dwelling has been designed for an eight-room house with bath and sleeping porch. Pine and redwood will be used in the interior finish. Hardwood floors and beam ceilings are specified. There will be a large open fire place in the living room with tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,000. Architect, Claude B. Barton. Security Bank Bldg., Oakland. Owner, E. L. Reed. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior finish will be largely of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

SAN JOSE, SANTA CLARA CO., CAL.—Bungalow, 1 story and base, frame, \$2,000. Architect, none. Owner, A. M. Elliott, 539 South Orchard street, San Jose. The dwelling has been designed for a six-room house with bath. Interior finish will be of tile and redwood. Some oak floors will be used. There will be an open fire place in the living room. Mantel will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are complete and work will be done by Day Labor.

SAN FRANCISCO—Residence, 1½ story and base, frame. Cost not stated. Architect, Henry Shermund, Mills Bldg., S. F. Owner, A. F. Korohl. The dwelling has been designed for a six-room house and will be erected at a corner in the Crocker Amazon Tract. The house will set back some distance from the sidewalk raised on a terrace. Interior finish will be of pine throughout. Hardwood floors will be used in the living room and dining room. There will be two open fire places and tile or brick mantels. Bath room will have tile wainscot and a composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SACRAMENTO, CAL.—Residences, 1 and 2 story, frame. Cost not stated. Architect, none. The following Day Labor jobs are reported as about to be started in Sacramento: Mrs. A. M. Daly, 3220 Magnolia avenue, five-room dwelling, \$2,000; H. Enkowi, 1230 M street, 2 story, brick addition, \$2,000; S. O. Mackey, 1022 34th street, four-room frame dwelling, \$1,600; E. A. Pierce, 214 Forum Bldg., six-room house, \$2,000; Sacramento Home Builders, Forum Bldg., five-room house, \$2,000; H. Uhl, Uhl Court, one five-room house and one seven-room house, \$3,500; Henry C. Ingham, 1500 O street, four-room frame cottage, \$600; R. E. Stubbe, 3712 Palm street, five-room house, \$2,500, and O. H. Moore, 2903 35th street, six-room house, \$2,000. All materials are now being purchased.

LAKEPORT, LAKE CO., CAL.—Residence, 2 story and base, frame, \$10,000. Architect, John J. Foley, 46 Kearny street, S. F. Owners, Franciscan Earthers. The dwelling will be erected adjoining the new church, and will be used as a parish house. The building will contain fourteen living rooms, tailor shop and parochial hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. Interior finish will be of pine with some hardwood. Two baths are to be included. Automatic water heater is specified. Bath rooms will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

TURLOCK, Stanislaus Co., Cal.—Residence, 2 story and base, frame, \$8,500. Architect, A. V. Scheppelman, Turlock. Owner, J. E. Weaver. The dwelling has been designed for a nine-room dwelling and will be finished in pine and hardwoods. Oak floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Residence, 2 story and base, frame. Cost not stated. Architects, Eisen & Son, Wilcox Bldg., L. A. Owner, Anna M. Moore. The dwelling will be erected on Ardmore avenue and has been designed to contain 16 rooms, 3 baths and sleeping porch. Interior finish will be of mahogany, pine, redwood and white enamel. Hardwood floors will be used throughout. Plans provide for furnace heat, an automatic water heater and open fire places. Mantels will be of tile. All bath rooms will have tile wainscot and composition floors. Exterior of the dwelling will be covered with shingles. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Residence, 2 story, attic and base, frame and plaster, \$29,000. Architect, Frank T. Kerley, Consolidated Realty Bldg., L. A. Owner, Dr. C. T. Thomas. The dwelling will be erected in Brentwood Place and will contain 15 rooms, 3 baths, sleeping porches and a garage. Interior finish will be of pine, redwood and white enamel. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile. Bath

rooms will have tile floors and wainscot. Exterior of the dwelling will be covered with cement plaster on metal lath and shingles. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

PORTLAND, ORE.—Residence, 2½ story and base, brick, \$15,000. Architect, Edward T. Root, Henry Bldg., Portland. Owner's name withheld. The dwelling will be erected in Portland Heights and has been designed to contain twelve rooms, three baths and sleeping porch. A garage will also be erected on the lot. Interior finish will be of pine and hardwood with hardwood and inlaid floors in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have tile wainscot and composition floors. An automatic water heater will be installed. Exterior of the house and garage will be faced with pressed brick. Plans are complete and figures are being taken.

Contracts Awarded.

LOS ANGELES, CAL.—Residence, 1½ story and base, hollow tile, \$40,000. Architects, Hunt & Burns, Laughlin Bldg., L. A. Owner, Gen. C. M. Spitzer. Contractor, C. J. Nordquist, 522 Patten street, L. A. Contract price, \$40,000.

SCHOOLS.

SAN FRANCISCO—School, 2 story and base, brick and concrete, \$130,000. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Oriental School, which is to be erected on the south side of Washington street, between Powell and Stockton streets, have been completed and turned over to the Board of Public Works for figures. Bids will be opened on April 1st. The building will be of the semi-fireproof type and will contain twelve class rooms, assembly hall, office and teachers' rooms. Interior will be finished in pine with maple floors. Plans provide for a modern system of steam heat, a vacuum cleaning system and slate blackboards. Special electric work and program clocks are called for. Exterior of the building will be faced with cement plaster and pressed brick. An official proposal appears in another column of this issue.

SAN FRANCISCO—Mission school, 3 story and base, Class C construction. Cost not stated. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions of Indianapolis. The building has been designed in the Chinese style and will be erected on a lot 58 by 80 feet on the west side of Stockton street between Sacramento and Clay streets. There will be a large auditorium, banquet room, class rooms and offices. Interior will be finished in pine throughout. Plans provide for steam heat and hot water system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SAN FRANCISCO—School, 2 story and base, brick and concrete. Cost not stated. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Cooper School have been completed and have received the approval of the Board of Education. The building will be erected at the corner of Jones and Lombard streets and will

contain fourteen class rooms, assembly hall, principals' office and teachers' rooms. There will be steam heat, a vacuum cleaning system, program clocks and bells. Construction will be of the semi-fireproof type. Interior finish will be of pine throughout with maple floors in the class rooms. Exterior of the building will be faced with pressed brick. Plans will go out for figures this week.

FRESNO, FRESNO CO., CAL.—Schools, 6, 1 and 2 story, brick or reinforced concrete, \$480,000. Architect, W. D. Coates, of the firm of Coates & Traver, Addison-Head Bldg., S. F., has been selected to act as supervising architect for the new Fresno schools. Mr. Coates was formerly State Architect. Architects from Fresno and elsewhere will submit plans for the new buildings.

CORCORAN, KINGS CO., CAL.—School, 2 story and base, brick, \$40,000. Architect, J. Carl Thayer, Forsyth Bldg., Fresno, Owners, Corcoran Union High School District. This building was mentioned here when Mr. Thayer was first commissioned to prepare the plans. Bids have been taken and were opened by the Board of Education on Tuesday night. A complete list of the figures will appear in the next issue of the Building and Industrial News.

SACRAMENTO, CAL.—School, 2 story and base, reinforced concrete, \$193,000. Architects, Shea & Lofquist, Bankers' Investment Bldg., S. F. Owners, City of Sacramento. All bids for the construction of the new school building at Sacramento have been rejected as above the appropriation. Plans will be revised, cutting the height of the building by two feet and making some changes in the type of floor construction, which, it is believed will bring the building cost to within \$193,000. Revised plans will be out for figures very shortly. Further mention will be made of the work.

STOCKTON, SAN JOAQUIN CO., CAL.—School, 2 story and base, brick, \$75,000. Architects, Stone & Wright, 24 South California street, Stockton, Owners, City of Stockton. This building, known as the East Side School, has been out for figures before Plans were not revised as the Board of Education believed that collusion existed among the three firms bidding. The building will contain twelve class rooms, assembly hall and office. Interior will be finished in pine throughout with hardwood floors in the class rooms. There will be steam heat, oil burning furnace and vacuum cleaning system. Exterior of the building will be faced with pressed brick. Bids will be opened on March 31st. Plans can be secured from the architects.

STOCKTON, SAN JOAQUIN CO., CAL.—School, 3 story and base. Class C construction. Cost not stated. Architects, Stone & Wright, 24 South California street, Stockton. Owners, St. Agnes Academy. The building will be erected at the corner of Park and San Joaquin streets and will cover a considerable area. There will be a number of class rooms, living apartments and dormitories. Plans provide for steam heat and hot water supply. Interior finish will be of pine throughout. Some maple floors will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed

brick. Plans are complete and segregated figures are being taken. Father McGough is in charge of the work.

ORANGE, ORANGE CO., CAL.—School, 1 story and base, brick, \$50,000. Architect, J. Flood Walker, 305 East 4th street, Santa Ana. Owners, Orange School District. The building will be erected on a site recently purchased and has been designed to contain eight standard size class rooms and an assembly hall. Interior finish will be of pine throughout with maple floors in the class rooms. There will be steam heat and vacuum cleaning. Program clocks will probably be installed. The exterior of the building will be faced with pressed brick. Plans are now being prepared.

RIVERSIDE, RIVERSIDE CO., CAL.—School, 2 story and base, brick, \$50,000. Architect, G. Stanley Wilson, Virginia Block, Riverside. Owners, Riverside School District. A new grammar school will be erected in the New Magnolia avenue district, and a kindergarten building will be erected for the Casa Blanca District. Interior of the grammar school will be finished in pine. There will be a central heating system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

Contracts Awarded.

SANGER, FRESNO CO., CAL.—School, 2 story and base, brick, \$43,000. Architects, Swartz, Hitchkin & Swartz, Rowell Bldg., Fresno. Owners, Sanger Union High School District. Contractors, Trehwitt & Shields, Fresno, general construction. Contract price, \$37,700. Visalla Plumbing Co., heating and ventilating, \$4,500.

SEWERS, STREET WORK AND WATER SYSTEMS.

CALIFORNIA—Highway construction. Cost not stated. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans are complete and figures are now being called for the construction of Portland cement and concrete highways together with some asphalt work in the following counties: Solano, Alameda (two pieces), Kern and Ventura. Plans and specifications can be had at the offices of the State Highway Commission. An official proposal appears in another column of this issue.

ORLAND, GLENN CO., CAL.—Reclamation work. Cost not stated. Engineer, United States Reclamation Service, Orland. Owners, United States Government. Sealed proposals will be received at the office of the United States Reclamation Service, Orland, California, until 2 o'clock p. m. April 21, 1914, for building the structures of the East Park Feed Canal in Colusa County, California, near Stonyford, and about 23 miles from Sites, terminus of the Colusa and Lake Railroad. The work involves about 6,000 cubic yards of excavation, 4,000 cubic yards of concrete, the placing of about 49,500 pounds of reinforcing steel and 14,150 pounds of metal work and gate fixtures, and the placing in structures of about 34,500 feet B. M. of lumber. For particulars address the United States Reclamation Service, Washington, D. C., Portland, Ore., or Orland, Cal. F. H. Newell, Director.

STORES.

SAN FRANCISCO—Stores and offices, 3 story and base. Class A construction, \$300,000. Architect, Lewis. Hobart, Crocker Bldg., S. F. Owners, Firemen's Fund Insurance Co. This building, which has been mentioned here before, will be erected at the southwest corner of Sansome and California streets, covering a considerable ground area. The entire first floor and mezzanine will be occupied by the owners. Upper floors will be arranged for modern offices. Interior will be handsomely finished in pine, metal and hardwood. Corridors will have marble wainscot and tile floors. There will be a complete steel frame. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick, granite and terra cotta. Plans are complete and figures are being taken.

SAN FRANCISCO—Cafe ventilating system. Cost not stated. Architect, Joseph T. Carter, Balboa Bldg., S. F. Owners, Hoffman Cafe. Plans are being prepared for a new system of ventilating which will be installed in the Hoffman Cafe on lower Market street. A blower system will be specified. Bids will be called for shortly.

SAN FRANCISCO—Lofts, 3 story and base, brick and steel. Cost not stated. Architect, none. Owner, Edward F. Franks, 98 Fillmore street, S. F. The building will be erected on the north side of California street west of Kearny. There will be stores on the first floor and lofts above. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the owner will take figures for the various parts of the work.

BERKELEY, ALAMEDA CO., CAL.—Office, 1 story, frame, \$3,500. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owners, Byron Jackson Iron Works. The building will be erected at the foot of Carlton street, and has been designed as an office for the company's plant. Interior will be finished in pine. There will be modern plumbing and electric work. Exterior will be covered with galvanized iron. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Lofts, 5 story and base. Class A construction. Cost not stated. Architects, Traln & Williams, Exchange Bldg., L. A. Owner, J. F. Hosfield. The building will be erected on property adjoining the City Hall on Broadway between 3rd and 4th streets, and will be used as a City Hall Annex. The building will be of the Class A type of construction and will cover an area of 60 by 160 feet. There will be a complete steel frame, reinforced concrete walls and floors. Interior will be finished in pine and hardwood with some metal trim and metal window sash and frames. There will be steam heat, elevator service and a vacuum cleaning system. Exterior of the building will be faced with cement plaster. Plans are complete and figures are being taken.

LOS ANGELES, CAL.—Offices, 12 story and base. Class A construction, \$1,000,000. Architects, Parkinson &

Bergstrom, Security Bldg., L. A. Owners, Commercial Fireproof Building Co. The building will be erected at the northeast corner of Spring and 5th streets. The entire first floor will be occupied by one of the largest banking institutions of Los Angeles. Upper floors will contain a total of 462 offices. There will be a complete steel frame, brick curtain walls, concrete floors and roof slabs. Interior will be finished in hardwood and metal trim. There will be five passenger elevators, mail chutes, steam heat, vacuum cleaning system and sidewalk doors and lights. Exterior of the building will be faced with terra cotta. Plans are complete and figures will be taken at once.

LOS ANGELES, CAL.—Stores and offices, 12 story and base, reinforced concrete, \$350,000. Architect, George W. Eldridge, Marsh-Strong Bldg., L. A. Owners, Spring Street Investment Co. The building will be erected on Spring street between 6th and 7th streets, covering an area of 58 by 112 feet. There will be stores on the first floor and a total of 253 offices on the upper floors. Foundations, exterior walls, floors and roof will be of reinforced concrete. Interior will be finished in pine, hardwood and metal trim. The plans provide for steam heat, three elevators, vacuum cleaning, mail chutes and a hot water system. Metal window sash, hollow tile partitions and patent store fronts are specified. Exterior of the building will be faced with terra cotta. Plans are being prepared.

SANTA ANA, ORANGE CO., CAL.—Bank and offices, 5 story and base. Class A construction. Cost not stated. Architect, T. Beverley Kelm, Jr., Los Angeles Investment Bldg., L. A. Owners, Farmers' and Merchants' Bank of Santa Ana. The building will be erected on a corner site and will cover an area of 50 by 100 feet. The entire first floor will be occupied by the bank. Upper floors will be arranged for 11 offices to the floor. Interior finish will be of pine and hardwood. Ornamental plaster will be used in the banking rooms. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. Special bank fixtures and vaults will be specified. Exterior of the building will be faced with pressed brick. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Dance hall and stores, 2 story and base, brick, \$25,000. Architect, Henry H. Meyers, Kohi Bldg., S. F. Owner's name withheld. The building will be erected on Mission street between 16th and 17th streets. The first floor will be arranged for stores and upper floor for a dance hall. Interior finish will be of pine throughout. A maple floor will be used in the dance hall. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

Contracts Awarded.

STOCKTON, SAN JOAQUIN CO., CAL.—Bank and offices, 10 story and base, Class A construction. Cost not stated. Architects, Stone & Wright, Stockton, associated with L. B. Dutton. Chronicle Bldg., S. F. Owners, Commercial Savings Bank of Stockton.

Contractor, P. J. Walker, Monadnock Bldg., S. F. Note: This contract has been taken on the percentage basis.

The superintendent of the Santa Fe Indian School, Santa Fe, New Mexico, CATO SELLS, commissioner.

PROPOSALS FOR GRANITE OR LIMESTONE WORK.

PURSUANT to Resolution No. 7643 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for furnishing of all the materials, labor and workmanship required in connection with the construction, erecting and finish of A: Granite Work and Setting, or B: Limestone Work and Setting, for the Auditorium, located on Twelfth street, between Broadway and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and

furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes, endorsed "Bid for Auditorium," addressed to the Council and deposited by the bidder or his agent, with said Council while in session, between 11 o'clock a. m. and 12 o'clock, noon, on the first day of the day of April, 1914, in the room of the Council in the City Hall, 14th and Washington streets, Oakland, and at the expiration of 10 o'clock a. m. the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

The Contract for the furnishing of all the labor and materials entering into the construction of the Auditorium, or B: Limestone Work and Setting, all as indicated on the Plans and Specifications, is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner or architect, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor, to the entire satisfaction of the Commissioner of Public Works and the Council, on or before seventy-five (75) working days from and after the beginning of the work.

After the award and upon the execution of the agreement, the contractor shall at that same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in and equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time, and in equal amount, a bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in and equal to equal fifty per centum (50%) of the amount named in said agreement.

The bond set of the forms of proposal, and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished contractors and deposited with the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The plans and drawings may be obtained at said office of the Supervising Architects after March 17th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five (\$25) which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition, on complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite the specifications and drawings will be given by the Supervising Architect upon application at his office.

The right is reserved by the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City Clerk.

PROPOSALS FOR ARCHITECTURAL

TERRA COTTA WORK.

PURSUANT to Resolution No. 7643 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for furnishing of all the labor, materials and workmanship required in connection with the construction, erection and finish of the Architectural

Terra Cotta and Setting for the Auditorium, located on Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bids for Auditorium" addressed to the Council and deposited by the bidder, or his agent, with said Council, while in session, between 11 o'clock p. m. and 2 o'clock p. m. on the 13th day of April, 1914, in the room of the Council in the City Hall, 14th and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

Said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications preliminary thereto, on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

The Contractor for the furnishing of all the labor and materials entering into the construction, and the completion of the Architectural Terra Cotta and Setting, all as indicated on the Plans and Drawings and as called for by the specifications is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner or architect, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council, before one hundred (100) working days from and after the beginning of the work.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond, payable to the City of Oakland, in the sum of Twenty-five percent of the amount named in the contract, and in an amount equal to twenty-five percent of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bound set of the forms of proposals and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished contractors on demand at the office of the Supervising Architect of the City of Oakland, Stanley Bank Building, corner of 11th and Broadway. The plans and drawings may be had at the said office of the Supervising Architect after March 17th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five (\$25.00) which deposit shall be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings and one complete set of specifications will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction. Additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding and all directions necessary to explain and make definite any of the provisions of the specifications or drawings furnished by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder, as required by Section 125 of the Charter.

FRANK M. SMITH, City Clerk.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Patterson Union High

School, Patterson, Stanislaus County, California, on the 11th day of April, 1914, up to 2 o'clock p. m. of the said day, for the purpose of procuring material to construct a new Union High School Building in said District, on the site provided for same, on the west line of 7th street, bounded on the north by H street and on the south by J street.

Plans and specifications for the said proposed new Union High School Building are on file in the office of Dr. A. M. Field, Clerk of the above Board, in the City of Patterson, California, in the office of Henry C. Smith, authorized architect, 785 Market street, San Francisco, California, where copies of same may be obtained by bidders on deposit of the sum of Twenty-five Dollars (\$25.00). Reference is hereby made to such plans and specifications for mode of bidding. Blank forms for bidding will be furnished by Clerk or architect upon application.

Each bid must be accompanied by a certified check or bidder's bond for ten per cent of the amount of the bid, said check or bond to be made payable to Dr. A. M. Field, Clerk of the Board of Trustees of the Patterson Union High School District. The Board reserves the right to reject any or all bids.

General bidders will be allowed to return the plans and specifications for six (6) consecutive days in which to prepare figures, but arrangements may be made by bidders to retain same until opening of bids, which amount will be deducted from the deposit made of \$25.00 when the plans and specifications are returned.

DR. A. M. FIELD, Clerk.
CAD ELLIS,
President of the Board of Trustees of the Patterson Union High School District, Patterson, Stanislaus Co., California.

NOTICE TO BIDDERS ON GRAMMAR SCHOOL BUILDING.

NOTICE is hereby given by the Board of Education of Stockton School District, that sealed bids will be received at the office of said Board in the Public School Building, Stockton, up to the hour of 8 p. m. on the 31st day of March, 1914, at which time bids will be publicly opened.

Plans for the furnishing of work, labor and materials to complete a certain school building for Stockton School District, according to plans and specifications which may be seen at the office of Stone & Wright, architects, 21 South California street, Stockton, California, during business hours. All bids must be accompanied by a certified check or certificate of deposit for not less than ten per cent of the amount bid, conditioned that the successful bidder shall enter into a contract in accordance with such bid, and file with said Board of Education a bond to be approved by them within ten days after the acceptance of his bid, which bond shall be conditioned for the faithful fulfillment of the contract specified in and on the said plans, for fifty per cent of the amount of the contract price for the work to be done thereunder.

Plans must be submitted upon forms obtained from the architects.

Contractors must make a deposit of \$25 with the architects when taking plans and specifications from the office. Dated March 10th, 1914.

By order of the Board of Education.
By ANSEL S. WILLIAMS, Sec'y.

PROPOSALS FOR BRICK WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of April, 1914, for doing the following work including the furnishing of the necessary labor and materials therefor, to wit: The brick work for the Oriental School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Pub-

lic Works, and completed within sixty (60) calendar days thereafter. The amount of bond for faithful performance of contract has been fixed at \$1,000.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

RICHARD J. CLINE, Secretary.

PROPOSALS FOR ELECTRIC WORK.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m. on Wednesday, the 1st day of April, 1914, for doing the following work including the furnishing of the necessary labor and materials therefor, to wit: The Electric Wiring for the Oriental School Building.

Progressive payments will be made. Said work must be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works, and completed within three hundred and thirty (330) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$250.00.

All proposals offered must be accompanied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposals.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works.

RICHARD J. CLINE, Secretary.

STATE OF CALIFORNIA. DEPARTMENT OF ENGINEERING.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 516 Forum Bldg., Sacramento, Cal., until the time hereinafter noted, at which time they will be opened. Proposals for the construction in accordance with the specifications therefor, to which special reference is made, portions of State Highways and as follows:

Unit 2 o'clock P. M., April 13, 1914

Solano County from Benicia to a point 2 1/2 miles south of Orinda H. S. about 3 miles in length, to be built of Portland cement concrete.

Alameda County from Hayward to Valhalla School (V-A-5-C), about 3.1 miles in length, to be built of Portland cement concrete.

Alameda County from Hayward to Oakland (O-A-D), about 5.1 miles in length, to be surfaced with asphaltic concrete.

Kern County from the northerly county boundary to Decatur (KT-K-D-P), about 12.4 miles in length, to be built of Portland cement concrete.

Ventura County from Sea Cliff to the western boundary (V-V-5-C, F & G), about 5.1 miles in length, to be built of Portland cement concrete.

Plans may be seen, and forms of proposals, contracts and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers in the divisions with which the work is situated. The Division Engineers' offices are

located at Whittier, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The Department of Engineering reserves the right to reject any all bids or to accept the bid deemed for the best interests of the State.

CHARLES H. BUCHHEIT, R. H. BUCHHEIT, NEWELL D. DARLINGTON, CHARLES F. STERN, California Highway Commission.

AUSTIN B. HITCHCOCK, Highway Engineer. WILSON R. ELLIS, Secretary. Dated: March 13, 1914. (4)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including **12 o'clock, Tuesday, April 21st, 1914**, said bids then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the construction and erection of the elevator work of the building known as the Federal Building, at the Stockton State Hospital, Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good order.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any or all of the foregoing.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope "Proposals for Elevator Work, Stockton State Hospital, Stockton, California."

(Signed) **W. F. McClure,** State Engineer. (4)

NOTICE TO CEMENT DEALERS.

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS. Union Depot and Ferry House, San Francisco, California, March 19, 1914.

SEALED PROPOSALS or bids will be received at this office at or prior to **11 o'clock A. M. on Thursday, April 2nd, 1914**, for furnishing Portland Cement for use on the waterfront of the City and County of San Francisco, in accordance with the specifications prepared therefor by the Assistant State Engineer of the Board and adopted by the Board, March 11, 1914, and on file in this office, to which special reference is hereby made.

The minimum amount of cement required for each contract is 100 barrels of the standard size and weight, same to be delivered f. o. b. cars, main line of Belt Railroad, San Francisco, during a period of twelve (12) months, and after date of execution of the contract. The cement shall be of the artificial Portland brand, capable of passing satisfactorily all of the tests set forth in specifications and must meet the approval of the Assistant State Engineer for the Board.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a cash deposit of \$500.00 for each contract, or \$5,000.00 dollars for each contract to be made payable to the order of the Secretary of the Board, conditioned that if the contract is not awarded, the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six days after the award is made, in that case said sum mentioned in said check shall be deemed liquidated

damages for such failure, and neglect and shall be paid into the San Francisco Harbor Improvement Fund.

The successful bidder to file a bond with two or more sureties in the sum of thirty thousand (\$30,000) dollars to be approved by the Board of State Harbor Commissioners, and conditioned for the faithful performance by the contractor of all the terms and conditions of said contract according to the true intent and meaning thereof and to the satisfaction of said Board; and said bond shall be effective as provided in an act approved May 1, 1911 for the protection of material men, mechanics and laborers.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary at the office of the Secretary at or prior to 11 o'clock A. M. on Thursday, April 2, 1914, at which time and place bids will be opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State.

Bidders are invited to be present at the opening of the bids.

Bidders are requested to mark envelope containing bid "Bid for furnishing Cement."

J. J. DWYER.

THOMAS S. WILLIAMS.

H. McCALLISTER, Board of State Harbor Commissioners.

JEROME NEWMAN.

Assistant State Engineer.

LEO V. W. MARR, JR., Secretary. (*)

PROPOSALS FOR SEWER WORK.

SEWER—Office of Quartermaster, Fort Yellowstone, Wyo.—Sealed proposals will be received at this office until 11 a. m. April 4, 1914, and then opened, for constructing an outfall sewer at this post. Further information may be obtained by applying at this office. W. B. McLAURIN, second lieutenant, 1st cavalry, quartermaster.

NOTICE TO BRIDGE BUILDERS.

NOTICE is hereby given that sealed bids will be received by the Board of Supervisors of the County of San Mateo, State of California, up to the hour of 10 o'clock a. m. on Monday, April 6, 1914, for constructing a reinforced concrete bridge on the West Union road across the Cordillera Creek near the Finkler residence, in the Second Road District, per plans and specifications prepared by the county surveyor and adopted by the Board of Supervisors on Monday, March 2, 1914, which said plans and specifications are now on file in the office of the clerk of said Board, where the same may be inspected.

All bids must be addressed to the

clerk of said Board of Supervisors at Redwood City, and each bid must be accompanied by a certified check on some reliable bank in a sum equal to at least 10 per cent of bid, made payable to the undersigned clerk of said Board of Supervisors, same to be forfeited to the county of San Mateo as liquidated damages in case the party to whom the contract shall be awarded shall fail, neglect, or refuse to execute and file, within ten days after the award of said contract, a bond to be approved by the chairman of the Board of Supervisors of said county in an amount not exceeding the contract price, or to enter into a written contract with said county in accordance with said plans and specifications, and the bid thereon.

All bids from contractors must specify the time for the completion of said work, also the cost of concrete in place, per cubic yard to be used in estimating the value of extra work, if required. The right is reserved to reject any and all bids.

JOS. H. NASH,
County Clerk.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Thursday, April 23rd, 1914, said bids when there to be publicly opened and read for furnishing all plant, materials and labor and doing the work required for the construction and erection of a building to be known as Ward 25, Stockton State Hospital, Stockton, California, in accordance with plans and specifications thereof, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Ward 25, at the Stockton State Hospital Stockton, California."

(Signed) W. F. McCLURE,
State Engineer. (*)

Firms desiring news from certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. Plans are complete and figures are now being taken by the Board of Public Works. Bids will be opened on April 5th. An official proposal appears in another column of this issue. Plans can be secured from the Department of Architecture.

FLATS—2 story and base, frame, \$5,000. San Francisco, Architect, none. Owner, A. Petry, 336 Pierce street, S.

F. The building will be erected on the west side of 11th avenue north of Fulton street, covering an area of 25 by 81 feet, and has been designed to contain two modern flats of five and six rooms. Interior finish will be of pine, redwood and some hardwood veneer. Oak floors will be used in the living room, dining room and reception hall. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic and cement plaster on metal lath. Plans are in the hands of the owner and the work will be done by Day Labor.

FLATS—3 story and base, frame, \$4,500. San Francisco, Architect, M. Mattanovich, David Hewes Bldg., S. F. Owner, Mrs. V. Kusish. The building will be erected on Pacific street west of Powell, and will contain two flats and a store. The structure will have a 20-foot frontage and a depth of 54 feet. Interior will be finished in pine and redwood. Open fire places and tile mantels are specified. Bath room will have tile wainscot and composition floor. Exterior of the building will be covered with rustic and shiplap. Plans are complete and work will be done by Day Labor. All materials are now being purchased.

FLATS—2 story and base, frame, \$4,000. San Francisco, Architect, none. Owner, V. Filippis, 866 Union street, S. F. The building will be erected at the southwest corner of Montgomery and Union streets, covering an area of 26 by 70 feet. Plans show two modern flats of five and six rooms. Interior finish will be of pine and redwood. Some oak floors will be used. Each living room will have a large open fire place with tile or brick mantel. Bath rooms will have composition floors and tile wainscot. Automatic water heaters are specified. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are being purchased.

GARAGE—1 story and base. Class A construction. Cost not stated. San Francisco, Architect, John A. Ettler, 604 Mission street, S. F. Owner, John V. Oppel. The building will be erected on the south side of Natoma street near Second, and will cover an area of 68 by 70 feet. There will be a steel frame, steel roof trusses and concrete walls and floors. Steel and foundations have been designed heavy enough to carry three additional stories. A completely equipped machine shop for automobile repairs will be installed. Exterior of the building will be covered with pressed brick. Plans are complete and figures are being taken.

HOTEL—1 story and base, brick and steel, \$80,000. San Francisco, Architect, Frederick H. Meyer, Bankers' Investment Bldg., S. F. Owners, Trowbridge & Perkins. The building will be erected at the southeast corner of Post and Shannon streets, covering an area of 67½ feet by 85½ feet. Interior will be arranged for a large number of single rooms, all of which will have private baths. Plans provide for steam heat, elevator service, vacuum cleaning system and hot water supply. Interior finish will be of pine and hardwood. Entrance will be finished

in marble and tile. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and segregated figures are now being taken.

HOTEL—4 story and base, reinforced concrete, \$24,000. San Francisco, Architect, J. C. Hladik, Monadnock Bldg., S. F. Owner, Mrs. Mary P. Prohack. The building will be erected at the corner of Pine and Powell streets, covering an area of 40 by 60 feet. There will be a total of 60 rooms, all of which will have private baths. Plans provide for steam heat, elevator service, a hot water supply and vacuum cleaning system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with cement plaster. Plans are complete and figures are under advisement. Contracts will be let shortly.

POST OFFICE—3 story and base, brick and concrete, \$200,000. Hilo, T. H. Architect, Supervising Architect Oscar Wenderoth, Washington, D. C. Owners, United States Government. A report from Washington, D. C., states that all figures received recently for the construction of the Federal Building at Hilo, T. H., have been rejected. The plans will be revised and new figures will be taken at once. The Campbell Building Co. of Salt Lake City submitted the lowest figure at approximately \$196,000. Only \$200,000 is available to complete the building.

SHOP EQUIPMENT—Municipal lines. Cost not stated. San Francisco, Engineer, City Engineer, Temporary City Hall, S. F. Owners, City and County of San Francisco. Bids are now being called for the shop equipment for the Municipal Railroads. Plans can be secured from the City Engineer. Bids will be opened by the Board of Public Works on April 1st. An official proposal appears in another column of this issue.

CAR BARN—1 story and base, reinforced concrete. Cost not stated. San Francisco, Architect, City Department of Architecture, Temporary City Hall. Owners, City and County of San Francisco. Contractor, James McLaughlin, 244 Kearny street, has signed a contract with the city for the construction of the new car barns. He is now in the market for the following subfigures: Electric wiring, sheet metal work, tar and gravel roofing, ornamental iron, glass and glazing and reinforcing steel.

RESIDENCE—1½ story and base, frame. Cost not stated. San Francisco, Architect, Henry Shermund, Mills Bldg., S. F. Owner, A. F. Kofahl. The dwelling has been designed for a six-room house and will be erected at a corner in the Crocker Amazon Tract. The house will set back some distance from the sidewalk raised on a terrace. Interior finish will be of pine throughout. Hardwood floors will be used in the living room and dining room. There will be two open fire places and tile or brick mantels. Bath room will have tile wainscot and a composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

MISSION SCHOOL—3 story and base, Class C construction. Cost not stated. San Francisco, Architect, Robert H

Or, Van Nuys Bldg., L. A. Owners, Christian Women's Board of Missions of Indianapolis. The building has been designed in the Chinese style and will be erected on a lot 58 by 80 feet on the west side of Stockton street between Sacramento and Clay streets. There will be a large auditorium, banquet room, class rooms and offices. Interior will be finished in pine throughout. Plans provide for steam heat and a hot water system. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SCHOOL—2 story and base, brick and concrete. Cost not stated. San Francisco. Architect, Houghton Sawyer, Shreve Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Cooper School have been completed and have received the approval of the Board of Education. The building will be erected at the corner of Jones and Lombard streets, and will contain fourteen class rooms, assembly hall, principal's office and teachers' rooms. There will be steam heat, a vacuum cleaning system, program clocks and bells. Construction will be of the semi-fireproof type. Interior finish will be of pine throughout with maple floors in the class rooms. Exterior of the building will be faced with pressed brick. Plans will go out for figures this week.

STORES AND OFFICES—3 story and base. Class A construction, \$300,000. San Francisco. Architect, Lewis P. Hobart, Crocker Bldg., S. F. Owners, Firemen's Fund Insurance Co. This building, which has been mentioned here before, will be erected at the southwest corner of Sansome and California streets, covering a considerable ground area. The entire first floor and mezzanine will be occupied by the owners. Upper floors will be arranged for modern offices. Interior will be handsomely finished in pine, metal and hardwood. Corridors will have marble wainscot and tile floors. There will be a complete steel frame. Plans provide for steam heat, elevator service, a vacuum cleaning system and mail chutes. There will be metal window sash and frames. Exterior of the building will be faced with pressed brick, granite and terra cotta. Plans are complete and figures are being taken.

CAFE VENTILATING SYSTEM—Cost not stated. San Francisco. Architect, Joseph T. Carter, Balboa Bldg., S. F. Owners, Hoffman Cafe. Plans are being prepared for a new system of ventilating which will be installed in the Hoffman Cafe on lower Market street. A blower system will be specified. Bids will be called for shortly.

LOFTS—3 story and base, brick and steel. Cost not stated. San Francisco. Architect, none. Owner, Edward F. Franks, 98 Fillmore street, S. F. The building will be erected on the north side of California street west of Kearny. There will be stores on the first floor and lofts above. Interior finish will be of pine throughout. Metal window sash and frames are specified. Exterior of the building will be faced with pressed brick. Plans are complete and the owner will take figures for the various parts of the work.

DANCE HALL AND STORES—2 story and base, brick, \$25,000. San Francisco. Architect, Henry H. Mey-

ers, Kohl Bldg., S. F. Owner's name withheld. The building will be erected on Mission street between 16th and 17th streets. The first floor will be arranged for stores and upper floor for a dance hall. Interior finish will be of pine throughout. A maple floor will be used in the dance hall. Patent store fronts and plate glass windows are specified. Exterior of the building will be faced with pressed brick. Plans are now being prepared.

APARTMENT HOUSE—3 story and base, brick and steel, \$80,000. San Francisco. Architects, Dunn & Kearns, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the south side of O'Farrell street between Larkin and Polk streets, and will have a frontage of 60 feet by a depth of 120 feet. There will be a total of 120 rooms arranged in suites of two and three rooms. Plans provide for steam heat, elevator service, hot water supply, vacuum cleaning and wall beds. All suites will have private baths. Interior finish will be of pine, redwood and hardwood. Bath rooms will have composition floors and tile wainscot. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken.

APARTMENT HOUSE ALTERATIONS—3 story, frame, \$7,500. San Francisco. Architect, Charles J. Roussseau, 46 Kearny street, S. F. Owner's name withheld. This work will consist of altering a three-story flat building into six modern four-room apartments. Steam heat, wall beds, plumbing, electric work, plastering, painting and millwork will be required. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SCHOOL—2 story and base, brick and concrete, \$130,000. San Francisco. Architect, Albert Pissis, Flood Bldg., S. F. Owners, City and County of San Francisco. Plans for the new Oriental School, which is to be erected on the south side of Washington street, between Powell and Stockton streets, have been completed and turned over to the Board of Public Works for figures. Bids will be opened on April 1st. The building will be of the semi-fireproof type and will contain twelve class rooms, assembly hall, office and teachers' rooms. Interior will be finished in pine with maple floors. Plans provide for a modern system of steam heat, a vacuum cleaning system and slate blackboards. Special electric work and program clocks are called for. Exterior of the building will be faced with cement plaster and pressed brick. An official proposal appears in another column of this issue.

RAILROAD STATIONS, YARDS AND FREIGHT SHED—Reinforced concrete and frame, \$1,000,000. San Francisco. Engineer, Engineering Department Southern Pacific Co., Flood Bldg., S. F. Owners, Southern Pacific Railroad Co. All matters under consideration with the Board of Supervisors pertaining to the Third and Townsend street depot have been settled and the company has announced that construction will be started at once. The main passenger station will be reinforced concrete. A large amount of yard trackage and

new freight sheds will be constructed. Bids will be called for within a week or ten days.

Contracts Awarded.

FERRY SLIP—Timber construction, \$110,600. San Francisco. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Contractors, Healy-Tibbitts Construction Co., S. F. Contract price, \$110,600. A complete list of all figures received for this work will be found under the heading of San Francisco in this issue.

RAILROAD CONSTRUCTION—\$219,754. San Francisco. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Contractors, Mahoney Bros., Merchants' National Bank Bldg., S. F. Contract price, \$219,754. This contract covers the construction of the Van Ness and Chestnut street line.

Builders' Exchange Holds Election.

Annual Election of Directors Results in Selection of Eleven Well Known Men For One Year.

The following were elected directors of the Builders' Exchange of San Francisco for the ensuing year:

E. J. Brandon,	R. A. Chisholm
C. W. Withington	R. J. H. Forbes
Fred Fischer	Chas. J. McDonnell
H. Maundrell	A. Mennie
Robert Dewar	J. D. McGilvray, Jr.
	James Young

The above named directors will meet the last Friday in this month to organize and elect officers. The Secretary's report showed the Exchange to be in a very prosperous condition, having \$3000 in local banks and a \$5000 equity in their building. Owing to the prosperous condition of the Exchange the monthly dues will be reduced beginning July 1st from three dollars to two dollars per month.

City Bids Opened.

Mahoney Bros. and R. C. Storrie Co. Both Very Close on Construction of Van Ness Avenue Line.

Four sets of figures were opened by the Board of Public Works on Wednesday afternoon for the construction of tracks for the Van Ness-Chestnut street Municipal Railroad. Mahoney Bros., Merchants' National Bank Bldg., appear to be low by from \$200 to \$700. R. C. Storrie & Co. were the next lowest bidders. The total of Mahoney Bros. bid is around \$219,200 while R. C. Storrie & Co.'s is around \$219,900. F. Rolandi and the Healy-Tibbitts Constr. Co. also submitted bids. Official action will be taken by the Board of Public Works at their next Friday afternoon meeting.

Only one bid, that of Bill & Jamison, was received for furnishing copper rail bonds for the Municipal Railroads.

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE — 2 story and base, frame, \$6,000. Oakland, Cal. Architect, Albert J. Mazurette, Albany Bldg., Oakland. Owner, P. Lindeblad. The dwelling will be erected on Crofton avenue, and has been designed for an eight-room house with bath, sleeping porch and private garage. Interior will be finished in pine and hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of brick and tile. Automatic water heaters will be specified. Bath rooms will have tile wainscot and composition floors. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared and when complete work will be carried on by Day Labor.

RESIDENCE — 1 story and base, frame, \$5,500. Oakland, Cal. Architect, none. Owner, H. C. Pfirang, 5359 Shafter avenue, Oakland. The dwelling has been designed for a six-room house, and will be erected on 63rd street east of Telegraph avenue. Interior finish will be largely of pine and redwood. Hardwood floors will be used in the living room and dining room. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. The wainscot and composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Olin S. Grove, 2911 Telegraph avenue, Berkeley. Owner, Frederick Townsend. The dwelling will be erected in Northbrae, and has been designed to contain seven rooms, bath and sleeping porch. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCES — 2, 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank

Bldg., Berkeley. Owner, E. L. Peters. These houses will each contain seven rooms and bath. Interiors will be finished in pine and redwood with some hardwood veneer. Hardwood floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of both houses will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE — 2 story and base, frame, \$4,000. Livermore, Alameda Co., Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner's name withheld. The dwelling has been designed for an eight-room house with bath and sleeping porch. Pine and redwood will be used in the interior finish. Hardwood floors and beam ceilings are specified. There will be a large open fire place in the living room with tile or brick mantel. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE — 2 story and base, frame, \$6,000. Piedmont, Alameda Co., Cal. Architect, Claude B. Barton, Security Bank Bldg., Oakland. Owner, E. L. Reed. The dwelling has been designed for a nine-room house with bath and sleeping porch. Interior finish will be largely of pine and redwood with some elm panels. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. Bath room and kitchen will have tile wainscot. Composition floor will be used in the bath room. Exterior of the house will be covered with cement plaster on metal lath. Plans are being prepared.

APARTMENT HOUSE — 3 story and base, frame, \$30,000. Oakland, Cal. Architect, Joseph Cahen, 45 Kearny street, S. F. Owner's name withheld. The building will be erected at the corner of Perkins and Grand streets, and will cover a large area. Interior will be arranged for a number of two, three and four room suites. Interior finish will be of pine and hardwood veneer. Some oak floors will be used. Plans provide for steam heat, a hot water system and portable vacuum cleaners. Bath rooms will have tile wainscot and composition floors. All suites will be equipped with wall beds. Entrance will be finished in marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

CHURCH ALTERATIONS — Cost not stated. Alameda, Alameda Co., Cal. Architect, John J. Foley, 46 Kearny street, S. F. Owners, St. Joseph's Church, Father Prout in charge. A new system of heating and ventilating, an indirect system of lighting and new light fixtures will be installed. Plans for this work will be ready for figures shortly.

LODGE HALL AND STORES — 5 story and base. Class C construction, \$260,000. Oakland, Cal. Architect, Albert J. Mazurette, Albany Bldg., Oak-

land. Owners, Oakland Moose Hall Association. The exact location of the building has not been made public although it has been selected. The owners will occupy about three floors of the building, the first floor being designed for stores. Two of the upper floors will be arranged for offices or living apartments for the members, depending on the number of reservations that can be secured by the time construction work will be started. Full particulars will be given later.

MUNICIPAL AUDITORIUM — 3 story and base. Class A construction, \$1,000,000. Oakland, Cal. Architect, John J. Donovan, Security Bank Bldg., Oakland. Owners, City of Oakland. Bids are now being taken for two alternate propositions. Proposition A for granite facing, Proposition B for limestone facing. These bids are to be opened on April 13th. On the same date bids will be opened for the architectural terra cotta work on the municipal auditorium. Plans and specifications together with full particulars can be secured from Architect J. J. Donovan, Security Bank Bldg. An official proposal appears in another column of this issue.

HOSPITAL GROUP — 1 and 4 story and base. Class A construction, \$1,500,000. Oakland, Cal. Architect, Charles Peter Weeks, Mutual Bank Bldg., S. F. Owners, Alameda County. The Alameda County Supervisors, acting with Architect Charles Peter Weeks, have appointed the staff of experts who will supervise the construction of the new Alameda County Hospital buildings. The list of appointees include the following: R. W. Myers, Oakland, electrical engineer; J. E. Davies, Berkeley, structural engineer, and R. A. Hudson, Berkeley, heating, ventilating and plumbing.

OFFICE — 1 story, frame, \$3,500. Berkeley, Alameda Co., Cal. Architect, James W. Plachek, Acheson Bldg., Berkeley. Owners, Byron Jackson Iron Works. The building will be erected at the foot of Carlton street and has been designed as an office for the company's plant. Interior will be finished in pine. There will be modern plumbing and electric work. Exterior will be covered with galvanized iron. Plans are complete and figures are being taken.

SACRAMENTO, STOCKTON & NORTHERN CALIFORNIA.

CHURCH—1 story and base, frame
 and plaster, \$10,000. Lakeport, Lake
 Co., Cal. Architect, John J. Foley, 46
 Kearny street, S. F. Owners, Fran-
 ciscan Fathers Church of Lakeport.
 Architect Foley has just been com-
 missioned to prepare plans for a new
 church, which will be designed in the
 Elizabethan style. The main audi-

torium will seat 400 people. Besides
 this room there will be Sunday school
 rooms and social hall. A hot air sys-
 tem of heating will be installed. In-
 terior will be finished in pine with
 ornamental plaster. Exterior of the
 building will be covered with cement
 plaster on metal lath. Working draw-
 ings are now being prepared.

HOSPITAL ELEVATOR WORK—
 Cost not stated. Stockton, Cal. Ar-
 chitect, State Department of Engineer-
 ing, Sacramento. Owners, State of
 California. Bids will be opened on
 April 21st by the State Board of Con-
 trol for the installation of a passen-
 ger elevator in the Female Building
 at the Stockton State Hospital. Plans
 and specifications together with com-
 plete particulars can be secured from
 the State Department of Engineering,
 Sacramento. An official proposal ap-
 pears in another column of this issue.

RESIDENCES—1 and 2 story, frame.
 Cost not stated. Sacramento, Cal.
 Architect, none. The following Day
 Labor jobs are reported as about to
 be started in Sacramento: Mrs. A. M.
 Daly, 3230 Magnolia avenue, five-room
 dwelling, \$2,000; H. Enkowi, 1230 M
 street, 2 story, brick addition, \$2,000;
 S. O. Mackey, 1022 34th street, four-
 room frame dwelling, \$1,600; E. A.
 Pierce, 214 Forum Bldg., six-room
 house, \$2,000. Sacramento Home Build-
 ers, Forum Bldg., five-room house, \$2,-
 000; H. Uhl, Uhl Court, one five-room
 house and one seven-room house, \$3,-
 500; Henry C. Ingham, 1500 O street,
 four-room frame cottage, \$660; R. E.
 Stubbe, 3712 Palm street, five-room
 house, \$2,500, and O. H. Moore, 2903
 35th street, six-room house, \$2,000. All
 materials are now being purchased.

RESIDENCE—2 story and base,
 frame, \$10,000. Lakeport, Lake Co.,
 Cal. Architect, John J. Foley, 46 Kear-
 ny street, S. F. Owners, Franciscan
 Fathers. The dwelling will be erected
 adjoining the new church and will
 be used as a parish house. The build-
 ing will contain fourteen living rooms,
 tailor shop and parochial hall. There
 will be furnace heat and open fire
 places. Mantels will be of tile or
 brick. Interior finish will be of pine
 with some hardwood. Two baths are
 to be included. An automatic water
 heater is specified. Bath rooms will
 have tile wainscot. Exterior of the
 house will be covered with cement
 plaster on metal lath. Plans are be-
 ing prepared.

SCHOOL—2 story and base, rein-
 forced concrete, \$193,000. Sacramento,
 Cal. Architects, Shea & Lofquist,
 Bankers' Investment Bldg., S. F. Own-
 ers, City of Sacramento. All bids for
 the construction of the new school
 building have been rejected as above
 the appropriation. Plans will be re-
 vised, cutting the height of the build-
 ing by two feet and making some
 changes in the type of floor construc-
 tion which, it is believed, will bring
 the building cost to within \$193,000.
 Revised plans will be out for figures
 very shortly. Further mention will be
 made of the work.

SCHOOL—2 story and base, brick,
 \$75,000. Stockton, San Joaquin Co.,
 Cal. Architects, Stone & Wright, 24
 South California street, Stockton. Own-
 ers, City of Stockton. This building,
 known as the East Side School, has

been out for figures before. Plans were not revised as the Board of Education believed that collusion existed among the three firms bidding. The building will contain twelve class rooms, assembly hall and office. Interior will be finished in pine throughout with hardwood floors in the class rooms. There will be steam heat, oil burning furnace and a vacuum cleaning system. Exterior of the building will be faced with pressed brick. Bids will be opened on March 31st. Plans can be secured from the architects.

SCHOOL—3 story and base. Class C construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, 24 South California street, Stockton. Owners, St. Agnes Academy. The building will be erected at the corner of Park and San Joaquin streets and will cover a considerable area. There will be a number of class rooms, living apartments and dormitories. Plans provide for steam heat and hot water supply. Interior finish will be of pine throughout. Some maple floors will be used. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and segregated figures are being taken. Father McGough is in charge of the work.

HIGHWAY CONSTRUCTION — Cost not stated. California. Engineer, State Highway Commission, Forum Bldg., Sacramento. Owners, State of California. Plans are complete and figures are now being called for the construction of Portland cement and concrete highways together with some asphalt work in the following counties: Solano, Alameda (two pieces), Kern and Ventura. Plans and specifications can be had at the offices of the State Highway Commission. An official proposal appears in another column of this issue.

RECLAMATION WORK — Cost not stated. Orland, Glenn Co., Cal. Engineer, United States Reclamation Service, Orland. Owners, United States Government. Sealed proposals will be received at the office of the United States Reclamation Service, Orland, Cal., until 2 o'clock p. m. April 21, 1914, for building the structures of the East Park Feed Canal in Colusa County, California, near Stonyford, and about 23 miles from Siles, the terminus of the Colusa and Lake Railroad. The work involves about 6,000 cubic yards of excavation, 4,000 cubic yards of concrete, the placing of about 49,300 pounds of reinforcing steel and 14,100 pounds of metal work and gate fixtures, and the placing in structures of about 30,500 feet, B. M., of lumber. For particulars address the United States Reclamation Service, Washington, D. C., Portland, Ore., or Orland, Cal. F. H. Newell, Director.

Contracts Awarded.

BANK AND OFFICES—10 story and base. Class A construction. Cost not stated. Stockton, San Joaquin Co., Cal. Architects, Stone & Wright, Stockton, associated with L. B. Dutton, Chronicle Bldg., S. F. Owners, Commercial Savings Bank of Stockton. Contractor, P. J. Walker, Monadnock Bldg., S. F. Note: This contract has been taken on the percentage basis.

PORTLAND AND OREGON.

BRIDGE—Steel or reinforced concrete. Cost not stated. Kinnaman, Ore. Engineer, County Surveyor, Tillamook. Owners, Tillamook County. Plans are complete and figures are being taken for a steel or reinforced concrete bridge to be constructed over the West Beaver Creek near Kinnaman. There will be one 50-foot span. Plans and specifications can be secured from the County Clerk, J. C. Holden, at Tillamook. Bids will be opened on March 27th.

HOTEL ADDITION AND ALTERATIONS—5 story and base, brick. Cost not stated. Pendleton, Ore. Architects, Tourtellotte & Hummel, Rothchild Bldg., Portland. Owners, Pendleton Hotel Co. The present three-story brick apartment house will be altered into a modern hotel and two additional stories will be added, giving the building a total of 100 guest rooms and a number of public and private baths. Plans include steam heat, passenger elevator and steam heat. Considerable exterior work is also included and the entire building will be faced with cement plaster. Plans are complete and figures are being taken.

BOTH THE OWNER and the Architect are particularly interested in all kinds of building materials, power and heating systems, building specialties, every accessory that goes into their project. Every issue of the Building and Industrial News contains hundreds of new building and construction reports giving the names and addresses of both the owner and the architects. Both the owner and architect receives a copy of the Building and Industrial News containing mention of their individual job conspicuously marked. Thus the builder and the architect have in their hands not only the news items of their particular project, but also the announcements and the advertisements of energetic business men who have goods to sell that are necessary to construct and equip the undertaking. **IS YOUR ADVERTISEMENT AMONG THESE?**

Catarrh Can Be Relieved

THERE IS NO NEED for you to continually suffer from Catarrh and Cold in the Head. It makes you miserable, doesn't it? You really don't care whether things go right or not and you wonder when you'll ever get over it. And you will not get over it until you get the Clover Leaf Catarrh Remedy, and use it. It will relieve you, and you'll wonder why you had not used it sooner. We are so positive that this will relieve you of your Catarrh or Cold in the Head, that we guarantee you satisfaction or we will refund your money.

Editorial Comment.

Governor Johnson has issued a proclamation commending to the people of California the observance of Saturday, April 18, as "Fire Prevention Day," which sets forth its objects in the following language:

"The purpose is to bring about united effort on this occasion to minimize the dangers of fire. I wish to join in making urgent appeal to all citizens to lend their energetic aid

"In recognition of the part insurance companies have had in the rebuilding of San Francisco, plans have been made for a celebration on 'Fire Prevention Day' at the Exposition grounds in San Francisco. It is my earnest hope that adequate expression will be given at that time to the confidence and good will so splendidly earned by these companies that met their obligations honorably and courageously in the hour of overwhelming disaster."

The Northwestern Pacific Railway has applied to the Railroad Commission for permission to issue something more than five million dollars worth of bonds for the purpose of extending its railroad lines to Eureka in Humboldt County and into the great lumber fields of the northwestern part of the state. This will tap a virgin field of country, rich not only in its lumber resources but also in its agricultural possibilities. As it is now the only means of access to a market of any considerable size is by water and at rough seasons of the year Humboldt bay is a somewhat dangerous harbor.

The coast range of mountains while not very high are extremely rugged and present great difficulties in railroad building. So that a road constructed through this particular part of the country is an expensive piece of work. No doubt the road will in time be extended into Oregon so that there will be a continuous line connecting the coast range cities and the great lumber and agricultural district of the Pacific shore.

As the population of this country grows and the great cattle ranges are taken up the production of beef cattle in proportion to the population steadily decreases. At the present time some beef is imported notably from South America and some from other sources. It is said that about 9,000,000 pounds a month is imported from Argentine, but that the importation is controlled by the Chicago meat trust or the packing houses there which import most of the meat from Argentine. As

this importation of meat amounts to only about one per cent of the amount consumed there is but little if any change in the prices resulting from outside competition.

The Examiner states that out of the Panama Canal Tolls victory will come party dissension and disaster. Certainly if the wish is father to the thought William Randolph Hearst would desire nothing better than to have party disaster overtake the administration.

It is interesting to note the alignment on this and other questions. All who have a political axe to grind are arranged against the administration. Among them also are those who believe that we have a right to do as we please with our coastwise trade and exempt what ships we please in the canal privileges. No one worthy of being considered doubts the President's sincerity or the clarity of his judgment. If he takes the stand that we should treat all nations alike under existing treaties it goes without saying that he thinks that the only honorable thing to do. And all the talk of Hearst and Ballyhoos of his kind will not change anybody's opinion.

The idea that Andrew Carnegie instituted the objection seems to be incomprehensible. That Elihu Root, in the service of the great corporations, might have entertained such a thing is probable. But as the question now presents itself in the alignment in Congress it is a question of difference of opinion with the prejudice in favor of the President because Hearst and every other self seeker is arrayed against him.

In commenting upon the recent address of President Wilson as to his private feelings in the matter of the responsibilities of his office, the Chronicle states that no one among his bitterest political opponents question the clarity of his mind on the earnestness of his patriotism. That is probably true. But it does not prevent such men as William Randolph Hearst from distorting facts and conveying to the people of cheap intelligence the idea that there is a tory and Anglomaniac in the office of President.

The latest thing that Hearst has discovered is that the phrase "watchful waiting" was taken from Milton. And this is enough to stamp him as a plagiarist and hold him up to public scorn, according to the Hearst idea.

When Bryan in his political career was asked about Hearst he said he never discussed men but principles. And surely if he were discussing principles the name of Hearst would never be mentioned.

The Proposed Trust Legislation.

Speech of Henry R. Seager, Professor
of Political Economy, Columbia
University, New York.

Reprinted from the Nation's Business.

The feature of the proposed trust legislation which I have been asked to make the starting point for my comments is the Interstate Trade Commission. In urging the creation of such a Commission, President Wilson is certainly voicing the mature judgment of students of the trust problem. It is a logical development of the Bureau of Corporations established in 1903, on the initiative of President Roosevelt. It was urged specifically by President Taft in his trust message of December 5, 1911, as a necessary supplement to a federal law providing for the incorporation of interstate commerce companies, which he also advocated. Nearly every witness testifying before the Congressional Committees which have investigated the trust problem during the last five years have spoken in favor of it. Thus the President's anticipation that "the opinion of the country would instantly approve of such a commission" appears abundantly justified.

The Newland's bill to create an Interstate Trade Commission has received more prolonged and careful attention than any of the other three measures now before Congress. It includes the essential features of the bill which Senator Newlands has urged upon his colleagues in the Senate for some time, together with additions designed to increase the efficiency of the Commission as the expert adviser of the attorney general and the courts. In brief the bill provides:

(1). That a Trade Commission of five members shall be created to take over the work of the Bureau of Corporations:

(2). That corporations engaged in interstate or foreign commerce, except common carriers, shall supply any information that may be required by this Commission, either at periodic intervals or on special occasions, and grant access to their books and records.

(3). That such information shall be made public in such manner and to such an extent as the Commission may deem wise:

(4). That the Commission shall have power to subpoena witnesses and require the presentation of such books and records as may be necessary for its information and that witness may not refuse to testify on the ground of incriminating themselves, but shall enjoy the customary immunity:

(5). That the Commission shall have power to investigate on complaint alleged violations of the anti-trust act and to report any violations it may discover to the attorney general:

(6). That it shall also investigate any corporation at the request of the attorney general or of the corporation itself to determine whether its organization, acts or relations with other corporations involve violation of the anti-trust act and report the changes in its organization, acts or relations with other corporations necessary to

bring it into compliance with that act.

(7). Similarly it may be called upon by any federal court to advise as to aspects of equity suit before it or proposed dissolution decrees under the anti-trust act.

(8). That nothing in the act shall interfere in any way with the authority and duty of the attorney general to enforce the anti-trust act:

The bill is thus drawn to give the broadest powers to the Commission, but without in any degree weakening the responsibility of the attorney general for enforcing, or the authority of the courts for interpreting the anti-trust act. Though doubtless susceptible of improvement in minor respects, I believe that it is well calculated to achieve the ends aimed at without unduly burdening or interfering with business. These ends seem to me highly desirable and I, therefore, regard this part of the legislative program of the Administration as entitled to hearty support.

Advising the attorney general when the anti-trust act is being violated and assisting the courts to draft dissolution decrees that will secure compliance with it, will be the chief duties of this new Commission. It will thus be a third arm of the government entrusted with responsibility for determining the application of the anti-trust act to specific plans of business organization and specific contracts and practices. One need not be the seventh son of a seventh son to foresee that this third arm will soon be the strong arm, on which the others—the attorney general and the courts—will come to lean. Its work is to be advisory rather than mandatory but all of our experience with commissions points to the conclusion that its advice as time goes on will be more and more controlling. Under the law, not only is the attorney general empowered to call upon it for assistance, but any one may address complaints to it, whereupon it must investigate and report its finding and recommendations to the attorney general. Is it not inevitable under these conditions that that overworked official will soon come to feel that he is performing his whole duty if he undertakes the prosecutions that are expressly recommended by the Commission? In presenting a case in court he will, as a matter of course, give chief prominence to the evidence collected by the Commission and the reasons it may have urged for believing that a violation has occurred. At first the courts may not be greatly impressed by the reasoning of the Commission—the Supreme Court was not at first greatly impressed by the reasoning of the Interstate Commerce Commission—but as time goes on, will not the views of the Commission almost certainly prevail? This may come about through the deliberate conviction of the Supreme Court that it is less competent than the Commission to decide difficult issues wisely and its deference to expert opinion, re-enforced as it cer-

tainly will be by cogent argument. Failing this, it may come about through amendments to the anti-trust act made on the recommendation of the Commission and serving virtually to overrule decisions of the courts. Thus as time goes on government prosecutions under the anti-trust act are likely to be those urged by the Trade Commission and the interpretation of the act in connection with the prosecutions is likely to be that approved by the Trade Commission. The creation of such a Commission means inevitably an extension of government by commission. I am in favor of it because I believe that with the growing complexity of business relations, it is only through the guidance of commissions of experts that we can hope to keep these relations straight and to advance sound public policy.

Being in entire accord with the Administration's proposal to create a Trade Commission, I can only regret the more deeply other proposals that will in my judgment prevent that Commission from rendering the great service of which it is capable in guiding the policy of the country with reference to industrial combinations. The second bill in the Administration's program, designed to amend the anti-trust act so as to condemn expressly lected or convicted obtained in government suits, is certainly commendable in purpose. We all agree that unfair methods of competition will enable big corporations to wrest markets from their smaller rivals, not because they can produce more economically or make a profit while selling more cheaply but through the sheer force of their larger resources and the wider range of their operations, must be stopped. If there is any doubt whether these practices would now be condemned under the present law as unlawful restraints on trade—and I do not personally believe that there is—it ought certainly to be removed by further legislation.

The measure against which I particularly protest as unnecessary and harmful is the third bill which undertakes not only to make the punishment for violation of the anti-trust act personal, as I agree it should be, but also to define the terms "every contract," "combination in the form of trust or otherwise" and "conspiracy in restraint of trade" and the word "monopolize," in conformity with the narrowest and most dogmatic conviction that every departure on the part of business men from unrestrained competition necessarily results in restraint of trade, and is therefore to be condemned.

Advance Interpretation Hazardous.

To judge in advance what interpretation may be given to the phrases of this bill would be hazardous. The first, second and third lines of conduct condemned, that is, "to create or carry out restrictions in trade or to acquire

a monopoly in any interstate trade, business or commerce," "to limit or reduce the production or increase the price of merchandise or of any commodity" and "to prevent competition in manufacturing, making, transporting, selling or purchasing of merchandise, produce or any commodity" are probably all fully covered by the present act as involving unreasonable restraint of competition or tendency to create monopoly. The fourth line of action condemned seems, however, to go much farther. If business men may not "make any agreement, enter into any agreement, or arrive at any understanding by which they, directly or indirectly, undertake to prevent a free and unrestricted competition among themselves or among any purchasers or consumers in the sale, production or transportation of any product, article or commodity" without rendering themselves liable to conviction for crime and to the severe penalties provided by the anti-trust act, current methods of carrying on business in the United States will have to undergo a modification. Under such a provision every understanding between railroads conveying passengers or freight between two cities, involving uniformity of rates, would be a violation of the anti-trust act. The schedule of rates of each railroad would have to be a matter for its independent determination, and if the law were strictly complied with, it would only be through the intervention of the Interstate Commerce Commission that the uniform rates, that have become well-nigh universal throughout the country and which public opinion very generally approves, could be maintained.

The truth is that our governmental policy toward railroads and other common carriers has long been inconsistent. The amendments to the Interstate Commerce Act giving the Interstate Commerce Commission complete control over rates, supplemented as it is about to be by the proposed measure giving a similar control over the issue of new securities, make the present restrictions of the anti-trust act, as laid down in the Traffic Association cases, illogical and unnecessary. Any further restrictions would, in my judgment, be highly undesirable. As regards the common carriers we are committed by the incontestable economic facts, as well as by the terms of the Interstate Commerce Act, to the policy of regulated monopoly. To deny it or to ignore it in amending or extending the anti-trust act is to fly in the face of the intelligent opinion of the country.

It has been customary among economists to draw a rather sharp distinction between railroads, telegraph and telephone companies, street railroads, water, gas, and electric light companies and other public utilities, which are styled natural monopolies, and manufacturing, mining and other industrial companies. Monopolistic in their very nature, the first class of businesses will not be adequately regulated by competition. For them we need and have developed machinery for the regulation of rates and charges in the public interest, where we have not actually undertaken government ownership and operation. This distinction is entirely ignored by the

present anti-trust act and is equally ignored in the proposed amending bills, from which it might be inferred that competition in railroad rates—rate wars—were as much in the pulling of dry goods.

I am one of the economists who thinks the distinction between the so-called natural monopolies and industrial enterprises such as coal mining and iron and steel manufacturing has been too sharply drawn. That combination and monopoly in connection with supplying a city like Washington with gas or electric light, with government ownership and operation or government regulation of charges and quality of service, is superior to competition will be generally admitted. I believe it is still an open question economically whether the advantage is not with combination rather than unregulated competition also in some branches of mining and manufacturing.

Economics and Advantages of Concentration.

You are all familiar with the argument. Let me take the steel industry as an illustration, since the steel trust has been much in the public mind of late. We have here a branch of industry in which concentration and large scale production make for economy until a scale of operations is attained calling for millions of dollars of capital and thousands of employees. The Carnegie Steel Company, the Jones-Laughlin Steel Company, the Illinois Steel Company all grew up under highly competitive conditions and each attained a gigantic size without passing the point where enlarging the scale of productive operations continued to make for economy in production. But when an industry is of such a character that success necessitates the investment of millions of dollars in each competing aggregation of units, you have a situation where the losses due to unrestrained competition are correspondingly enormous. In times of prosperity each producing organization expands to realize more fully the economies of large scale production. Iron and coke properties are secured to insure uninterrupted supply of raw materials, transportation facilities are acquired since the business is so large as to require for its exclusive use fleets of vessels and special railroad cars, blast furnaces and rolling mills are built in convenient proximity to permit the conversion of raw materials into finished products with least expenditure of time and effort. This development is in obedience to the laws of expanding trade. If the industry is to be economically conducted it must occur. The public interest demands that it shall occur.

A period of depression now ensues. If each of the competing units pursues its own interest blindly, disregarding of the general good of the trade, each will compete desperately to secure the largest share of the diminishing trade, prices will be recklessly cut. It is better to operate mines and mills at low profits, at no profits, or even at a loss, than to have mines and mills shut down, the properties deteriorate and the skilled labor force that has been slowly drawn together dispersed far and wide over the country. There

is thus no limit short of actual bankruptcy to which the competitors will not find it to their interest to go so long as they remain competitors. But why should they carry their competition to such reckless lengths? Will it not be better for each and for all to produce moderately at low profits until the depression has passed and conserve all the producing machinery for the time when business will revive, as it surely will revive, and all will again be needed? Is such combination to restrain competition opposed to the interest of the whole community? What useful purpose after all is served by forcing large numbers of steel plants into bankruptcy in every period of depression, with the result that the machinery for production becomes quite inadequate to meet the demand when prosperity returns and prices are forced to levels as unreasonably high as they were unreasonably low during the depression? Instead of having steel either price or paper is it not better to have steel a contented and moderately prosperous citizen at all times? It is contended that this life and death competition makes for more rapid improvement in productive methods, but does it? Under a regime of regulated combination each producing unit is still under strong pressure to cut down its expenses of production and to make its profits by that much larger. Is there any real evidence that improvements in methods have not been introduced as rapidly since the steel trust was organized in 1901 as they were before? In that period the open hearth process has been substituted on a vast scale for the Bessemer process. The steel trust has spent millions of dollars in developing its plants at Gary to the highest efficiency yet known in the industry. Its smaller rivals have been equally active. Although in many many lines prices have been steadied and run-away markets in either direction prevented, there have been as eager efforts to improve on existing methods and to concentrate production at the points best fitted for it is there ever were before. I admit, however, that this aspect of the matter is debatable. The objection that I urge against this bill which attempts to define "contract," "combination," and "conspiracy in restraint of trade" is that it treats the point as though it were conclusively settled. If it becomes a law and if it is rigidly enforced, as with the aid of a competent Trade Commission it ought to be, our business men will be absolutely barred from taking any steps to restrain competition when its only effect may be to force some of them overloaded with fixed capital into bankruptcy and to so reduce the producing capacity of the country that in the next period of activity there will be as serious an under-supply as there was an over-supply in the period of depression. My plea is that with a Trade Commission empowered to compel full publicity of business operations and the law left as it is now is condemning not all contracts and combinations in restraint of competition but only those in unreasonable restraint, we should be able for the first time to test the real merits of combination in the industries where it is claimed to be superior to unregulated competition. We have

not been able to make the test in the past because unfair methods of competition have been used and because the opportunity to reap large returns at the expense of so-called "innocent investors" has given an artificial turn to the whole combination movement. The Trade Commission could put a stop to the use of unfair and discriminatory methods by calling the attention of the attorney general to them and recommending him to begin prosecutions. The publicity of financial operations which it would require would curb the activities of the promoter and the high financier. Monopoly achieved by artificial means would still fall under the condemnation of the law. There would thus be scope only for restraints on competition which were believed by the Trade Commission and by the attorney general, acting upon its advice, to be reasonable in the sense that the benefits they might confer on the parties to the agreement or understanding would be shared by the whole community. Would such a policy involve any real risk to the best interests of the country, which the proposed bill penalizing every relaxation of the ardor of competition would preserve? Would it not rather enable us to feel our way along toward a solution of this difficult combination problem that would be permanently satisfactory because balancing fairly the interests of producers and consumers?

Points from Germany.

I said a moment ago that I thought the superiority of regulated combination over unregulated competition for other industries—not many but a few—than natural monopolies, was at least debatable. For this country it is debatable, because we have not proved how efficiently we could impose the necessary degree of regulation. For Germany, I submit, it is no longer debatable. German courts early took the view that combination to check an excessive fall of prices in a period of depression might be a good thing for the community as well as for the producers immediately concerned. Consequently regulated combination, not competition made obligatory, has become the established policy of that country. No one who has studied the results of the combination movement in Germany in moderating extremes of prosperity and depression and in promoting foreign trade can doubt that, for that country at least, the policy adopted, which is the exact opposite of the policy that would be confirmed and strengthened for this country by the proposed legislation, has been a good thing. German economists and public men are almost unanimous in approving it, though, of course admitting that the machinery for regulating the cartels is still inadequate and that a vigorous governmental policy is necessary to prevent producers from taking advantage of consumers. Is it probable that a policy so generally approved in Germany is entirely unsuited to the United States?

Two objections may be urged against the policy of allowing even a little latitude to the combination movement under the supervision of the proposed Trade Commission. First, it has been said that if given the slightest encouragement the combinations would

regulate the Trade Commission rather than the Trade Commission the combinations. This contention would carry more weight to my mind if it were not contradicted by our experience with the Interstate Commerce Commission. No corporations could be more powerful or more firmly entrenched in their privileges than were the railroad companies of this country when the Interstate Commerce Commission was established in 1887. It has been a long struggle but at no stage has there been any suspicion that the Commission was controlled by the railroads. Today the authority of the Commission over railroads is so securely established and so universally acknowledged that there seems more danger that the Commission will not show adequate consideration for the legitimate needs of the railroads than that it will fail to safeguard fully the legitimate rights of the public.

The other objection is the familiar one that such a policy will land us in socialism. I do not think so. I think rather that the creation of an able and efficient Trade Commission for the supervision of industrial combinations will insure for us the advantages of combination, which is one of social-

ism's most alluring promises, and preserve us from the great loss of efficiency in business organization and management which I conceive to be socialism's greatest weakness.

It is a trite remark that we live in age of co-operation. My argument against the complete prohibition of anything like concerted action on the part of directors of our great industries reduces to the plea that our business men be given a chance to co-operate so far as they can and will, but under conditions that will enable all of us to enjoy the benefits of their co-operation. So long as desire for private gain continues the dominant motive of those engaged in business, competition will remain a dominant force in business. But let us not make a fetish of competition! It also has its bad as well as its good side. While recognizing its value and making strenuous efforts to insure it a fair field for its operation, let us not ignore the fact that co-operation also has its legitimate place. On a higher moral plane than competition, its extension, under conditions that compel adequate regard to the public interest, must prove advantageous not only to business men but to the whole community.

Firms desiring news on special classes of buildings, such as Banks, Churches, Schools, Hotels, etc., will find such items all classified and grouped under proper headings, commencing on this page. These same items are again repeated under "LOCALITIES" in the last part of our news department.

APARTMENT HOUSES.

SAN FRANCISCO—Apartment house, 4 story and base, reinforced concrete, \$23,000. Architect, none. Owners, Kincaid Construction Co., 215 Montgomery street, S. F. The building will be erected on the south side of Ellis street west of Hyde and will cover an area of 23 by 137½ feet. Interior will contain a total of sixteen suites arranged in two and three room apartments. Pine and elm will be used for interior trim. Plans provide for steam heat, an automatic elevator and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will have tile wainscot and composition doors. Entrance will be finished in tile. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Apartment houses, 2, 3 story and base, frame, \$13,000 and \$10,000, respectively. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. One of these buildings will be erected at the southwest corner of Jackson and Taylor streets and the other on the west line of Taylor street south of Jackson. Each building will contain six apartments of three and four rooms. Interiors will be finished in pine with some elm panels and beam ceilings. All suites will have private bath rooms and wall beds. Plans provide for steam heat and a hot water supply in each building. Bath rooms will have composition floors and tile wainscot. Entrances will be finished in tile and marble. Exteriors will be covered

with cement plaster on metal lath, brick veneer bases and rustic. Plans are complete and owners will take figures at once.

SAN FRANCISCO—Apartment house, 2 story and base, frame. Cost not stated. Architect, John J. Foley, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Gough street and has been designed for a four-apartment building. Each apartment will contain four rooms and bath. Interior will be finished in pine and redwood with some oak floors. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile and will have composition floors. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, reinforced concrete, \$17,000. Architect, none. Owners, J. G. Kincaid Construction Co., 215 Montgomery street, S. F. The building will be erected on the east side of Hyde street north of Eddy and will cover an area of 25 by 87½ feet. There will be a total of eleven suites of two and three rooms. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be steam heat and a hot water supply. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

OAKLAND, CAL.—Apartment house, 2 story and base, frame, \$18,000. Ar-

chitects, Elite Planners, 1844 5th avenue, Oakland. Owner's name withheld. The building will be erected on Grand avenue and has been designed to contain a total of twelve suites arranged in three rooms each. Interior finish will be of pine with some hardwood veneer and beam ceilings. Plans provide for steam heat and a hot water supply. All suites will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared. Further mention will be made of this work.

BERKELEY, ALAMEDA CO., CAL.—Apartment house, 2 story and base, frame, \$10,000. Architect, Julia Morgan. Merchants' Exchange Bldg., S. F. Owner, Mr. H. Merritt. The building has been designed to contain eight suites of three and four rooms and will be centrally located. Interior finish will be of pine and redwood with some hardwood floors and veneer. All apartments will have wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

SAN FRANCISCO—Apartment house, 5 story and base, reinforced concrete. Cost not stated. Architect, William Beasley, 127 Montgomery street, S. F. Owner, Mrs. Annie Gallagher. The building will be erected on the east side of Leavenworth street between Post and Geary, covering an area of 23 feet 11 inches by 69 feet 9 inches. There will be a total of ten suites of three rooms each. Interior finish will be of pine with some elm panels and oak floors. Each apartment will have wall beds and private bath rooms. Plans provide for steam heat, an automatic elevator, vacuum cleaning and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with white cement plaster. Plans are being prepared.

SAN FRANCISCO—Apartment house, 3 story and base, frame. Cost not stated. Architect, William Beasley, 127 Montgomery street, S. F. Owners, D. Coleman et al. The building will be erected at the southwest corner of Howard and Rausch streets, covering an area of 50 by 100 feet, and will contain a total of 60 rooms arranged in three and four room apartments with private baths. The interior of the building will be finished in pine throughout. All apartments will have wall beds. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick veneer and cement plaster on metal lath. Plans are complete and figures will be called for at once.

SAN FRANCISCO—Apartment house, 7 story and base, steel and reinforced brick. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Bush street west of Stockton on a lot 40 by 90 feet. There

will be a total of 36 suites of two rooms and bath each. Interiors will be handomely finished in pine and hardwood veneer. Plans provide for steam heat, an automatic elevator, vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and composition floors. Wall beds will be installed. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick and terra cotta.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction. Cost not stated. Architect, Leonard L. Jones, Central Bank Bldg., L. A. Owner, Herman Gutterson. The building will be erected on West 10th street near Figueroa, covering an area of 60 by 125 feet. There will be 75 rooms arranged in two and three room apartments with wall beds and private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is to call contracts.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick. Cost not stated. Architect, E. S. Williamson, Story Bldg., L. A. Owner, C. E. Lee. The building will be erected on Towne avenue near 5th street, and has been designed to contain 63 rooms, which will be arranged in suites of two and three rooms with private baths. Interiors will be finished in pine with some hardwood veneer. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base, brick and steel. Cost not stated. Architects, Architectural Designing Co., Grosse Bldg., L. A. Owner, Mr. Neely. The building will cover an area of 50 by 150 feet and is to be erected on Hope street between 1st and 2nd streets. Interior will be arranged for 78 rooms. Apartments will be of the two and three room type with private baths. Pine and hardwood veneer will be used for trim. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

SANTA MONICA, LOS ANGELES CO., CAL.—Apartment house, 3 story and base, Class C construction. Cost not stated. Architect, Albert C. Martin, Higgins Bldg., L. A. Owner, Thomas Higgins. The building will be erected on a 75 by 100 foot lot located at the corner of 2nd and Arizona streets, and will contain 75 rooms arranged in two and three room apartments besides a large lobby and amusement room. Interior finish will be of pine and hardwood veneer. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning system. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the build-

ing will be faced with pressed brick. Plans are being prepared.

LOS ANGELES, CAL.—Apartment house, 3 story and base. Class C construction, \$35,000. Architect, William Boshysbell, Wright and Callender Bldg., L. A. Owner, G. A. Wettin. The building will be erected on West 21st street, covering an area of 60 by 107 feet. There will be a total of seventy rooms arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

BRIDGES, DAMS AND HARBOR WORK.

and timber pile construction, \$300,000. Engineer, Assistant State Engineer Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Plans submitted to the State Advisory Board at Sacramento by the San Francisco Harbor Commissioners for Pier No. 41, to be constructed on the San Francisco waterfront, have been approved. Bids will be called for by the Harbor Commissioners at once. Further mention will be made of the work.

VALLEJO, SOLANO CO., CAL.—Bulkhead work, stone and concrete. Cost not stated. Engineer, City Engineer, Vallejo. Owners, City of Vallejo. Bids are now being called for to be opened on April 15th for a bulkhead to be constructed along the city waterfront between Main and Kentucky streets. Plans and specifications can be secured from the City Clerk at Vallejo.

CHURCHES.

OAKLAND, CAL.—Church wiring. Cost not stated. Architect, G. Albert Lansburgh, 769 Mission street, S. F. Owners, First Hebrew Congregation of Oakland. Plans for the electric work in the new church building to be erected at the corner of 28th and Webster streets have been revised and new figures will be called for at once.

LOS ANGELES, CAL.—Church, 1 story and base, frame, \$35,000. Architect, Robert H. Orr, Van Nuys Bldg., L. A. Owners, University Christian Church. The building will be erected at the corner of Santa Barbara and Budlong streets, and will cover an area of 104 by 120 feet. The structure has been designed in the classic style, with the exterior faced with veneer pressed brick. Interior will be arranged for a large auditorium and Sunday school rooms. Pine and ornamental plaster will be used in the auditorium. There will be a central heating system and modern ventilation. Plans are being prepared.

FACTORIES & WAREHOUSES.

SAN FRANCISCO—Machine shop equipment. Cost not stated. Engineer, City Department of Engineering, Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the machinery equipment which is to be installed at the Municipal Pipe Yards in San Francisco have been completed and are now out for figures.

Bids will be opened on April 15th. Plans and specifications can be secured from the Board of Public Works.

SEATTLE, WASH.—Warehouse, 4 story and base, reinforced concrete, \$250,000. Architect, Paul T. Whitman, care of the Port of Seattle Commission, Central Bldg., Seattle. Owners, City of Seattle. The building will be erected on Watcom avenue on the East Waterway, and will cover an area of 80 by 300 feet. Construction will be fireproof. It is the intention of the Port of Seattle Commission to add an additional 300 feet to the building later. Plans are complete and out for figures.

SANTA BARBARA, SANTA BARBARA CO., CAL.—Warehouse, 3 story and base, reinforced concrete. Cost not stated. Architects, Mayberry & Parker, Pacific Electric Bldg., L. A. Owner, Homer N. Duffy. The building will be erected at the corner of Mason and Helena streets and will cover an area of 67½ feet by 140 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Metal window sash and frames and fireproof doors are specified. A fireproof vault and elevator service will be installed. The building is designed to carry three additional stories. Exterior will be faced with cement plaster. Plans are being prepared.

PORTLAND, ORE.—Shipping department and stables, 2 1/2 story brick, \$20,000. Architects, Claussen & Claussen, Macleay Bldg., Portland. Owner's name withheld. Contractor, William Vactz, 241½ First street, Portland. Contract price, \$20,000.

FIRE HOUSES AND JAILS.

SAN FRANCISCO—Firehouse, 2 story and base, brick and steel, \$25,000. Architects, Ward & Blohm, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. The building will be erected at the southwest corner of Drumm and Commercial streets, and will be known as Engine House No. 12. Interior will be arranged for four pieces of apparatus, office and quarters for the crew. There will be steam heat, modern plumbing, special electric work and vacuum cleaning. First floor will be of cement. Pine and hardwood trim are specified. Bath rooms will be equipped with showers. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken. Bids will be opened on April 15th. An official proposal appears in another column of this issue.

BERKELEY, ALAMEDA CO., CAL.—Firehouses, 3, 2 story and base, frame, \$5,000 each. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. Bids opened for this work were taken under advisement until the next meeting of the City Council. A complete list of the bids received will be found under the heading of Alameda County in this issue.

FLATS.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,500. Architect, John F. Haner, 3576 19th street, S. F. Owner, Louise Cuneo. The building has been

designed to contain two modern flats of five and six rooms with baths. The building will be erected on Baker street south of Fillbert, covering an area of 25 by 53 feet. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

SAN FRANCISCO—Flats, 2 story and base, frame, \$3,750. Architect, none. Owner, P. Prasso, 320 Lombard street, S. F. The building will be erected on the east side of Grant avenue north of Greenwich and will contain two flats of six rooms each. Interiors will be finished in pine and redwood with some oak floors. Each living room will have an open fire place with tile mantel. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

GOVERNMENT WORK AND SUPPLIES.

Oil Fuel for the Navy.

Of growing importance, to a degree which is a real emergency, is the plan of the Navy Department to acquire control of an adequate supply of fuel oil. Secretary Daniels as suggested that \$500,000, which he hopes to save by not constructing marine barracks, may be authorized for expenditure in the acquisition, or lease of oil lands. Of course, it is realized that this would not go very far, but it would be a step toward the fulfillment of his policy of having the Navy Department possess its own oil fields and produce and refine its own fuel oil. He is convinced that the department should own or control at least two oil areas, one on the Pacific Coast and one in the mid-continent field tributary to a Gulf or Atlantic port, each of these fields to be capable of yielding a supply exceeding the total needs of the Navy Department for a number of years to come. It is believed that if the Navy Department can secure in its oil-land holdings on a reasonable basis and can be authorized to arrange for the transportation and refining of its oils, the sale of the higher priced light oils, which it will not need for its own use, will not only cover the cost of refining but will also cover or largely reduce the cost of drilling, transportation, and storage of the oils needed for needed for naval use. The price of oil is increasing and will doubtless continue to increase with the growth of the demand or oil in different countries and for different purposes. It will probably increase by leaps and bounds. Thus, two and one-half years ago the price of Oklahoma oil increased abruptly from 43 cents to \$1.05 per barrel. This certain increase in the price of oil will be due, not so much to a necessary increase in the cost of production as to increase in the demand for oil, without a corresponding increase in the supply. By securing and reserving its own supply of oil the government can avoid having to pay the large increase in price which will come from this increase in

demand for oil for naval and commercial uses in other countries. It is apparent, then, that the government should it produce its own oil, should save the large profit of pipe-line transportation now accruing to the pipe-line companies by building its own pipe line. This cannot be done instantly, however. To successfully operate a pipe-line, contracts for handling a full line amount of oil must be secured before the pipe line is laid. The amount used by the navy will be one-fifth of the full-line capacity; the other four-fifths of the space can be used in piping oil as a common carrier. The Navy must also secure its own production—secure leases, drill, and get and maintain its own supply—prior to building its own pipe line and to erecting a refinery. For this purpose it is advisable to get an appropriation of \$500,000 to secure a lease of a modest amount of land as a beginner—say, a quarter section of a highly probable land—the remainder of the \$500,000 to be used in drilling and in acquiring additional land, at the best judgment of the manager in the field. The acquiring of land can thus be done in a common sense way, and the expansion of the oil operations can be developed in a natural and logical manner.

Orland Irrigation Project.

The Reclamation Service is asking for proposals for building the structures of the East Park Feed Canal in Colusa county, California, near Stonyford, in connection with the Orland Irrigation project. The work involves about 6,000 cubic yards of excavation, 4,000 cubic yards of concrete, the placing of about 49,300 pounds of reinforcing steel, and 14,150 pounds of metal work and gate fixtures, and the placing in structures of about 30,500 feet, E. M., of lumber. Bids will be opened at 2 o'clock p. m. April 21 at the office of the Reclamation Service, Orland, Cal.

Mare Island, Cal., Magazine.

The bid of Monson Bros., 1907 Bryant street, San Francisco, Cal., \$11,950 in amount, has been accepted for constructing a brick and concrete magazine, with structural steel roof framing at the U. S. navy yard, Mare Island, Cal.

Yards and Docks, Fire Pumps.

The contract for furnishing two motor-driven fire pumps for delivery at the navy yards, Mare Island and Puer Sound has been awarded to the Alberger Pump & Condenser Co., 140 Cedar street, New York City, at \$13,683.

Dredge, Reclamation Service.

Abstract of proposals for 1½ cubic yard dipper dredge for Yakima storage project, delivered f. o. b. Meadow Creek, Wash.:

Steam - Driven Steel - Constructed Dredge.

Bucyrus Co., South Milwaukee, Wis., \$16,964.

Fairbanks Steam Shovel Co., Marion, Ohio, 3-part line, \$9,012; 2-part line, \$9,256.25, and 1-part line, \$9,584.75. Electrically Driven Steel - Constructed Dredge.

Bucyrus Co., South Milwaukee, Wis., \$24,054.

Steam - Driven Timber - Constructed Dredge.

American Dredge Building and Con-

struction Co., Seattle, Wash., \$10,076.25.

Bucyrus Co., South Milwaukee, Wis., \$15,968.

Fairbanks Steam Shovel Co., Marion, Ohio, 3-part line, \$3,767.75; 2-part line, \$5,962, and 1-part line, \$9,300.50.

Electrically-Driven Timber-Constructed Dredge.

Bucyrus Co., South Milwaukee, Wis., \$23,084.

Pressure Gauges, Salt River Project.

Abstract of bids for reclamation hydraulic indicating pressure gauges for Salt River project, Ariz., advertisement No. 275, bids opened at Los Angeles, Cal.:

Crane Co., Los Angeles, Cal., \$23.96; 5 weeks at Los Angeles, Cal.; alternate bid, \$14.34; 5 weeks at Los Angeles, Cal.

Warren & Bailey Mfg. Co., Los Angeles, Cal., \$33.26; few days at Boston, Mass.

HALLS & SOCIETY BLDGS.

SAN FRANCISCO—Affiliated Women's Club, 8 story and base. Class A construction. Cost not stated. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, Affiliated Women's Clubs of San Francisco. The organization has secured a site 137½ by 137½ feet on Sutter street between Mason and Taylor streets, and are now completing plans for financing a large Class A building. The architects have only prepared preliminary plans and details of the building cannot be given at this time. Further mention will be made of the work.

SAN FRANCISCO—City Hall marble work. Cost not stated. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. The Board of Public Works has been instructed to advertise for bids for the marble work on the new City Hall. Bids are to be opened on April 29th. Plans can be secured from the City Department of Architecture, Temporary City Hall.

OAKLAND, CAL.—Lodge hall, 3 story and base. Class A construction, \$250,000. Architect, A. J. Mazurette, Albany Bldg., Oakland. Owners, Oakland Moose Lodge Hall Association. This work was mentioned in last week's issue, out since then the announcement as to the selection of a site has been made. The building will be erected on Telegraph avenue near 17th. Working drawings are being prepared. Further mention will be made of the work.

HOSPITALS

SAN FRANCISCO—Hospital, 3 story and base, reinforced concrete, \$30,000. Architect, William C. Hayes, Foxcroft Bldg., S. F. Owners, Union Iron Works. The building will be erected on Pennsylvania between 18th and 19th streets, and will contain private rooms as well as wards. The structure will cover an area of 90 by 90 feet. Construction will be fireproof. Interior will be finished in pine with tile and white enamel. Plans provide for furnace heat and a vacuum cleaning system, elevator service and modern operating room equipment. Exterior of the building will be faced with cement plaster. Plans are being prepared.

AGNEWS, SANTA CLARA CO., CAL.—Hospital buildings, 2, 1 story, frame. Cost not stated. Architect, State Architect McDougall, Sacramento. Owners, State of California. Two new buildings, one a Nurses' Home and the other a Female Workers' Cottage, are to be erected at the Agnews Asylum. Bids will be opened for the Workers' Cottage on April 23rd and for the Nurses' Home on April 27th. Official proposals appear in another column of this issue.

SAN FRANCISCO—Hospital ward addition, 2 story, reinforced concrete, \$15,000. Architect, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. Pringle-Dunn & Co. submitted the low cost figure at \$11,683 for the new addition to the Letterman General Hospital at the Presidio. A complete list of bids, including the heating, plumbing, electric work and fixtures will be found under the heading of San Francisco in this issue.

HOTELS.

SAN FRANCISCO—Hotel, 23 story and base. Class A construction. Cost not stated. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Fred C. Finkle. This building, designed to be the tallest hotel structure west of Chicago, will be erected at the northwest corner of Pine and Stockton streets. The basement and sub-basement will connect direct with the Stockton street tunnel. There will be a complete steel frame, concrete floors and hollow tile and metal lath and plaster interior partitions. The first 18 stories will contain a total of 187 guest rooms, all of which will have private baths. Upper five floors will be devoted to observatory rooms, dance hall, banquet rooms and roof garden. Plans provide for steam heat, elevator service, vacuum cleaning and all other modern conveniences. The architects state that bids will be taken at once for the structural steel and that following the letting of this contract figures will be called for on the balance of the work. The building is to be completed by the opening of the Exposition.

SAN FRANCISCO—Hotel and stores, 7 story and base, brick and steel, \$110,000. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. This is the second building to be erected by Mr. Stewart and designed by the same architects. The building will be erected on the north side of Ellis street east of Mason and will have a frontage of 50 feet and a depth of 137½ feet. There will be two stores, offices and lobby on the first floor. Upper floors will contain 120 guest rooms, all of which will have private baths. Plans provide for steam heat, elevator service and a hot water system. Interior will be finished in pine and hardwoods with ornamental plaster and marble used in the office, entrance and lobby. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

SAN FRANCISCO—Hotel, 4 story and base, brick and steel, \$20,000. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Edward Franks. The build-

ing will be erected on California street near Kearny, covering an area of 31 by 59½ feet. There will be a total of 42 guest rooms and a number of public and private baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

SEATTLE, WASH.—Hotel, 10 story and base. Class A construction, \$200,000. Architects, Howell & Stockes, Henry Bldg., Seattle. Owners, W. F. Kennedy and W. C. Phillips, 2822 10th avenue, Seattle. The exact location of the building has not been made public. Construction will be fireproof throughout with a complete steel frame, reinforced concrete walls, floors and roof slabs. Interior partitions will be of hollow tile and metal lath and plaster. The structure will contain in the neighborhood of 200 guest rooms and a number of public and private baths. There will be steam heat, elevator service, a vacuum cleaning plant and hot water supply. Metal window sash and frames are specified. Exterior of the building will probably be faced with pressed brick. It has not been determined whether to let a general contract or do the work by Day Labor. Plans are nearly complete and construction will be started about the last of April.

Contracts Awarded.

LOS ANGELES, CAL.—Hotel, 4 story and base. Class C construction, \$50,000. Architect, E. J. Borgmeyer, Stimson Bldg., L. A. Owner, J. B. Solomon. Contractor, Fred W. Siegel, Stimson Bldg., L. A. Contract price, \$60,000.

PANAMA-PACIFIC EXPOSITION WORK.

SAN FRANCISCO—Foreign exhibit building, frame and plaster construction, \$60,000 to \$100,000. Architect, G. J. Oakeshott, Service Bldg., S. F. Owners, Australia. Architect G. J. Oakeshott of Sydney, Australia, who is to be in charge of the Australian exhibit building to be erected at the Panama-Pacific International Exposition, arrived in this city Wednesday. The building will be similar to the other buildings erected by the various states and countries and will be of frame and plaster construction, costing between \$60,000 and \$100,000. Mr. Oakeshott will make his headquarters at the Service Building temporarily.

SAN FRANCISCO—Exhibit building, 2 story, frame and plaster construction, \$100,000. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, German-American Societies. Preliminary plans have been completed and approved for a large exhibit building to be erected for the German-American Societies at the 1915 Exposition. The structure will contain space for exhibits, offices and reception rooms. Working drawings are now being completed and figures will shortly be called. Full particulars can be secured from the architects.

SAN FRANCISCO—State exhibit building, 2 story, frame and plaster. Cost not stated. Architect, Burdette, Service Bldg., S. F. Owners, State of California. All architectural drawings for the California building to be erect-

ed at the 1915 Exposition have been completed and structural drawings are 50 per cent complete. The plans are being drawn in the office of the Director of Works, Service Bldg.

SAN FRANCISCO—Festival Hall, 2 story and base, frame and plaster construction, \$214,000. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The three lowest figures submitted for the general construction of the Festival Palace for the Panama-Pacific International Exposition Co. were as follows: McLeran & Peterson, \$214,000; Strehlow, Freeze & Peterson, \$216,000; Commary-Peterson, —. A contract will probably be awarded to McLeran & Peterson.

POST OFFICES.

SAN FRANCISCO—Post office, 2 story, reinforced concrete, \$25,000. Architect, State Architect McDougall, Sacramento. Owners, State of California. The State will erect and lease a building to the Government to be used as a new Ferry Post Office. The proposed structure will be erected just south of the Union Ferry Depot. Preliminary plans only have been prepared. The work will be carried on under the direction of the State Harbor Commissioners. Further mention will be made here when plans are advertised.

RAILROAD CONST., STATIONS AND EQUIPMENT.

SAN FRANCISCO—Railroad track specials. Cost not stated. Engineer, City Engineer, San Francisco. Owners, City and County of San Francisco. Specifications are complete for furnishing track specials to the Municipal Railroads under Section C of Contract No. 7. Bids will be opened on April 15th. Plans, specifications and full particulars can be secured from the Board of Public Works.

Contracts Awarded.

SALT LAKE CITY, UTAH—Railroad buildings, group of 2 and 3 story, reinforced concrete. Cost not stated. Engineer, Santa Fe Engineering Department, L. A. Owners, Santa Fe Railroad Co. Contractors, Van Stoughton Co., Hooker-Lent Bldg., S. F. Contract price not stated.

RESIDENCES.

SAN FRANCISCO—Residence, 2 story and base, frame, \$6,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling will be erected in Jordan Park, and has been designed for an eight-room house with two baths. Interior will be finished in pine and hardwood with oak floors in the principal rooms. Plans are complete and in the hands of the owner who will do the work by Day Labor. Materials are now being purchased.

SAN FRANCISCO—Residence, 2½ story and base, frame, \$15,000. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, Mrs. Meyers. This dwelling has been mentioned here before when the architect was first commissioned to prepare plans. The house has been designed for a ten-room dwelling with three baths and sleeping porch, and will be erected on Pacific avenue. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being revised and new figures will shortly be called.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,500. Architect, none. Owner, J. M. Peters, 1010 Balboa street, S. F. The dwelling has been designed for a seven-room house with bath, and will be erected on the east side of 20th avenue near California street. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. The wainscot will be used in the bath room and kitchen. Composition floors are specified for the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased by the owner.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,000. Architect, none. Owner, W. E. Ginley, 131 5th avenue, S. F. The dwelling will be

erected on the east side of 15th avenue near Clement, and has been designed to contain six rooms and bath. Interior will be finished in pine with hardwood floors and beam ceilings. There will be furnace heat and open fire places. Mantels will be of tile or brick. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story and base, frame, \$2,000. Architect, none. Owner, N. J. Nelson, 4278 23rd street, S. F. The dwelling will be erected on the north side of 17th street west of Cole, and has been designed for a six-room house with bath. Pine will be used for interior finish throughout. Some hardwood floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. The wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

SAN FRANCISCO—Residence, 2 story, attic and base, frame, \$8,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling is to be erected at the southwest corner of Mercedes Way and Paloma avenue in Ingleside Terraces and will contain eight rooms, three baths and sleeping porch. Interior finish will be largely of pine with some hardwood veneer and beam ceilings. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. The tile will be used in the bath rooms and kitchen. Composition floors are specified in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased by the architect.

SAN FRANCISCO—Residence, 2 story and base, frame, \$4,000. Architect, Joseph A. Leonard, 85 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling will be erected on De Soto avenue in Ingleside Terraces and has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have a composition floor and tile wainscot. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor under the direction of the architect.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$4,000. Architect, J. W. Placche, Acheson Bldg., Berkeley. Owner, Joel H. Hildebrand. The dwelling will be erected in the northeast section of Berkeley and has been designed for a

seven-room house with bath and sleeping porch. Interior will be finished in pine throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared for the work.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$4,000. Architect, none. Owner, F. T. Malley, 2001 Grove street, Oakland. The dwelling has been designed for a nine-room house with two baths and will be erected on 12nd street. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception room. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile and will have composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$1,500. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, George F. Bell. The dwelling will be erected in Northbrae Tract and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood, with some hardwood floors and beam ceilings. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

BERKELEY, ALAMEDA CO., CAL.—Residences, 2, 2 story and base, frame. Cost not stated. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Johnson. These two houses will be erected in the Claremont Tract and each has been designed to contain seven rooms, bath and sleeping porch. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. There will be tile wainscot in the bath rooms and kitchens and composition floors in the baths. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$5,000. Architect, Leonard H. Ford, 2135 Center street, Berkeley. Owner, Mrs. C. Alger. The dwelling will be erected in Thousand Oakes Park and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors and beam ceilings will also be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement

plaster on metal lath. Plans are now being prepared. Work will probably be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$6,500. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, Mr. Alberger. The dwelling will be erected near Piedmont Park and will contain eight rooms, two baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. Oak and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame. Cost not stated. Architect, Harris Allen, 2514 Hillegass avenue, Berkeley. Owner, J. W. McKibben. The dwelling will be erected on Piedmont avenue near Dwight Way and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater is specified. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,000. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, R. A. McWilliam. The dwelling will be erected on Arroya street and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be finished with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

OAKLAND, CAL.—Residence, 2 story and base, frame, \$3,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, P. Lindblad. The house will be erected on Grand avenue and will contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials will be purchased by the architects.

HILLSBOROUGH, SAN MATEO CO., CAL.—Residence, 2 story, attic and

base, frame and brick, \$75,000. Architects, Huss & Faville, Balboa Bldg., S. F. Owner, Mr. C. de Guigne. The dwelling has been designed for a large country house and will contain in the neighborhood of twenty rooms, several baths and sleeping porches. A garage, stables and other out-buildings are included in the work. Interior of the house will be finished in pine and hardwoods. Hardwood and inlaid floors will be specified. There will be a central heating system, probably steam heat, open fire places, a vacuum cleaning system and automatic water heaters. Bath rooms will be finished in tile and will be equipped with showers. Exterior of the house, out-buildings and garage will be covered with cement plaster. Plans are complete and figures are being taken.

Fay, 1081 South 7th street, 1 story, frame cottage, \$1,500, and B. W. Loring, 100 North 1st street, frame garage, \$1,000.

PORTLAND, ORE.—Residence, 2 story, attic and base, frame and tile, \$30,000. Architect, John V. Bennes, Chamber of Commerce Bldg., Portland. Owner, A. H. Maegly. The dwelling will be erected in Arlington Heights and has been designed to contain in the neighborhood of fifteen rooms, several baths and servants' rooms. There will be steam heat, automatic water heaters and vacuum cleaning system. Interior will be finished largely in hardwoods with oak and inlaid floors in the principal rooms. Bath rooms will have tile wainscot and floors. There will be several open fire places and tile or brick mantels. Exterior of the dwelling will be covered with pressed brick. A clay tile roof will be used. Plans are complete and figures are being taken.

SAN FRANCISCO—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, J. D. Clancy, 2581 Filson street, S. F. The dwelling has been designed for a six-room house and will be erected on Anza street near 17th avenue. Interior finish will be of pine throughout with some hardwood floors in the living and dining rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

OAKLAND, CAL.—Bungalow, 1 story and base, frame, \$2,500. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, J. W. Baughman. The dwelling will be erected in the Temescal District and has been designed for a live-room house with bath. Pine and redwood interior finish will be used with some oak floors. There will be a large open fire place in the living room and tile mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster. Plans are being prepared and when complete the work will be done by Day Labor.

PIEDMONT, ALAMEDA CO., CAL.—

Bungalow, 1 story, and oase, frame, \$2,500. Architects, Elite Planners, 1841 5th avenue, Oakland. Owner, Mr. Brach. The dwelling has been designed for a five-room house. Interior finish will be of pine or redwood throughout. Hardwood floors will be used in the principal rooms. There will be a large open fire place in the living room with a tile mantel. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

BERKELEY, ALAMEDA CO., CAL.—Residence, 2 story and base, frame, \$3,500. Architect, none. Owner, Louis O. Hansson, 2116 Bancroft Way, Berkeley. The dwelling will be erected on Spruce street and has been designed for a seven-room house with bath. Interior finish will be largely of pine. Some hardwood floors will be used. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor.

SCHOOLS.

FRESNO, FRESNO CO., CAL.—School group, 2 story and base, brick and steel, \$380,000. Architect, State Architect McDougall, Sacramento. Owners, State of California. Plans for the new State Normal School to be erected in Fresno are reported as practically complete and figures will be called for shortly. The main building will house the administrative office, library, a large auditorium and several calls rooms. Two wings, each two stories high will be arranged for the laboratories and manual training and domestic science departments.

CHICO, BUTTE CO., CAL.—School, 2 story and base, reinforced concrete, \$50,000. Architect, Chester Cole, Chico. Owners, Chico School District. In last week's issue an unofficial report was published crediting this work to Architect Bryan of Chico. Mr. Bryan's plans were awarded second place and Architect Cole will design the building. Working drawings are now being prepared.

LOS ANGELES, CAL.—Schools, 2 story and base, reinforced hollow tile construction, \$75,000. Architects, S. B. Marston and Garrett Van Pelt, Chamber of Commerce Bldg., L. A. Owners, Los Angeles Board of Education. A twelve-room building will be erected at Lamanda Park and a ten-room school at Altadena. Interiors will be finished in pine with maple floors in the class rooms. There will be central heating systems and modern school plumbing. Exteriors will be faced with cement plaster. Plans are now being prepared.

CORONA, RIVERSIDE CO., CAL.—School, part 1 and part 2 story and base, brick, \$30,000. Architects, Allison & Allison, Hibernian Bldg., L. A. Owners, Corona School District. The architects have just been commissioned to prepare plans and details of construction cannot be given at this time. The present building will also be remodeled.

SEATTLE, WASH.—School addition,

1 story and base, reinforced concrete, \$150,000. Architect, Edgar Blair, 1426 Jackson street, Seattle. Owners, City of Seattle. An addition 90 by 175 feet will be made to the Green Lake District School. The ground floor will contain class rooms and a large auditorium. Basement has been arranged for boys' and girls' gymnasium. Construction will be fireproof. Plans provide for steam heat, a modern system of ventilation and program clocks. Exterior of the building will be faced with cement plaster. Plans are complete and figures will be opened on April 7th.

SEWERS, STREET WORK AND WATER SYSTEMS.

FRESNO, FRESNO CO., CAL.—Street electroliers, \$70,000. Engineer, City Engineer B. E. Cronkite, Fresno. Owners, City of Fresno. City Engineer Cronkite has completed plans for a number of ornamental electroliers to be installed in the business district of the city. Plans have been approved by the city Council and figures will be asked for shortly. The engineer's estimate for this work is \$70,000.

DALY CITY, SAN MATEO CO., CAL.—Reservoir and water system. Cost not stated. Engineer's name not given. Owners, Daly City. Plans have been received by the City Clerk for a reinforced concrete reservoir to be built as a part of the town's new water system. Figures are now being taken on the work. Complete information can be secured from the City Clerk.

Contracts Awarded.

SACRAMENTO, CAL.—Reservoir, reinforced concrete. Cost not stated. Engineer, City Engineer, Sacramento. Owners, City of Sacramento. Contractors, Mathews Construction Co., Sacramento. Contract price not stated.

SEALED PROPOSALS.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC WORKS of the City and County of San Francisco.

Sealed proposals will be received at this office between the hours of 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 15th day of April, 1914, for doing the following work, including the furnishing of the necessary labor and materials therefor, to wit:

ROAD.—Sealed proposals will be received at the office of the lighthouse inspector, San Francisco, Cal., until 2 o'clock p. m. April 17, 1914, and then opened for constructing a gravel road for coal and light station, Cal. Blank proposals and particulars may be obtained by addressing the LIGHT HOUSE INSPECTOR, San Francisco, Cal.

PROPOSALS FOR LANTERN.

LANTERN.—Seale proposals will be receive at the office of the lighthouse inspector, Portland Ore., until 2 o'clock p. m. April 10, 1914, and then opened for furnishing one standard fourth-order lantern. Blank proposals and particulars may be obtained by addressing the LIGHTHOUSE INSPECTOR, Portland, Ore.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Monday April 27, 1914, said bids then there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Nurses Home, Female, at the Agnews State Hospital, Agnew, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Nurses' Home, Agnews State Hospital, Agnew, California."

(Signed) W. F. McCLURE, State Engineer. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Tuesday April 28, 1914, said bids then there to be publicly opened and read for furnishing all plant, materials, and labor, and doing the work required for the construction and erection of a building to be known as the Worker's Cottage—Female—at the Agnews State Hospital, Agnew, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Worker's

Cottage—Female—at the Agnews State Hospital, Agnew, California."
(Signed) W. F. McCLURE, State Engineer. (*)

PROPOSALS FOR CANAL WORK.

CANAL WORK.—Department of the Interior, U. S. Reclamation Service, Washington, D. C.—Sealed proposals will be received at the office of the U. S. reclamation service, Great Falls, Mont., until 2 o'clock p. m. April 15, 1914, for the construction of a portion of the St. Mary canal, St. Mary storage unit, Milk River project, Montana, involving about 500,000 cubic yards of excavation, 2,000 cubic yards of concrete, 13,000 square yards of paving, 760 cubic yards of rip-rap, and 8,500 cubic yards of puddling; the placing of about 185,000 pounds of steel reinforcement bars, and 332,000 feet, board measure, of lumber in wooden structures and the erecting of about 105,000 pounds of miscellaneous materials. The work is situated in the Blackfeet Indian Reservation.

PROPOSALS FOR SALE OF VESSELS.

SALE OF U. S. NAVAL VESSELS.—Sealed proposals will be received at the bureau of supplies and accounts, Navy Department, Washington, D. C., until 12 o'clock noon, May 14, 1914, when they will be publicly opened for the purchase of the following vessels: U. S. S. Manila, at navy yard, Alameda Island, Cal., appraised value \$10,000; U. S. S. Restless, at naval torpedo station, Newport, R. I., appraised value \$2,000. The Manila was torpedoed, and the Restless is the highest bidder and the Restless to the bidder offering the highest price above the appraised value. Forms of proposal and bond and instructions concerning the vessels and the terms and conditions of sale may be obtained upon application to the bureau of supplies and accounts, JOSEPHUS DANIELS, Secretary of the Navy.

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Tuesday, April 23rd, 1914, said bids then there to be publicly opened and read for furnishing all plant, materials, and labor and doing the work required for the construction and erection of a building to be known as Ward 25, Stockton State Hospital, Stockton, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work.

Cash, a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid.

A deposit of Ten (\$10.00) Dollars will be required on plans and specifications, the deposit to be returned immediately on the return of the plans and specifications to the State Department of Engineering at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope: "Proposals for Ward 25, at the Stockton State Hospital, Stockton, California."

(Signed) W. F. McCLURE, State Engineer. (*)

PROPOSALS FOR BUILDING.

BUILDING.—Department of the Interior, Office of Indian Affairs, Washington, D. C.—Sealed proposals plainly marked on the outside of the sealed envelope "Proposals for Additions to Brick Dormitory, Santa Fe Indian School, New Mexico," and addressed to the commissioner of Indian Affairs, Washington, D. C., will be received at the Indian Office until 2 o'clock p. m. April 18, 1914, and thereupon they will be opened for the construction of additions to girls' brick dormitory at the Santa Fe Indian School, New Mexico, in strict accordance with the plans, specifications and instructions to bid-

ders, which may be examined at the office of the paper or periodical in which this advertisement appears, the U. S. Indian Warehouse at San Francisco, Cal., and at the Santa Fe Indian School. For further information apply to the superintendent of the Santa Fe Indian School, Santa Fe, New Mexico. CATO SELLS, commissioner.

PROPOSALS FOR GRANITE OR LIMESTONE WORK.

PURSUANT to Resolution No. 7645 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for furnishing all the materials, labor and workmanship required in connection with the construction, erection and finish of—A: Granite Work and Setting, or B: Limestone Work and Setting for the Auditorium, located on Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council while in session, between 11 o'clock a. m. and 12 o'clock, Noon, Pacific Time, on the 13th day of April, 1914, in the room of the Council in the City Hall, 14th and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

The Contract for the furnishing of all the labor and materials entering into the construction, erection and finish of—A: Granite Work and Setting, or B: Limestone Work and Setting, all as indicated on the Plans and Drawings and as set forth in the specifications, is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner or architect, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor, to the entire satisfaction of the Commissioner of Public Works and the Council, on or before seventy-five (75) working days from and after the beginning of work.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise deliver and execute at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bond set out of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished by contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The said office of the Supervising Architects after March 17th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five (\$25.00) which deposit will be returned to the applicant when the said plans and drawings are in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will be furnished, provided the applicant pays the

cost of reproduction, such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted. Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City Clerk.

PROPOSALS FOR ARCHITECTURAL TERRAZZO COTTA WORK.

PURSUANT to Resolution No. 7643 N. S., passed March 16, 1914, the Council of the City of Oakland will receive bids for furnishing all the materials, labor and workmanship required in connection with the construction, erection and finish of the Architectural Terrazzo Work and Setting for the Auditorium, located on Twelfth street, between Fallon street and Lake Shore avenue, in the City of Oakland.

All proposals shall be made upon and conform to the requirements of the forms of proposals, prepared and furnished by the City, through the Supervising Architect, and shall be enclosed in sealed envelopes endorsed "Bid for Auditorium," addressed to the Council and deposited by the bidder, or his agent, with said Council, while in session, between 11 o'clock a. m. and 12 o'clock, Noon, Pacific Time, on the 13th day of April, 1914, in the room of the Council in the City Hall, 14th and Washington streets, Oakland, and at the expiration of the time named the bids will be opened, examined and publicly declared in open session of the Council.

All said materials, labor and workmanship is to consist of that required by, and be in accordance with the plans, drawings and specifications prepared therefor and on file in the office of John J. Donovan, Supervising Architect of the City of Oakland, to which said plans and specifications reference is hereby made.

The Contract for the furnishing of all the labor and materials entering into the construction, erection and completion of the Architectural Terrazzo Work and Setting, all as indicated on the Plans and Drawings and as set forth in the specifications is to be let or awarded as a separate contract.

The Contractor will be required to begin work within five (5) days from the execution of the contract, unless otherwise notified in writing by the owner or architect, and to fully complete the entire work in accordance with the requirements of the agreement, plans, drawings and specifications prepared therefor to the entire satisfaction of the Commissioner of Public Works and the Council, on or before seventy-five (75) working days from and after the beginning of work.

After the award and upon the execution of the agreement, the contractor shall at the same time execute to the City of Oakland and deliver to the Auditor a bond guaranteeing to the City the faithful performance of the contract, and in an amount equal to twenty-five per centum (25%) of the amount named in the agreement. He shall likewise execute and deliver at the same time another and separate bond to protect any and all persons performing labor upon or furnishing materials to be used upon the said work, and in an amount equal to fifty per centum (50%) of the amount named in said agreement.

A bond set out of the forms of proposal and of the required affidavits, agreement, bonds, acknowledgments and specifications will be furnished by contractors on demand at the office of the Supervising Architect of the City of Oakland, Security Bank Building, corner of 11th and Broadway. The said office of the Supervising Architects after March 17th, 1914, within a reasonable time after application, and upon a deposit of Twenty-five (\$25.00)

which deposit will be returned to the applicant when the said plans and drawings are returned to the Architect in good condition; one complete set of plans and drawings required for the work will be furnished each applicant; additional copies will, however, be furnished, provided the applicant pays the cost of reproduction. Such additional copies to be returned to the Architect together with the first set.

All information relative to the requirements for bidding, and all directions necessary to explain and make definite any of the provisions of the specifications or drawings will be given by the Supervising Architect upon application at his office.

The right is reserved to the Council in accordance with the provisions of the Charter of the City of Oakland, to reject any or all bids submitted.

Each bid shall bear the affidavit of the bidder as required by Section 126 of the Charter.

FRANK M. SMITH, City Clerk.

NOTICE TO CONTRACTORS.

NOTICE is hereby given that sealed bids will be received by the Board of Trustees of the Patterson Union High School, Patterson, Stanislaus County, California, on the 11th day of April, 1914, at 10 o'clock p. m., of the said day, for furnishing the labor and material to construct a new Union High School Building in said District, on the site provided for on the west side of line of 7th street bounded on the north by H street and on the south by J street.

The plans and specifications for the said proposed new Union High School Building are on file in the office of Dr. A. M. Field, Clerk of the above Board, in Patterson, California, and also in the office of Henry C. Smith, authorized architect, 755 Market street, San Francisco, California, where copies of same may be obtained by bidders on deposit of the sum of Twenty-five Dollars (\$25.00). Reference is hereby made to such plans and specifications for mode of bidding. Blank forms for bidding will be furnished by Clerk or architect upon application.

Each bid must be accompanied by a cash or certified check for ten per cent of the amount of the bid, said check or bond to be made payable to Dr. A. M. Field, Clerk of the Board of Trustees of the Patterson Union High School District. The Board reserves the right to reject any or all bids.

All general and particular bids allowed to retain the plans and specifications for six (6) consecutive days in which to prepare figures, bid arrangements and make payment of \$10.00 to retain same until opening of bids, which amount will be deducted from the deposit made of \$25.00 when the plans and specifications are returned.

DR. A. M. FIELD, Clerk.

CAD ELLIS,

President of the Board of Trustees of the Patterson Union High School District, Patterson, Stanislaus Co., California.

PROPOSALS FOR BUILDING.

OFFICE OF THE BOARD OF PUBLIC Works of the City and County of San Francisco.

Sealed proposals will be received at the Office of the Board of Public Works, at 2 o'clock p. m. and 3 o'clock p. m., on Wednesday, the 8th day of April, 1914, for doing the following work including the construction of the necessary labor and materials therefor, to wit:

The construction of the Central Fire Alarm Station, to be located in that portion of the square bounded by Laguna, Octavia and Turk streets and Golden Gate avenue.

Progressive payments will be made. Said work will be done in accordance with the specifications on file in the office of the Board of Public Works, to which reference is hereby made, and must be commenced within five (5) calendar days from the receipt of written notice from the Board of Public Works. The work must be completed within one hundred twenty (120) calendar days thereafter.

The amount of bond for faithful performance of contract has been fixed at \$12,500.00.

All proposals offered must be accom-

panied by a check certified by a responsible bank, payable to the order of the Clerk of the Supervisors, for an amount not less than ten per cent of the aggregate of the proposal.

Printed proposal forms will be furnished gratuitously upon application at the office of the Architect, and all proposals must be made upon such forms.

The Board of Public Works reserves the right to reject any and all bids. By order of the Board of Public Works, RICHARD J. CLINE, Secretary.

STATE OF CALIFORNIA,
DEPARTMENT OF ENGINEERING.

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS.

SEALED PROPOSALS will be received at the office of the California Highway Commission, 316 1/2 Post Street, Sacramento, Cal., until the time hereinafter noted, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, portions of State highways as follows:

Until 2 o'clock P. M., April 13, 1914

Solano County from Benicia to a point 2 1/2 miles south of Cordelia (11-Sol-1), about 9 miles in length, to be built of Portland cement concrete, Alameda County from Hayward to Yalle Vista School (IV-A-5-C), about 3.1 miles in length, to be built of Portland cement concrete.

Alameda County from Hayward to Oakland (IV-A-5-D), about 5.1 miles in length, to be surfaced with asphaltic concrete.

Kern County from the northerly county boundary to Dearborn (VI-Ker-1-2), about 12.4 miles in length, to be built of Portland cement concrete.

Ventura County from Sea Cliff to the westerly county boundary (VII-Ven-2-F & G), about 1.1 miles in length, to be built of Portland cement concrete. Plans may be seen, and forms of proposal, bond contract, and specifications may be obtained, at the said office and they may be seen at the offices of the Division Engineers of the Division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, and Los Angeles.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospectors is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work, etc. done.

The Department of Engineering reserves the right to reject any or all bids, or to accept the bid deemed for the best interests of the State.

CHARLES D. BLANEY,
NEWELL D. DARLINGTON,
CARL E. F. SISK,
California Highway Commission.
AUSTIN B. FLETCHER,
Highway Engineer.
WILSON F. ELLIS, Secretary.
Dated: March 13, 1914. (*)

NOTICE TO CONTRACTORS.

SEALED BIDS will be received by W. F. McClure, State Engineer, Capitol Building, Sacramento, California, up to and including 12 o'clock noon, Tuesday, April 21st, 1914, said bids to then and there to be publicly opened and read for furnishing all plant, materials and labor, and doing the work required for the construction and erection of the elevator work of the building known as the Female Building, at the Stockton State Hospital, Stockton, California, in accordance with the plans and specifications therefor, copies of which may be obtained on application to the State Department of Engineering, Sacramento, California.

Such bids will be received for the Entire Work, on a bidder's bond, or a certified check in the sum of ten per centum (10%) of the amount of the bid must accompany each bid. A deposit of Five Dollars (\$5.00) will be required on plans and specifications, the deposit to be returned immediately

on the return of the plans and specifications to the State Department of Engineering, at Sacramento, California, in good condition.

The State Department of Engineering reserves the right to reject any and all bids and to waive any informality in any bid received.

Plans dealing with certain localities like San Francisco, Los Angeles, Portland, Seattle, etc., will find all such items, commencing on this page, all carefully classified as to location. These same items are repeated in the fore part of the news department, under distinct headings, such as Banks, Churches, Hotels, etc.

SAN FRANCISCO.

RESIDENCE — 2 story and base, frame, \$4,500. San Francisco. Architect, none. Owner, J. M. Peters, 1010 Balboa Bldg., S. F. The dwelling has been designed for a seven-room house with bath, and will be erected on the east side of 20th avenue near California street. All interior finish will be of pine or redwood. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. Composition floors are specified for the bath room. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. Materials are now being purchased by the owner.

RESIDENCE — 2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, E. Glinley, 131 5th avenue, S. F. The dwelling will be erected on the east side of 15th avenue near Clement, and has been designed to contain six rooms and bath. Interior will be finished in pine with hardwood floors and beam ceilings. There will be furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story and base, frame, \$2,000. San Francisco. Architect, none. Owner, N. J. Nelson, 4278 23rd street, S. F. The dwelling will be erected on the north side of 17th street west of Cole, and has been designed for a six-room house with bath. Pine will be used for interior finish throughout. Some hardwood floors will be used. There will be a large open fire place in the living room. Mantel will be of tile. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster and rustic. Plans are complete and in the hands of the owner who will do the work by Day Labor. All materials are now being purchased.

RESIDENCE — 2 story, attic and base, frame, \$8,000. San Francisco. Architect, Joseph A. Leonard, 35 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling is to be erected at the southwest corner of Mercedes Way and Paloma avenue in the Ingleside Terraces, and will contain eight rooms, three baths and sleeping porch.

All bids must be addressed to W. F. McClure, State Engineer, Sacramento, California, and plainly marked on the envelope, "Proposals for Elevator Work, Stockton State Hospital, Stockton, California." (Signed) W. F. McClure, State Engineer. (*)

Interior finish will be largely of pine with some hardwood veneer and beam ceilings. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile and brick. Automatic water heaters will be installed. Tile will be used in the bath rooms and kitchen. Composition floors are specified in the bath rooms. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials are now being purchased by the architect.

RESIDENCE — 2 story and base, frame, \$4,000. San Francisco. Architect, Joseph A. Leonard, 35 Cerritos avenue, S. F. Owners, Urban Realty Co. The dwelling will be erected on De Soto avenue in Ingleside Terraces, and has been designed for a seven-room house with bath and sleeping porch. All interior finish will be of pine. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Both room will have composition floor and tile wainscot. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. The work will be done by Day Labor under the direction of the architect.

FOREIGN EXHIBIT BUILDING—Frame and plaster construction, \$60,000 to \$100,000. San Francisco. Architect G. J. Oakeshott, Service Bldg., S. F. Owners, Australia. Architect G. J. Oakeshott of Sydney, Australia, who is to be in charge of the Australian Exhibit Building to be erected at the Panama-Pacific International Exposition, arrived in this city Wednesday. The building will be similar to the other buildings erected by the various states and countries, and will be of frame and plaster construction, costing between \$60,000 and \$100,000. Mr. Oakeshott will make his headquarters at the Service Building temporarily.

EXHIBIT BUILDING—2 story, frame and plaster construction, \$100,000. San Francisco. Architects, Ward & Blohm, Alaska Commercial Bldg., S. F. Owners, German-American Societies. Preliminary plans have been completed and approved for a large exhibit building to be erected for the German-America Societies at the 1915 Exposition. The structure will contain space for exhibits, offices and reception rooms. Working drawings are now being completed and figures will shortly be called. Full particulars can be secured from the architects.

STATE EXHIBIT BUILDING — 2 story, frame and plaster. Cost not stated. San Francisco. Architect, Burdette, Service Bldg., S. F. Owners,

State of California. All architectural drawings for the California Building to be erected at the 1915 Exposition have been completed and structural drawings are 50 per cent complete. The plans are being drawn in the office of the Director of Works, Service Bldg.

FESTIVAL HALL—2 story and base, frame and plaster construction, \$214,000. San Francisco. Architect, Director of Works, Service Bldg., S. F. Owners, Panama-Pacific International Exposition Co. The three lowest figures submitted for the general construction of the Festival Palace for the Panama-Pacific International Exposition Co., were as follows: McLeran & Peterson, \$214,000; Strehlow, Freeze & Peterson, \$216,000; Connolly-Peterson, —. A contract will probably be awarded to McLeran & Peterson.

RESIDENCE—2 story and base, frame, \$6,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner's name withheld. The dwelling will be erected in Jordan Park and has been designed for an eight-room house with two baths. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater is specified. Bath rooms will have tile wainscot and composition floors. Beam ceilings will be used in the dining room and reception hall. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared.

RESIDENCE—2 story and base, frame, \$3,000. San Francisco. Architect, none. Owner, Theodore Gibson, 355 Fair Oaks street, S. F. The dwelling has been designed for a seven-room house and will be erected on Lincoln Way west of 25th avenue. Interior finish will be principally of pine with some elm panels and beam ceilings. Hardwood floors will be used in the living room, dining room and reception hall. Plans provide for open fire places and furnace heat. Mantels will be of tile or brick. Bath room will have tile wainscot and composition floor. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and the work will be done by Day Labor. All materials are now being purchased.

RESIDENCE—2 story and base, frame, \$2,400. San Francisco. Architect, none. Owner, John O'Donnell, 1543 Fell street, S. F. The dwelling, which has been designed for a six-room house, will be erected on the west side of 24th avenue north of Judah street. Interior will be finished in pine, redwood and some oak veneer. Hardwood floors are specified in the living and dining rooms. There will be a large open fire place and tile or brick mantel. Bath room and kitchen will have tile wainscot. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$15,000. San Francisco. Architect, Charles C. Frye, 20 Montgomery street, S. F. Owner, Mrs. Meyers. This dwelling has been mentioned here before when the architect was first com-

missioned to prepare plans. The house has been designed for a ten-room dwelling with three baths and sleeping porch, and will be erected on Pacific avenue. Interior will be finished in pine and hardwood with oak floors in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will have tile wainscot and composition floors. Automatic water heaters will be installed. Exterior of the building will be covered with cement plaster on metal lath. A clay tile roof will be used. Plans are being revised and new figures will shortly be called.

APARTMENT HOUSE—4 story and base, reinforced concrete, \$23,000. San Francisco. Architect, none. Owners, Kincanon Construction Co., 215 Montgomery street, S. F. The building will be erected on the south side of Ellis street west of Hyde, and will cover an area of 23 by 137½ feet. Interior will contain a total of sixteen suites arranged in two and three room apartments. Pine and elm will be used for interior trim. Plans provide for steam heat, an automatic elevator and hot water supply. All suites will have wall beds and private bath rooms. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor. Materials are now being purchased.

APARTMENT HOUSES—2, 3 story and base, frame, \$13,000 and \$10,000, respectively. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owners, Metropolis Investment Co. One of the buildings will be erected at the southwest corner of Jackson and Taylor streets and the other on the west line of Taylor street south of Jackson. Each building will contain six apartments of three and four rooms. Interiors will be finished in pine with some elm panels and beam ceilings. All suites will have private bath rooms and wall beds. Plans provide for steam heat and a hot water supply in each building. Bath rooms will have composition floors and tile wainscot. Entrances will be finished in tile and marble. Exteriors will be covered with cement plaster on metal lath, brick veneer bases and rustic. Plans are complete and owners will take figures at once.

APARTMENT HOUSE—2 story and base, frame. Cost not stated. San Francisco. Architect, John J. Foley, 46 Kearny street, S. F. Owner's name withheld. The building will be erected on Gough street, and has been designed for a four-room apartment building. Each apartment will contain four rooms and bath. Interior will be finished in pine and redwood with some oak floors. All suites will have private bath rooms and wall beds. Bath rooms will be finished in tile and will have composition floors. Plans provide for steam heat and a hot water system. Exterior of the building will be covered with rustic and shiplap. Plans are being prepared.

APARTMENT HOUSE—3 story and base, reinforced concrete, \$17,500. San Francisco. Architect, none. Owners, G. Kincanon Construction Co., 215 Montgomery street, S. F. The building will be erected on the east side of

Hyde street north of Eddy and will cover an area of 23 by 87½ feet. There will be a total of eleven suites of two and three rooms. Interior finish will be of pine and redwood with some elm panels and hardwood floors. There will be steam heat and a hot water supply. All suites will have private bath rooms and wall beds. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in tile and marble. Exterior of the building will be faced with cement plaster. Plans are complete and in the hands of the owners who will do the work by Day Labor.

HOTEL—23 story and base. Class A construction. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner, Fred C. Finkle. This building, designed to be the tallest hotel structure west of Chicago, will be erected at the northwest corner of Pine and Stockton streets. The basement and sub-basement will connect direct with the Stockton street tunnel. There will be a complete steel frame, concrete floors and hollow tile and metal lath and plaster interior partitions. The first eighteen stories will contain a total of 187 guest rooms, all of which will have private baths. Upper five floors will be devoted to observatory rooms, dance hall, banquet rooms and roof garden. Plans provide for steam heat, elevator service, vacuum cleaning and all other modern conveniences. The architects state that bids will be taken at once for the structural steel and that following the letting of this contract figures will be called for on the balance of the work. The building is to be completed by the opening of the exposition.

HOTEL AND STORES—7 story and base, brick and steel, \$17,000. San Francisco. Architects, Smith & Stewart, 244 Kearny street, S. F. Owner, A. O. Stewart. This is the second building to be erected by Mr. Stewart and designed by the same architects. The building will be erected on the north side of Ellis street east of Mason, and will have a frontage of 50 feet and a depth of 137½ feet. There will be two stores, offices and lobby on the first floor. Upper floors will contain 120 guest rooms, all of which will have private baths. Plans provide for steam heat, elevator service and a hot water system. Interior will be finished in pine and hardwoods with ornamental plaster and marble used in the office, entrance and lobby. All bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick trimmed with terra cotta. Plans are being prepared.

HOTEL—4 story and base, brick and steel, \$20,000. San Francisco. Architect, C. O. Clausen, Phelan Bldg., S. F. Owner, Edward Franks. The building will be erected on California street near Kearny, covering an area of 31 by 89½ feet. There will be a total of 42 guest rooms and a number of public and private baths. Interior finish will be of pine and redwood. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are complete and figures are being taken.

APARTMENT HOUSE—5 story and base, reinforced concrete. Cost not stated. San Francisco Architect, William Beasley, 127 Montgomery street, S. F. Owner, Mrs. Annie Gallagher. The building will be erected on the east side of Leavenworth street between Post and Geary, covering an area of 23 feet 11 inches by 69 feet 9 inches. There will be a total of ten suites of three rooms each. Interior finish will be of pine with some elm panels and oak floors. Each apartment will have wall beds and private bath rooms. Plans provide for steam heat, an automatic elevator, vacuum cleaning and a hot water system. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with white cement plaster. Plans are being prepared.

APARTMENT HOUSE—3 story and base, frame. Cost not stated. San Francisco. Architect, William Beasley, 127 Montgomery street, S. F. Owners, D. Coleman et al. The building will be erected at the southwest corner of Howard and Rausch streets, covering an area of 50 by 100 feet, and will contain a total of 60 rooms arranged in three and four room apartments with private baths. The interior of the building will be finished in pine throughout. All apartments will have wall beds. Plans provide for steam heat and a hot water supply. Bathrooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick veneer and cement plaster on metal lath. Plans are complete and figures will be called for at once.

APARTMENT HOUSE—7 story and base, steel and reinforced brick. Cost not stated. San Francisco. Architects, Rousseau & Rousseau, Monadnock Bldg., S. F. Owner's name withheld. The building will be erected on the north side of Bush street west of Stockton on a lot 40 by 90 feet. There will be a total of 36 suites of two rooms and bath each. Interiors will be handsomely finished in pine and hardwood veneer. Plans provide for steam heat, an automatic elevator, vacuum cleaning system and hot water supply. All bath rooms will have tile wainscot and composition floors. Wall beds will be installed. Entrance will be finished in tile and marble. Exterior of the building will be faced with pressed brick and terra cotta.

PIER—Concrete and timber pile construction, \$300,000. San Francisco. Engineer, Assistant State Engineer, Jerome Newman, Ferry Bldg., S. F. Owners, State of California. Plans submitted to the State Advisory Board at Sacramento by the San Francisco Harbor Commissioners for Pier No. 41 to be constructed on the San Francisco waterfront have been approved. Bids will be called for by the Harbor Commissioners at once. Further mention will be made of the work.

MACHINE SHOP EQUIPMENT—Cost not stated. San Francisco. Engineer City Department of Engineering. Temporary City Hall, S. F. Owners, City and County of San Francisco. Plans for the machinery equipment, which is to be installed at the Municipal Pipe Yards in San Francisco, have been completed and are now out for figures.

Bids will be opened on April 15th. Plans and specifications can be secured from the Board of Public Works.

FIREHOUSES—2 story and base, brick and steel, \$25,000. San Francisco. Architects, Ward & Blohme, Alaska Commercial Bldg., S. F. Owners, City and County of San Francisco. The building will be erected at the southwest corner of Drumm and Commercial streets and will be known as Engine House No. 12. Interior will be arranged for four pieces of apparatus, office and quarters for the crew. There will be steam heat, modern plumbing, special electric work and vacuum cleaning. First floor will be of cement. Pine and hardwood trim are specified. Bath rooms will be equipped with showers. Exterior of the building will be faced with pressed brick and terra cotta. Plans are complete and figures are being taken. Bids will be opened on April 15th. An official proposal appears in another column of this issue.

FLATS—2 story and base, frame, \$3,500. San Francisco. Architect, John F. Haner, 3576 19th street, S. F. Owner, Louise Cuneo. The building has been designed to contain two modern flats of five and six rooms with baths. The building will be erected on Baker street south of Filbert, covering an area of 25 by 33 feet. Interiors will be finished in pine throughout. There will be open fire places and tile mantels. Bath rooms will have composition floors and tile wainscot. Automatic water heaters will be installed. Exterior of the building will be covered with rustic. Plans are complete and the work will be done by Day Labor.

FLATS—2 story and base, frame, \$2,750. San Francisco. Architect, none. Owner, P. Prasso, 320 Lombard street, S. F. The building will be erected on the east side of Grant avenue north of Greenwich, and will contain two flats of six rooms each. Interiors will be finished in pine and redwood with some oak floors. Each living room will have an open fire place with tile mantel. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be covered with rustic and shiplap. Plans are complete and in the hands of the owner who will do the work by Day Labor.

AFFILIATED WOMEN'S CLUB—8 story and base. Class A construction. Cost not stated. San Francisco. Architects, Righetti & Headman, Phelan Bldg., S. F. Owners, Affiliated Women's Clubs of San Francisco. The organization has secured a site 137½ by 137½ feet on Sutter street between Mason and Taylor streets, and are now completing plans for financing a large Class A building. The architects have only prepared preliminary plans and details of the building cannot be given at this time. Further mention will be made of the work.

CITY HALL MARBLE WORK—Cost not stated. San Francisco. Architects, Bakewell & Brown, 251 Kearny street, S. F. Owners, City and County of San Francisco. The Board of Public Works has been instructed to advertise for bids for the marble work on the new City Hall. Bids are to be opened on April 29th. Plans can be secured from the City Department of Architecture, Temporary City Hall.

HOSPITAL—3 story and base, reinforced concrete, \$30,000. San Francisco. Architect, William C. Hayes, Foxcroft Bldg., S. F. Owners, Union Iron Works. The building will be erected on Pennsylvania between 18th and 19th streets, and will contain private rooms as well as wards. The structure will cover an area of 90 by 90 feet. Construction will be fireproof. Interior will be finished in pine with tile and white enamel. Plans provide for furnace heat and a vacuum cleaning system, elevator service and a modern operating room equipment. Exterior of the building will be faced with cement plaster. Plans are being prepared.

HOSPITAL WARD ADDITION—2 story, reinforced concrete, \$15,000. San Francisco. Architect, Constructing Quartermaster's Department, Fort Mason. Owners, United States Government. Pringle-Dunn & Co. submitted the lowest figure at \$11,683 for the new addition to the Letterman General Hospital at the Presidio. A complete list of bids, including the heating, plumbing, electric work and fixtures, will be found under the heading of San Francisco in this issue.

POST OFFICE—2 story, reinforced concrete, \$25,000. San Francisco. Architect, State Architect McDougall, Sacramento. Owners, State of California. The State will erect and lease a building to the government to be used as a new Ferry Post Office. The proposed structure will be erected just south of the Union Ferry Depot. Preliminary plans only have been prepared. The work will be carried on under the direction of the State Harbor Commission. Further mention will be made here when plans are advertised.

RAILROAD TRACK SPECIALS—Cost not stated. San Francisco. Owners, City and County of San Francisco. Specifications are complete for furnishing track specials to the Municipal Railroads under Section C of Contract No. 7. Bids will be opened on April 15th. Plans, specifications and full particulars can be secured from the Board of Public Works.

RESIDENCE—2 story and base, frame, \$3,500. San Francisco. Architect, none. Owner, D. J. Clancy, 2884 Folsom street, S. F. The dwelling has been designed for a six-room house, and will be erected on Anza street near 17th avenue. Interior finish will be of pine throughout with some hardwood floors in the living and dining room. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Tile wainscot will be used in the bath room and kitchen. An automatic water heater will be installed. Exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and in the hands of the owner who will do the work by Day Labor.

Contracts Awarded.

RAILROAD BUILDING GROUP—2 and 3 story, reinforced concrete. Cost not stated. Salt Lake City, Utah. Engineer, Santa Fe Engineering Department, L. A. Owners, Santa Fe Railroad Co., Contractors, Van Sant-Houghton Co., Hooker-Lent Bldg., S. F. Contract price not stated.

Letterman Hospital Gets New Ward.

Many Firms Submit Close Bids For Work at General Hospital in The Presidio Reservation.

Bids were opened by the Constructing Quartermaster's Office at Fort Mason for the construction of an additional hospital ward at the Letterman General Hospital at the Presidio. Separate bids were received for the general construction, plumbing, heating, electric work and electric fixtures. Pringle-Dunn & Co. submitted the lowest figure for the general construction at \$11,683 and will probably be awarded the contract. A complete list of all figures opened follows:

OAKLAND AND ALAMEDA COUNTY.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, J. W. Pischke, Acheson Bldg., Berkeley. Owner, Joel H. Hildegard. The dwelling will be erected in the northeast section of Berkeley and has been designed for a seven-room house with bath and sleeping porch. Interior will be finished in pine throughout. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room and kitchen will have tile wainscot. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared for the work.

RESIDENCE—2 story and base, frame, \$4,000. Oakland, Cal. Architect, none. Owner, F. T. Malley, 3001 Grove street, Oakland. The dwelling has been designed for a nine-room house with two baths, and will be erected on 42nd street. Interior finish will be of pine and redwood with some elm panels. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. Bath rooms will be finished in tile and will have composition floors. An automatic water heater will be installed. Exterior of the dwelling will be covered with rustic and cement plaster. Plans are complete and in the hands of the owner who will do the work by Day Labor.

RESIDENCE—2 story and base, frame, \$4,000. Berkeley, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, George F. Bell. The dwelling will be erected in Northbrae Tract, and has been designed to contain six rooms, bath and sleeping porch. Interior will be finished in pine and redwood with some hardwood floors and beam ceilings. There will be furnace heat and open fire places. Mantels will be of tile and brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. The exterior of the dwelling will be covered with cement plaster on metal lath. Plans are complete and figures are now being taken.

RESIDENCES—2, 2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, John Hudson Thomas, First National Bank Bldg., Berkeley. Owner, H. L. Johnson. These two houses will be erected in the Claremont Tract and each has been designed to contain seven rooms, bath and sleeping porch. Interiors will be finished in pine and redwood. Hardwood floors will be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. Automatic water heaters will be installed. There will be tile wainscot in the bath rooms and kitchens and composition floors in the baths. Exteriors will be covered with cement plaster on metal lath. Plans are being prepared.

RESIDENCE—2 story and base, frame, \$5,000. Berkeley, Alameda Co., Cal. Architect, Leonard H. Ford, 2125 Center street, Berkeley. Owner, Mrs. C. Alger. The dwelling will be erected

in Thousand Oaks Park, and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Oak floors and beam ceilings will also be used in the principal rooms. Plans provide for furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are now being prepared. Work will probably be done by Day Labor.

RESIDENCE—2 story and base, frame, \$6,500. Piedmont, Alameda Co., Cal. Architect, C. W. McCall, Central Bank Bldg., Oakland. Owner, Mr. Alberger. The dwelling will be erected near Piedmont Park and will contain eight rooms, two baths and sleeping porches. Interior finish will be of pine, redwood and hardwood. Oak and inlaid floors will be used in the principal rooms. There will be furnace heat and open fire places. Mantels will be of tile or brick. Bath rooms will have composition floors and tile wainscot. An automatic water heater will be installed. Exterior of the house will be covered with cement plaster on metal lath. Plans are nearly complete and figures will be called for shortly.

RESIDENCE—2 story and base, frame. Cost not stated. Berkeley, Alameda Co., Cal. Architect, Harris Allen, 2514 Hillegass avenue, Berkeley. Owner, J. W. McKibben. The dwelling will be erected on Piedmont avenue near Dwight Way and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be largely of pine. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater is specified. Bath room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

RESIDENCE—2 story and base, frame, \$3,000. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, R. A. McWilliam. The dwelling will be erected on Arroya street and has been designed for a seven-room house with bath and sleeping porch. Interior finish will be of pine and redwood. Hardwood floors will be used in the living room, dining room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile or brick. An automatic water heater will be installed. Bath room will have tile wainscot and composition floor. Exterior of the house will be finished with cement plaster on metal lath. Plans are being prepared and when complete the work will be done by Day Labor.

RESIDENCE—2 story and base, frame, \$3,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, P. Lindblad. The house will be erected on Grand avenue and will contain seven rooms and bath. Interior finish will be largely of pine with some hardwood veneer. Oak floors will be used in the dining room, living room and reception hall. There will be furnace heat and open fire places. Mantels will be of tile. An automatic water heater will be installed. Bath

room will have tile wainscot and composition floor. Exterior of the house will be covered with cement plaster on metal lath. Plans are complete and work will be done by Day Labor. All materials will be purchased by the architect.

APARTMENT HOUSE—2 story and base, frame, \$18,000. Oakland, Cal. Architects, Elite Planners 1844 5th avenue, Oakland. Owner's name withheld. The building will be erected on Grand avenue and has been designed to contain a total of twelve suites arranged in three rooms each. Interior finish will be of pine with some hardwood veneer and beam ceilings. Plans provide for steam heat and a hot water supply. All suites will have private baths and wall beds. Bath rooms will have composition floors and tile wainscot. Entrance will be finished in tile and marble. Exterior of the building will be covered with cement plaster on metal lath. Plans are being prepared. Further mention will be made of this work.

APARTMENT HOUSE—2 story and base, frame, \$10,000. Berkeley, Alameda Co., Cal. Architect, Julia Morgan, Merchants' Exchange Bldg., S. F. Owner, Mr. H. Merritt. The building has been designed to contain eight suites of three and four rooms and will be centrally located. Interior finish will be of pine and redwood with some hardwood floors and veneer. All apartments will have wall beds and private bath rooms. Plans provide for a central heating system and hot water supply. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be covered with cement plaster on metal lath. Plans are complete and figures are being taken.

CHURCH WIRING—Cost not stated. Oakland, Cal. Architect, G. Albert Langsbrough, 709 Mission street, S. F. Owners, First Hebrew Congregation of Oakland. Plans for the electric work in the new church building to be erected at the corner of 28th and Webster streets have been revised and new figures will be called for at once.

FIREHOUSES—3, 2 story and base, frame, \$5,000 each. Berkeley, Alameda Co., Cal. Architect, W. H. Ratcliff, Jr., First National Bank Bldg., Berkeley. Owners, City of Berkeley. Bids opened for this work were taken under advisement until the next meeting of the City Council. A complete list of the bids received will be found under the heading of Alameda County in this issue.

LODGE HALL—3 story and base. Class A construction, \$250,000. Oakland, Cal. Architect, A. J. Mazurette, Albany Bldg., Oakland. Owners, Oakland Moose Hall Association. This work was mentioned in last week's issue, but since then the announcement of the selection of a site has been made. The building will be erected on Telegraph avenue near 17th. Working drawings are being prepared. Further mention will be made of the work.

BUNGALOW—1 story and base, frame, \$2,500. Oakland, Cal. Architects, Elite Planners, 1844 5th avenue, Oakland. Owner, J. W. Baughman. The dwelling will be erected in the Temescal District, and has been designed by Day Labor.

SAN JOSE AND THE SANTA CLARA VALLEY

RESIDENCE—2 story, attic and base, frame and brick, \$75,000. Hillsborough, San Mateo Co., Cal. Architects, Bliss & Faville, Balboa Bldg., S. F. Owner, Mr. C. de Guigne. The dwelling has been designed for a large country house and will contain in the neighborhood of twenty rooms, several baths and sleeping porches. A garage, stables and other out-buildings are included in the work. Interior of the house will

be finished in pine and hardwoods. Hardwood and inlaid floors will be specified. There will be a central heating system, probably steam heat, open fire places, a vacuum cleaning system and automatic water heaters. Bath rooms will be equipped with showers. Exterior of the house, out-buildings and garage will be covered with cement plaster. Plans are complete and figures are being taken.

RESIDENCES—1 story and base, frame. Cost not stated. San Jose, Santa Clara Co., Cal. Architect, none. The following Day Labor jobs are reported as about to be started in San Jose: A. A. Fay, 1081 South 7th street, 1 story, frame cottage \$1500, and B. W. Loring, 100 North 1st street, frame garage, \$1000.

HOSPITAL BUILDINGS—2, 1 story, frame. Cost not stated. Agnews, Santa Clara Co., Cal. Architect, State Architect. McDougall, Sacramento. Owners, State of California. Two new buildings, one a Nurses' Home and the other a Female Workers' Cottage, are to be erected at the Agnews Asylum. Bids will be opened for the Workers' Cottage on April 28th and for the Nurses' Home on April 27th. Official proposals appear in another column of this issue.

RESERVOIR AND WATER SYSTEM—Cost not stated. Daly City, San Mateo Co., Cal. Engineer's name not given. Owners, Daly City. Plans have been received by the City Clerk for a reinforced concrete reservoir to be built as part of the town's new water system. Figures are now being taken on the work. Complete information can be secured from the City Clerk.

LOS ANGELES AND SOUTHERN CALIFORNIA.

APARTMENT HOUSE—3 story and base. Class C construction. Cost not stated. Los Angeles, Cal. Architect, Leonard L. Jones, Central Bank Bldg. L. A. Owner, Herman Guttersen. The building will be erected on West 10th street near Figueroa, covering an area of 69 by 125 feet. There will be seventy-five rooms arranged in two and three room apartments with wall beds and private baths. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service and a hot water supply. Bath rooms will have tile floors and wainscot. Entrance will be finished in marble and tile. Exterior of the building will be faced with pressed brick. Plans are complete and in the hands of the owner who is letting all contracts.

APARTMENT HOUSE—3 story and base, brick. Cost not stated. Los Angeles, Cal. Architect, E. S. Williamson, Styles Bldg. L. A. Owner, C. E. Lee. The building will be erected on Towne avenue near 5th street, and has been designed to contain 63 rooms which will be arranged in suites of two and three rooms with private baths. Interiors will be finished in pine with some hardwood veneer. Plans provide for steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Entrance will be finished in marble. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base, brick and steel. Cost not stated. Los Angeles, Cal. Architects, Architectural Designing Co, Grosse Bldg. L. A. Owner, Mr. Neely. The building

will cover an area of 50 by 150 feet and is to be erected on Hope street between 1st and 2nd streets. Interior will be arranged for 78 rooms. Apartments will be of the two and three room type with private baths. Pine and hardwood veneer will be used for trim. There will be steam heat and a hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—3 story and base. Class C construction. Cost not stated. Santa Monica, Los Angeles Co., Cal. Architect, Albert C. Martin, Higgins Bldg. L. A. Owner, Thomas Higgins. The building will be erected on a 75 by 100 foot lot located at the corner of 2nd and Arizona streets, and will contain 75 rooms arranged in two and three room apartments, besides a large lobby and amusement room. Interior finish will be of pine and hardwood veneer. There will be steam heat, an automatic elevator, hot water supply and vacuum cleaning system. All apartments will have wall beds and private bath rooms. Bath rooms will be finished in tile and will have composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

APARTMENT HOUSE—i story and base. Class C construction. \$35,000. Los Angeles, Cal. Architect, William Boslyshell, Wright and Callender Bldg. L. A. Owner, G. A. Wetlin. The building will be erected on West 21st street, covering an area of 60 by 167 feet. There will be a total of 70 rooms arranged in two and three room suites with private baths and wall beds. Interior finish will be of pine throughout. Plans provide for steam heat, elevator service, a vacuum cleaning plant and hot water supply. Bath rooms will have tile wainscot and composition floors. Exterior of the building will be faced with pressed brick. Plans are being prepared.

CHURCH—1 story and base, frame. \$25,000. Los Angeles, Cal. Architect, Robert H. Orr, Van Nuys Bldg. L. A. Owners, University Christian Church. The building will be erected at the corner of Santa Barbara and Buñolung streets, and will cover an area of 101 by 120 feet. The structure has been designed in the classic style with the exterior faced with veneer pressed brick. Interior will be arranged for a large auditorium and Sunday school rooms. Pine and ornamental plaster will be used in the auditorium. There will be a central heating system and modern ventilation. Plans are being prepared.

WAREHOUSE—3 story and base, reinforced concrete. Cost not stated. Santa Barbara, Santa Barbara Co., Cal. Architects, Mayberry & Parker, Pacific Electric Bldg. L. A. Owner, Homer N. Duffy. The building will be erected at the corner of Mason and Helena streets and will cover an area of 67 1/2 feet by 140 feet. Construction will be fireproof throughout with reinforced concrete walls, floors and roof slabs. Interior partitions will be of metal lath and plaster. Metal window sash and frames and fireproof doors are specified. A fireproof vault and elevator service will be installed. The building is designed to carry three additional stories. Exterior will be faced

with cement plaster. Plans are being prepared.

SCHOOLS—2, 1 story and base, reinforced hollow tile construction, \$75,000. Los Angeles, Cal. Architects, S. B. Marston and Garrett Van Pelt, Chamber of Commerce Bldg., L. A. Owners, Los Angeles Board of Education. A twelve-room building will be erected at Alamanda Park and a ten-room school at Altadena. Interiors will be finished in pine with maple floors in the class rooms. There will be central heating systems and modern school plumbing. Exterior will be faced with cement plaster. Plans are now being prepared.
